**MEMBERS OF THE BOARD OF DIRECTORS
OF THE
ROYAL COLLEGE OF DENTAL SURGEONS
OF ONTARIO**

District No. 1 — J. P. Coupland	Ottawa
District No. 2 — W. J. Langmaid	Oshawa
District No. 3 — M. V. J. Keenan	Sudbury
District No. 4 — R. E. Diprose	Toronto
District No. 5 — W. G. Bruce	Kincardine
District No. 6 — D. C. Stiles	London
District No. 7 — J. R. Hurton	Brantford
District No. 8 — A. H. Leckie	Hamilton
Faculty of Dentistry — J. D. Purves	Toronto
<i>Ex-Officio</i> — The Honourable the Minister of Health	
The Honourable the Minister of Education	

OFFICERS OF THE BOARD

President — M. V. J. Keenan

Vice-President — A. H. Leckie

Registrar-Secretary-Treasurer — Wesley J. Dunn

COMMITTEES

Executive — LECKIE, Stiles, Coupland, Bruce, Purves

Discipline — LECKIE, Hurton, Diprose, Stiles, Purves

Examiners and Petitions — PURVES, Diprose, Leckie

Government and Legislation — COUPLAND, Stiles, Langmaid

Clinics and Extension Lectures — PURVES, Hurton, Bruce

Finance — STILES, Coupland, Hurton

Public Relations — HURTON (power to add)

Dental Services — STILES, R. P. Lowery, D. B. McAdam, P. E. Willson,
W. H. Feasby

Property — LANGMAID, Diprose, W. G. Woods.

REPRESENTATIVES

Council, Faculty of Dentistry — Purves, Langmaid, Dunn

Senate, University of Toronto — Dunn

Dentists' Legal Protective Association — Diprose

National Dental Examining Board — Godfrey (Balance of term)

Canadian Dental Association — Keenan, Coupland, Leckie, W. G. McIntosh,
L. M. Grose

Workmen's Compensation Board — Hurton, Bruce

Faculty Library Committee — Dunn

American Association of Dental Examiners — Purves

Research Advisory Committee — Dunn

REPORT OF THE PAST-PRESIDENT

Fall Meeting

As this is the last meeting that I will act as your president, I would like to express my sincere appreciation for the co-operation I have had in this office from all the members of the board.

Some of the plans of previous boards as well as our new policies have culminated in the last two years, which has made the work of the various committees very arduous and the members are to be commended for their efforts.

First, I would like to mention the new Faculty of Dentistry Building. I'm sure the profession owes a debt of gratitude to Dean Ellis, the members of the faculty, and the various committees, who have contributed so much to the successful planning of this building. There is an opportunity and a duty for all the members of the College to use their influence to induce the right type of young men and women to enter our profession now that we have the proper facilities to train them.

It is felt that with larger graduating classes of Dental Surgeons and Dental Hygienists the acute shortage of dental personnel, especially in rural areas, will be alleviated.

It will be noted with satisfaction, that the welfare programme, on which the board has worked for so many years, will be implemented on January 1st, 1959. The members of the profession should familiarize themselves with the terms of the agreement entered into with the Department of Welfare of this province.

The co-operation received from the profession, with regards to the group liability insurance plan was a source of great satisfaction to your board. Authorities agree that this policy is the most practical type available, and the board urges the members of the College to study its benefits. One of the most important programmes of the board is the post payment plan to be administered by Canadian Dental Service Plans Incorporated, which will start to operate January 1st, 1959. The administrator, Mr. W. E. Jackson, through society meetings and personal contact has tried to reach every member of the College to explain the terms and operation of this plan. The board feels that through this service to the profession, many citizens of Ontario, through lack of immediate funds, have been unable to have dental health service rendered, will now be able to do so.

The board hopes through the operation of the post payment and the welfare plans to demonstrate that the profession is capable of administering plans for dental care service.

As the Canadian Dental Association requires the offices we occupy in the C.D.A. headquarters building, and in order to accommodate the above mentioned plans, the board was faced with the necessity of renting offices or purchasing property. It was felt that it was more economical to purchase than rent. The board purchased and remodeled 230 St. George St., Toronto and has since rented offices to the Ontario Dental Association and the Toronto Academy of Dentistry. The members of the College are urged to visit the new headquarters at the first opportunity.

PAST-PRESIDENT

In the past year there has been a slight decrease in the attendance of the extra-mural lectures. It is felt that these lectures raise the standard of service rendered to the citizens of Ontario and that Societies should be encouraged to take advantage of this board service.

The reports of the discipline committees over the past number of years will show the concern of the board in regard to illegal practice. It is felt, that with proper co-operation from the members of the College, this condition could be greatly reduced. Instances have been reported that lead us to believe that these illegal practitioners have occasionally been protected by our members. Another most frequent complaint by the patient is due to the lack of proper explanation of the service to be rendered and the results to be expected. This is especially true in regards to immediate dentures. The board feels that these numerous complaints do great damage to our public relations.

It has been a pleasure to work with our Secretary for the past two years. His efficiency and zeal in carrying out the policies of the board are to be commended and it is gratifying to know that on January 1st he will give his full time to the work of the board.

It is also a pleasure to acknowledge the loyalty of the staff.

ACTION

Adopted

Motion: THAT the Report of the President be received and adopted.

PRESENTATION OF GAVEL TO DR. BEBEE FROM THE IMMEDIATE PAST-PRESIDENT, DR. R. J. GODFREY:

"During the last meeting of the Board it has become the established custom for the immediate past president to perform a certain duty. It also offers one the opportunity to expound upon many of the attributes and the accomplishments of Board Members and to give a discourse on a variety of subjects.

During your terms of office on the Board and as its president, which I consider to be the highest honour in the gift of our profession, many important projects have been brought to fruition and others initiated which will have far-reaching effects and benefits to the public and to the dental profession. I submit that you can look upon these achievements with justifiable pride and satisfaction as will the retiring and continuing members of the Board.

You have now reached a stage in your life when you will look forward to more relaxation, indeed you are already, in some measure, experiencing the well-earned opportunity to do many things that seemed impossible whilst engaged in active practice. I will, however, suggest that often there is a boredom in too much ease. Many of us have been rather busy making a livelihood and sometimes the more important business of living a life is crowded into the background by our concern with immediate problems. Then we do begin to ease up we have acquired the notion that work is a burden to be discarded at the earliest opportunity, leaving us with leisure in which we find out how poorly equipped we are to use it. This I venture to say will not be a problem with which you will have to wrestle.

PAST-PRESIDENT

The gavel is the symbol of labour and all here will readily agree that you have laboured in the interests of the people and for the advancement of our profession over a considerable period of time and with good effect.

Your years of private service and public responsibility have brought you rewards that cannot be reckoned alone by monetary standards.

I am honoured to be the one to present to you your gavel which you have used to call unruly or loquacious members of the Board to order and to give the final authorization to actions of the Board which are recorded for posterity in our Proceedings."

REPORT ON BOARD ELECTIONS

In accordance with the provisions of the Dentistry Act of Ontario and the By-Laws of this College, an election of the Board of Directors for the Royal College of Dental Surgeons of Ontario was held from October to December, 1958.

On the 20th of October, nominations were called for by circular letter to each member of the College resident in Ontario on October 1st.

Valid nominations were received as follows:

- District No. 1 — Dr. J. P. Coupland, Ottawa
Dr. M. K. Davis, Kingston
Dr. D. A. R. McDougall, Ottawa
Dr. E. M. Wansbrough, Ottawa
- District No. 2 — Dr. W. J. Langmaid, Oshawa
- District No. 3 — Dr. M. V. J. Keenan, Sudbury
- District No. 4 — Dr. R. E. Diprose, Toronto
Dr. R. P. Lowery, Toronto
Dr. M. W. Roher, Toronto
- District No. 5 — Dr. W. G. Bruce, Kincardine
Dr. J. E. Peterson, Stratford
- District No. 6 — Dr. J. M. Garrett, Sarnia
Dr. D. C. Stiles, London
Dr. T. H. Wachna, Windsor
- District No. 7 — Dr. J. R. Hurton, Brantford
Dr. R. L. Scott, Brantford
- District No. 8 — Dr. D. G. Johnstone, Niagara Falls
Dr. A. H. Leckie, Hamilton

No valid nominations having been received for opposing candidates in Districts 2 and 3, the nominated candidates were declared elected by acclamation.

Elections were held in Districts 1, 4, 5, 6, 7 and 8.

On December 1st, ballots together with necessary instructions were mailed to all qualified electors in the Districts in which elections were being held. The officially appointed Scrutineers counted the ballots on December 10th and made report, herewith submitted, that the following were elected:

- District No. 1 — Dr. J. P. Coupland
- 4 — Dr. R. E. Diprose
- 5 — Dr. W. G. Bruce
- 6 — Dr. D. C. Stiles
- 7 — Dr. J. R. Hurton
- 8 — Dr. A. H. Leckie

A communication from the Secretary of the Faculty of Dentistry, University of Toronto, stated that at a regularly held meeting of the Faculty Council, Dr. James D. Purves was elected Representative to the Board by the said Faculty.

ELECTIONS

Therefore the duly-elected members of this Board of Directors for the ensuing biennial term are:—

- District No. 1 — Dr. J. P. Coupland, Ottawa
- 2 — Dr. W. J. Langmaid, Oshawa
- 3 — Dr. M. V. J. Keenan, Sudbury
- 4 — Dr. R. E. Diprose, Toronto
- 5 — Dr. W. G. Bruce, Kincardine
- 6 — Dr. D. C. Stiles, London
- 7 — Dr. J. R. Hurton, Brantford
- 8 — Dr. A. H. Leckie, Hamilton
- Faculty — Dr. J. D. Purves, Toronto

The ballots as sealed by the Scrutineers are herewith presented and should be disposed of by direction of the Board.

Wesley J. Dunn, D.D.S.,
Secretary.

SCRUTINEERS' REPORT ON ELECTIONS

District No. 1

Number of ballots received	216
Number of valid ballots	214
Number of invalid ballots	2
Reason for declaring ballots invalid:	
No validation slip	2
The 214 valid ballots were marked as follows:—	
For Dr. J. P. Coupland	132
For Dr. D. A. R. McDougall	21
For Dr. E. M. Wansbrough	61
Showing a majority of 71 for Dr. Coupland.	
Dr. Coupland is thereby declared elected.	

District No. 4

Number of ballots received	492
Number of valid ballots	488
Number of invalid ballots	4
Reason for declaring ballots invalid:	
No validation slips	2
Spoiled ballots	2
The 488 valid ballots were marked as follows:—	
For Dr. R. E. Diprose	225
For Dr. R. P. Lowery	180
For Dr. M. W. Roher	83
Showing a majority of 45 for Dr. Diprose.	
Dr. Diprose is thereby declared elected.	

District No. 5

Number of ballots received	82
Number of valid ballots	82
The 82 valid ballots were marked as follows:—	
For Dr. W. G. Bruce	45
For Dr. J. E. Peterson	37
Showing a majority of 8 for Dr. Bruce.	
Dr. Bruce is thereby declared elected.	

ELECTIONS

District No. 6

Number of ballots received	196
Number of valid ballots	196
The 196 valid ballots were marked as follows:—	
For Dr. J. M. Garrett	49
For Dr. D. C. Stiles	147
Showing a majority of 98 for Dr. Stiles.	
Dr. Stiles is thereby declared elected.	

District No. 7

Number of ballots received	118
Number of valid ballots	118
The 118 valid ballots were marked as follows:—	
For Dr. J. R. Hurton	82
For Dr. R. L. Scott	36
Showing a majority of 46 for Dr. Hurton.	
Dr. Hurton is thereby declared elected.	

District No. 8

Number of ballots received	212
Number of valid ballots	212
The 212 valid ballots were marked as follows:—	
For Dr. D. G. Johnstone	100
For Dr. A. H. Leckie	112
Showing a majority of 12 for Dr. Leckie.	
Dr. Leckie is thereby declared elected.	

SCRUTINEERS (Sgd.) R. S. Woollatt
(Sgd.) Colin C. Rous

Toronto, Ontario.
December 10th, 1958.

UNIVERSITY OF TORONTO

Faculty of Dentistry

Office of the Secretary

230 College Street,
Toronto 2-B, Canada.

Dr. W. J. Dunn,
Royal College of Dental Surgeons,
230 St. George Street,
Toronto 5, Ontario.

Dear Dr. Dunn,

I am pleased to inform you that at a meeting of Council held on Tuesday, September 30, 1958, Dr. J. D. Purves was elected to the post of representative to the Board of Directors, Royal College of Dental Surgeons of Ontario, for the period 1958/60.

Yours sincerely,
P. W. Millard (signed)
Secretary.

ACTION

Adopted

Motion: THAT the Report on Board Elections be received and adopted.

REPORT OF THE REGISTRAR-SECRETARY

It has been a sincere privilege to have been permitted to serve this Board, and, through the Board, the public and the profession during the past year. Several matters are herein presented for your consideration:

1. Hospital Relationship

On March 25th, 1959, Bill 98, An Act to Amend the Public Hospitals Act, 1957 received third reading in the Ontario Legislature and was deemed to have come into force on the 1st day of January, 1959.

The two sections having particular pertinence to the dental profession are as follows:

I (3) (q) "treatment" means the maintenance, observation, medical care and supervision and skilled nursing care of a patient and, if dental service is made available in a hospital by its board, includes the dental care and supervision of the patient.

IV Section 17 of The Public Hospitals Act, 1957 has been amended as follows:

17. Subject to any existing agreement relating thereto, every hospital receiving provincial aid shall provide such facilities for medical students and dental students as the regulations require.

This is a significant development in hospital legislation and marks the first break-through in this regard in Canada.

It now becomes necessary to effect amendments to the General Regulations which are made pursuant to the Act and, as well, to the Model By-laws of Public General Hospitals.

The Board previously developed "Suggested Permissive Legislation re Hospital Dental Services" (See Proceedings 1957-1958, pages 11 and 12). This material has been presented to the Ontario Hospital Services Commission and, as in principle, these proposals received the Commission's concurrence we have every reason to expect that our proposals should become a part of the General Regulations and the Model By-laws. Sustained effort will be made to encourage the Commission to develop regulations to meet the needs of the public and permit the profession to render its services in hospitals in accordance with such needs.

2. Group Liability Insurance Program

With a little less than one year's operation, it is already evident that the application of group principles which prompted the Board to sponsor a Liability Insurance Program are working effectively for the good of the profession. More has been achieved, probably, than we had any reason to expect.

Coverage for the current year has been extended for an additional two months without charge and coverage on renewal has been substantially increased at no additional cost.

Your Advisors, Dr. Russell A. Hugill and Dr. Ernest Rollaston and the secretary met with representatives of our Insurance Counsel, the Broker, and the Underwriter for the purpose of renegotiating the terms of the agreement in the light of the experience to that date.

REGISTRAR-SECRETARY

Over 900 Ontario dentists are sharing in the benefits of the plan and the claims' experience has been most favourable. Accordingly we were successful in obtaining the following amendments at no increase in premium rate:

1. Increase in single limit from \$25,000.00 to \$50,000.00 and a decrease in the previously somewhat unrealistic figure of \$150,000.00 aggregate to an aggregate of \$100,000.00. The presently applicable single limit of \$25,000.00 is considered too low by many dentists and the \$150,000.00 aggregate presupposes at least six claims against one dentist in one year which is almost inconceivable.
2. Addition of a \$1,000.00 Property Damage Cover. This coverage was initially offered at an additional premium of \$1.00 but was not incorporated at the time.

For the members participating in the plan prior to the above meeting on April 8th, there will be a two month's extension in the expiration date of their certificates without additional premium. It was agreed that mid-summer was a most inappropriate time to forward renewal notices to the profession.

It was proposed by the representatives of the Board that a participant be given the option of remitting a three years' premium at one time in accord with the usual formula of $2\frac{1}{2}$ times the annual premium. This proposal was not considered feasible because the plan has been in existence an insufficient time to permit the Global General Insurance Co., to establish a three year rate which would both protect the interests of the company and be desirable for the Insured. Just as in the first year of the plan the participants have benefitted through the "experience rating" a three year contract would preclude such favourable amendment.

On May 8, 1959 The Board received Endorsements #11 and #12 outlining the above amendments and these now form a part of the Policy No. 50150 which the Board holds. These endorsements become effective on October 1, 1959.

A full report has been developed for circulation to the profession. The report will document the additional benefits and will provide a notice of premium for those presently participating as well as an application form for those who have not yet joined the group.

3. Equipment Fund

The Board has made a most significant investment in major equipment which can be shared by all organizations renting accommodation in the Headquarters Building. These items are an addressing machine, postage meter, Gestetner, Thermo-fax copying machine, and an automatic stapler.

In order to maintain this equipment, replace it when necessary, and add equipment which may become essential for our purposes, it is proposed that an Equipment Fund be created.

To arrive at an equitable contribution by each participating organization a certain number of utilization units have been assigned. Admittedly, this apportionment is somewhat arbitrary but was based on a reasonable assessment of the possible utilization factor of each organization. The units, therefore, have been assigned as follows:

R.C.D.S. — 5 Units
D.S.P.I. — 5 Units
O.D.A. — 3 Units
Academy — 2 Units

The monthly depreciation on the equipment mentioned plus auxiliary furniture and fixtures required has been calculated to be \$71.00. Accordingly each organization has been asked to remit monthly amounts as follows:

R.C.D.S. —	\$24.00
D.S.P.I. —	\$24.00
O.D.A. —	\$14.00
Academy —	\$ 9.00

For this sum the R.C.D.S. will maintain all equipment, will keep mailing plates updated, and will perform all clerical procedures in respect to the postage meter.

All participating organizations have been contacted and each has expressed appreciation to the Board for the above proposal.

Upon ratification of this action each organization will be invoiced on the basis of the amounts above commencing with the fiscal year 1959-60. No charges have been made for the fiscal year to which this report pertains.

It cannot be over-stressed that good working equipment is essential to the efficient administration of offices with programs as extensive as those presently operable at Headquarters. This proposed Equipment Fund will make it possible to maintain our equipment without draining funds which have not been specifically designated for the purpose.

As a separate savings account is required and signing officers appointed, ratification of this proposal by the Board is necessary before activation is possible.

4. Staff Pension Plan

At the November 1958 meeting of the Board, approval was given for the institution of a pension plan for the members of the R.C.D.S. staff. Dr. R. P. Lowery and Dr. L. M. Grose were appointed Trustees. The general provisions of the Plan were approved by the Board following a meeting with Mr. J. T. Staddon, Administrator of the C.D.A. Pension-Assurance Plan and in two or three areas where the Board required amendments these, subsequently, received the concurrence of the Trustees.

The plan following the approval of its terms by the Solicitor of the Board was submitted to the Deputy-Minister, Department of National Revenue, Taxation Division, for approval. On April 29th, in a letter to the Royal College of Dental Surgeons the plan was approved and was made effective as of January 1, 1959.

The plan provides:

1. Employee contributions for future service benefits of 4% of annual earnings.
2. Employer contributions for future service benefits of 6% of participant's annual earnings.

It is a requirement that the annual premium be paid in advance and this sum has been forwarded to the Administrator. Pay roll deductions in accordance with their respective contributions are being made on behalf of the employees presently entitled to participate.

5. Pension Plan for Dental Hygienists, Nurses, or Assistants

As one of the problems in recruitment of auxiliary personnel appears to be the greater security offered by commercial organizations, it seems that the profession should give some consideration to the development of pension or superannuation plans for application respecting their office assistants. It is our belief that a substantial number of dentists practising in Ontario would like to have a contributory pension plan available for the benefit of their assistants. The difficulty of individual action has been that, in the main, employer-dentists have each only one assistant.

We have enquired of the Legal Department of the Department of National Revenue whether a plan could be established laying down basic rules respecting provision of pension, contributions, etc. and then allow

REGISTRAR-SECRETARY

the individual members to decide whether they wish to utilize it for the benefit of their staff. It would, obviously, not be possible to make participation compulsory for either existing or new staff, but without some such overall plan nothing will be done whether the dentist and his assistant would like it or not.

Basically any such plan would provide that the members of the profession who wished to contribute towards a pension for their staff would pay, perhaps 6% of salary, and the staff of such members would contribute 4%. It would be a money purchase plan, the contributions buying deferred annuities, possibly with the employee having the right to add life assurance, in which instance the employee would be responsible for all this portion which, of course, would not be deductible. Normal retirement date would be age 60 or 65 with some provision for earlier or later retirement.

The R.C.D.S. would, undoubtedly, be required to appoint members of the profession as Trustees.

It would be recommended in the plan that on withdrawal the employee would have the right to take cash, a paid-up policy, or continue the payments, in respect of the benefit secured by the employee's own contributions, and that vesting of employer's contributions would be immediate but that withdrawal benefit would be restricted to paid-up policy (subject to minimum requirement) or continuation contributions.

The Director of the Legal Branch of the Department has indicated that the general proposals outlined do not appear to conflict with the requirements of the Department in respect of Employee Pension Plans. No definite statement, however, can be rendered by the Department until the detailed provisions of such a plan have been submitted for review.

It would be required that the plan be centrally administered by Trustees or a Board or Committee, depending on the type of arrangements instituted. Such persons would be responsible for the reporting of payments out of the plan in accordance with the requirements of the Income Tax Act and Regulations.

If it were determined that a sufficiently large number of dentists were interested in participating in such a plan the introduction of such a scheme would undoubtedly prove an enhancement in obtaining and retaining assistants desiring to make this field of endeavour a life-time career.

6. Fluoridation

The present government policy on fluoridation should be well known. At the session of the Legislature recently prorogued the government chose not only not to introduce legislation to make it possible for communities who wished to institute the fluoridation procedure to do so but, in the words of the Minister of Health, it was the policy of the government "not to permit it." This policy extended even to those communities which experienced favourable plebiscites on the measure.

The government has appointed a Committee which has almost the authority of a Royal Commission and has, virtually, a limitless budget, to study the entire question and report on its findings from time to time. It should be realized that the Government in no way is committed to act upon the eventual recommendations of the committee. It would seem reasonable, however, that should the final report be favourable this would then create a persuasive influence on the government.

The committee will hold public hearings in the fall. It is axiomatic that the profession must be prepared to make effective presentation at such hearings.

Rather than dilute the efforts of those who might make contribution to such a Brief it would appear logical that one major presentation be prepared by the profession and that such a Brief be the very best that can be produced. This will entail much time and a great deal of effort.

As it seems likely that the responsibility for the development of such a Brief will evolve upon the Board it is suggested that appropriate action be taken forthwith in order that the profession may be well-prepared to present its case before the committee.

7. Recruitment

The subject of recruitment not only for the profession itself but for dental hygienists and dental nurses continues to be a matter of significant concern. Your secretary, on April 20th, attended a meeting as representative of the Board, convened by the U. of T. Dental Alumni Association. Those present included Dr. Murray Cornish representing the Alumni, Dr. J. G. Chalmers of the C.D.A., Dr. E. T. Guest of the O.D.A. and Dr. J. H. Johnson of the Faculty.

After a lengthy discussion it was agreed that the Alumni Association should attempt to develop an acceptable recruitment plan. This plan, if finances became a consideration of pertinence, could then be presented to the R.C.D.S. Board for possible financial support. It was also pointed out that any program organized provincially should be co-ordinated with any program the C.D.A. or any other dental organization might envision and develop.

At this meeting great stress was given to the belief that the most important agent of recruitment is the individual dentist himself. The motivation of members of the profession in this regard would appear to be a Board and an Association problem. It follows, then, that each elected and/or appointed officer of the O.D.A. or the R.C.D.S. should consider recruitment as a major area of concern in his contacts with the members whom he represents.

Your secretary has had the privilege of sharing in Career Day programs in three Secondary Schools during the past year.

8. Auxiliary Services

It is not usually germane within the Report of the Secretary to comment upon legislation in other provincial jurisdictions. However the day is past when the mythical provincial boundaries cannot be transgressed by persuasive precedents established in another province.

Bill 90, An Act Respecting the Dental Profession of Saskatchewan, recently enacted, is almost shocking in its interpretation.

The profession and members of the Saskatchewan Dental Technicians Association supported before the Law Amendments Committee an Act which was carefully prepared to meet the current needs of the public and the profession. Several "public denturists" opposed the Bill.

The original decision of the Law Amendments Committee was to hold over the Bill for one year and consider it in concert with a draft Bill to be submitted by the Saskatchewan Dental Technicians Association. When Bill 90 was referred back to the Committee drastic amendments were made and when the Bill returned to House it was passed and is now Law.

From the deletions to the definition of dentistry it would now appear that the Saskatchewan Legislature has opened the whole field of prosthetic dentistry to anyone who wishes to engage in it! Provided the patient obtains a certificate of oral health from a legally qualified medical practitioner or a member in good standing of The College of Dental Surgeons of Saskatchewan anyone — lawyer, truck driver, street-car conductor, barber, minister — may proceed to attempt to fabricate any appliance usually considered in the fields of crown and bridge and denture prosthesis.

The prescription clauses in the Act were entirely deleted.

It is difficult to find any rational explanation for the action by the Saskatchewan Legislature which perpetrates such a disservice on the

REGISTRAR-SECRETARY

public. While this legislation, at the moment, affects Saskatchewan, it is another stepping stone to be employed by those who wish to usurp the prerogatives which long years of higher education and training have conferred on the profession.

9. Insurance Benefits for Dental Services

The Ontario Society of Oral Surgeons is to be congratulated for its initiative in attempting to have certain dental services included in group sickness and accident plans. Significant progress can be recorded relative to the Plan in effect for the Teacher's Federation which now authorizes many oral surgical procedures.

The Life Insurance Companies through their Group Sickness and Accident Divisions have been loathe to extend, under existing premiums, benefits which now cover only general surgical and medical procedures.

The printed Surgical Schedules generally do not provide for the payment of surgical benefits except where surgery is performed by a physician or surgeon legally qualified to practise medicine. Some companies, however, have paid surgical benefits as provided in such printed Schedules of Operations whenever a dental surgeon treated a fractured jaw or removed a dental cyst or tumour. Some, although not provided for in the policy, have also allowed a small surgical benefit mainly limited to extraction of fractured teeth where the teeth were injured in an accident and where such surgery follows closely after such accidental injury.

One company with which we have been in contact states that under its Comprehensive Health Insurance or Major Medical Benefit Coverages, dental surgery is excluded by the policy. However, under the contracts surgical benefits have been allowed during the past several months where certain forms of dental surgery are required as a result of accidental injury. In these cases allowances are made for extractions required as the result of such accident and under the policies the company has made some allowance for the replacement of natural teeth by some acceptable prosthesis or prostheses providing such attention is given within a few months following such accidental injury.

It is obvious that considerations in this area are pertinent to the profession as a whole and not only to the Oral Surgeons. Accordingly it is suggested that a representative committee be appointed under the aegis of the Board to study and report on group sickness and accident plans as they relate to dentistry and offer direction to the profession in respect to how a broader recognition of dental services might be engendered.

10. Physicians Practising Dentistry

From time to time the office receives complaints in respect to some physicians practising certain aspects of dentistry.

Section 31 of The Dentistry Act states as follows:

"Nothing in this Act shall affect or interfere with the rights and privileges conferred upon legally qualified medical practitioners by the Medical Act . . ."

There is no definition of what constitutes the practice of medicine in the Medical Act but there is a definition of dentistry in The Dentistry Act that is appropriate to the scope of the professional activities practised by dentists. It, therefore, becomes a question of whether the practice of medicine in law includes the rendering of the services usually performed by dentists.

There has, apparently, been no binding statement by the Courts of Ontario as to what constitutes the practice of medicine. At the time of the reference made to the Court of Appeal in 1906 to determine the proper interpretation of what constitutes the practice of medicine the only concrete statement of any value was to the effect that the practice of medicine was not necessarily limited to the prescribing or use of drugs

and medicine, but that it might well extend to any method or course of treatment known to and practised by the medical profession, and that as medical science was not a static thing but subject to new concepts and practices, the question could not be determined in any abstract way or on any hypothetical basis but any case arising would have to be determined upon the specific facts of the case and the state of medical knowledge and practice at the time in question.

Legal opinion has been expressed that as the methods or practice followed by the dental profession are not in this day and age practised by the medical profession, the practice of dentistry as we know it and as it is defined in The Dentistry Act would not likely be considered as falling within the scope of the practice of medicine so that a person registered under The Medical Act but not under The Dentistry Act could not properly engage in the practice of dentistry as defined in The Dentistry Act.

This reasoning may well apply where non-surgical procedures are performed but if the services rendered by the medical practitioner are of a surgical character such services would be permissible through his registration under The Medical Act which, of course, extends to the practice of surgery.

The Board has received, at no time, complaint that any physician has engaged in prosthodontic or operative dentistry services. Allegations have been made that some patients have had teeth removed by medical practitioners in order to benefit under their P.S.I. coverage. Careful investigation has so far failed to reveal any corroboration for such allegations. P.S.I. benefits do not extend to any dental service whether performed either by physician or dentist. Therefore in order to receive a fee for such dental service the physician would have to falsify the account he submits to P.S.I. Such action would be viewed with serious concern by P.S.I. and steps would be taken by the medical profession to discipline such an offender.

It is likely that we shall experience a greater frequency of certain surgical procedures in and about the month being performed by certain medical practitioners. Several European graduates in both medicine and dentistry have been or will become registered under The Medical Act. Such persons, without evidence of graduation from an approved dental school, do not possess a registrable qualification under The Dentistry Act. A general gravitation to the field of Oral Surgery would appear almost inevitable.

11. Mediscope '59

Recently a representative group from the profession met with the Assistant-Secretary of the Ontario Medical Association, Dr. J. C. Allison, to discuss the possible participation of dentistry within the exposition, "Mediscope '59". Dean R. G. Ellis, represented the Faculty; Dr. J. G. Chalmers, the C.D.A.; Dr. E. T. Guest, the O.D.A.; Dr. M. G. Boyes and Dr. G. T. Mitton, the Dental Public Health Committee of the O.D.A.; and the secretary represented the Board.

Mediscope '59 is an almost overwhelmingly ambitious project being undertaken by the O.M.A. It will be a very large exposition to be held in the Queen Elizabeth Building of the C.N.E., and will run from October 12th through October 17th. An attendance of between 200,000 and 300,000 people is confidently expected.

There will be approximately 175 individual exhibits covering almost every phase of health care services. The O.M.A. through its various sections will create and develop a large preponderance of exhibits but pharmacy, nursing, occupational and physical therapy, lay medical organizations, and governmental health departments will provide exhibits as well. Continual motion picture showings will form an integral part of the exposition.

The purpose of Mediscope '59 is primarily to show the public the great progress in medicine and its allied sciences, to outline, to some extent, the role of government, provide some health education, and encourage students to consider the health sciences as possible careers.

The exposition will be free to the public and the commercial aspect has been excluded. Any company providing equipment or sponsoring an exhibit will be permitted only a very small uniformly lettered plaque.

The available space has been divided into areas 10 feet wide and 12 feet deep and the rental has been set for each of these areas at \$500.00. The sum includes all services including those of a display consultant plus an overall insurance coverage on the exhibits themselves.

It was the view of the group which met to discuss this matter that dentistry could hardly afford not to participate. Because, however, dentistry's exhibit would be relatively small in comparison to the 110 booths being utilized by the various sections of the O.M.A., it was our unanimous view that anything done in this regard would have to be of the very highest quality.

The group gave cursory consideration to exhibit content, to the financial problems involved, and to the relatively short time remaining and decided that the information obtained and the views of the group be relayed to the Boards of the O.D.A., and R.C.D.S., respectively, for further consideration.

12. General Anaesthesia

The secretary continues to find himself in the unenviable position of being the recipient on behalf of the Board of widely divergent viewpoints in respect to the subject of General Anaesthesia. The report of the Dean also indicates that this subject has been a matter of concern to him.

The Council on Dental Education for some time has been rendering concerned attention to the subject but the report of Council relative to General Anaesthesia presented to the 1958 C.D.A. Board of Governors Meeting was referred back to Council for further study. This report will again be presented to the C.D.A. Governors and its disposition, at this writing, is unknown.

It appears most likely, however, as only a few of the policy statements met with criticism last year that, at very least, the major portion of the report either as presented or amended will be approved by the C.D.A. Board.

Following the release of the C.D.A. policy it would seem pertinent for this Board to appoint a committee to give further study to the subject as it pertains to the profession in Ontario. It is suggested that the present situation is untenable and it is unquestionably the responsibility of this Board to give guidance to the profession and to our teaching institution.

13. Commercial Clinical Presentations

There has been a significant increase in the number of clinical presentations to the profession during the past year. Some direction from the Board is required for guidance in this matter.

Many years ago the Board found it necessary to exert its prerogatives conferred in The Dentistry Act relative to the presentation of material having an educational significance to the profession. Some highly questionable presentations made mandatory such action by the Board.

The dental supply industry has co-operated fully with the Board and appreciates the possible abuses if some measure of control is not exerted. Such control, however, is most difficult to exert. When does a presentation of one's products or services become a clinical demonstration having an educational context? That line of departure is almost

impossible for me to discern. What position, then, should the Board assume in respect to "presentations" by companies within the dental industry? A firm distributing golds and precision attachments conducted a clinic and discussion in Toronto on "The use of precision attachments in partial denture construction". A retail organization with a local outlet made the arrangements and provided information to interested dentists beyond that stated in the letter to the profession. Does such unauthorized presentation contravene the intent of The Act?

Lecturers, particularly in the field of practice administration, have addressed groups of dentists within the province and one firm makes the necessary arrangements on behalf of the lecturer. In this latter context we have requested that recognized dental societies sponsor such lectures but this has not eliminated the criticisms.

The secretary is anxious that all of our friends in the dental trade be treated alike and therefore seeks some policy direction from the Board in this regard.

14. Signs

By-Law No. 13 Section 1 (b) enunciates the regulations pertaining to signs employed in conjunction with the practice of dentistry. There is no mention made of the employment of the words "Dental Clinic" wherein dentists are proposing to employ terms such as "Parkdale Dental Clinic" or using the surname of the dentist "Jones Dental Clinic".

The By-Law is most explicit on the size of the letters which may be employed. Also a strict and technical interpretation of the By-law excludes from a sign anything other than the dentist's name, degrees, profession, certified specialty, if any, or if the entrance is difficult to locate the words "Entrance on . . .".

Obviously there are many precedents for the employment of the term "Clinic" but as our present regulations would appear to exclude such terminology some direction should emanate from the Board.

15. Changes in Register

On April 30, 1959, the number on the Active Register was as follows:

Annual Fee Paid	2301*	
Less deceased since paying fee	4	2297
Honorary Licenses issued	109	
Less deceased since issuance	1	108
		2405

*Including 10 who paid Reduced Fee.

The following changes in the list have occurred during the year:

Additions

Graduates of University of Toronto	67	
N.D.E.B. Certificates	4	
Board Examinations	12	
Resumed Licence	14	97

Deletions

Deceased (Hon. 8 - Act. 25 - Inact. 1)	34	
Retirements	10	
Did not renew '59 licence	7	
Temporarily Inactive	6	
Left Ontario	16	73

Increase over previous year	24
-----------------------------	----------

16. Dental Hygienists

On April 30, 1959, the number of Dental Hygienists on the Register was as follows:

Registered to date	37
Residing and Practising in Ontario	35

17. Licentiates Deceased — Honorary Members

Extramural and Extension Lectures

Appended to this report will be found a list of the Licentiates who died during the year ended April 30, 1959 — (Appendix A).

A list of Honorary Members is presented including the names of those proposed to be added this year — (Appendix B).

The report of the Extramural and Extension Service is presented — (Appendix C). Effort should be made to have some societies effect their plans earlier. Late requests place a burden on the Faculty member requested and do not permit the scheduling of typing and mailing the invitations to the Licentiates in the area in which the Lecture is being given.

Conclusion

It has been a privilege to represent the Board on the Council of the Faculty of Dentistry and share in the deliberations of the Library Committee, the Scholarship and Awards Committee, the Admission Committee, and the Research Advisory Committee. As the representative of the Board on the Senate of the University of Toronto opportunity is provided to serve on the Board of Dental Studies. Through this participation it is possible to view, at first hand, developments in dental education and express the viewpoint of this Board which has, under the Act, the responsibility of establishing the educational criteria to enable students to register in Ontario following successful completion of their University course.

I would be remiss if I did not acknowledge with appreciation the sincere and concerted efforts of our Staff during the past most difficult but most rewarding year. Certainly it was the most eventful year in the modern history of the R.C.D.S. Less than four years ago this Board employed a part-time secretary, one full-time secretarial assistant and a half-time inspector. Today the staff employed by the Board totals seven full-time employees, one part-time stenographer, a half-time inspector and resident caretakers.

It is a privilege for your secretary to be associated in this development and to have had the opportunity to work with members of the Board as they have conscientiously attempted to discharge the important responsibilities of the positions which have been entrusted to them by their confreres. We look forward to the next biennial term with even greater anticipation and enthusiasm.

LICENTIATES DECEASED

May 1st, 1958 to April 30th, 1959

	1923	Bayne, Robert John Beattie	Sarnia	July 5, 1958
*	1906	Becker, Frederick Charles	Toronto	Nov. 1958
	1915	Black, Herbert Ferguson Blair ..	Toronto	June 30, 1958
	1920	Box, Willard McConnell	Toronto	Oct. 8, 1958
	1927	Brookes, Arthur Frederick	Toronto	March 2, 1959
	1910	Brown, Roy Hugh	Sudbury	March 24, 1959
*	1904	Carruth, Robert Mills	Toronto	Aug. 1958
	1917	Clark, Roland McIntyre	Hamilton	March 10, 1959

Number of Lectures: 30.
Total Attendance: 921

ACTION

**Adopted
Motions:**

- (1) Whereas in view of the recent changes in the Public Hospitals Act and the new location of the Faculty of Dentistry, therefore be it resolved
 THAT this Board recommends to the Faculty of Dentistry that the undergraduate teaching in hospitals be augmented with the object in view that the students may become familiar with hospital routine and become fully appreciative of the advantages and responsibilities of caring for hospitalized patients.
- (2) THAT the Secretary be requested to forward a letter of appreciation to Dr. Russell A. Hugill and Dr. Ernest Rollaston for their efforts relative to the Group Liability Insurance Program.
- (3) THAT a separate Savings Account be established at the Bloor and Bedford Branch of the Royal Bank of Canada as an Equipment Fund with the President and the Treasurer appointed as its signing officers.
- (5) THAT a questionnaire be distributed to the registered dentists in Ontario to ascertain their interest in establishing a pension for their assistants.
- (6) THAT a Committee composed of Dr. L. A. Chute, Dr. L. F. Koyl, Prof. Jocelyn Rogers, Dr. Gordon Nikiforuk, Dr. K. J. Paynter, Dr. F. H. Compton, Dr. Robert Grainger and any necessary consultative and legal counsel be formed to prepare a Brief for presentation to the Committee appointed by the Ontario Government to study fluoridation and that the President and Secretary be given power to make substitution, if necessary, and that the sum of \$1,000.00 be budgeted for this purpose.
- (8) THAT the Secretary may communicate with the Saskatchewan Board to (1) offer our commiseration in their present legislative difficulties and to (2) offer assistance where possible and (3) any pertinent views of the Ontario Board relative to those areas of activity in Saskatchewan which have a possible relationship to the Ontario profession.
- (9) THAT the consideration of insurance benefits for dental services be referred to the Dental Services Committee and that the committee be requested to work with the Insurance Committee of the Ontario Society of Oral Surgeons to study this problem.
- (11) THAT this Board approve participation with the O.D.A., C.D.A., Faculty and any others in Mediscope '59 and for the purpose the budgetary allotment be \$500.00.

REGISTRAR-SECRETARY

- (12) Whereas this Board holds the opinion that certain procedures are accomplished best in the dental office with the use of general anaesthesia, and

Whereas these services have been rendered acceptably for many years by Licentiates of the R.C.D.S., therefore be it resolved

THAT this Board of Directors approves continuation of a course in General Anaesthesia in the undergraduate curriculum and further, in the Board's opinion this course should familiarize the student with some of the recognized techniques and is intended to provide a background for more intensive study at the post graduate level.

It would be expected to embrace:

- (a) Study of the properties and physiological action of various agents employed and equipment required.
 - (b) An opportunity to observe the administration of general anaesthesia.
 - (c) Some experience in operating under general anaesthesia.
 - (d) Instruction in dealing with emergencies which might arise, and further
- (b) THAT a committee be set up to give further study to the subject of General Anaesthesia as it pertains to the profession in Ontario and further that the committee consist of Drs. Coupland, Purves, Diprose, Stiles and Leckie.
- (13) THAT recognized dental society sponsorship be required when it is suggested that a lecturer be brought in by a commercial organization.
- (14) THAT the Secretary be instructed to inform anyone making inquiry respecting signs of the provisions of the By-law as they now exist.
- (17) THAT Honorary Membership in the Royal College of Dental Surgeons of Ontario be granted to the following who have commenced their fiftieth year in the practice of dentistry in Ontario — Doctors J. Durran, S. H. Hutt, M. L. Laidlaw, S. Lederman, A. C. McKenna, J. S. Strachan.

THAT the Report of the Registrar-Secretary be adopted.

TREASURER
WESLEY J. DUNN

REPORT OF THE TREASURER

It is a pleasure to report a surplus on the year's operations. However it must be remembered that this surplus is only possible when one considers the Accounts Receivable for Dental Service Plans Incorporated. These funds have been advanced from the General Account to D.S.P.I. and it is hoped that these amounts may be remitted in the reasonably near future.

Our Bond Reserves continue to remain constant although these Bonds are still hypothecated as collateral for the loan necessary to finance the purchase and alterations of Headquarters.

The General Expenditures for the year were almost exactly as budgeted one year ago and the Revenue was approximately \$2,000.00 in excess of that estimated.

In accordance with the regulations Notices of Annual Fee were mailed to the profession. On April 1st, the following remained unpaid and were entered into Division Court for collection:

1. Dr. H. G. M. Ayre, Rainy River
2. Dr. J. G. Dean, Toronto
3. Dr. D. D. Lloyd, Sarnia

The Auditors' report is attached and the appointment of Auditors for the ensuing year is necessary.

ACTION

Adopted THAT the Budget be received and adopted.

Motions:

That the Report of the Treasurer be received and adopted and that the firm of Thorne, Mulholland, Howson, and MacPherson be retained as Auditors for the next fiscal year.

AUDITORS' REPORT

We have examined the balance sheet of the Royal College of Dental Surgeons of Ontario as at April 30, 1959 and the statements of revenue and expenditure of the general account and the property fund and of receipts and disbursements for the Welfare Trust Fund and the Harry R. Abbott Memorial Library Fund for the year ended on that date.

In our opinion, the above balance sheet and accompanying statements of revenue and expenditure and receipts and disbursements present fairly the financial position of the College as at April 30, 1959 and the results of its operations for the year ended on that date.

REPORT — GOVERNMENT AND LEGISLATION COMMITTEE

1. L.D.S. and F.D.S.

Some two years ago this Board created a By-Law which now makes it possible for a dentist who is a graduate of a dental school of a British Commonwealth University, holding the Bachelor of Dental Surgery degree, to apply directly for licensing examination without fulfilling the previous regulation of completing one year in the Faculty of Dentistry of the University of Toronto. To date one member has been registered on the basis of this amendment.

Prior to the enactment of the By-Law, the B.D.S. holder and the candidate possessing the combination of Licentiate in Dental Surgery and the Fellowship in Dental Surgery of the Royal College of Surgeons were considered equally by the Faculty Admissions Committee for acceptance into the final year of the course.

Reasonably extensive investigations have been conducted during the intervening period with a view to the possible recognition of the combination of the Royal College of Surgeons' Licentiate and Fellowship qualifications.

The L.D.S., R.C.S., is a qualifying examination held by the Royal College of Surgeons. The necessary requirements are one Pre-dental year and four Dental years at one of the recognized U.K. dental schools. The B.D.S., is also a qualifying examination, but it is a University degree. It is six months' longer training than the L.D.S. and is therefore considered to be of a greater academic value than the L.D.S.

The F.D.S., R.C.S., is a higher examination, not a qualifying examination. Candidates must be over 25 years of age; must have qualified (either L.D.S., or B.D.S.) for so many years, and must have been on the staff of a hospital or teaching school or some similar institution. The examination is held in two parts, the Primary consisting of the basic sciences, and the Final requiring an advanced knowledge of all aspects of dentistry. There is a definite general agreement on the high standing of this examination. A candidate for the F.D.S. must, of necessity, have taken courses usually extending over a reasonably lengthy period of time.

In view of this information it would seem appropriate that we amend By-Law No. 10 Section 1 to make it possible for one who possesses both the L.D.S., R.C.S., and the F.D.S., R.C.S., to make application directly for licensing examination.

2. Dental Internship

By-Law No. 9 Section 1 does not presently make provision for dental internship for any other than graduates of "approved schools". In our interpretation "approved schools" refers to those which have been accredited by the Council on Dental Education of the Canadian Dental Association. Under the present By-Law, therefore, internship is not possible for the B.D.S. holder even though his qualification is a registrable one. If the L.D.S., F.D.S. qualification becomes registrable, internship would also be impossible without an appropriate By-Law amendment. It is recommended that this Section of our By-Laws be amended to provide internship for all who possess a registrable qualification in this province.

3. Dental Hygienists

Under the present regulations it would appear that a dental hygienist could perform her services for the patients of her employer not necessarily in the said employer's office. Under such circumstances one would have to question the degree of direction or control the dentist could exert. In order to avoid possible abuses it is suggested that By-Law No. 13, Sections 2 (h) & (i) be amended to require that the services of the dental hygienist be provided in the office of the dentist whose patient is receiving the dental hygienist's services.

4. Qualified Electors

Section 4 of By-Law No. 14 defines 'elector' as one who practises in an electoral district or if the elector has ceased to practise one who resides in the said electoral district. An elector is entitled to vote in Board Elections and to stand for and if elected, serve on the Board of Directors of the College.

Section 7 of the same By-Law is not consistent as it makes no mention of the elector who has ceased to practise but continues to reside in the district. An appropriate amendment to this section to overcome the obvious inconsistency is indicated.

5. By-Laws for Dental Hygienists

The By-Laws for Dental Hygienists were approved by the Lieutenant-Governor in Council on April 19th, 1951. No amendments have been effected since that date.

The action the Board must take, should it be desirous of amending these By-Laws, is to seek the approval of the Lieutenant-Governor in Council. The By-Laws respecting dental hygienists are effected pursuant to Section 12 of The Act whereas By-Laws relative to members of the profession are made under the authority of Section 11.

Section 11 provides that while the Lieutenant-Governor in Council may annul a By-Law of the Board, it is not incumbent upon the Board to seek prior authorization for the enactment of such By-Law.

By-Laws enacted pursuant to Section 12, however, do require the prior approval of the Lieutenant-Governor in Council.

There are two age-limit clauses contained in the By-Laws which are a source of concern:

By-Law No. 7 (a) requires that an applicant for admission to the course of study must have attained 18 years of age.

By-Law No. 12 1 (a) requires that an applicant for registration as a dental hygienist be 20 years of age.

It would appear that the Ontario grade XIII admission requirement sufficiently controls the age factor to justify the deletion of both these By-Law requirements. It is possible for a young lady to complete her grade XIII and not have attained her eighteenth birthday by the time registration in the Faculty is effected. Accordingly she will not have reached her twentieth birthday upon completion of her course and registration in the R.C.D.S.

It is recommended that the age clauses be deleted from the 'By-Laws for Dental Hygienists'.

M. V. J. Keenan

D. C. Stiles

W. J. Langmaid, Chairman

Wesley J. Dunn, Secretary

ACTION

Adopted WHEREAS it is the opinion of the Government and Legislation
Motions: Committee that an Education Register should be created to enable, if required, the registration of post-graduate students in dentistry, therefore be it resolved

THAT a limited licence permitting practice in a hospital or hospitals in Ontario may be granted to one who holds a degree or qualifications in dentistry adjudged acceptable by the Board and who is employed as an Interne or is engaged in post-graduate work in a public hospital approved under the Public Hospitals Act, and further

THAT the Examiners and Petitions Committee be required (1) to consider the suitability of each candidate applying for such registration and (2) to admit such candidate who, in the opinion of the committee, has qualifications entitling him to such registration and (3) to report to the Board at the next subsequent meeting of the Board, and further

THAT the fee for registration on the Educational Register be \$10.00.

THAT the Report of the Government and Legislation Committee be received and adopted.

BY-LAW NO. 90

ENACTED MAY 22nd, 1959

Being a By-Law to Amend By-Law No. 9 Section 1; By-Law No. 10 Section 1 g; By-Law No. 13 Section 2 (h) and (i) and By-Law No. 14 Section 7.

Be it enacted a By-Law of the Royal College of Dental Surgeons of Ontario as follows:

That By-Law No. 9, Section 1 be amended by the addition of "or any graduate of a dental school of a British Commonwealth University holding the degree of Bachelor of Dental Surgery or any dentist holding both the Licentiate in Dental Surgery and the Fellowship in Dental Surgery of the Royal College of Surgeons" following the word "school" in line one.

That By-Law No. 10 Section 1 g be amended by the addition of "or if the applicant holds both the Licentiate in Dental Surgery and the Fellowship in Dental Surgery of the Royal College of Surgeons" following the word "degree" in the said section.

That By-Law No. 13 Section 2 (h) and (i) be amended by the deletion of the fifth last word in each subsection, "a", and substitute in place thereof in each subsection the words, "the said".

That By-Law No. 14 Section 7 be amended by the addition of the words, "or, in the event of his cessation of practice, residing" following the word "practising" in the nomination paper.

BY-LAW NO. 91

ENACTED MAY 22nd, 1959

Being a By-Law to Amend By-Law No. 12, Section 4

Be it enacted a By-Law of the Royal College of Dental Surgeons of Ontario as follows:

That By-Law No. 12 be amended by deleting 1956 in line one and substituting in place thereof '1960' and by deleting "\$50.00" in the last line and substituting in place thereof '\$75.00'.

REPORT OF THE DENTAL SERVICES COMMITTEE

INTRODUCTION

On January 1st, 1959 two plans for dental care service were inaugurated in Ontario. The first is a Dental Welfare Plan in which approximately 20,000 children under sixteen years of age who qualify under the Mothers' and Dependent Children's Allowances Act of Ontario (1957) receive basic dental care through a contractual agreement effected between the Royal College of Dental Surgeons of Ontario and the Ontario Department of Public Welfare. (See pages 9 & 10, Proceedings 1957-'58.)

The second plan is a Post Payment Plan for dental services in which a patient may receive the dental treatment he requires when he needs it and pay for it on an extended basis. Both plans have been approved by the Board of Directors of the Royal College of Dental Surgeons of Ontario and are being administered by a federally incorporated body developed and controlled by the dental profession, Canadian Dental Service Plans Incorporated. The latter organization was established in consonance with the policy statement of the Canadian Dental Association on Group Dental Service Plans and, with the approval of the C.D.A. Board of Governors, a federal charter was obtained in order to permit D.S.P.I. to function interprovincially.

Following a statement on the purposes and objects of D.S.P.I. will be found a reasonably extensive documentation of the services of D.S.P.I. in Ontario and short statements respecting the relationship of D.S.P.I. to certain other provinces.

CANADIAN DENTAL SERVICE PLANS INCORPORATED

Extended negotiations resulted in the recording on March 11th, 1959 of a body corporate and politic without share capital under the name of Canadian Dental Service Plans Incorporated. The date of incorporation was effected retroactive to January 9, 1959. The purposes and objects of the corporation are:

- a) to promote the cause of dental health in the provinces of Canada by making available to the public a standardized, low-cost method of paying for dental service on a post-operative basis;
- b) to promote the cause of dental health by the dissemination of health literature and information.
- c) to establish, maintain and conduct facilities to accommodate the handling of dental accounts for members of the dental profession and generally to act as agent for members of the profession with respect thereto.

The business of the Corporation shall be carried on without pecuniary gain to its members and any profits on other accretions to the corporation shall be used in promoting its objects.

General Policy (See Appendix 'A')

Any province in Canada, the Provincial Body of which desires to have utilized in such province any service made available by the corporation shall be eligible to be a participating province. Each application by a province shall be considered and passed upon by the Board of Directors and the Board shall have the power to require as a condition of accepting any such application that the applicant participate propor-

DENTAL SERVICES

tionately in the financing of the corporation on such basis as the Board deems fair and equitable.

The affairs of the corporation shall be managed by a Board of Directors consisting of a minimum of two directors from each province which is currently a participating province. The Board shall not consist of less than five directors and three shall constitute a quorum. The selection and appointment of directors for each participating province shall be made by the Provincial Body of such provinces and the Provincial Body also has the power to remove such directors at any time. The directors initiate and promulgate the general plans and policies of the corporation. They may make such arrangements as they deem advisable with any Provincial Body or other organization or individual for the provision by such body, organization or individual of secretarial, administrative or other services upon such terms as to the Board shall seem proper.

In each participating province the Provincial Body of such province shall determine the manner and extent to which and the period during which facilities made available by the corporation may be introduced and utilized in such provinces provided that the corporation shall not be obliged to service or administer any such plans unless and until the directors of the corporation shall have determined that the servicing of such plan is practicable or after the directors shall have determined that continuation of the servicing of such plan is no longer practicable and except upon terms and conditions satisfactory to the directors of the corporation. Any participating provinces shall be free to withdraw from participation at any time on such terms as the directors deem fair and equitable.

On April 15th the first meeting of the Corporation took place in Toronto and the Royal College of Dental Surgeons of Ontario was accepted as a participating province and some 784 Ontario dentists were accepted into individual memberships.

The original Application for Incorporation was made by Doctors R. J. Godfrey, D. B. McAdam, R. P. Lowery, and Wesley J. Dunn and by Mr. Gordon Watson, Q.C. Dr. D. C. Stiles, Dr. P. E. Willson, and Dr. W. H. Feasby later assumed directorships having been appointed by the R.C.D.S. Board. Drs. Lowery and McAdam continued as Directors making a Board of five members.

Dr. D. C. Stiles and Dr. W. H. Feasby were elected president and vice-president, respectively, and Mr. W. E. Jackson was appointed secretary-treasurer of the Corporation.

PRESENT SERVICES PROVIDED BY D.S.P.I.

(a) D.S.P.I. IN ONTARIO.

D.S.P.I. administers two plans for dental care service — a Welfare Plan and a Post Payment Plan.

1. The Welfare Plan

On April 22, 1958 the Minister of Public Welfare on behalf of the Government of Ontario and the President and Secretary of the Royal College of Dental Surgeons of Ontario on behalf of the profession effected a contract in which the profession agrees to provide basic dental care to dependent children or dependent foster children under sixteen years of age who qualify within the meaning of the Mothers' and Dependent Children's Allowances Act of 1957. The basic dental care embraces fillings, extractions, posterior bite-wing radiographs and prophylaxes. The R.C.D.S. will receive each month, seventy cents for

DENTAL SERVICES

each child who is a beneficiary under the Act during the month. Approximately 20,000 children are presently eligible. It is the hope of the Dental Services Committee that further groups will be added as experience is gained both by the profession and the Department of Public Welfare.

The Department has furnished each qualifying mother with an identification card which contains her name and address as well as the names and dates of birth of her children. From this the dentist can determine the eligibility of the child.

Each dentist in Ontario has been supplied with a few chart forms on which he can record the pertinent information respecting an eligible patient for whom he wishes to undertake treatment. Following the caries' examination the dentist may then proceed, without authority, to render the care which the agreement permits. Should he go beyond the stipulated treatment or should he render service for an ineligible child then no responsibility rests with D.S.P.I. to remit fees for those services. The dentist is prohibited by law from rendering any other account or collecting payment from any other source for services he has provided under the agreement.

The Ontario Dental Association is possessed of a Schedule of Fees and this is employed in establishing the fees for treatment within the Plan. Accounts are at present being pro-rated — the dentist receiving 66 2/3% of the O.D.A. Fee. It is hoped that sufficient funds will remain to permit a further payment toward the end of the fiscal year.

The children concerned under this plan have been receiving no care at all, or in the main, individual members of the profession have been providing their services gratuitously.

Participation in Plan

Services under the Plan were very limited during the first month mainly because of the delay within the Department of Public Welfare in providing entitlement cards to beneficiaries. A report on the first third's activities then may be somewhat misleading because of the relative inactivity in January.

To the end of April 1959 dental treatment was provided as follows:

1. Number of children cared for	1,705
2. Restorations inserted	5,726
3. Extractions — anterior	171
— posterior	1,980

The present administrative charges have been assessed at 9% of the authorized fees. This figure, it is believed, is conservative, but greater experience will be necessary before the administrative overhead can be determined. It may be that a reduction in this percentage will be possible and thus release more funds for direct payment to dentists for services rendered.

STATEMENT OF RECEIPTS & EXPENDITURES

(1 Jan. '59 to 30 Apr. '59)

RECEIPTS:	Jan. 1st to Mar. 31st	\$42,759.50	
	April grant outstanding	<u>14,436.80</u>	\$57,196.30
EXPENDITURES:	Payments to dentist	\$29,206.00	
	Overhead	<u>2,628.54</u>	31,834.54
Actual Balance			<u>25,361.76</u>
Less: Holdback (33 1/3% reduction on			
Schedule of Fees)			<u>15,917.27</u>
	Free balance		<u>\$ 9,444.49</u>

****Note:** Does not make provision for accounts not submitted or in transit.

DENTAL SERVICES

It is significant that the expenditures made in April are greater than the income for the month. The retention of the 66 2/3% proration was made possible because in each of the preceding three months there was an excess of revenue over expenditure. It would appear that if participation in this Plan continues to increase there will be a greater demand than the revenue can bare and it would become necessary to pro rate dentists' accounts even more.

This may be offset in one or two ways:

- (1) Re negotiate with the Department of Welfare for an increase in the monthly grant of 70 cents.
- (2) Augment the Plan by having the Department of Public Welfare provide entitlements to other groups receiving social service assistance through the department.

On the basis of the relatively extensive experience of the Alberta Pensioners' Dental Treatment Service it is apparent that the demand within the Mothers' Allowance Dependents' group is approximately four times that of the Old Age Pensioners and the average cost per case varies little between the two groups.

For the months of January through April the average cost per case under this plan on the basis of the pro rated 66 2/3% was \$18.61.

Positive direction should come from this meeting relative to the procedure now to be followed.

Specific Treatment Policies

The Dental Services Committee, because of the limited financial resources, has found it necessary to establish certain policies relative to treatment authorized under the Plan. While the Committee fully realizes the inadequacy of the services available it nevertheless believes that the Plan represents a sincere attempt to provide the greatest amount of benefit to the largest number of beneficiaries.

The following, in brief, are the policies presently in effect:

1. **Traumatic Injuries** — Pulp protection and Rocky Mountain Crown. Authorized fee \$8.00. Any further care is the direct responsibility of the beneficiary.
2. **General Anaesthesia** — The dentist will select his own method of anaesthetization but the service rendered will be paid for on the basis of local anaesthesia being employed.
3. **Antibiotic Injections** — No fees are provided for injections of antibiotics.
4. **Prosthodontic, Crown and Bridge, Endodontic, or Orthodontic Services** — These services are the direct responsibility of the beneficiary to provide and do not form any part of the program.
5. **Payments to Patients, Faculty Clinic, School or Hospital Clinics** — This program was designed for the private practice facility and no payments are made to patients, Faculty Clinic, or School or Hospital Clinics.
6. **Radiographs** — Only posterior bite wings have been authorized. No fee will be remitted for peri-apical radiographs taken in conjunction with extraction. For this Welfare Plan it is considered that the authorized fee for extraction is sufficient to compensate the dentist making such a radiograph.
7. **Examination** — As caries' care is essentially all that can be provided under this Plan it was felt that no separate fee should apply for examination but that the fee for 'Caries Examination and Posterior Bite-wing Radiographs' should be \$5.00.
8. **Broken Appointments and Unco-operative Patients** — No fee is authorized for broken appointments or for a specific treatment service which has not been completed because of an unco-operative patient. These problems become the individual responsibility of the parent of the child.

When a future contract is negotiated with the Department strong

representation must be made to provide some means of caring for the youngster who through accident or neglect has had to lose permanent teeth. Where anterior teeth, particularly, are lost, severe aesthetic and emotional problems may result. When a child has become deprived of several posterior teeth adequate mastication is no longer possible.

2. The Post Payment Plan

On April 30, 1959 some 787 Ontario dentists were members in the Post Payment Plan. By this date two series of cheques were issued to dentists for whom payments had been received from patients participating in the plan. During this first four month period some 3,125 agreements were processed representing approximately \$342,370.00. Payments totalling \$58,101.64 have been made to participating dentists.

The plan works very simply. Each participating dentist is supplied with the agreement forms and explanatory literature. A wall plaque stating that the office is a member of the Canadian Dental Service Plans Incorporated Post Payment Plan is provided as well as a smaller edition of the plaque for use wherever the financial arrangements are discussed with the patient. Pamphlets also indicating the availability of such a plan and all pertinent details respecting it are provided for the reception room literature table.

After the examination has been performed, the case presentation made, and the estimate of cost given then either the dentist or assistant, whichever is preferred, discusses the financial arrangements to be made. If the account is not being paid in cash, then the patient is further acquainted with the deferred payment plan available and if this method is accepted the explanation concludes with the signing of the agreement. The agreement is then forwarded to D.S.P.I. from whence all further servicing of the account emanates.

The agreement arranged between the dentist and the patient may be as flexible as both parties mutually agree for it to be. The terms of agreement rest completely with the dentist and his patient and D.S.P.I. follows any payment plan stipulated in the agreement. There is neither a minimum nor a maximum amount which can be submitted. There is no minimum or maximum time over which the payments must be extended. These arrangements rest entirely with the dentist and his patient.

The cost of participation in the plan for both dentist and patient is modest. To the dentist there is a lifetime membership fee of \$35.00 plus 1% service charge on all amounts remitted. To the patient there is a basic service charge of \$1.00 plus 30 cents per month in each subsequent month the account is carried if the account is less than \$150.00. If the account is \$150.00 or more the basic \$1.00 charge remains the same but the monthly service charge is increased to 50 cents.

While, obviously, this plan is, as yet, not self-sustaining it is hoped that greater participation will be forthcoming. The Board of the R.C.D.S. has advanced considerable sums to create and, in the early days, sustain D.S.P.I. and the Post Payment Plan it administers.

The Treasurer of the Board has invoiced D.S.P.I. for furniture, fixtures, equipment and services to a total of \$17,349.22. It is hoped that the time will not be too far distant when D.S.P.I. will have discharged its financial indebtedness to the R.C.D.S. and will be entirely capable of meeting its own financial obligations.

(b) D.S.P.I. IN SASKATCHEWAN

The Post Payment Plan in Saskatchewan is administered through the Toronto office with all items being cleared through a Saskatoon post office box. At the present time there are 45 Saskatchewan dentists participating.

DENTAL SERVICES

(c) D.S.P.I. IN ALBERTA

The administrative arrangement in Alberta varies somewhat from the plan in Saskatchewan. The responsible committee of the Alberta Dental Association has extended the operations of the office of the A.D.A. to provide direct administrative services in that province. The plan is operated almost entirely through the Alberta office but the forms being employed are similar to those in use in Ontario and Saskatchewan.

Where patients in Alberta make payments to the banks, these amounts are forwarded by the banks to the branch of the bank holding D.S.P.I. accounts. The bank coupons are sent weekly by the Toronto office to the office in Edmonton and once each month the Toronto office issues a cheque for the total received to the Edmonton office.

Explanatory and promotional literature has been developed and produced by the Toronto office.

(d) D.S.P.I. IN NOVA SCOTIA AND NEW BRUNSWICK

Correspondence has been exchanged with both Nova Scotia and New Brunswick relative to the commencement of an operation in each province. These negotiations are insufficiently advanced to permit a further report at this time.

Respectfully submitted,

W. H. Feasby
R. P. Lowery
D. B. McAdam

P. E. Willson
D. C. Stiles, **Chairman**
Wesley J. Dunn, **Secretary**

ACTION

Adopted THAT the Dental Services Committee be empowered to adjust
Motions: the pro-rata allowance, if necessary, and to renegotiate the plan with the Government.

THAT the results of a special meeting of certain members of the Board held in December 1958 be adopted:

"Although the Directors of D.S.P.I. serve at the pleasure of the Board, the responsibility for the administration of the corporation rests with the directors of D.S.P.I. Thus the administrator, although actually being an employee of the R.C.D.S. is responsible, as far as the administration of D.S.P.I. is concerned, to the Directors of D.S.P.I."

THAT the Report of the Dental Services Committee be adopted.

CANADIAN DENTAL SERVICE PLANS INC.

MEMORANDUM OF AGREEMENT

1. We the undersigned do hereby severally covenant and agree, each with the other and each of them, to become incorporated under the provisions of Part II of the Companies Act as a corporation without share capital, under the name of Canadian Dental Service Plans Inc., or such other name as the Secretary of State may give to the corporation, for the purpose of carrying on in more than one Province of Canada, without pecuniary gain to its members, the objects following:

- (a) to promote the cause of dental health in Provinces of Canada by making available to the public a standardized, low-cost method of paying for dental service on a post-operative basis;
- (b) to promote the cause of dental health by dissemination of health literature and information;
- (c) to establish, maintain and conduct facilities to accommodate the handling of dental accounts for members of the dental profession, and generally to act as agent for members of the profession with respect thereto.

2. We the undersigned do further severally covenant and agree, each with the other and each of them, that the corporation shall be carried on without pecuniary gain to its members, and that any profits or other accretions to the corporation shall be used in promoting its objects.

3. The subscribers hereto shall be the first members of the corporation, and the corporation shall consist of the subscribers and of those who shall hereafter duly become members of the corporation in accordance with the By-Laws from time to time in force.

4. The first Directors of the corporation shall be as set out in the petition herein.

5. The following shall be the By-Laws of the corporation:

- (1) The name of the corporation shall be Canadian Dental Service Plans Inc.;
- (2) The head office of the corporation shall be at the City of Toronto in the Province of Ontario, and at such place therein as the Board of Directors shall from time to time determine;
- (3) The objects of the corporation shall be as set out in its Letters Patent of incorporation;
- (4) A seal embodying the corporate name of the corporation shall be the official seal of the corporation. It shall be kept in the custody of the Secretary-Treasurer and shall be authenticated by signatures of the President or Vice-President and the Secretary-Treasurer or Assistant Secretary-Treasurer on documents requiring to be executed by or on behalf of the corporation;
- (5) All funds of the corporation and any profits or other accretions to the corporation shall be used in promoting its objects, and the corporation shall be carried on without pecuniary gain to its members.

6. The duly constituted legal body which in any province of Canada is authorized to pass upon the qualifications and fitness to practise of dental practitioners in such province is hereinafter referred to as the Provincial Body for that province.

7. Every Provincial Body which desires to implement the utilization in its province of any facilities made available by the Corporation shall

DENTAL SERVICES

be eligible for membership in the Corporation. Membership in the Corporation by such a Provincial Body shall be known as Provincial Membership and any Provincial Body which has been accepted for membership in the Corporation shall, so long as it continues to be a member of the Corporation, be known as a Provincial Member and shall be referred to as the Provincial Member for the province in respect of which such Provincial Body is authorized to act. The province in respect of which any such Provincial Membership has been obtained shall, so long as such Provincial Membership continues, be known as a Participating Province.

8. All applications for Provincial Membership shall be made by the applicable Provincial Body and shall be in writing in the form prescribed by the Board of Directors of the Corporation (hereinafter referred to as the Board). Each such application shall be considered and passed upon by the Board and the Board shall have absolute and unqualified discretion to determine whether and when it will be in the interests of the Corporation to accept any such application and to designate the province concerned as a Participating Province. The Board shall have power to require, as a condition of accepting any such application, that the applicant participate proportionately with other Provincial Members in the financing of the Corporation on such basis as to the Board shall seem fair and equitable.

9. If and when the Board determines for any reason that it is no longer in the interest of the Corporation that the Membership of a Provincial Member and the designation as a Participating Province be continued, it shall notify the Provincial Member for such province in writing accordingly and thereafter the Membership in the Corporation of such Provincial Member shall terminate and the designation of such province as a Participating Province shall cease, provided that no such termination of membership and cessation of designation shall abrogate any contractual obligations existing between such Provincial Member and the Corporation except as provided in the contractual arrangements existing between them.

10. Any Provincial Member which desires to terminate its membership and withdraw from participation may do so at any time by notifying the Secretary-Treasurer in writing of such desire, provided that no such cessation of Provincial Membership or withdrawal from participation shall abrogate any contractual obligations existing between such Provincial Member and the Corporation except as provided in the contractual arrangements existing between them.

11. All Members in good standing of any Provincial Body which is a Provincial Member of the Corporation shall be eligible for individual membership in the Corporation. Individual members shall not be entitled to vote at meetings of the Corporation.

12. All applications for individual membership shall be in writing in the form prescribed by the Board and shall in the first instance be considered and passed upon by the Secretary-Treasurer of the Corporation. No applicant shall be rejected except for lack of eligibility or failure to file a prescribed application form and to pay the membership fee fixed by the Board. The decision of the Secretary-Treasurer on any such application shall be open to appeal to or review by the Board and the decision of the Board shall be final, provided that the Board may, at any time either affirm or alter its decision with respect to any application.

13. Any individual Member of the Corporation who ceased to be a Member in good standing of a Provincial Body shall ipso facto cease to be a Member of the Corporation.

14. Any individual Member who in the opinion of the Directors is guilty of violation of the By-Laws of the Corporation, or of failure to comply with regulations promulgated by the directors for promotion of the attainments of the objectives of the corporation, may be expelled from the Corporation by a majority vote of the Board.

15. Any individual Member who desires to terminate his Membership

and to withdraw from the Corporation may do so at any time by notifying the Secretary-Treasurer in writing of such desire.

16. The affairs of the Corporation shall be managed by a Board of Directors consisting of two directors from each Participating Province provided that at no time shall the Board consist of less than five directors. Three directors shall constitute a quorum of the Board for all purposes.

17. Each Provincial Member shall have the right to nominate two directors. Nominations shall be made in writing and be duly signed by an authorized officer of such Provincial Member, and filed with the Secretary-Treasurer of the Corporation on or before January 31st in the applicable year. Only persons so nominated shall be eligible to become directors of the Corporation, but this provision shall not apply to the interim filling of vacancies pursuant to Paragraph 18. Directors shall be elected from among the persons so nominated, at the annual meeting, by the persons present and entitled to vote thereat. The Provincial Member may at any time file with the Secretary notice requesting the removal of a director or directors nominated by it. Such notice shall be in writing duly signed by an authorized officer of such Provincial Member.

18. If at any time there shall exist a vacancy or vacancies in the minimum complement of 5 directors, the directors nominated by a Provincial Member or Members, who have been duly elected, shall have the right to elect any individual member of the Corporation to fill such vacancy or vacancies, until such time as directors duly nominated by Provincial Members in respect of each Participating Province have been duly elected in sufficient numbers to constitute the minimum complement.

19. A Director shall forthwith cease to hold office as a Director if:

- (a) he ceases to be eligible to be a Member of the Corporation;
- (b) he becomes of unsound mind;
- (c) he establishes residence outside the Participating Province he was appointed to represent;
- (d) the Provincial Member by which he was nominated files notice requesting his removal.
- (e) the Provincial Member by which he was nominated ceased to be a Member of the Corporation.

20. The directors shall manage the affairs of the Corporation and shall initiate and promulgate the plans and policies of the Corporation. The Directors shall have power to pay all expenses incurred in obtaining the incorporation of and in organizing of the Corporation and to make such arrangements as they may deem advisable with any Provincial Body or any other organization or individual for the provision by such body, organization or individual of secretarial, administrative or other services upon such terms as to the directors shall seem proper. The directors shall have power to borrow from any Participating Provincial Body which is willing to advance funds to the Corporation, or from any chartered bank, such funds or such portion of funds and upon such terms as the directors deem necessary or advisable for advancement of the objectives of the Corporation or the administration of its affairs and shall have power to repay such borrowed funds from time to time out of any funds of the Corporation available for the purpose.

21. The facilities provided by the Corporation which will be made available in any particular province at any time will be determined by the Board. The Provincial Body in each Participating Province shall determine the time when, the manner and extent to which, and the period during which the facilities which are so made available by the Corporation, shall be introduced and utilized in such province, provided that the Corporation shall not be obliged to provide facilities to service or administer any plan introduced or sponsored in any Participating Province by any Provincial Body unless and until the Board shall have determined that the servicing or administration of such plan is practicable, nor after

DENTAL SERVICES

the Board shall have determined that continuation of the servicing or administration of such plan is no longer practicable, nor except upon terms and conditions satisfactory to the Board. Any Provincial Body shall be free to discontinue at any time the utilization in its Participating Province of facilities made available by the Corporation on such reasonable terms as to the Board shall seem fair and equitable.

22. The Board shall elect from among its Members an Executive Committee consisting of three members who shall carry out all commitments made to it by the Directors. The Executive Committee shall meet at the call of its chairman who shall be selected by the Members of the Committee. A majority of the Members of the Committee shall constitute a quorum for the transaction of business.

23. Meetings of the Directors shall be convened by the Secretary from time to time at such convenient time and place as the President shall request. Notice of such meeting shall be given by telephone, telegraph or mail, dispatched not less than three days before the date of the meeting. Meetings may be held at any time without notice if all Directors are present, or if those absent waive notice.

24. The officers of the Corporation shall consist of a President and Vice-President elected by the Directors from among their own number, and a Secretary-Treasurer (and if desirable an Assistant Secretary-Treasurer) appointed by the Board who need not be a member of the Board. When so authorized by the Board, the Secretary-Treasurer may have and exercise the powers of a general manager of the affairs of the Corporation. All officers shall hold office during the pleasure of the Board and may be removed by a majority vote of the Board.

25. The President shall be the Chief Executive Officer of the Corporation. He shall have general supervision of the affairs and activities of the Corporation, either itself or through its officials, agents or committees; he shall preside at all meetings of members of the Corporation or of its Board of Directors; he shall sign all documents, agreements and contracts on behalf of the Corporation except routine documents which the Secretary-Treasurer may be authorized to execute on behalf of the Corporation.

26. The Vice-President shall perform the duties of the President in the absence of the latter, or during his inability to act.

27. The Secretary-Treasurer shall conduct correspondence; give notice of meetings to all persons entitled thereto, keep correct minutes of the proceedings of the Corporation, its directors and committees, and all necessary books of account and records; he shall render to the Board at regular meetings thereof and, whenever required of him, a report of the activities of the Corporation by him; an account of all his transactions as Treasurer, and the financial position of the Corporation; he shall deposit all monies and cheques to the credit of the Corporation in the bank or banks appointed by the Directors, and shall have authority to endorse all cheques payable to the Corporation for the purpose of depositing them in such bank to the credit of the Corporation; and shall have authority to disburse funds received by the Corporation in satisfaction of routine disbursements or payments authorized by the Directors. He shall discharge all duties assigned to him by the Board and when so authorized by the Board shall, subject to control by the Board, assume the duties and exercise the powers and title of general manager of the affairs of the Corporation and shall be paid such salary or other compensation as the Board may from time to time decide.

28. The Assistant Secretary (if any) shall perform the duties of the Secretary-Treasurer during his absence or inability to act, and shall also perform such duties as may be delegated to him from time to time by the Secretary or by the Board.

29. No salary or other remuneration shall be paid to any officer or Director of the Corporation other than the Secretary-Treasurer or

Assistant Secretary, but the Directors shall be entitled to award out of available funds of the Corporation, proper travelling expenses and other disbursements incurred with the approval of the Board in carrying out the affairs of the Corporation or the advancing of its objects. The Board shall have power to fix the remuneration to be paid for any clerical help or other employees or advisors of the Corporation.

30. The annual meeting of the Corporation shall be held on the first Monday in February each year, or on such other date as may be selected by the Board of Directors, and at such time and place as may be selected by the Board. Special meetings of the Corporation may be held at any time and place at the call of the President or of any three Directors. A quorum at a meeting shall consist of five members personally present.

31. Notice of meetings shall be given in writing and forwarded by prepaid mail, posted to each member in good standing, not less than seven days prior to the date of a meeting.

32. Each Provincial Member shall appoint two persons to represent it and to exercise its voting power at all meetings of the Corporation. Such appointment shall be in writing, signed by a duly authorized officer of the pertinent Provincial Member and filed with the Secretary of the Corporation, and shall continued in force until replaced by a subsequent appointment similarly signed and filed.

33. The President, or in his absence, the Vice-President, or in his absence, a Chairman selected by a majority of the Members entitled to vote who are represented at a meeting shall preside at meetings. Each Provincial Member shall be entitled to two votes, one exercisable by each of its duly appointed representatives, on all matters properly arising at such meetings. All questions shall be decided by a majority of votes and the Chairman shall be entitled to a casting vote.

34. At the annual meeting of the Corporation an auditor shall be appointed for the current year to examine and report upon the books and accounts and the financial affairs of the Corporation.

35. The annual report of the auditors shall be submitted at the annual meeting of the Corporation.

36. The fiscal year of the Corporation shall end on December 31st each year.

37. A bank account or accounts shall be opened and kept in such bank or banks as the Directors shall from time to time determine. When authorized by the Board to do so, the Secretary-Treasurer shall certify as By-Laws or Resolutions of the Corporation, By-Laws or Resolutions dealing with the carrying on of the Corporation's banking arrangements, in the forms which may be required by the Bank or banks so appointed, embodying such arrangements as the Board shall have approved. Cheques shall be signed by such person or persons as may be designated by the Board.

38. The Board of Directors may prescribe such rules and regulations not inconsistent with these By-Laws relating to the management and operation of the Corporation as they deem expedient, provided that such rules and regulations shall have force and effect only until the next annual meeting of the members of the Corporation when they shall be confirmed and in default of confirmation at each annual meeting of members shall at and from that time cease to have force and effect.

39. By-Laws may be enacted, altered, added to, amended or repealed by a majority vote of members in good standing, present at an annual meeting or at any special meeting regularly called for that purpose, provided that notice of such enactment, alteration, addition, amendment or repeal is specified in the notice calling such meeting, or is given in writing to all members qualified to attend and vote at such meeting. Such By-Laws, alterations, additions, amendments or repeals may be initiated by the Directors or by a member at any meeting so convened at which a quorum is present, provided nevertheless that the repeal or

DENTAL SERVICES

amendment of By-Laws not embodied in the Letters Patent shall not be enforced or acted upon until the approval of the Secretary of State has been obtained.

IN WITNESS WHEREOF we have hereunto set our hands and affixed our seals this 11th day of December, 1958.

WITNESS:

W. E. Jackson

R. J. Godfrey,
W. J. Dunn,
D. B. McAdam,
R. P. Lowery,
Gordon Watson.

REPORT OF THE DISCIPLINE COMMITTEE

The establishment of Mediations Committees by some of the local Dental Societies has relieved the Secretary of considerable correspondence.

However, since the last Annual Meeting of the Board in May, 1958, our Secretary has dealt with 28 written complaints regarding members of the profession.

These can be classified as follows:

1. One regarding a sign which did not comply with the regulations.
2. Three respecting advertisements inserted in newspaper or trade papers.
3. Eight in which patients claimed excessive fees had been charged.
4. Sixteen complaints of improper services being rendered.

The last two groups were mainly of the nature of misunderstandings between patient and dentist.

These have all been handled very capably and diplomatically by our Secretary, and when necessary a firm hand has been applied.

The most serious matter dealt with was at the November meeting when two dentists of the same community appeared before the Board to air their differences. It was felt that some good came from the meeting.

Recently there appeared in the week-end section of a number of papers in the Province, an article outlining a specialized service offered by a member of the profession. As this is the third article of a similar nature which had to be dealt with, it would seem that the Board should adopt some policy and the profession be advised as to the procedure to be followed.

R. P. Lowery
R. O. Winn
W. J. Langmaid
I. W. Hamilton
A. H. Leckie, Chairman

ACTION

Adopted THAT the Board reaffirms its policy with reference to a clearance and editing of all material for publication, TV or radio — unless such material be presented to and edited by a recognized dental society — be required for submission to the Board prior to being offered to the medium of concern.

THAT the Report of the Discipline Committee be adopted.

REPORT OF THE PROPERTY COMMITTEE

Fall Meeting

At this date, 230 St. George Street is almost ready for occupancy. The caretakers Mr. and Mrs. A. Backmann and their family are already ensconced in the apartment as the services have all been connected and the decoration is complete. It has been a source of real regret that the building was not completely ready for occupancy prior to the Fall Meeting of the Board. Your committee has done its best to maintain a vigorous and coercive oversight but certain contingencies were almost continually arising which retarded progress.

FINANCING

The entire purchase of the property including legal fees coincident thereto has been effected through the cash reserves of the Board. A portion of this cash became available through the sale of Government of Canada Bonds at the time of the Conversion. The following, therefore, represents the advances by the bank, the amount already repaid and the collateral security presently being held by the Royal Bank of Canada.

ADVANCES BY BANK

	Drawings	Repayments	Unpaid Bal.
June 2, 1958	25,000.00		25,000.00
July 29, 1958		20,475.40	4,524.60
Sept. 15, 1958	10,000.00		14,524.60
Nov. 5, 1958	10,000.00		24,524.60
Authorized maximum limit — \$50,000.00 (see collateral below).			
Accrued interest Oct. 22 — Nov. 20 inclusive —		82.09	
Interest paid June 2 — Oct. 21 inclusive —		298.55	
	Total interest	380.64	

Collateral Security Held by Royal Bank of Canada
At Its Bloor and Bedford Branch, Toronto

10,000.00 — Government of Canada	
Bonds — $3\frac{1}{4}\%$ due Oct. 1, 1979	
10,000.00 — Government of Canada	
Bonds — $4\frac{1}{2}\%$ due Sept. 1, 1983	
8,000.00 — Province of Ontario	Bonds — $2\frac{3}{4}\%$ due July 15, 1971
7,000.00 — Province of Ontario	Bonds — $2\frac{3}{4}\%$ due July 15, 1972
10,000.00 — Province of Ontario	Bonds — $2\frac{3}{4}\%$ due July 15, 1970
5,000.00 — Hydro-Electric Power	
Comm. of Ontario — $2\frac{3}{4}\%$ due April 1, 1964-67	

\$50,000.00

PROPERTY

A resolution is required covering the hypothecation of these bonds similar in form to the resolution covering the original Government of Canada bonds which the Board had converted.

It is unlikely that the Board will be required to borrow to the extent of the authorized maximum limit as the 1959 fees will soon augment the almost depleted bank balance. It is difficult at this time, however, to determine the specific amount of our loan which can be repaid during this fiscal year.

R. J. Godfrey
A. H. Leckie
R. P. Lowery
W. J. Langmaid, Chairman

ACTION

Adopted Motions: THAT the Secretary be and is hereby authorized to sell, at the most favourable price, which must be at least par, the Royal College of Dental Surgeons of Ontario owned \$20,000.00 Government of Canada bonds, 3%, due June 1st, 1960 and thereby reduce our bank indebtedness accordingly, and further

THAT the Secretary be and is hereby authorized to negotiate the conversion of the Royal College of Dental Surgeons of Ontario owned \$10,000.00 Government of Canada Bonds, 3%, due September 1st, 1966 to the 4½%, 25 year issue maturing September 1st, 1983.

THAT the President and Registrar-Secretary-Treasurer be and they are hereby authorized to deliver and transfer to the Royal Bank of Canada or its nominee, and hypothecate as collateral security for the indebtedness represented by the said notes the following securities which are the property of the College. 2 x \$5,000.00 — Government of Canada Bonds — 4½% due September 1st, 1983.

THAT the Report of the Property Committee be adopted.

Annual Meeting

During December 1958 the new offices of the Royal College of Dental Surgeons of Ontario were opened for occupancy. On January 24th, 1959 the Honourable Dr. M. B. Dymond, Minister of Health of the Province of Ontario, officially opened the Headquarters Building. His address was published in the Journal of the Canadian Dental Association, Volume 25, Number 3, March 1959, 162-166. The same issue carried a news report of the Opening Ceremonies as did the March 1959 issue of the Journal of the Ontario Dental Association.

The building is now being employed to capacity and in addition to the offices of the R.C.D.S., the Ontario Dental Association, the Academy of Dentistry, Toronto and Canadian Dental Service Plans Incorporated are utilizing space in the building on a rental basis.

The one-year guarantee period commenced on March 2nd and will terminate on March 1st, 1960. Final payment was made on March 2nd. All debts outstanding are consolidated and represented in the bank loan. There is no mortgage or other encumbrance against this property.

PROPERTY

The following is a breakdown of estimated and actual costs coincident with the property:

ESTIMATED COST

Purchase, legal, architectural, and contractors' fees,
furniture, and fixtures \$110,000.00

FUNDS EXPENDED TO APRIL 30, 1959

Purchase	69,923.26	
Legal Fees	778.00	
Architects' Fees	3,333.42	
Contractors' Fees (incl. Landscape)	29,103.53	112,132.91
Furniture and Fixtures	8,994.70	
		112,132.91
Cost over estimate	112,132.91	
	110,000.00	2,132.91
Less — Landscaping not in estimate	624.80	
— Sale of 5 Boardroom chairs	125.00	
		749.80
Net cost over estimate		1,383.11
Further estimated expense		
— Fencing, grading, tree removal		2,000.00

Borrowing Position on April 30, 1959

The following represents our borrowing position with the Royal Bank of Canada at 30th of April 1959.

	Drawings	Repayments	Unpaid Bal.
June 2, 1958	\$25,000.00		25,000.00
July 29, 1958		20,475.40	4,524.60
Sept. 15, 1958	10,000.00		14,524.60
Nov. 5, 1958	10,000.00		24,524.60
Nov. 24, 1958	10,000.00		34,524.60

The authorized maximum limit on our present Collateral Security is \$50,000.00 made up in the bonds which appear in the Report of the Treasurer.

Insurance

Recently an inventory of the furniture, fixtures and equipment owned by the R.C.D.S. and D.S.P.I. was prepared and this revealed a total value on these items of \$20,471.41. This figure is exclusive of stationery and other sundry supplies which could approximate \$5,000.00 in value.

The present insurance held by the Board in respect to building and contents is as follows:

1. London Guarantee and Accident Co. Ltd. fire & Extended Peril — Sum insured \$12,000.00 on the furniture, fixtures and equipment. Coverage 2nd January 1959 to 2nd January 1962. Premium \$70.80.
2. Sun Insurance — Fire & Extended peril — Sum insured \$40,000.00 on Building, \$5,000.00 on contents. Exp. March 15, 1960.

On the basis of the information contained above direction should come from the Board in respect to the amount of fire and extended peril insurance necessary. It will be noted that no Liability Insurance is presently owned by the Board and it is suggested that direction be given in this regard as well.

Parking Lot

No action has, as yet, been taken in respect to the parking lot. Permission has been received from the Headquarters Property Committee of the C.D.A. for the Board, at the Board's expense, to dismantle the fence separating the two properties and reconstruct it on the south boundary of the property. New fencing would be required across the foot of the lot. The large tree in the centre of the back lot would have to be removed and the property then graded and appropriately surfaced to correspond with the presently existing lot of the C.D.A. It is recommended that this matter be proceeded with as soon as possible as members attending meetings and several of our staff as well as our tenants are required to park their automobiles on the C.D.A. lot. The present condition of our wood fencing makes mandatory some improvement in that regard.

Budget

Although this Committee possesses no significant past experience to guide it in this matter it is proposed that a Budget be established in respect to the operation of the Headquarters Building. This proposed Budget is set out in Appendix 'A' to this report. Repayment of a portion of the Bank Loan has not been included in the Property Budget.

Conclusion

It has been a privilege for this Committee to have had the responsibility of creating a Headquarters Property which reflects the professional character of dentistry and which, already, has made possible greatly augmented services both to the profession and to the public.

R. P. Lowery
R. J. Godfrey
A. H. Leckie
W. J. Langmaid, Chairman
Wesley J. Dunn, Secretary

ACTION

Adopted THAT a comprehensive insurance be obtained covering building,
Motions: building contents, and liability on a basis of up to 80% of appraised value.

THAT improvements on the parking lot be proceeded with in keeping with the suggestions mentioned in the Property Committee Report.

THAT the Property Committee be requested to investigate air conditioning for the Board Room.

THAT the Report of the Property Committee be adopted.

REPORT OF THE EXAMINERS' AND PETITIONS COMMITTEE

Fall Meeting

The following is the report of the Board Examinations held November 19, 20, and 21. Three of the four candidates met all requirements established by the Committee.

I. Applications for Registration

(i) The Committee recommends that:

1. Frederick Allan, B.D.S. (U. of London, 1953), Final year student McGill University,
 2. Zygmunt Bejnarowicz, B.D.S. (U. of London, 1957), and
 3. Winston Mook Sang, D.D.S. (McGill, 1944)
- be granted their L.D.S. Certificates when all remaining regulations have been met.

(ii) The Committee further recommends that when Kenneth A. Best, B.S., D.D.S. (Meharry, 1952) meets all the requirements of this Board including a four week refresher course in Operative Dentistry, that he be passed and then he be granted his L.D.S. Certificate.

II. Application for Specialty Certification

The following having met the requirements of the Board for certification in Orthodontics is recommended for certification as a specialist in Orthodontics:

Stanley Rosenthal, D.D.S. (Tor., 1954) Dip. Orth. (Illinois, 1957).

R. P. Lowery
R. O. Winn
R. J. Godfrey, Chairman

ACTION

Adopted THAT the Report of the Examiners and Petitions Committee
Motion: be received and adopted.

EXAMINERS AND PETITIONS

Annual Meeting

The following is the report of the Board Examination held May 13, 14 and 15, 1959.

On the basis of the resolution adopted by the Board at the November 1958 meeting special examinations were conducted for Professor H. G. Poyton and Professor Egil Harvold of the Staff of the Faculty of Dentistry and both candidates were adjudged most satisfactory. Routine examinations were held for the remaining applicants and all obtained the necessary standing.

I. Application for Registration

The Committee recommends that:

1. A. R. Erwood, B.D.Sc. (Queensland) (D.D.S., Dal '59),
 2. V. J. Jindra, B.D.Sc. (W.Aust.),
 3. C. E. Kaye, (D.D.S., McG., '59),
 4. E. J. Paslawsky, (D.D.S., Det., '59),
 5. D. O. Patterson, D.D.S. (West. Reserv.),
 6. J. B. Recker, D.D.S. (Det., '59),
 7. C. J. Reece, B.Sc., D.D.S. (Det., '59),
 8. D. A. Santana, D.D.S. (McG., '59),
 9. H. G. Poyton, L.D.S., R.C.S. (Eng.), H.D.D., R.C.S. (Edin), F.D.S., R.C.S. (Eng.), and
 10. E. P. Harvold, Cand. Odont., Dr. Phil. (Oslo)
- be granted their Licentiate in Dental Surgery Certificates when all remaining regulations have been met.

II. Application for Specialty Certification

The following, having met the requirements of the Board for certification in Orthodontics are recommended for certification as specialists in Orthodontics:

1. Ross O. Fisk, D.D.S., (Tor.), M.S. (Mich.),
2. Kevin L. Hargadon, D.D.S. (McG.), Dip. Orth. (Col.) and
3. Albert Reinstein, D.D.S., (Tor.), M.Sc., (Northwest).

R. P. Lowery
R. O. Winn
R. J. Godfrey, Chairman

ACTION

Adopted THAT the Report of the Examiners and Petitions Committee be
Motions: received and adopted.

THAT when Matthias Huta fulfills the requirements of Student Registration he be granted his Licentiate in Dental Surgery.

THAT the Licentiate in Dental Surgery be granted to the following graduating students of the Faculty of Dentistry, University of Toronto, who have met the regulations of the Board:

EXAMINERS AND PETITIONS

Apse, Mrs. Ruta
 Aris, Bruce Elliot
 Bagworth, Donald George

THAT the following when they have met all the regulations of the Board be granted registration as Dental Hygienists:

Armstrong, Sonja Lynne
 Boucher, Marguerite Joy
 Campbell, Glenna Dawn
 Harwood, Kathryn Maureen
 Leslie, Elaine Anne
 Rask, Judith Arlene
 Thibault, Florence Evelyn

REPORT OF THE INSPECTOR

I have the honour to report for your information the following investigations and prosecutions from May 1, 1958 to April 30, 1959.

1. CANU, JOHN — 5 Hawthorne Road, Etobicoke.
He was charged with supplying a denture and on October 10, 1958 pleaded guilty before Magistrate N. Gianelli in Police Court, at Etobicoke, and was fined \$100.00 and \$4.00 costs or 30 days.
He was also charged with having equipment at his home. He pleaded guilty in the same Police Court, Etobicoke, and was fined \$100.00 or 30 days.
2. FREEDMAN, ARNOLD — 124 Harbord Street, Toronto.
He was charged with supplying a denture and on November 26, 1958 pleaded guilty before Magistrate Foster, E. Court, Toronto, and was fined \$100.00 or 30 days.
He was also charged with supplying another denture on August 16, 1958 and pleaded guilty in the same Court, November 26, 1958 and was fined \$100.00 or 30 days.
3. IRVINE, VICTOR — 23 Prospect Avenue, Kirkland Lake (Registered Technician).
He was charged with repairing a denture and on November 6, 1958 pleaded guilty before Magistrate E. W. Kenwick, Kirkland Lake and was fined \$100.00 and \$13.00 costs or 30 days.
4. SZEMERE, MIKLO — 1560 Bathurst Street, Toronto.
He was charged with filling teeth in Hamilton, Ontario, and on May 9, 1958, he pleaded guilty before Magistrate Hopkins in Hamilton, Ontario and he was fined \$50.00 or 30 days.
5. TUSTIN, FRANK — 121 Cleseti Drive, Scarborough.
He was charged with supplying a denture and on November 26, 1958 pleaded guilty before Magistrate Foster, E. Court, Toronto, and was fined \$100.00 or 30 days.
A charge of having equipment was withdrawn.
6. WEBSTER, THOMAS — 590 University Avenue, Windsor (Registered Technician).
He was charged with supplying a denture and on October 3, 1958 pleaded guilty before Magistrate McMillan, Windsor, and was fined for his second offence \$100.00 or 30 days.
He was also charged with having equipment and on October 3, 1958 pleaded guilty before Magistrate McMillan, Windsor, and was fined for his first offence under this section of the Act \$50.00.

Other investigations are presently proceeding.

Gavin A. Monahan,
Inspector

ACTION

Adopted THAT the Report of the Inspector be received and adopted.
Motion:

REPORT OF THE REPRESENTATIVE TO THE NATIONAL DENTAL EXAMINING BOARD OF CANADA

1. The annual meeting of the N.D.E.B. was held in Ottawa on June 22, 1958.
2. A new member of the Board is Dean J. D. McLean, representing the Council on Dental Education of the C.D.A., replacing Dean R. G. Ellis.
3. The secretary reported on a meeting of the National Board of Dental Examiners (U.S.) he attended in Chicago and informed the Board that the N.B.D.E. (U.S.) was desirous of some form of reciprocity between the two bodies. A committee was appointed to meet with a committee of the N.D.E.B. of Canada to discuss problems of mutual interest. Drs. J. D. McLean, A. G. Racey and R. J. Godfrey were appointed to a committee to meet with a similar committee of the N.B.D.E. of the U.S. for discussions.
4. The president was authorized to appoint a committee to study the question of oral examinations, and also to study the question of holding clinical examinations and to report at the next annual meeting. The matter of the N.D.E.B. conducting clinical examinations was proposed by Dr. Ross Upton on behalf of the College of Dental Surgeons of B.C.
5. The question of the acceptance of B.D.S. (Commonwealth) graduates who hold a D.D.S. degree, but have not completed four years of study in a dental school approved by the Council on Dental Education of the C.D.A., was again discussed. Your representative presented the motion and views of the Board of the R.C.D.S. of Ontario, but no change was made in this regulation. Some progress was made in that the secretary was instructed to obtain the opinions of the provincial Licensure Boards, and this matter will be placed on the agenda of the next annual meeting. Your representative would welcome a further statement from the R.C.D.S. Board to support the argument for the suggested amendment to the regulations and the possibility of conjoint examinations between the N.D.E.B. and the Faculties of Dentistry in Canada.
6. Any change in the enabling certificate was deferred until the question of the four-year regulation was disposed of.
7. The subject of Public Health Dentistry is to be included on the examination paper in Preventive Dentistry.
8. The dates of the annual examination for 1959 are June 1-4 inclusive,, and the annual meeting will be held in Ottawa on June 29th.
9. Dr. H. R. MacLean was re-elected president, Dr. H. M. Eaton was re-elected vice-president, and Drs. Racey, Hancock and Ball were elected to the executive committee. Dr. H. N. Beach was re-appointed as Registrar-Secretary-Treasurer.
10. Summaries of the 1958 examination results appear in appendices A and B of this report.
11. At the request of the Board, your representative agreed to serve until the completion of his term at the end of 1959.
12. The number of certificate holders is now in the neighborhood of 400.

Respectfully submitted,

R. J. Godfrey,
Representative to the N.D.E.B. of Canada.

ACTION

Adopted THAT the Report of the Representative to the National Dental
Motion: Examining Board of Canada be received and adopted.

REPORT OF THE REPRESENTATIVES TO THE CANADIAN DENTAL ASSOCIATION

Fall Meeting

The annual meeting of the Canadian Dental Association was held in Montreal from October 22nd to October 25th inclusive, and Ontario was represented by Doctors Keenan, Winn, McIntosh, Grose and Langmaid.

The surroundings were very spacious, as the meeting was held in the new Queen Elizabeth Hotel and both the management and the Quebec dentists did everything possible to make everyone comfortable.

In his opening address, Dr. Gerald Racey welcomed the new members of the Board and reported on his year in office. His general tone seemed to be one that prevailed through the entire meeting, that of being concerned with the tremendous problems which are facing our profession and the suggestion that more help would soon be required at headquarters if we are to meet those problems.

The Secretary, Dr. Gullett, reported that although the population had increased by 500,000 yet the number of dentists in Canada had only increased by 83.

In the Executive report, it was pointed out that one of our greatest problems is the need of training auxiliary (not ancillary) personnel and asked the Provincial Boards to study this matter carefully.

Dr. S. J. Phillips, Chairman of Finance, reported that our present budget would exhaust our finances and if further expenditure was anticipated, it would be necessary to increase the annual fees.

In the discussion on specialists and specialization, it was decided after considerable discussion to pass a resolution which called for the recognizing of Periodontics as a special branch of dental practice and Periodontists as specialists.

One of the more important items of business as far as this Board is concerned was the passing of a resolution to the effect that we be permitted to attempt to obtain a federal charter to allow the development of an organization which may function interprovincially to administer dental health care services.

In the report of the Auxiliary Services Committee, it was shown that this problem is as serious as ever and a great amount of time and money have been spent during the past year regarding this matter. The "denturists" of Alberta pay an annual fee of \$180.00 and the illegal labs of B.C. have raised a fund of \$36,000.00 to present their case to the B.C. Legislature.

One of the most difficult problems seemed to be that of the Council on Dental Education in coming to an agreement regarding the teaching necessary for students in the giving of general anaesthetics.

The Committee on Legislation was so concerned regarding our future that they presented a resolution which was passed unanimously, to the effect that the Executive give serious consideration to the employment of a person whose professional training would permit him to give positive guidance in this area of concern.

It was with regret that the Committee on Publications announced the resignation of the Editor of the Journal, Dr. Wes Dunn, but were happy to announce that they have been successful in securing Dr. Ed. Bilkey to take his place.

C.D.A.

These are just a few of the highlights of a four day meeting and your representatives suggest a careful study of the annual proceedings when they are presented.

The next annual meeting is in Halifax in June of 1959, at which time Dr. George M. Dewis of Halifax will preside as President. We would ask every member of this Board to attend if possible.

Respectfully submitted,

M. V. J. Keenan
R. O. Winn
L. M. Grose
W. G. McIntosh
W. J. Langmaid

ACTION

Adopted THAT the Report of the Representative to the Canadian Dental
Motion: Association be received and adopted.

REPORT OF THE DEAN

FACULTY OF DENTISTRY, UNIVERSITY OF TORONTO

The pressure arising from details associated with the new dental building have resulted in this report being more concise than in previous years. I am confident that the members of the Board will appreciate this statement.

Registration

The figures for the academic year 1958/59 are presented below for your information. The total, 450 students, compares with 428 in the previous session.

Pre-professional Year	98	
First Dental Year	89	
Second Dental Year	76	
Third Dental Year	79	
Fourth Dental Year	74	416
Occasional Students	5	
Dental Hygiene, First Year	5	
Dental Hygiene, Second Year	9	
Bachelor of Science in Dentistry,		
Postgraduate and Diploma Courses	15	Total: 450

Included in the total of 416 students registered in the undergraduate course, are 24 women.

The estimated enrollment in the undergraduate course for session 1959/60 is as follows:

Pre-professional Year	110	
First Dental Year	110	
Second Dental Year	100	
Third Dental Year	75	
Fourth Dental Year	85	Total: 480

making a total of 480. This figure represents an increase of approximately 60 in the undergraduate course over the present session, and is made possible by the increased facilities which will be available when these classes register late in September, 1959.

Our chief concern at the moment is whether there will be sufficient good applications to increase the Pre-professional and First Dental Years to the proposed numbers.

Recruitment of Students

On several occasions in the past I have urged this Board to consider seriously their responsibility in giving leadership in the recruitment of students for dentistry. At a recent meeting of the Executive Committee of the Faculty of Dentistry it was decided to urge this Board to join with the Faculty, the Dental Alumni Association, and any other groups concerned with this matter, in organizing a program of recruitment. We would request this Board to consider this matter and take some positive action at this meeting. We believe a program similar to the Extra-mural Lecture Program might be set up with a panel of two or three well chosen speakers available to answer requests for a

representative from dentistry to be present at Career Day sessions in the Collegiate Institutes of Ontario. Within the past few weeks Members of the Staff and the Secretary of this Board have addressed groups of students at the following Collegiate Institutes: Bloor, Downsview, Earl Haig, North View Heights, Leaside, Gordon Graydon Memorial, Winston Churchill and Blakelock (Oakville). In addition, the Deans office has provided material for members of the profession to use on similar occasions in centres outside Toronto as follows: Dr. J. R. Callingham, Ottawa; Dr. J. S. Christilaw, Hamilton; Dr. L. J. Kearney, Orillia; Dr. K. G. Miller, Sault Ste. Maries. We are sure that this does not exhaust the list of High School programs which have been addressed by dentists in recent months. We urge that some degree of uniformity is desirable in the presentations made to the High Schools, and this could best be done by a limited number of the more effective speakers available within the profession.

In addition to our efforts directed towards students for the regular undergraduate dental course, we should keep in mind both dental hygiene and dental nursing. After discussing this matter at some length with senior officials in the Department of Education, it was decided to make a direct approach to the principals and vocational guidance officers in all the Collegiate Institutes in Ontario. A list was obtained and a letter was directed to the secondary schools in February providing information on the dental hygiene course, and subsequently in April providing an announcement and information on the course in dental nursing. Since these items have been distributed the number of enquiries regarding both courses has increased greatly but it remains to be seen whether these will materialize into fully-documented applications.

Aptitude Tests

For some years the Council on Dental Education of the Canadian Dental Association has given consideration to the adaptation of the American Dental Association aptitude test for the Canadian students who seek admission to the dental schools in Canada. Consultation with representatives of the Research Division of the Ontario College of Education led to the suggestion that the A.D.A. tests were not entirely suitable for Canadian candidates, and that they would be pleased to collaborate with the Council and set up a series of tests which might be suitable for Canadian students. At the meeting of the Council held during February 1959, the establishment of a pilot study, to be set up at the University of Toronto, was approved. This study will be a joint project, bringing together representatives of the Ontario College of Education and the staff of the Faculty of Dentistry. Dr. R. M. Grainger was recently appointed by the Council of the Faculty to give leadership from our standpoint, and it is anticipated that an early start will be made on this pilot study.

Curriculum

A number of changes are contemplated in the curriculum during the next two years. In session 1959/60 oral anatomy will be discontinued as a separate course in the First Dental Year and integrated into the course known as gross anatomy. The number of hours of tooth carving will be greatly reduced and the emphasis will be placed on the recognition of teeth, the importance of various aspects of tooth surfaces, occlusion and function. The organic chemistry course will be commenced in the second term of the Pre-professional Year, and will be completed in the first term of the First Dental Year. This will permit the re-assignment of biochemistry in the second term of the First Dental Year. The course known as "Orientation to Clinical Practice", which introduces the student in his first year to the clinic, will be increased both in the First Dental Year and the Second Dental Year. After experimenting with this type of program during the past two years, we are now convinced

of its value as a motivating factor and a means of integrating the biological science courses with clinical practice. The pre-clinical operative technique course, given in the Second Dental Year, will be transferred from the laboratory bench to the facilities provided in the clinic. This will commence in September 1959. The headrest of the dental chair will be made readily interchangeable with the rod supporting a phantom head. The phantom head will be the receptacle for a removable dentoform provided with extracted teeth mounted and arranged in reasonably good anatomical order. Under these conditions the second year student will learn to prepare his earliest cavity preparation at the dental chair, using the same equipment and viewing arrangements as he will use on the patient later, and this includes the airtoror.

When these changes have been completed it will be possible in session 1960-61 to make adjustments in the second year timetable, the most important point being that pathology will be given in the second term of the second year rather than in the third year. This will permit an earlier introduction of the Third Year students to X-ray interpretation, oral diagnosis and treatment planning.

New Dental Building

It is now anticipated that the contractors will have completed their work on the new dental building by June 1st, 1959, which is approximately eight weeks ahead of schedule.

Contracts have been let for the built-in laboratory furnishings and equipment. The university authorities are determined to have the teaching and clinical areas ready for operation when the students report, about September 21st, for the opening of the 1959-60 session. We are pleased with their optimism, but still consider there is a possibility that full-scale operations may be curtailed at the outset.

Purchase orders have now been completed for 264 new dental units of various makes, 284 dental chairs, 284 operating lights, and 124 airtoror control units and 80 handpieces. The heavy equipment which will be transferred from 230 College Street is limited to 17 dental units, approximately the same number of chairs and a few lights. We have decided to embark upon a policy of providing the students with the majority of the clinical instruments on a rental basis. This will greatly reduce the student outlay of funds for instruments over the four-year period. Unfortunately an increase in tuition fees has been decided upon by the university, and this will offset the saving on instruments to a limited extent.

Staff

A year ago I reported that provision had been made in the 1958/59 appropriations to add three full-time staff members, bringing the total of full-time academic appointments to 17. Under this provision we welcomed as new members of the staff Dr. Egil P. Harvold from Norway, who was appointed professor and head of the Department of Orthodontics, and also Dr. H. Guy Poyton from London, England, as professor and head of the Department of Dental Radiology.

In preparation for the expanded program in the new dental building, provision has been made in the 1959/60 appropriations for the addition of the following members of staff in the academic category: 4 full-time appointments; 1 half-time appointment; 3 full-time equivalents on a part-time basis. Provision has also been made for an increased number of staff nurses, technicians and secretary-stenographers.

General Anaesthesia

The Council on Dental Education of the Canadian Dental Association has had under consideration for the past eighteen months a report of one of its sub-committees on the teaching of general anaesthesia both at the undergraduate and graduate level. The first report of the Council to the Board of Governors of the Canadian Dental Association was returned to the Council for further study. A second report will be presented at the next meeting of the Board of Governors of the Canadian Dental Association. It is evident from the discussion which has taken place during the past eighteen months in respect to this subject that there is a wide divergence of opinion as to the teaching of general anaesthesia to undergraduate students. If general anaesthesia is to be practised by the dental profession in Ontario, than the undergraduate students should be taught to administer general anaesthesia for dental purposes. In view of the divergence of opinion on this point, this Board should give consideration to the matter so that the Faculty policy in respect to teaching general anaesthesia could be clarified.

Licensure of B.D.S. Holders

The admission of B.D.S. holders (British Commonwealth) to the Board's licensing examinations has created one problem which also needs clarification. On a recent occasion a successful candidate at the Board's examinations applied thereafter for admission to the final year of the regular undergraduate course leading to the D.D.S. degree. The Faculty Admissions Committee recommended to the Faculty Council that such an applicant should not be considered for advanced standing in the regular undergraduate course. The view was taken that this candidate had already completed the requirements for the licence to practise dentistry, and that the chief function of B.D.S. holders proceeding through the final year of the course leading to the D.D.S. degree was to obtain the necessary registrable qualification. It was thought that if we permitted dentists licensed to practise in the Province of Ontario to register in the undergraduate course, we could then be faced with undergraduate students in this category practising dentistry while they were taking the course. A similar case has arisen in the last few weeks, and the Faculty would appreciate the advice of this Board on this difficult matter.

Extra-mural Lectures

As in the past an extensive program of extra-mural lectures has been completed during the 1958/59 session. There have been times when it has been extremely difficult to persuade some of the staff members to undertake these lectures, partly because of the very short notice given often by the local societies. We have requested the local societies to plan far enough in advance so that a minimum of two months' notice can be given to staff members who are requested to go on these assignments. The representatives of the Board are urged to assist us in this matter by bringing to the attention of the local societies the need for planning their programs well in advance.

Research

The research output of the Faculty continues to receive recognition for the high quality of the work being done. The Burlington orthodontic study and the radioactive isotope studies are but two that are receiving wide recognition. It is anticipated that the facilities in the new dental

building will greatly assist in the further development of our contribution to dental research.

New Scholarships and Awards

During the present session, the following new awards have been established in this Faculty:

1. The Canadian Society of Dentistry for Children has established an award, in the form of a subscription to the Journal of Dentistry for Children, to that student of the Fourth Dental Year who, in the opinion of the Faculty Council, is proficient in the subjects related to dentistry for children.
2. Through the generosity of Dr. Paul Takahashi, an annual scholarship of \$100.00 will be awarded to the student of the graduating year who ranks first in the subject of periodontics.
3. An anonymous donor has made possible a book award in the Fourth Dental Year to the student who ranks first in the subject of orthodontics.
4. The Fred Campbell Memorial Scholarship, in the amount of \$100.00, the gift of Mrs. T. R. Bowman of Barrie, Ontario, has been established in memory of the late Dr. Fred A. Campbell. It is to be awarded annually to the student of the second year of the dental hygiene course who ranks highest in general proficiency.

Staff Notes

Rather than single out any of the members of the staff for special mention under this heading, I should like to pay tribute to every member of the staff who, during the past year, has carried on regular duties while being involved continuously in the details associated with the plans and program for the new dental building. This has placed an extraordinarily heavy burden on heads of departments, and indeed all members of the staff.

In conclusion, we extend our thanks and gratitude to the Dental Alumni Association, many individual members of the profession who have supported various aspects of the teaching program with scholarships, awards, etc., and particularly the members of this Board, who have supported us both financially and with ready assistance whenever problems were presented to them. The active help we receive from all sources serves as a stimulus to the entire Faculty.

ACTION

Adopted Motions: THAT in respect to those possessing a licence to practise dentistry in Ontario, such persons should not be admitted to the Faculty of Dentistry at the undergraduate level.

(See item no. 12 under 'Action' re Registrar-Secretary's Report.)

THAT the Report of the Dean of the Faculty of Dentistry be adopted.

WORKMEN'S COMPENSATION BOARD

REPORT OF THE REPRESENTATIVES TO THE WORKMEN'S COMPENSATION BOARD

Fall Meeting

The Representatives to the Workmen's Compensation Board present for your consideration a slight revision to Form 8B, which is the Report of the Dental Surgeon, and an amended Schedule of Dental Fees. (See Report of Consultant, Annual Meeting.)

The representatives would also urge the Board to give consideration to the creation of an annual honourarium to the Consultant for his valuable services. The Consultant represents the interests of the profession while attempting to render due cognizance to the policies and responsibilities of the Workmen's Compensation Board. The amount of time the Consultant is required to spend on W.C.B. matters seriously encroaches upon his practice responsibilities. A great deal of after-hours' work must be done to mediate successfully many of the problems which arise. The amount of the annual honourarium which the representatives would suggest to be conveyed to the Finance Committee for possible inclusion in the budget next term is \$500.00.

D. C. Stiles

M. V. J. Keenan

ACTION

Adopted THAT the Report of the Representatives to the Workmen's
Motion: Compensation Board be received and adopted.

REPORT OF THE CONSULTANT TO THE WORKMEN'S COMPENSATION BOARD

In the past year the duties of your consultant to the Workmen's Compensation Board of Ontario might be reported in three parts:

1. Regular routine consultations with the Board's Medical Aid Division regarding dental problems arising with members of the profession.
2. Consulting with the Medical Aid Committee of the Board and the Board itself regarding general provisions of the Board respecting dental treatment.
3. Assisting your Board's Sub-Committee on Workmen's Compensation Board matters and assisting your Registrar-Secretary in negotiating a new fee schedule for dental services to cover Workmen's Compensation Board's beneficiaries.

ROUTINE CONSULTING, etc.

This year some thirty-two claims have been reviewed and written reports sent to the Board. This is in contrast with eighty in the same period last year. The reason for this is not too apparent. The Board's assessors are not processing less dental claims but there has been a change in policy of appraising the Board's responsibility. Allowing for a more liberal dental claims' policy which has been evolved during the year, there could be other reasons for the sudden drop in claims' referrals.

During the year your consultant has made a number of clinical examinations concerning complaints of beneficiaries in respect to services performed and also in respect to optimum method of treating certain cases. In this connection it should be understood that while the Board permits its beneficiaries to choose the dentist of their choice in most instances, it does reserve the right to recommend treatment procedures to a dentist and even to refer the beneficiary to a dentist of ability known to them for specific treatment.

Further there have been many telephone conferences with members of the Board's staff of claims' assessors and also with dentists concerning treatment problems and fee allowances.

The question of dental fees brings up a provision of the Workmen's Compensation Act that should perhaps be brought to your attention :— "A dentist may not request payment from an injured workman for any treatment to which the workman is entitled under the Act". This means the Board provides its beneficiaries with a service coverage and not a payment on account for service.

GENERAL PROVISIONS OF THE BOARD RESPECTING DENTAL TREATMENT

Over the years, the profession in general seems to have had difficulty in understanding the policy of the Workmen's Compensation Board in respect to dental treatment. Your consultant has conferred with the Board and its Medical Aid Committee in setting up certain statements of general information for the guidance of the dentist. These statements that have been prepared are of special interest to the dentist but they also harmonize with similar statements set up for medicine. These statements are set up as Appendix "A" at the end of this report.

Further the Board has developed some new principles in assessing its entitlement for dental service. The new policy is more liberal in favour of the beneficiary. It is subject to amendment, of course, but it indicates the Board's attitude in dealing with the unfortunate injured workman.

SCHEDULE OF DENTAL FEES

As your Board is no doubt aware, the dental fee schedule has been under consideration since the 1958 fall meeting of your Board. Your consultant prepared a revision which was considered by your Compensation Board Sub-Committee and negotiations with the Compensation Board authorities have proceeded from there.

During the past year there has been considerable complaint from dentists respecting the inadequacy of the Board's present fee allowances. Particularly is this true among the men known to do better than average dentistry. Nevertheless the profession has been patient and co-operative. The Board is concerned about these complaints because it desires to obtain good dental service for its beneficiaries and is quite willing to pay a fair compensation to dentists for good service. It is unwilling however to pay one man more than another for a given service except in complicated cases of its type.

In setting up a schedule of fees for good services on a group basis which are to be performed by average dentists, it is felt the schedule

should be defensible and capable of justification. Therefore a study of the basic fee problem and its relation to a dentist's income was made.

In one of our Canadian provinces an economic study of dental practices was made by a management consultant firm. In a summary of this firm's report it is stated, "That in order to enjoy an equivalent income to men in salaried positions with approximately the same work demands, an independent dentist in general practice requires an annual income not less than \$10,000.00 as a very conservative minimum".

Further a former United States Commissioner of Internal Revenue, writing in the American Publication of Economic Research Associates, recently pointed out among other things, that an income of \$13,000.00 before income tax was required in 1957 to provide an income with equal purchasing power that \$5,000.00 had in 1939. Therefore a personal income of \$10,000.00 to \$13,000.00 is not an unfair objective for a dentist who is capable of average production of good services. Especially is this true when it is recognized that he has considerable capital invested, that he must provide for his own retirement pension plan and that he takes risk of complete loss of income when he is incapacitated by illness.

These factors together with the risk, skill, responsibility and time involved in various dental services have been taken into consideration to develop a fair fee for service. Perhaps it is not out of place to indicate that experience shows practice overhead could range between \$40.00 and \$60.00 per day depending on the income bracket objective.

Higher income means increased production with higher overhead. It should be stated also that consideration of the Ontario Dental Association Fee Schedule has been made in this preparation.

Thus a fee schedule for services usually encountered in dealing with Workmen's Compensation dental beneficiaries was developed and presented to the Workmen's Compensation Board.

Discussion arose about many items. In regard to the fee for examination diagnosis and report your representatives contended that the present allowance was inadequate and that this no doubt contributed to hurried and sometimes unsatisfactory diagnosis and treatment planning. An increase to \$5.00 was recommended. The Board noted the protest but did not concede the increase because \$3.00 was still the allowance in medical cases. In practically all other instances the Board accepted your Committee's suggested revisions.

However, on the day before your representatives' appointment to finalize the schedule, your consultant learned of a probable increase in dental technician's charges. This increase in technical services' costs was then added to those services affected, but it was agreed the Board should delay until the rumour had been confirmed or denied. In the meantime it has been confirmed.

In discussing with the Chairman of the Medical Aid Committee the probable effective date that the new schedule could be put in operation, he replied that it probably could be finalized in about three weeks after it had been received. The fee schedule appears as Appendix "B".

In view of the changes in Board policy respecting dental services and the revision of the fee schedule, members of the Board expressed a desire for acquainting the profession of the changes. It was intimated that speakers might be available to dental groups, that they might consider producing a booklet to send to each dentist as a reference. The feeling existed too that your Board might do something to publicize the changes and its willingness to co-operate.

In conclusion, your consultant desires to report very cordial relations with the Workmen's Compensation Board and those members of staff with whom he is in contact. Mr. A. B. McCartney, Chairman of the Medical Aid Committee, has been especially co-operative. Further your consultant is very grateful to Dr. Dunn for his assistance and co-operation throughout the year and to your Board for the privilege of representing you in these matters.

T. R. Marshall,
W.C.B. Consultant

GENERAL PROVISIONS

1. Dental service, under the Act, is limited to treatment of oral conditions which result from an industrial accident or industrial disease with the object of restoring as nearly as possible the masticatory function to the degree of health and efficiency existing prior to the accident.
2. A dentist in accepting a case for treatment, which is the responsibility of the Workmen's Compensation Board, agrees to accept the Schedule of Fees authorized by the Workmen's Compensation Board of Ontario and approved by the Royal College of Dental Surgeons of Ontario.
3. In uncomplicated cases the fees as listed cover complete treatment and submission of reports.
4. In complicated cases additional fees may be submitted. Additional payment in complicated cases is dependent upon the nature of injury and the detail of treatment and attendance submitted by the attending dentist.
5. A dentist may, without prior authority, render emergency treatment to an injured workman and take necessary X-ray films to diagnose the extent of injury, all of which will be paid according to the Schedule of Fees.
6. A dentist may not, with the exception of the above, proceed with treatment without prior authority from the Workmen's Compensation Board.
7. The receipt of any form from the Workmen's Compensation Board, Ontario does not imply entitlement under the Act, but the submission of a completed form is necessary in order to adjudicate the claim.
8. This Schedule is to be used when submitting accounts to the Board. Approval of accounts will be based solely and finally on the information given in the written reports and itemized estimates furnished to the Board.
9. Supplies and appliances are covered by the fees in the Schedule except in cases of fractured jaws.
10. Porcelain Jacket Crown:
This type of restoration is fragile and may easily fracture. It is allowed only on the request of the claimant and on his undertaking to assume responsibility for replacement in case of fracture. Gold Veneer Crowns using heat cured plastic are suggested rather than Porcelain Jacket Crowns.
11. When it is necessary to extract injured anterior teeth and a fixed bridge replacement is contemplated, a provisional denture may be supplied to permit a better final restoration.
12. Accounts are to be submitted on form 34 provided by the Board within 30 days of the conclusion of treatment. This is the due date. Under section 50, subsection 7 (a) of the Workmen's Compensation Act, the Workmen's Compensation Board, Ontario may impose a percentage reduction penalty if an account is submitted beyond the permitted time limit. Accounts not submitted within 60 days following the due date may be reduced 5% for each month's delay.

PRINCIPLES TO BE APPLIED IN ADJUDICATION OF DENTAL CLAIMS

1. The modern approach to dental care aims at the restoring of health, masticatory function and dental comfort. In this respect an injured workman requiring dental care as a result of an accident in employment is entitled under the Act to the best dental care that would restore his mouth to a condition as close as possible to that prior to the accident and the cost of which is to be based on the Workmen's Compensation Board Dental Fee Schedule.
2. Where it is shown that an accident in employment creates the need for dental service for the lifetime of the claimant this may be supplied. Thus in cases where a workman is entitled to restoration as a result of an accident, dental service in relation to the restoration may be supplied for the workman's lifetime excepting where the restoration is broken as a result of carelessness or misconduct on the part of the workman.
3. Where restoration has been supplied to a workman, oral hygiene should not as a general rule affect subsequent entitlement. There may be an occasional case where the claimant could be supplied with a restoration and further dental care limited due to the presence of poor oral hygiene or other factors not covered by his entitlement. In such a situation the claimant should be so advised in writing and such limitation be recorded in the claim as a part of the permanent record.
4. No dental service is to be supplied on the basis of aesthetic effect alone.

Based on these principles, it is directed that in the handling of dental claims the following shall apply.

- (a) When all the claimant's remaining teeth in either jaw are injured in an industrial accident he is to be supplied with a restoration and the restoration is to be kept in repair for his lifetime provided the restoration is not broken due to carelessness or misconduct. Where a workman has four or fewer teeth remaining in the affected jaw at the time of accident and they are all injured in the accident and full restoration is required, the claim should be referred to the Medical Aid Division for opinion regarding possible limitation of continuing entitlement to dental service in respect to this restoration. Any appeal by the claimant of such a decision should be referred to the Board.
- (b) When only some of a workman's teeth are injured and a restoration is supplied, this restoration is to be kept in repair for the claimant's lifetime where no attention is required to the uninjured teeth.
- (c) Where a restoration is supplied and this creates deterioration of the abutment teeth to the extent that they have to be restored or extracted, any necessary change to the restoration is to be made or a new restoration is to be supplied and kept in repair for the workman's lifetime.
- (d) Where a restoration is supplied and sometime later teeth not involved in this restoration require removal due to circumstances not covered by his entitlement under the Act, 50% of the cost of the new restoration calculated according to the Workmen's Compensation Board Schedule of Fees may be paid

providing that the teeth involved in the restoration which was supplied as a result of a compensable accident are included in the new restoration. When such service is supplied it is considered to complete his entitlement under the Act with respect to this restoration. No allowance is to be made for the cost of X-rays, dentist's fees for extraction, etc., and the total fee charged by the dentist to the claimant is not a concern of the Workmen's Compensation Board.

- (e) When only some of the workman's teeth are injured in the accident and the uninjured teeth require attention or there are teeth missing, such that it increases the number of teeth on the restoration, the claimant is to receive the dental care involved and he is to be advised that this completes his entitlement under the Act.
- (f) A provisional denture may be supplied to a workman injured in an industrial accident where it is shown that it will contribute to a superior final result.
- (g) The workman is to be advised where any limitation is placed on dental restoration.
- (h) Where there is doubt about our responsibility, discuss claim with Unit or division Head. If a decision cannot be reached, the claim may be referred to Desk No. 265 for further consideration.

Appendix B

SCHEDULE OF FEES

1. Initial Visit (See item 5, General Provisions)
 - (a) Emergency treatment (Except as in Item 4 of General Provisions) \$ 3.00
 - (b) Repair of fractured denture (Plus \$1.00 for each tooth supplied) \$ 8.00
 - (c) Replacement of broken facing \$ 10.00
2. Examination, diagnosis with comprehensive and satisfactory report \$ 3.00
(This fee will not be allowed in respect to the repair of dentures, broken facings, OR ANY INCOMPLETE REPORT.)
3. Extractions:
 - (a) Extraction of each tooth \$ 2.00
4. Anaesthetics:
 - (a) Local anaesthetic — per visit \$ 3.00
Local anaesthesia in all procedures other than extractions is included in the service fee.
 - (b) General anaesthetics:
 - i Short anaesthesia — minor procedures not exceeding 30 minutes \$ 10.00

ii Prolonged anaesthesia — for the first hour	\$ 20.00
iii Each successive one-quarter hour or fraction thereof	\$ 2.50
5. (a) Root Canal Therapy including canal obliteration by root filling — prove by X-ray	\$ 30.00
(b) Root resection where necessary	\$ 15.00
(X-rays must be taken following treatment in addition to original X-rays and show complete canal obliteration and be forwarded to the Board.)	
6. Gold inlay where specially indicated:	
(a) 2 surface	\$ 22.00
(b) 3 surface	\$ 27.00
7. Silicate fillings with cement base	\$ 6.00
8. Silver amalgam fillings:	
(a) 1 surface	\$ 4.00
(b) 2 surface	\$ 6.00
(c) 3 surface	\$ 8.00
9. Crown Restorations:	
(a) Anterior or bicuspid cast gold crown with heat cured plastic facing	\$ 55.00
(b) Anterior cast gold three-quarter crown	\$ 27.00
(c) Cast gold molar crown, full or three-quarter	\$ 38.00
(d) Cast gold bicuspid crown, full or three-quarter	\$ 32.00
(e) Porcelain Jacket Crown (see item 10 of General Provisions)	\$ 55.00
10. Fixed bridge restorations:	
(a) Abutment attachments as per No. 9 above	
(b) Pontic	\$ 27.00

DENTURES

11. Complete upper or lower denture with plastic base	\$ 85.00
12. Partial dentures	
The design for all partial dentures shall be submitted for fee justification.	
(a) Plastic type upper with necessary metal clasps \$30.00 —	\$ 75.00
(b) Upper or lower partials with cast metal bar and necessary clasps with plastic base	\$110.00
(c) Provisional (see item ten General Provisions)	\$ 30.00
13. Denture reline:	
(a) Processed reline — complete or partial	\$ 27.00
(b) Self-curing plastic — complete or partial	\$ 15.00
14. X-ray service	
The following fees are for X-ray examination made by a dentist. No fee will be allowed for X-ray films submitted that are of unsatisfactory diagnostic value. X-rays to be taken on a double film packet with copy for Board files submitted with written report.	
(a) Single tooth area	\$ 3.00
(b) One quadrant of mouth	\$ 5.00
(c) Complete upper or lower	\$ 6.00
(d) Complete survey (minimum of 14 films)	\$ 12.00
15. Hospital attendance	\$ 5.00
16. Fractures: maxilla or mandible	
(a) Consultation and report	\$ 15.00
(b) Consultation and participation at reduction	\$ 50.00
(c) Fracture reduction and fixation (alveolar process excepted), complete responsibility	\$ 75.00
(d) Open reduction	\$125.00
(Where special appliances are necessary standard fabrication charges will be allowed.)	

ACTION

Adopted THAT Dr. T. R. Marshall be reappointed as Consultant to the
Motions: Workmen's Compensation Board of Ontario and that he be paid
an Honourarium of \$500.00 per annum.

THAT the Report of the Consultant to the Workmen's Compensation Board be received and adopted.

LIBRARIAN

JOSEPH H. JOHNSON

REPORT OF LIBRARIAN

The Library has functioned during the year under the dual obligation of providing the customary Library services and, at the same time, supervising the plans for the design and furnishing of the Library in the new dental building. This has been a heavy and time-consuming responsibility, but a very rewarding one.

The reading room and stack space as currently developed appear to be adequate in dimension, functional in design and pleasing in appearance. The periodical area will be both unique and attractive. The ceilings are acoustic tile with rubber tile on the floor, thus reducing noise in the reading room to a minimum. The stack space provided should meet our requirements well into the future. In addition we will have a large storage room in the basement for the duplicate periodicals and for museum storage.

The University very generously provided the services of Mr. Hall, an architect who specializes in the field of museum design. He has provided an excellent model of the museum as he has planned it. His design, if adopted, will turn an unattractive box of concrete blocks with an ugly pillar in the middle of it into a thing of beauty. At the same time, it provides excellent display space for all types of exhibits. On one wall he has suggested an artistic mural depicting the history of Dentistry in Ontario.

The finishing of the museum is not in the contract under the present terms of agreement and its completion must await certain developments. I cannot, at the moment, report on the extent to which the University may participate. A private donor has offered generous assistance, but it falls far short of the total requirements for the plan envisaged. We are still hopeful that this plan will become a reality.

The University has also supplied us with a scale model of the layout of our reading room. The Library Committee recommended that the reading room be equipped with a new style of reading carrel which provides virtually a private reading space for each student in the general reading room. Considerable thought has gone into the design of these carrels. The University has provided us with a rough mock-up of the design which seems to satisfy all the requirements of utility while, at the same time, preserving the aesthetic quality of the room. Study carrels for graduate students are also being provided in a separate room adjacent to the stacks.

During the year there were 88 acquisitions of books and one new journal subscription was added. There are 47 book orders outstanding at this date. The entire Library situation at the University has been reviewed during the year by a special committee of Library experts. We do not anticipate any radical changes affecting our Dental Library to emanate from their report in the immediate future.

The University of Toronto increased the appropriation for the dental Library to \$2,072 which is herewith gratefully acknowledged. During the current year our appropriation has been virtually identical with our requirements for Library expenditure.

Torontonensis and Hya Yaka are two of the most authoritative historical items in our Library. Our files in both were incomplete and the Library Committee published notices to this effect in the Canadian Dental Journals which invited donations of the missing items. With the co-operation of your Secretary, eighty-seven letters were prepared and

mailed to the graduates still in practice in Ontario for the years concerned. I am happy to state that the appeal has already brought a donation from Dr. F. A. Blatchford of Fort William and the promise of additional contributions from Dr. G. E. French of Niagara Falls. Dr. Morley Shuckett of Winnipeg has also very generously presented us with his 1949 copy of *Torontonensis*. This response to our appeal is acknowledged with sincere thanks.

Continuing effort was also made to complete some of the early periodicals, including the *Western Dental Journal* from 1888 to 1909, the *Dental Register* for 1864 and 1866 and the *Ohio State Journal of Dental Science* for 1881. Thirty volumes of various journals were completed. From the Library of Northwestern University we also acquired the *Angle Orthodontist* from Volume 1, 1931 to Volume 26, 1956. This journal is particularly difficult to acquire. We are most fortunate and very grateful to the donor of this item. Mr. Lofgren, editor of *Odonotologisk Tidskrift*, a Swedish research journal, has also supplied us with copies of this journal from 1946 to 1956, when our own subscription started, which makes our collection complete since 1946.

During the year we mailed out 105 parcels comprising 820 periodicals and 16 books. We received mail in the same period from 30 medical and dental libraries in the United States and Canada, the Canal Zone, Wales, Sweden, Japan, India, Mexico, New Zealand, Argentine, France and Finland.

A 30 page list of our book acquisitions from 1948 to 1958 was completed during the year. This will also have a supplement of the 202 journals currently received by the Library. For several years a mimeographed sheet of the best papers published in the current journals has been prepared and circulated by Miss Smith, the Assistant Librarian. This originally started with distribution to 6 interested people, but has now grown until the distribution to staff and interested graduates has a total of 75 copies per month.

Donations of books and journals are gratefully acknowledged from 20 individual donors. We are particularly indebted to Dr. E. A. Grant for a sizeable donation; to the Canadian Dental Association for many copies of the *British Dental Journal*; to the Ontario Dental Association for a variety of foreign journals and for a large donation from Oral Health. The latter included many books from the Library of the late Dr. Seccombe.

Circulation figures, which have remained virtually constant for the past three years, are herewith appended along with the financial report of the Abbott Fund (Appendices A and B). Total circulation was 9,014 and in addition 1,500 books and periodicals were used in the reading room without being charged out. 94 items were mailed to 33 out of town borrowers and there were 10 interlibrary loans. We have continued to use the income from the Abbott Fund for renovating the books in the Abbott collection, many of which are now one hundred or more years old. Several more years will be required to completely rehabilitate the collection.

Miss Smith and her assistant are to be commended for their faithful and efficient services as is also the Library Committee for its interest and co-operation in assisting with the direction of the Library and the planning of the new building.

This report is respectfully submitted with the recommendation that the customary grants be continued for the ensuing year.

ACTION

Adopted THAT the Report of the Librarian be received and adopted.
Motion:

REPORT OF THE DENTAL PUBLIC HEALTH COMMITTEE

It is my privilege to present an outline of the activities of the Dental Public Health Committee for the 1958-59 term.

Since this is the last report I shall be presenting to the Board as Chairman of the Dental Public Health Committee I take this opportunity to express my sincere gratitude for the splendid help and co-operation the Board has given the Dental Public Health Committee during my tenure of office. The sympathetic interest shown by the Board has sparked the Dental Public Health Committee to put forth "that little extra effort" on many occasions.

Dr. Glenn Mitton, the field secretary of the Dental Public Health Committee, will be presenting a separate report (Appendix A) but I feel that I would be very remiss in my responsibilities if I did not again draw attention to the steady excellent work carried on by Dr. Mitton. He continues to further the cause of Dentistry throughout the province and has done much to strengthen the ties between Dentistry and other organizations. Such connections have added greatly to the effectiveness of the Dental Public Health Committee.

The Red Cross had continued to work closely with our committee and I am pleased to report that the orthodontic treatment project is now well under way. Dr. Mitchell, chairman of the committee, informs me that several hundred children have been examined, forty-eight are under treatment at present, and treatment will be commenced on twenty more cases immediately.

The Dental Public Health Committee has continued its interest in a better distribution of dentists throughout Ontario. It will be recalled from a previous report that the Red Cross and the Dental Public Health Committee spent a good deal of time, effort and money in the town of Mattawa in order to procure a resident dentist. Drs. Mitton and MacGregor visited Mattawa and gave assistance in the formation of a citizen's committee made up of representative groups. A survey was made of the school children by Dr. Grainger and Dr. Mitton which showed deplorable conditions.

A dentist was found and taken to Mattawa by the field secretary and Dr. MacGregor only to find that the available space had been leased to a dentist from Sudbury. This was done with the full knowledge of the citizen's committee and no hint was given to the Dental Public Health Committee of what was transpiring. In view of this indifference the Citizen's Committee of Mattawa was informed that we had finished spending time, money and effort on their behalf and from now on they must work out their own dental problems. This information should be kept in mind for future similar situations which might arise.

The town of Tottenham requested that the Red Cross Coach be sent to them. Dr. Mitton visited Tottenham and discussed the situation with interested parties. As a result of this the town decided that it would try to work out its own problems. It is understood that a dentist has been secured for the town.

Dr. Kenneth Pownall and his Committee are to be congratulated on the success of Dental Health Day. The day was highlighted by widespread press, radio and television activity throughout the province. This year some of the Ethnic group newspapers carried dental health items — thus a new section of the population was reached.

The Dental Public Health Committee was again fortunate in having the co-operation and experienced assistance of the Health League of Canada in promoting Dental Health Day.

The student dinner provided by the O.D.A. and R.C.D.S. Boards was repeated in Hart House and would seem, from all reports, to have been a success. It was noted, with satisfaction, that the Board Members took the opportunity to mingle freely with the students. The students appreciated the interest shown by the Board Members and in the days following the event expressed their appreciation on several occasions.

The Dental Public Health Committee has continued to be represented on the Fluoridation Committee of the Health League of Canada. I believe it is fair to state that out of discussions of the Committee has arisen the suggestion that organized Dentistry in Ontario wage an all out effort to promote fluoridation among the people of the province. Preparations for this campaign are now under way. It is hoped that all Dental Societies in Ontario will work towards bringing widespread public opinion to a place where it will demand the fluoridation of communal water supplies.

The Dental Public Health Committee booth and display at the 1959 Convention were the result of much hard work and preparation by the Materials Committee. May I command their efforts to you.

Mark G. Boyes,
Chairman.

APPENDIX 'A'

REPORT OF FIELD SECRETARY

Having referred to my tenure of office as President of the Ontario Public Health Association, I should like to report on the completion of that term with the Annual Meeting, September 29-October 1, 1958. With very splendid co-operation of all sections of this Association and particularly that of the Dental Public Health Officers' section, it was possible to initiate some new ideas learned through activity over the years in our own Ontario Dental Association. Very close working relationship in program planning was established with the Deputy Minister of Health, who arranges the Minister's Conference on the first day of the convention. All medical officers are expected to attend this conference, and under legislation are provided their expenses. By such planning and by arranging for timely subjects to interest all sections, some of the results were: the largest attendance of any Annual Meeting; the largest active membership to that date; and the most satisfactory financial status enjoyed by the Association. For the first time, the Association honoured six of the pioneers who gave so much to public health and to this Association over the years. Past-presidents were also honoured for the first time, and appropriate past-president lapel buttons were designed and presented at the dinner meeting. These are just a few of the highlights resulting from the efforts of a very keen executive committee with whom it was my pleasure, as a representative of the dental profession, to be associated.

Since the last Annual Meeting, there were held six regular meetings of the Dental Public Health Committee. The Materials Sub-committee met regularly on five occasions and many other conference sessions were held in respect to new materials being reviewed or developed. The Field

Secretary attended the dental health officers' sub-section bimonthly meetings. Beside these, the interests of dental public health have been represented by attendance at many meetings, receptions, and on deputations, as well as through interviews, some of which are listed in a condensed summary which follows.

As a result of earlier requests coming from citizens of the Mattawa area and following an earlier visit to assess the local situation, a visit was made to North Bay and to Mattawa in June. A number of dentists were interviewed who were familiar with the Mattawa situation to get the support of North Bay dentists in locating a resident dentist in Mattawa. Plans were discussed with a representative group of Mattawa people and a local committee on dental health was established. Dr. R. M. Grainger and I procured local dental information by examining children in the public and separate schools. We reported our findings at a Ladies' Night dinner meeting of the Lions Club at which representatives of the local committee and their wives were present. A public meeting of all the parents was suggested early in the fall to be addressed by Dr. S. A. MacGregor. By this time, we had a prospective dentist. We informed the Mattawa committee and told them we would bring him along to be introduced at this time. In the meantime, the office location was tentatively arranged by the local committee.

Upon our arrival for the fall meeting, we learned that, with the knowledge and apparent blessing of the local committee, the office location was rented the previous day to two dentists from Sudbury. While the public meeting was held, this breach of good faith on the part of the local committee was disappointing. They lost out on a full-time resident dentist and any further assistance from this committee.

There has, however, been some measure of success in interesting new graduates in smaller towns where dental services are so badly needed. An earlier prospect for Mattawa, who graduates this year, will be practising in Espanola. The Orangeville-Tottenham area has also been visited on request of the local school board, and at least one member of the graduating class will practise in this area.

It is evident that members of the local dental societies could add greatly to the success of locating new graduates in smaller communities which need them so badly. Too frequently, new graduates meet with discouragement by local dentists after being stimulated to go and look over the opportunities in such towns. This only emphasizes the need for a closer working relationship with the societies of the province, and an opportunity for better mutual understanding in respect to such professional public health responsibilities.

I'm pleased to report a very successful Dental Health Day, and the best of co-operation from both television and radio stations. A number of the societies were very active during National Health Week, and followed up contacts we had made locally with communications people. The Ontario Retail Pharmacists' Association contacted and distributed our material to 2,500 Ontario Pharmacists. The College of Pharmacy Bulletin also carried an article on dental health. The Canadian Labour Congress Journal carried our article "Let's Strike for Dental Health" prior to National Health Week. The commercial value of time and services given during National Health Week would make it impossible under our Association budget, but are freely available to us at this time. Again, I would stress the need for film spot material for television use which could be made available to each province across Canada during National Health Week. Our Materials Committee have produced new slides and scripts, and have a continuous program for producing new material from year to year.

More could be done through available services of the Health League of Canada on a national basis by providing press releases on dental

health for a wider distribution in the daily and weekly newspapers of Canada. They accept the press releases of the League throughout the year and especially during National Health Week. The "Health Magazine" is also available to us, on a national basis, for articles throughout the year. The circulation as of May 1, 1959 was approximately 28,000. The most co-operative relationships are enjoyed by our committee and the National Health Week committee of the League.

The Dental Public Health Committee, during National Health Week, sponsored again a complimentary dinner for the members of the graduating class. The chaplain of Queen's University, the Rev. A. M. Lavery, gave the address.

Representatives of the Board of the Royal College of Dental Surgeons of Ontario and the Ontario Dental Association spoke briefly, and entertainment was provided by Mr. Frank Palmer. Consideration is being given to a change in the program for one year to give the representatives of the two Boards more opportunity to discuss their functions.

A continual flow of requests for materials and assistance to members comes to our attention throughout the year. This again points up the need for the development of new materials to assist local societies and individual members of the Association to promote better dental health locally.

A condensed summary of highlight activities follows:

Trips were made to —

- North Bay — meet with dentists regarding Mattawa situation and their support.
- Mattawa — two trips to organize for meetings.
- Grimsby — to attend a special dinner meeting honouring Dr. Ralph Connor on leaving for an appointment in Manitoba.
- Tottenham — to meet the members of the school board regarding dental health services.
- Markham — as a guest speaker at Kiwanis luncheon.
- Kirkland Lake — attending the Northern Ontario meeting.

Dental Public Health Representation at Meetings, Receptions and Deputations

- Scarborough — meeting of dentists called by the dental director, Dr. J. W. M. Lawrence.
- Ontario Public Health Association — five meetings including the Annual Meeting at which I presided
- East York-Leaside Health Unit — meeting called by M.O.H. to discuss dental program.
- School of Hygiene — student reception given by staff.
- Academy of Dentistry — Winter Clinic and four regular meetings.
- Career's Day participation at Lawrence Park Collegiate.
- Presentation of dental health material by S. L. Honey.
- Fluoridation Committee of the Health League of Canada.
- Annual Meeting of the Health League of Canada.
- Deputation to a meeting of the provincial government.
- Private Bills Committee re fluoridation.
- Student Dinner — fourth year graduating class.
- Civil Defence Health Services Committee of Ontario.
- Junior Red Cross Orthodontic Committee.
- New Faculty of Dentistry cornerstone ceremony.

Two-day Workshop Conference on Public Health Aspects of Road Safety.
Metro Workshop Conference on dental health at which a paper was presented.

Health Section Meeting of the Ontario Educational Association.
Editorial Committee of the Health League of Canada.

Interviews or Conferences

These seem to increase each year and include students in respect to practice location opportunities; dentists regarding requests for speaking engagements, radio or T.V. participation; people associated in education respecting aspects of material preparation; writers, producers, display people, film laboratories; nutritionist of Canadian Milk Foundation regarding display material for convention; two conferences with chairman of the Health Section of the Ontario Educational Association on program for the Workshop Conference; Dr. R. B. Sutherland of the provincial industrial Hygiene Division on dental health aspects of industrial health; Dr. W. G. Brown, Deputy Minister of Health on program for the Ontario Public Health Association Annual Meeting and related matters.

What of the future?

At the last meeting of this committee, plans were consummated to invite two representatives of every Dental Society or Association in Ontario to be the guests of the Ontario Dental Association at a Breakfast Meeting on Tuesday, May 12, 1959. It is hoped to bring the societies into a better understanding of the problems and challenging situations which face dentistry in these days. From frank discussion, it is hoped that better communications will result between those charged with the responsibilities for the profession, and the practising dentist who may be the one most affected by present-day trends. With such farsighted services as D.S.P.I. being offered the public by the profession, it would seem to be timely and would strengthen our professional relationship if the Ontario societies elected to become component societies of the Ontario Dental Association. This Breakfast Meeting might well become an annual event for the purpose of improving such communications, and offer opportunity and a responsibility for a more democratic representation by the individual members of local societies in important professional affairs. This participation, as it applies to dental public health, could include the present problem of utilizing fluoridation as a public health measure; the recruitment of dental students, dental hygienists and dental nurses the better distribution of dentists to serve the public throughout Ontario and a more effective program of dental health education throughout the province.

An invitation has been received from the Ontario Medical Association to participate in a Medical Exposition, "Mediscope 59", to be held in the Queen Elizabeth Building, Exhibition Park, October 12-17, 1959. The committee has agreed in principle, if requested by the professional committee, to participate. 200,000 visitors are anticipated to attend.

Glenn T. Mitton.

ACTION

Adopted THAT the Report of the Dental Public Health Committee be
Motion: received and adopted.

MISCELLANEOUS

Application for Reinstatement

An application was received from a dentist who was last in good standing in the mid 1930's.

THAT Dr. be required to take a qualifying examination for reinstatement into the R.C.D.S. of Ontario — the time and content of such examination to be set by the Examiners and Petitions Committee.

Appointment of Business Manager

THAT Mr. W. E. Jackson be appointed Business Manager of the R.C.D.S., responsible to the Registrar-Secretary-Treasurer.

Conference of Provincial Secretaries

THAT a sum not to exceed \$400.00 be allocated to provide Ontario's share of the cost of convening an annual meeting of the Provincial Secretaries.

'Dentistry as a Professional Career'

The booklet "Dentistry as a Professional Career" has been distributed to each High School in Ontario which provides a matriculation course.

Hygienists' By-Laws

THAT approval be sought from the Lieutenant-Governor in Council pursuant to Section 12 of The Dentistry Act to amend the By-Laws for Dental Hygienists as follows:

Section 7 (a) — delete "she is of the age of 18 years". Clauses (b) and (c) then become clauses (a) and (b) respectively.

Section 10 (1) (a) — delete "is of the age of 20 years." Clauses (b) and (c) then become clauses (a) and (b) respectively.

Mediations Committee Established in Toronto

The Academy of Dentistry, Toronto, has reported that it has established a Mediations Committee.

National Dental Examining Board of Canada

THAT further to the resolution submitted by the R.C.D.S. Board to the annual meeting of the National Dental Examining Board of Canada, the R.C.D.S. Board would again request that consideration be given to an amendment of regulations which would permit graduates of approved dental schools to try the National Examinations irrespective of the number of years the applicants were in attendance on such course.

Portraits, Busts, Etc.

THAT all portraits, busts etc. now the property of the R.C.D.S. be presented to the Faculty of Dentistry.

Professional Services Criticized

Several dentists in one area registered a complaint with the Board relative to the professional services of a confrere. The Secretary was directed to take appropriate action to the extent permitted by the information provided.

Reinstatement of Member

THAT when all financial obligations to the Royal College of Dental Surgeons of Ontario, including arrears, reinstatement fee and current licence fee, have been discharged by Dr. J. G. S. Macintosh, that his name be restored to the register.

Staff Pension Plan

The provisions of the Staff Pension Plan as outlined at the Fall Meeting are as follows:

- (1) Employees to be divided into 2 categories: Executive Staff and Salaried Clerical Staff below Executive rank.
- (2) Executive eligible without any waiting period.
- (3) Others eligible after 2 years service or at age 30 whichever is later.
- (4) Joining date is Anniversary date of Plan following date of eligibility.
- (5) Retirement at age 65 with provision for early or late retirement.
- (6) Pension will be amount purchased by 10% of salary: 6% to be paid by the College and 4% by Contributor.
- (7) Provisions as defined in Pension Trust Agreement for vesting of College's contributions, Death Benefits, Terminations of Employment, Increases in Salary, etc.

THAT Dr. R. P. Lowery and Dr. L. M. Grose be appointed as Trustees to set up a Pension Plan in regard to the employees of the R.C.D.S.

Study Club for Practice Administration

THAT permission be granted to Dr. James Sim of St. Catharines to form a study club to be known as the Study Club for Practice Administration.

REGULATIONS

SIGNS

A member of the Royal College of Dental Surgeons, in connection with his profession:—

1. May not display any sign containing anything other than his name, degrees and profession and in which any letters larger than four inches are used.

2. May not display more than two signs in addition to one at or on his entrance door.

(a) Not more than one of these may be a suspended sign.

(b) Not more than one of these may be an illuminated sign and if illuminated must not be intermittent, daylight, "Neon" or "Neon type" and no colours shall appear in such signs other than white or black.

3. May not display any sign on premises other than those in which his practice is actually carried on.

Notwithstanding the above regulations he may (using only un-illuminated letters or figures not larger than two inches:

(a) Add to his entrance sign, his office hours.

(b) Add to any sign the words (when an entrance is difficult to find) "Entrance on . . ."

PROFESSIONAL CARDS AND ANNOUNCEMENTS

A member of the Royal College of Dental Surgeons, in connection with his practice:—

1. May not permit to appear in any newspaper or other publication, printed or written for distribution or display anything other than his professional card (which may contain at most his name, title or degrees, profession, address, telephone number and office hours) or an announcement of his commencement of practice, change of office location, absence from or return to practice, or the restriction of his practice. The announcement shall not contain any reference to qualifications, procedure or equipment. The space used, for either card or announcement, must not exceed one column (13 ems) in width by two inches in length and must not be in the nature of a display.

2. He may, however, observing the dignity and ethics of the profession, without reference to qualifications, procedures or equipment:

(a) Use private professional cards.

(b) Issue accounts and receipts.

(c) Issue appointment cards.

(d) Mail to his patients recall notices.

(e) Mail to his patients and acquaintances announcements of his commencement of practice, change of office location, absence from or return to practice or the restriction of his practice, provided he is a certified specialist.

SOLICITED ADVERTISING

For the protection of the Profession from solicited advertising, this Board prohibits any Member of the Royal College of Dental Surgeons from inserting his professional card in hand-bills, programs, year books or other printed matter of like character.

TAKING OVER A PRACTICE

When any member of the Royal College of Dental Surgeons takes over the practice or office of another member of the College, either by purchase or otherwise, the member so acquiring the said practice or office shall not after one year from the date of such acquisition use any sign or printed matter which suggests to the public that the retiring member was in any way associated or connected with the said practice or office.

RE LISTING OF DENTIST IN TELEPHONE DIRECTORIES FOR PROVINCE OF ONTARIO

- (1) No display advertising of any kind.
- (2) No black face listings in the yellow pages.
- (3) No specialists' lists under separate group headings.
- (4) Mention of office hours is of no particular value, and is usually used only to increase space, therefore, to be excluded.
- (5) Mention of particular facilities or equipment, such as X-ray, gas extractions, etc., not acceptable in either section.
- (6) Residence listing on yellow pages, as well as on white pages, is acceptable.
- (7) Designation as specialists may be used in both yellow and white pages, provided the dentist is a specialist certified in and restricted to the designated branch of dentistry.

REPORT

Introduction

A year has passed since you honoured me, by election, to this high office, for which I am very grateful. I wish to express my appreciation to our efficient Secretary and his Staff for the assistance they have rendered me during this period, and also the Chairmen and Members of the numerous Committees. This, of course, would include all the members of this Board. I wish, however, to include those members of the profession, who although not members of this Board have accepted responsible positions on several committees, and given generously of their time and ability. As I am from a locality remote from the large City of Toronto and the distance is a handicap as far as frequent attendance at meetings is concerned, it seems that extra burdens fall on those members residing in and around our home here at 230 St. George. To these gentlemen, I say a special thank-you.

In many ways it has been a year of great advancement, and yet it has been a year during which new problems have unfolded. This points up the need for continued vigilance and effort, and vindicates our past decisions to augment our headquarters staff and provide them with suitable office space in which to work. This occasion marks the first anniversary of our Annual Meeting being held in our own home. Those who have visited Headquarters are loud in their praise of our acquisition. I feel this was something well and timely done.

This year of 1959 is the first year our Secretary has been full time with the R.C.D.S. Board. This was indeed fortunate in that his time is so fully occupied now that it makes one wonder how our business could have been processed with anything less than a full time Secretary. The key to the answer is that so many more projects are being managed, and this will accrue to our benefit as time will show.

Looking into the future it would be my opinion that this trend will continue and the need of the profession, for organization and direction to render more and better dentistry to the public, will require even larger staff.

Finances

The recent increase in our licence fee which I might add, is still one of the lowest in Canada, has been well received. Very few complaints have been registered. I feel the majority of the members of the College realize the necessity for this increase, in view of the many recent new obligations, and are willing to assume this increased financial burden since it will benefit dentistry.

A word about our finances. The purchase and renovations of this property required some manipulation of our assets. The need for a new property came at a time when the Board was operating at a deficit, which caused us great concern. However, in a word, we now own our Headquarters and due to the increased revenue hope to add a little to our reserves each year. It is considered necessary to have a reserve of one year's budget to take care of emergencies.

C.D.A. Grant

We, the members of the R.C.D.S. Board, felt that we were being quite generous in our decision to increase our grant to the C.D.A. by \$10.00 per member per year; and I might say the C.D.A. is most appreciative, but I think you will find that many of the other provinces consider the requirements of the C.D.A. so necessary and urgent that their grants will be increased by \$15.00.

Dental Service Plans

Our Welfare Plan and our Post-Payment Plan have now completed one year of operation. As was expected, experience directs that some changes be made.

The Welfare Plan has functioned well. Accounts were processed quickly and the members of the profession accepted a pro rated fee, if not with pleasure, at least with little complaint. Our committee is continuing to negotiate with the government. The Welfare Plan is something the profession has been striving for since prior to 1933. We have been able to show the government that we can operate a program efficiently and with the smallest administrative costs and we have demonstrated to the public that we are concerned with the dental problems of welfare recipients. We must extend this service to other groups; e.g., blind, old age pensioners, etc. As for ourselves, we are acquiring invaluable data on dental needs, dental demands, as well as cost of dental services.

The Post-Payment Plan has not been as successful as we had anticipated. However, we need not be discouraged. I think it has provided the profession with much needed and invaluable experience as well as fulfilling a definite need. Dentists, as we know, are reluctant to change. In order to facilitate this change it is intended that the organization and administration of D.S.P.I. be explained to students in their final year, in addition to being included in dental convention programs across the Dominion. In this way, it is hoped that the use of the Post Payment Plan will increase slowly.

I would like to extend my congratulations to members of the Dental Services Committee and D.S.P.I. Mr. Jackson and his assistants have accomplished great things over a short period.

A sub committee of the Health Insurance Studies Committee of the C.D.A. is presently attempting to draft a Prepayment Plan. Such a program is both necessary and desirable. It is hoped their considerations of this difficult problem will receive the necessary heavenly inspiration.

Fluoridation

The national picture indicates that over the past year, several communities have decided to fluoridate their water supply, but the rate of acceptance of this preventive measure is slower than it has been previously. In Ontario, the advance of this program has been checked and awaits the report of the Ontario Fluoridation Investigating Committee. Your Board as well as the C.D.A. and the O.D.A. presented briefs to this committee supporting our policy of water fluoridation. We trust that the recommendations of this Investigating Committee will be based on scientific findings. Those of us who practise in an area, fortunate enough to have fluoridated water, can vouch for its benefits from clinical observations. It is in situations of this nature when we know how fortunate we are to have an enthusiastic vigilant group of scientific dentists conducting our research. Any assistance directed to them is money well spent.

Public Relations

For years, we have been attempting to get a program of public relations functioning. The field was so large, and our resources so small that it proved a difficult task. Dr. Hurton made a very fine report at the fall meeting. One of his observations was that there are two kinds of public relations: One—internal (the dentist and his assistants); Two—external (those outside the profession). One is directly related to the other—strengthen one and the other automatically becomes stronger.

Many events took place in the past year which put dentistry to the fore. Some helped our external public relations and some unfortunately did otherwise.

The Official Opening of our new Faculty of Dentistry was one which improved dentistry internally, externally, locally, nationally and internationally. Truly, our school is something every graduate can be proud of. Dentistry has increased in stature when a university will provide such a magnificent building and equipment to aid the teaching of dental sciences. Dean Ellis and his associates on the Faculty contributed hundreds of hours of concentrated effort to achieve the end result, the finest Dental School in the world.

Heartiest congratulations!

It is said we start to grow old the minute we are born. So also our new faculty building will continue to undergo changes to meet the needs of a progressing profession.

Our external public relations have been such that a demanding public has been dissatisfied with our efforts in rendering dental services to them. They continue to exert pressure on governments to make a change. In a democratic country when a change is demanded a change will eventually be made. This does not follow that the results will be entirely what is envisioned. It is our duty to see that, in so far as we are able, the results are progressive and for the benefit of the patients and the profession. The reasons for this situation are many and too long to set down at this time but suffice to say that they are of such importance that at the last Executive Meeting of the C.D.A., the President, Dr. W. G. McIntosh

saw fit to present to the committee a goal for dentistry. I would like to include here an excerpt from Appendix X of the Executive Committee meeting. This very clearly shows the necessity for reassessment of our position.

1. Conclusions of Dr. Taylor made after a comprehensive review of the practice of Medicine in Canada.
 - (1) Present inability to serve more than a small fraction of the population does present a real problem.
 - (2) The problem is going to be met—if not by medicine by governments or other agencies.
 - (3) The final solution will be better if medicine co-operates in the planning.
 - (4) The sooner a program is worked out and put into operation the better for both public and profession.
2. The same principles apply to the practice of dentistry and inability to serve a large enough percentage of our population is the chief problem.
3. It appears to be impossible to solve this problem by a continuation of present methods.
4. The only solution appears to depend on
 - (1) The efficient use of auxiliary personnel.
 - (2) More and better use of preventive measures.
 - (3) Research—particularly in preventive fields.
 - (4) An accurate knowledge of the country's needs for dental service.
 - (5) The establishment of a pre-payment plan to assist those in the lower income brackets.
 - (6) Welfare plans to assist the indigent.

This situation does not apply only in Canada but elsewhere as well. As I am writing this a meeting has been called for May 6th and May 7th of the Executive Committee of the C.D.A. to meet with representatives of the A.D.A. and this problem will be top among the subjects under discussion.

The efficient use of auxiliary personnel is a subject which is causing editorial comment in some of our dental journals, and proposals are made that the training of such personnel be part of the duties of the profession. If this were attempted, it would mean co-operation at the university level and this is why I stated our new school may need to consider even now changes to educate dental personnel differently from that for which it had been designed.

Dentistry is one of the most progressive professions, but it is possible that due to the many obstacles which it has encountered, the external part of our public relations is not aware of this. In other words if our public relations were such that we could portray dentistry offensively rather than defensively, we would have accomplished a great deal. A

very good example would be our very successful participation in Mediscope '59. The efforts of our confreres in charge of the dental booth were of such high quality that the profession profitted immensely in many ways, public relations being one of them. We the Board were reluctant to spend money on this project, particularly at the time when we were operating on a deficit. However, we should be able to learn from this successful venture that to change our public relations from the defensive to the offensive will require some financial support.

Finally on public relations, it has been the experience that commercial public relations people have not benefited dentistry in the past. It seems this problem can best be handled by those who have a dental background. The Canadian Dental Association has now established a Bureau of Public Information with the Deputy-Secretary, Mr. Ken Croft, in charge. As you know the C.D.A. has been instructed by official motion to augment its staff in the legal and economic field. Dr. Gullett has been fortunate in securing the services of Miss Isabel Boyd, a graduate of the University of Toronto in Political Economy, to head a department of Economic Research. It is felt that we the profession of Dentistry must have a background of authentic facts and information to assist us in our deliberations.

Secretaries' Conference

This year also marked the first Secretaries' Conference which was regarded by all who took part therein, a huge success and a great step forward. Our Secretary's Report will fill you in on the details.

Conclusion

The year 1959-1960 has been a very active and progressive year for Dentistry. May our decisions at this annual meeting be such as to speed our progress.

ACTION

Report adopted.

REPORT

It is a privilege to present my fourth annual report for your consideration.

1. Hospital Relationship

In the spring of this year your Secretary was contacted by the General-Manager of the Ontario Hospital Services Commission with a view to assist in the establishment of some regulations relative to the admission of patients for dental treatment in hospitals. In early March I met with the Manager of the Hospital Claims Division and its Medical Consultant to discuss the extent of benefits which should be provided by the Commission for dental treatment in hospitals.

The Commission had abundant evidence to indicate that in certain localities of the Province hospitals were being somewhat abused by over-utilization. The Commission wondered why it appeared so necessary in certain geographic areas to employ hospitals so extensively for dental services while in others almost no use was made of hospital facilities at all.

It was realized that no stipulated set of regulations pertaining to extent of benefits would ever be satisfactory in all instances but after discussion certain proposals were made which were eventually presented to the Board in letter form.

Following receipt of the proposals from O.H.S.C. your Secretary met with the Hospital Dental Services Committee of the Canadian Dental Association and following these deliberations communicated again with the Commission.

On March 17th, the following proposals were offered to assist the Commission in meeting the obvious need for dental services in hospitals under certain conditions and at the same time providing a mechanism by which abuses might be minimized:

1. Other than for medical complications no coverage need be provided for admission for extraction of seven teeth or less.
2. For the extraction of eight or more teeth, two day's hospitalization should be allowed and, if the Commission considers it desirable, if the patient is over 65 years of age up to three day's care be provided.
3. For all cases where there are medical complications or where major oral surgery is involved a full number of days necessary for treatment should be allowed provided full and acceptable reasons are given to the Commission in writing and the case has been cleared by the Commission's Medical Consultant.

4. Hospitalization should be provided for cerebral palsied and mentally retarded children and the cases should be accepted for both general dentistry and extractions for whatever period is indicated.

The Commission was also concerned relative to the admission of patients for fillings where there do not appear to be medical complications. I expressed the view that such admissions should indeed be rare but that it is conceivable for an office environment not to be conducive to the provision of good dentistry for very young children or for children who present an almost impossible management problem.

Also your Secretary reiterated a previous view that if dental services existed in hospitals somewhat in the fashion as outlined in our proposed regulations there would be a built-in disciplinary oversight which could be extremely valuable. I expressed the belief that if dentists could be appointed to hospital staffs much on the same basis as medical appointees wherein the academic, professional, ethical and moral qualifications of the applicant are considered we could, to a very large extent, eliminate many of the abuses which we must recognize exist to-day.

One further suggestion was made to the Commission. It was pointed out that for many years our services which are provided under the Workmen's Compensation Act of Ontario have been greatly enhanced because of the availability of a dentist to act in the capacity of a Consultant. Obviously dental claims are not sufficient in number to justify a full-time appointment but the Workmen's Compensation Board does utilize the services of a most efficient practising dentist who is available to the Board when the Medical Aid Division requires his advice. The establishment of such a post within the Ontario Hospital Services Commission might well prove to be most beneficial in attempting to mediate many of the claims which the Commission is called upon to assess. If the Commission considers this suggestion favourably I offered the co-operation of the Board to assist the Commission in the selection of an appropriate individual.

On May 10th, 1960, the Board received a communication from the Ontario Hospital Services Commission to the effect that the four proposals outlined above have been approved. No action has as yet been indicated relative to the proposal to appoint a Dental Consultant to the Commission.

Your Secretary has been impressed with what he considers has been a most reasonable attitude on the part of the Commission. It is unfortunate that the very heavy demands upon the members of the Commission have made it impossible for them to have the time to review all the General Regulations made pursuant to the Public Hospitals Act. The Medical-Legal Consultant has assured me that the very great demands upon the Commission have absolutely precluded not only a consideration of the regulations under the Public Hospitals Act but under the Private Hospitals Act as well. It may be, then, some time before the General Regulations are amended, hopefully, to include more extensive dental provisions.

In the meantime Public General Hospitals in Ontario whose Boards authorize a dental service are permitted to develop By-Laws for such services. Our Public General Hospitals should be encouraged to make provision for dental services and our professional confreres should be urged to co-operate in such developments.

2. Pre-Payment Plans

It has been your Secretary's privilege to serve on a special Sub-Committee of the Health Insurance Studies Committee of the Canadian Dental Association for the past several months. This Sub-Committee was assigned the task of developing a model of a pre-payment plan for dental services. This, the Committee has been able to do.

It would be redundant within this report, to attempt to outline the deliberations of the Committee which made possible the pertinent conclusions. Suffice it to say that the principles respecting pre-payment plans have been reviewed and modified somewhat, a model has been developed and estimated premiums have been determined. The premiums, of course, depend almost entirely upon the benefits existing within the plan, the fee schedules which apply to those services, and the percentage utilization by the beneficiaries.

In my opinion sufficient exploratory work has now been done to make the institution of a pre-payment plan both desirable and practical. In the Province of Ontario there exists legislation entitled "An Act Respecting Pre-Paid Hospital and Medical Services". On the basis of this legislation the Royal College of Dental Surgeons of Ontario could not, in itself, establish a pre-payment plan for dental services. Such a plan can only be brought into being by "any company or corporation incorporated for the purpose of establishing, maintaining and operating a hospital or medical service on a non-profit pre-payment basis . . ." Thus it will be necessary before a pre-payment plan may be instituted in Ontario to incorporate an Ontario Dental Services Board or similarly-named agency.

A Board, so incorporated, could effect necessary policy and an administrative vehicle already exists, D.S.P.I., to which administration could be assigned.

It is therefore recommended that authority be provided to incorporate an Ontario Dental Services Board for the purpose of instituting a pre-payment plan or plans within the Province of Ontario and that individuals be selected to seek such incorporation.

3. Recruitment

The Secretary is continuing to act as representative of the Board on a Recruitment Committee essentially organized by the Dental Alumni Association but in which the Alumni, the O.D.A., the R.C.D.S. and, to some extent, the C.D.A. participate.

All correspondence relating to the broad fields of recruitment and placement received in the offices of the various participating organizations is forwarded to the Dental Alumni office for distribution to the

appropriate destination. This provides an overall understanding of the various activities being performed by each organization in this area of concern. This Dental Alumni office has been established within the Faculty of Dentistry and there is some secretarial assistance to help facilitate activities there.

The specific problem of recruitment is being considered in two separate divisions—that concerning the profession and that relating to the public. It was agreed that it would be the general responsibility of the R.C.D.S. Board to fulfill those functions which bring to the attention of the profession the need for and desirability of recruitment activities by each of the members of the profession. The Dental Alumni Association will attempt to deal with matters which have a relationship to the public such as developing a roster of speakers, making provision for printed material and the establishment of a list of counsellors to meet requests of high school people and others. The Ontario Dental Association through its Dental Public Health Committee has been and will continue to be primarily concerned with placement services.

Unquestionably, recruitment activities have been greatly intensified during the past year and already it seems reasonably certain that there will be a greater number of applications both for the course in dentistry, itself, and for dental hygiene.

The Committee is still convinced that the most important person in the entire program is the individual practising dentist. It is my hope that within the local dental societies there can be a continuing and growing interest in this most important area of concern.

4. Fluoridation

The Ontario Fluoridation Investigating Committee has only recently concluded its public hearings on the subject assigned to it by the Government of Ontario. While, at this time, it is quite impossible to predict the precise nature of the report of the Committee it would seem almost inconceivable to anyone who participated in these hearings that the recommendations could be anything other than unqualified support for fluoridation as a sound and practical public health measure.

The Royal College of Dental Surgeons of Ontario joined with The Ontario Dental Association and presented a Brief to the Committee. This Brief was written by your Secretary and came under the constructive scrutiny of Drs. Gordon Nikiforuk, K. J. Paynter, R. M. Grainger, and Glenn T. Mitton. I am indeed grateful to these gentlemen for their most helpful and constructive observations.

The Brief consisted of a relatively short statement outlining the essential facts concerning this public health measure. No attempt was made at an extensive documentation of the evidence pertaining to the efficacy and safety of water fluoridation because we were cognizant of the fact that the Ontario Fluoridation Investigating Committee had sought and had obtained such scientific information in four major reports.

The Appendix to the dental profession's Brief was perhaps somewhat unique. Your Secretary interviewed several of his counterparts in assoc-

iated professional organizations and in all instances received the fullest possible co-operation. This co-operation is reflected in the Appendix where official statements from these organizations can be found, reproduced on their own letterhead and signed by their own Secretaries and/or other officers. The effect of this method of presentation has been to remove any possible doubt that these agencies do, in effect, strongly support the fluoridation of communal water supplies.

Many congratulatory communications have been received and requests came from three libraries for the inclusion of this Brief.

The Public Hearings commenced on May 2nd. Previous to the Hearings each organization which submitted a Brief received a memorandum from the Committee outlining the procedure to be followed. The Hearings were divided into six basic phases and experts were retained by the Committee to deal with all facets with the exception of the last one that being "Personal Rights". The experts retained by the Committee were questioned at great length by the Committee's Counsel and following the termination of his interrogation the experts were then exposed to questions from anyone in attendance who wished to cross-examine.

Your Secretary has never been as proud to be a dentist as when he witnessed the presentation of Dr. Gordon Nikiforuk, Dr. K. J. Paynter and Dr. R. M. Grainger. These dentists, all members of the Research Division of the Faculty of Dentistry, not only prepared probably the finest report of its kind available in the world, but conducted themselves in a highly effective fashion throughout their portion of the Hearings. The dental profession owes a great debt of gratitude to these men.

Perhaps the most startling aspect of the entire Hearings was the almost complete lack of public interest. When the Hearings opened on Monday, May 2nd, exclusive of the reporters and Committee and staff, only twenty-seven people were in attendance of whom some seventeen or eighteen were people known to be in favour. The anti-forces obtained professional anti-fluoridation lobbyists from the United States and these were supported by local persons who have been known for some years for their opposition to this measure.

It remains now to await the results of the Committee's deliberations. Unquestionably it will be some time before all the testimony is prepared in report form and we can only hope that the report will be available for the next session of the Provincial Legislature.

I believe that all dentists can take justifiable pride in the professional concern and responsibility exhibited by our profession in its efforts to encourage the adoption of a measure which has been proven so conclusively to be in the interests of the public good.

5. Mediscope '59

Canada's first health science exposition, Mediscope '59, was, by all indications, an overwhelming success. The Ontario Medical Association merits great acclaim for its vision and energy which brought this exposition into being.

Our profession played a significant role in this exposition and Dentistry's exhibit was adjudged by all who saw it as one of the top quality displays in the entire exposition. It is impossible to estimate, precisely, the number of persons who passed through the exhibit but close to 25,000 Red Cross Dental Booklets were received by persons who visited the display. Certainly a number greatly in excess of that did present themselves at our booth.

The exhibit was manned at all times during the entire week by at least two dentists, a dental hygienist, and a dental assistant. Each dentist was asked to provide his reactions in writing by replying to a questionnaire and it was unanimously recorded that the exhibit and the exposition were outstandingly successful.

This booth is presently being stored in R.C.D.S. Headquarters in the hope that other societies might be able to utilize it at similar affairs. A small section of the display relating to "Careers" has been reserved by one society for use at a Careers' Exposition.

The exhibit was financed by a \$1,000.00 grant from the Ontario Dental Association, a \$500.00 grant from the Academy of Dentistry, Toronto, and an amount of \$3,510.00 from nine members of the Canadian Section of the American Dental Trade Association. The remaining \$1,798.48 was provided by the Royal College of Dental Surgeons of Ontario. Our profession should be most grateful to our friends the Dental Dealers and Dental Manufacturers who made this participation possible.

It is my belief that it has been emphatically demonstrated the public is greatly interested in matters of this nature and I hope that we shall have a similar opportunity in the future to participate in like fashion. Present indications point to another and more extensive Mediscope sometime in 1961 and it would appear judicious to give some cognizance to planning, both content and financial.

6. The Dental Technicians' Act

Notification has been received that the Governing Board of Dental Technicians is seeking extensive amendments to the Dental Technicians' Act and as well have proposed several amendments to the Regulations made pursuant to the Act. The effect of the proposed amendments to The Act is as follows:

- Section 2(2) —provides for the addition of the past chairman to the Board for a one year appointment.
- Section 3-1(a) —provides for an increase in the limit of the registration fee from \$25.00 to \$75.00.
- (c) —provides for an increase in limit of annual renewal of registration from \$25.00 to \$75.00
- (f) —provides for imposition of fine in addition to cancellation or suspension of registration for misconduct or incompetence.
- Section 4(1) —provides for the addition of initials "R.D.T." to designate any person registered under The Act.

- Section 6(3) —provides that no person, other than a registered dental technician, be permitted to engage generally in the service of dentists or two or more dentists unless
- (1) all such dentists are practising together in the same suite of offices in one building
 - (2) all such dentists are practising in association with one another and jointly sharing the general expenses of their practices
 - (3) no more than 3 dentists are so associated
 - (4) any such person is a salaried employee of such dentists and recorded as such with the Income Tax Dept. and the Unemployment Insurance Commission
 - (5) no dental laboratory services are furnished by the association or by the employee for any person other than the members of the association.

- Section 6(4) —This section would make effective subsection (3) only from the day of proclamation and any person engaged in the work of a dental technician contrary to subsection (3) shall not be affected thereby so long as he continues to be engaged in the work of a dental technician provided he shall not thereafter expand or in any manner change the circumstances or conditions of his engagement except as permitted by subsection (3).

- Section 7 —provides for incorporation as long as
- (1) the majority of the common shares are held by a registered dental technician,
 - (2) at least one member of the Board of Directors is a registered dental technician, and
 - (3) a registered dental technician is in charge at all times, of actual operation.

- Section 9 —provides increases in penalties for convictions under The Act. The first offence has been increased from \$50.00 to \$100.00, the second offence from \$100.00 to \$200.00, and the third offence \$200.00 to \$300.00

- Section 10 —There is a change in wording for the purpose of a greater clarification of meaning.

- Section 12 —provides that any penalties recovered under The Summary Convictions Act are to be paid to the Secretary-Treasurer of the Governing Board of Dental Technicians.

Your secretary has carefully perused all the proposed Amendments to the Regulations made pursuant to The Act and it can be stated that all amendments are indigenous to the Governing Board of Dental Technicians and in no way affect the dental profession. It is recommended that the Regulations be approved.

The two proposed amendments to The Act which will certainly have pertinence to members of the profession are Section 6(3) and Section 7.

Unquestionably the intent of the Dental Technician's Act as it presently exists is that no person other than a registered dental technician should serve more than one dentist unless the two or more dentists are partners or similarly associated. The words "similarly associated" have defied precise interpretation and thus the basic intent of this section has been unenforceable. The proposed amendment would clarify the language presently being used and would prohibit a person, not a registered dental technician, from engaging generally in the services of more than one dentist except under the well-defined conditions outlined in Section 6(3) above.

The original proposal made no provision for two or three dentists practising in association but stipulated that the dentists must be associated in a registered partnership. Most certainly there is no trend in dentistry toward registered partnerships because any advantages which accrue from registered partnerships are, in my opinion at least, more than offset by the increased liability which each partner assumes.

Section (6)3 as presently proposed appears most reasonable.

The new Section 7 would prohibit a dentist from having a controlling interest in the operation of a commercial dental laboratory. In my opinion a dentist registered under the Dentistry Act should not also be engaged in the commercial laboratory business. It is difficult to disagree with the amended Section as proposed.

7. Training Course For Dental Technicians

In the fall of 1959 an informal discussion between a Registered Dental Technician and a Member of this Board resulted in a contact between the Technician and your Secretary relative to the feasibility of the provision of a course of study for dental technicians.

Following this communication your Secretary contacted the Secretary of the Governing Board of Dental Technicians relative to the possible establishment of a Committee comprised of representatives of the Governing Board of Dental Technicians and the Royal College of Dental Surgeons of Ontario.

The Governing Board at a subsequent meeting agreed with the proposal and appointed Messrs. Samuel Sweet, Walter Wood, Charles Spence, and Keith McKandy as the representatives of the registered dental technicians. It is my understanding that this Committee is already at work attempting to explore various avenues of pertinent information.

In view of the obvious desire on the part of the Governing Board of Dental Technicians to co-operate in this regard it is suggested that appointees be designated to represent this Board on such a Committee.

It seems perfectly obvious to all parties concerned that some training course is mandatory and it seems highly appropriate that the necessary action be initiated to attempt to develop such a program.

8. Emergency Service

An attempt has been made to determine the availability of Emergency Care Services established by local dental societies throughout the Province.

Some nine societies have more or less established formalized emergency service programs. A fairly constant pattern is evident in that there is some answering agency such as a Telephone Answering Service, a Nurses' Registry or Emergency Departments in General Hospitals. Some societies publish the availability of the service in telephone directories and in newspapers while others feel that the service might be abused if such were done.

The following societies have established Emergency Services:

- | | |
|----------------------------------|------------------------|
| 1. Academy of Dentistry, Toronto | 6. London and District |
| 2. Durham-Ontario | 7. Orillia |
| 3. Greater St. Catharines | 8. Sault Ste. Marie |
| 4. Hamilton | 9. Thunder Bay |
| 5. Lambton County | |

There is no question but that the availability of such a service enhances the status of dentistry both in the regard of the public and in the view of our medical confreres. It is my belief that those societies whose geographic distribution makes an Emergency Service feasible should be encouraged to develop such a program.

9. Liability Insurance

Approximately 1,100 Ontario dentists are now participating in the Comprehensive Group Liability Insurance Program developed for the Royal College of Dental Surgeons of Ontario. Approximately 200 dentists from the Provinces of Manitoba and Alberta are also sharing in the advantages of this Program. Recent correspondence indicates that both Saskatchewan and British Columbia are somewhat interested in the Plan.

The claims' experience to date has been most satisfactory. Since December of 1958 until the present time some eight claims have been honoured to an aggregate of \$1,259.18. Two of the eight claims were for property damage.

In view of this favourable experience a further enhancement has been achieved and effective from the date of renewal, October 1st, 1960, an increase in the property damage coverage from \$1,000.00 to \$5,000.00 will

be implemented with no increase in premium. With this improvement we are now approaching the point where maximum protection can be provided at minimum cost and with reasonable margin for contingencies. If satisfactory experience continues throughout the current year consideration then may be given to a modification of the Plan whereby the coverage can be offered on a three year basis and a further dividend realized by the resultant premium discount. It is our understanding that if such is possible then the participant may choose between a one year premium and a three year premium.

Steps have been taken to communicate again with the profession in order to encourage members, in their own enlightened self-interest, to participate in this most excellent program.

10. School Accident Insurance

Shortly after the Annual Meeting of the Board in 1959 we were informed that certain amendments had been made in respect to dental coverage in school accident insurance. Previously, it will be recalled, the applicable insurance applied only in the fifty-two week period subsequent to the injury sustained by the pupil. The unrealistic nature of this regulation has been recognized and now the coverage has been broadened to include some allowance for contemplated dental expense.

A clause has been inserted which states in effect that if the age of the insured is such that the dental development is not sufficient to permit such treatment of the dental injury to be completed within fifty-two weeks following the date of the accident the insurer will pay upon receipt of a satisfactory report from the attending dentist, within ninety days after the date of the injury, which sets forth all pertinent facts relating to the damage sustained by the teeth and reasons precluding completion of treatment thereof within fifty-two weeks following the accident, the amount which the attending dentist estimates will be the total ultimate cost of completing the necessary treatment subject, of course, to the limits in the policy.

While this constitutes a most significant improvement in this coverage it is still strongly recommended that dentists effect whatever arrangements are necessary with the parent and not assume that the coverage will be adequate to meet the needs of the child.

11. Hypnotism Control Act

The Royal College of Dental Surgeons of Ontario has been provided with a proposed bill which has been presented to the Minister of Health by the Medical-Legal Consultant to the Ontario Hospital Services Commission on the subject of hypnotism control.

Essentially, if the Bill is presented and passed, it will make it illegal for any person, other than a legally qualified medical practitioner, a dentist licensed under the Dentistry Act, or a person holding a Doctorate in Psychology from a reputable university to use or attempt to use hypnotism for the treatment, cure or alleviation of any disease or disorder or of the symptoms or effects thereof or for any psychological irregularity,

disturbance, or malfunction or for any tic or undesirable habit or for any other therapeutic purpose. No person will be able to give for entertainment, instruction or any other purpose an exhibition, demonstration or performance in which hypnotism is used or attempted or in connection with an entertainment or other gathering to which the public are admitted whether by payment or otherwise.

I am convinced that this is a most progressive piece of legislation and its adoption should be encouraged by this Board for the welfare of the public. If the Board agrees its views should be made known to the Prime Minister, the Attorney-General, and the Minister of Health.

12. Secretaries' Conference

On January 11th and 12th, 1960, at the Headquarters of the Canadian Dental Association, the first Annual Conference of the Secretaries of Provincial Dental Organizations was held.

Each Province was represented and it was the general opinion of all in attendance that this meeting was one of the most beneficial of any in which we had ever participated.

Dr. Don W. Gullett was elected Chairman of the Conference and he conducted it in his usual masterful style.

The first presentation was made by your Secretary entitled "The Structure and Administration of the Office of Registrar-Secretary". This presentation consumed the major part of the opening day and elicited extensive discussion. A thorough description, with exhibits, of the operations carried out at R.C.D.S. Headquarters was interspersed with detailed discussion. Each Secretary was provided with a book containing a point by point outline of all routine office procedures accompanied by the appropriate forms and documents. A tour of the R.C.D.S. building followed and it is hoped that this presentation was of some benefit to those in attendance.

The Editor of the Journal of the Canadian Dental Association emphasized the role the Provincial Secretaries could play relative to provincial participation in Journal affairs.

Mr. W. E. Jackson, Secretary-Treasurer of Canadian Dental Service Plans Incorporated, outlined the role of D.S.P.I. in the socio-economic aspects of Canadian dentistry.

Mr. H. E. Trenholme, Manager of the Pension Trust Department of the Royal Trust Company, Toronto Branch, described the Canadian Dental Association's Retirement Savings Plan. Following his presentation all Secretaries agreed to attempt through a communication to their members to encourage participation in this Plan.

An extended discussion followed on auxiliary services with the Secretaries of the Western Provinces, particularly, being most active in this discussion.

The Deputy Secretary of the Canadian Dental Association, Mr. K. L. Croft, discussed the administrative relationship of the Provincial Corporate Members with the Canadian Dental Association.

Toward the conclusion of the Conference the following resolution moved by your Secretary and seconded by Dr. George M. Dewis of Nova Scotia was unanimously adopted:

"Whereas it is the unanimous opinion of all Secretaries in attendance at the First Secretaries Conference at Canadian Dental Association Headquarters, January 11th to 12th, 1960, that the Conference was most successful, and

Whereas opportunity was provided to share information and views on a wide variety of subjects having pertinence to the profession of dentistry in the respective provinces, and

Whereas there are many areas of interest and concern which could, in subsequent meetings, be considered and discussed and from which significant value could accrue to the participating Secretaries thus enabling them to discharge the duties and responsibilities of their offices more effectively, therefore be it resolved

THAT the Secretaries in attendance at the First Conference of Secretaries strongly urge that a Conference having similar objects and purposes be conducted annually, and further

THAT the Corporate Members of the Canadian Dental Association be requested to make the necessary arrangements for an annual repetition of this meeting".

13. Course In Dental Assisting

It now appears obvious that the course in Dental Nursing established within the Faculty of Dentistry of the University of Toronto will not provide even a very small proportion of the auxiliary services required for the profession. The Ontario Grade XIII admission requirement has almost eliminated candidates for this course.

Considerable investigation has been made to attempt to develop a course for dental assistants which may provide at least a partial answer for the profession's requirements.

Consideration has been given to the establishment of what might be tantamount to a pilot course within the Evening Course Program at Central Technical School in Toronto. Your Secretary met with Mr. Graham M. Gore, Assistant Superintendent of Toronto Secondary Schools to discuss this possibility.

Seldom have I met with anyone who evinced such co-operation as did Mr. Gore. He stated that under the terms which I proposed there should be no difficulty whatsoever, in establishing such a course within the framework of the existing program.

The R.C.D.S. Board would be required to request the establishment of a sponsored course in Dental Assisting and the R.C.D.S. would be required to provide, without charge to the Board of Education, lecturers and special equipment. The fee which would be assessed by the Evening Course Program would be \$10.00 to each young lady admitted to the course and this sum represents only a token payment toward the cost of

the Board of Education providing a special teacher to act as co-ordinator and, of course, the physical facilities within which the program would be conducted.

It is suggested that the course be conducted two evenings per week commencing October 1st and terminating March 30th. There would be an examining procedure and a certificate could be given which would be signed by the Principal of Central Technical School and the Chairman of the Toronto Board of Education. This would be supplementary to a certificate which the R.C.D.S. Board should provide.

The admission requirements and the applicable fees may be established by the sponsoring organization. From the aggregate fee collected \$10.00 for each registrant would be forwarded to Central Technical School.

Mr. Gore stated that with the facilities available a limit on the class from eighteen to twenty students would be required.

Your Secretary has met with the Educational Committee of the Ontario Dental Nurses' and Assistants' Association and there appears to be reasonable enthusiasm for such a course. The Educational Committee of the O.D.N. & A.A. has presented a Brief which appears in Appendix E.

It is suggested that Grade XI or its equivalent be established as a basic admission requirement and that the length of service as a dental assistant could be considered by the Admissions Committee for partially providing a possible academic equivalent. Also it was felt that at least an 80% attendance record be required before entitlement to write the examinations be granted. A preliminary discussion with Dean Ellis leads me to believe that it may be possible to utilize Faculty facilities on certain occasions for some practical demonstrations.

It is therefore suggested that the R.C.D.S. Board create a committee to establish a course for dental assistants within the Evening Course Program at Central Technical School, Toronto. If such a course is to proceed this fall it will be necessary to make application immediately subsequent to this Board meeting.

There are many other locations in the Province of Ontario where evening courses are conducted and if a suitable prototype could be established in Toronto then it follows that other geographic areas might be persuaded to establish similar arrangements. If four or five of these courses could be conducted annually throughout the Province it can be seen that there would be a significant contribution to the number of at least partially trained dental assistants and assistants, incidentally, who would be receiving their training under professional sponsorship.

14. Pension Plan for Dental Nurses and Assistants

At the Annual Meeting of the Board in May of 1959 the Secretary was authorized to distribute a questionnaire to the dentists of Ontario to ascertain their interest in establishing a pension plan for their assistants.

The number of respondents was insufficiently large to warrant the R.C.D.S. making further efforts. Only 127 dentists expressed a desire for the R.C.D.S. Board to make further efforts toward the establishment of a contributory pension plan for dental office assistants.

The questionnaire and the names of the respondents were in turn forwarded to the Canadian Dental Association to determine whether or not our National Body would wish to pursue the matter on a country-wide basis. Apparently such a plan has been brought forward for discussion to the C.D.A. on at least two previous occasions. There have been interviews held between the C.D.A. office and representatives of the Canadian Dental Nurses' and Assistants' Association on the subject. Communications have also been received by the C.D.A. from individual dentists that some arrangement be made. The Canada Life Assurance at one time expressed some interest in the matter and indeed investigated it but dropped it at some stage.

Any progress, if any, in this regard, made by the Canadian Dental Association would undoubtedly be reported to the next meeting of the Board of Governors.

15. Co-Operative Seeks to Practise Dentistry

In the fall of 1959 the Board was informed by the Deputy Provincial Secretary that a Charter for Incorporation was being sought by the "St. Paul's Patients' Preventative Dental Co-Operative" of Alliston, Ontario. The object of the proposed corporation extended not only to the payment of dental bills for members and their dependents but also to the actual practice of dentistry. In effect, the Co-Op would be operating the practice of dentistry with the participating dentist simply an employee.

As the provision of the objects, with the exception of the insurance clause, were clearly in conflict with the provisions of the Dentistry Act, the Board vigorously opposed this application. The Solicitor of the Board and your Secretary met in the office of the Deputy Provincial Secretary together with the representatives of the Co-Operative seeking the charter. The Deputy Provincial Secretary and the two Solicitors in attendance from his Department agreed with the position taken by the Board and suggested to the applicants that it might be possible to incorporate under only one object rather than under the six as stipulated. The object, to which no objection could be taken, would make it possible for the Co-Operative to enter into a contract with members which provided for the pre-payment of dental accounts for such members and their dependents.

The matter then became one of insurance and presumably should the applicants wish to proceed approval would have to be obtained from the Insurance Department. To date we have not heard of any charter being granted on this insurance basis.

16. College of General Practice of Dentistry of Canada

There has been considerable discussion in several quarters during the past year of the need to encourage graduates in dentistry to maintain high standards of professional care. Suggestions have been made on several occasions that the issuance of a licence should be contingent upon the presentation of evidence that the dentist is both maintaining and developing his knowledge of the art and science of dentistry.

A few moments reflection upon the problems which would thereby be engendered rather precludes this suggestion as a practical one. In our view it is a somewhat negative measure which while perhaps theoretically possible becomes, from a practical standpoint, entirely unworkable.

Our sister profession of medicine has in years gone by given sincere consideration to the same problem. The College of General Practice of Medicine of Canada has been created and membership in this College is a privilege conferred upon those who give evidence of attending acceptable courses of study and meet the other requirements of the College. This, in your Secretary's view, is a positive means of elevating the status of the general practitioner of medicine.

Perhaps the time has come that we in dentistry should give consideration to a similar type of program. It would seem to be impractical to develop such an organization on a provincial basis but it well might be that a national approach could stimulate a great deal of interest in our profession. If the Board considers there is any merit in this proposal perhaps some recommendation could be forwarded to the Canadian Dental Association for at least some discussion at the next meeting of the Board of Governors.

17. Registration of Dentists Not Requiring Licensing Examination

During the Secretaries' Conference your Secretary learned that in some Provinces no candidate is ever registered until such candidate has made a personal visit to the office of the Registrar. In Ontario we have not required this procedure but have simply been prepared to accept an application completed in its entirety without the need of the candidate presenting himself in person.

As an example a graduate from a dental school in Canada other than the Faculty of Dentistry of the University of Toronto who possesses the Certificate of the National Dental Examining Board of Canada can simply forward to the Registrar all the pertinent documents and the registration and licence fees and everything being in order, be admitted to the Register. To the best of my knowledge no problem has ever arisen from this procedure.

Unquestionably it would be easier to present fraudulent documents through the mails as the Registrar could certainly not compare the photographs on the Application with the face of the candidate. Also the opportunity of informing the applicant of many professional considerations which should be pertinent to him is minimized somewhat when correspondence must be employed for that purpose.

This matter is brought to the attention of the Board for the Board's direction.

18. Transcripts for Specialty Courses

It is difficult occasionally to obtain from certain Canadian Dental Schools, a transcript which reports upon attainments within a specific course of study which a candidate for certification in Ontario has com-

pleted. Without a transcript it is virtually impossible to consider the academic acceptability of any candidate. In one University, particularly, the comment has been made that as the course in question is a diploma course it is impossible to supply transcripts. The reason for this, to me at least, is somewhat obscure. It is suggested that the Board recommend to the Council on Dental Education of the Canadian Dental Association that each Canadian Dental School which purports to conduct a course of study for the academic qualifications necessary for certification in a particular specialty provide transcripts for any Provincial Board to which a candidate makes application for certification.

19. Board Elections

It will again be necessary this fall to conduct a biennial election for positions on the Board of Directors of the Royal College of Dental Surgeons of Ontario. For this purpose it is required that Scrutineers be appointed in accordance with By-Law No. 14, Section 13.

20. Dentist-Patient Ratio

During the year a distribution map was developed which indicates the number of dentists practising in Ontario in their respective locations. This map is amended monthly at the time of the production of the monthly Change in Register. Available with the map is the current issue of the Municipal Directory which provides the most up-to-date population figures.

Attached to this report as Appendix D is a breakdown of the dentist-patient ratio according to counties, which reveals areas of heavy and light concentrations.

There is a discrepancy between the total figures shown and the audited membership upon which we base our grant to the Canadian Dental Association. The reason for this is that licences are issued on the calendar year and not on the fiscal year of the College which extends from May 1st to April 30th. Therefore any member who dies subsequent to the issuance of licences and prior to April 30th will be recorded in the audited membership but not in the actual membership reflected in these ratios.

The distribution map has already proven most useful as several students and candidates for specialization have closely studied this map to assist them in deciding upon appropriate locations for their practices.

It is quite true that these figures, in assessing the dental services available in communities, can only be utilized with other factors. The number of dentists is the total number possessing licences and does not take into account those Honorary Members who may be retired or dentists who for one reason or another are not engaged in active practice. It is a most significant aid, however, when it is necessary to consider distribution of dental personnel.

21. Licences Issued for 1960

Dentists

Licences Issued—Active	2324	
—Inactive	7	
—Honorary	107	
Total licences issued January 1 - April 30, 1960.....	2438	
Deceased since issuance	7	
Out-of-province	41	
Licensed dentists in Ontario	2390	2438
Increase in Licences issued over previous year 2431—2405=	26	

22. Additions

Graduates of University of Toronto	75	
N.D.E.B. Certificates	5	
Board Examinations	12	
Resumed Licence	2	94

Deletions

Deceased (Hon. 10+Act. 23)	33	
Retirements	10	
Did not renew '60 Licence	6	
Left Ontario	13	
On Post Grad. Course	6	68

ACTUAL INCREASE of Practising dentists over previous year 26

23. Dental Hygienists

On April 30th, 1960 the number of Dental Hygienists on the Register was as follows:

Registered to date	50	
Residing and Practising in Ontario	30	
Inactive but licensed	13	43

24. Licentiates Deceased — Honorary Members — Extramural and Extension Lectures

Appended to this report will be found a list of the Licentiates who died during the year ended April 30th, 1960. (Appendix A).

A list of proposed Honorary Members is presented to be added this year. (Appendix B).

The Extramural and Extension Lecture Service is presented in Appendix C.

Conclusion

Your Secretary continues to be privileged to represent the Board on the Council of the Faculty of Dentistry and on the Library Committee, Scholarship and Awards Committee, Admissions Committee and the Research Advisory Committee of the Faculty. As your Representative on the Senate of the University of Toronto it has also been my pleasant responsibility to serve on the Board of Dental Studies.

Again your Secretary is deeply appreciative of the devoted and sincere efforts of our Business Manager and Headquarters' Staff. Everyone associated at Headquarters diligently discharges responsibilities assigned to him. In turn I know I speak for the Staff when I express appreciation to the Board for the provision of accommodation which makes working at R.C.D.S. Headquarters so pleasant. It has been a privilege for all of us of the Headquarters' Staff to serve the Board and the members of the College during the past year.

LICENTIATES DECEASED

May 1st, 1959 to April 30th, 1960

	1918	Boyd, Archibald Wyldie	Kirkland Lake.....	Dec. 28, 1959

**Brief for the Education and Certification of
Dental Assistants
prepared and presented
by
The Ontario Dental Nurses' and Assistants' Association**

This brief, which we present on behalf of the Ontario Dental Nurses' and Assistants' Association and in response to your request has been formulated through a keen desire to co-operate in any way to alleviate a critical shortage of trained dental assistants.

We believe this problem warrants the immediate interest and attention of every member of the Dental Profession to facilitate a program of education and certification of Dental Assistants in the Province of Ontario.

The Ontario Dental Nurses' and Assistants' Association are grateful to the Royal College of Dental Surgeons of Ontario for the opportunity to present our views on the problem of education and certification of dental assistants in this province.

Chairman—Educational Committee

Mrs. June Cook, 86 Bloor St. West, Suite #715, Toronto 5, Ontario.

Committee

Miss Velma Wallace

Mrs. Irean Bruce
Mrs. Loretta Parry

Miss Sylvania Hazel

Benefits To The Dental Profession

- (1) A Certification Study Course would standardize the knowledge and training of dental assistants in the province. Trained employees serve as an inspiration to and encourage other employees in similar work to seek training to improve their status.
- (2) An approved Certification Course would give an assistant the opportunity to have a supervised dental education and still allow her to retain a salaried position in dentistry.
- (3) Although the standards of the University course of training for dental nurses must necessarily be high, the person with many attributes for becoming a competent assistant has been lost to the profession through the time and money involved in such a course.
- (4) The type of person applying for the position has deteriorated and coupled with the lack of dental education and training the standard of dental assistants has become progressively lower among new girls entering the profession.
- (5) The turn over of new personnel in offices would be lessened due to the fact that girls entering dentistry would have a goal to strive towards and feel that dental assisting was a worthwhile career with a future rather than a stop gap position.

- (6) The apprentice type training that was possible in dental offices in the past, is no longer practical in the dental offices of to-day with the result that an acute shortage is being felt all over the province.
- (7) The type of course proposed would reach a large number of persons in smaller cities, towns and regional areas who have not had the benefits of education available in the larger cities.
- (8) The increase of new graduates in dentistry in the very near future will accentuate the shortage of trained dental assistants, unless some method of education and training is found to keep pace with the demands of the present and those of the future.
- (9) Dental Public Health Education is becoming an ever-growing factor in modern dentistry. Here again properly trained dental assistants can be a valuable help on the dental team.
- (10) Unless there is an educational program for dental assistants sponsored by the proper source, unauthorized groups will take over this field and by their methods cause unfair criticism of the entire dental profession.

Findings Of The O.D.N. & A.A.

In Regards To Education And Training

- (1) Through past experience of our Association with our own members we have found that dental assistants keenly desire to improve their education and training with study courses.
- (2) New girls entering the profession have become very discouraged by the lack of training facilities and interest shown by the profession in educational problems.
- (3) Many new Canadians who have been employed in dentistry in other countries, are potentially fine dental assistants but have no source from which to learn the Canadian way of dentistry.
- (4) Dental Assistants in smaller cities and regional areas feel that their situations and problems are often neglected for the benefit of assistants in larger centres.
- (5) Our Association is aware of the necessity to educate and train the greatest number of girls in a minimum of time. The ideal method of a day course at the University has proved impossible. A substitute such as we suggest, would be a partial answer, reaching smaller cities, towns and regional areas in every section of the province rather than centralizing education in Toronto.
- (6) We suggest, that should an evening course be considered by the Royal College of Dental Surgeons, it be given a trial in Toronto for one year. At the termination of this first year, a review of the situation be made to ascertain the value of such a course.

Recommendations Of The O.D.N. & A.A.

- (1) A Certification Study Course with a fee, to be established by the Royal College of Dental Surgeons, which would include examinations and Certification Diplomas.
- (2) Suggested course of 108 hours, with 2 hours nightly, twice a week.
- (3) Qualifications for students wishing to take course,
 - (a) Formal education of grade XI or its equivalent.
 - (b) Certain natural aptitude for dental assisting.
 - (c) Minimum age limit of 17 years.
- (4) Candidates taking the course be divided into three categories.
 - Class (1) Assistants employed in ethical dental offices for a minimum of six months with grade XI or equivalent qualifications.
 - Class (2) Girls who have not been employed in dental offices, but who have a certain natural aptitude and meet the educational requirements.
 - Class (3) The dental assistants who have been employed in dentistry for fifteen years and who have ten years' consecutive membership in the O.D.N. & A.A.

Explanation of Class (1)

- (a) The students in this category to have preference if the classes are to be limited in numbers or a percentage of them be allowed in each group formed.
- (b) These students to sit for examinations at the completion of the 108 hours of study.
- (c) If successful the candidate would receive a Diploma of Certification and be titled a Certified Dental Assistant.

Explanation of Class (2)

- (a) The students in this category would have to complete the number of specified hours of study.
- (b) The above qualifications having been fulfilled they would be issued a type of "Interim Certificate".
- (c) After six months' practical experience in an ethical dental office or its equivalent—a probationary period—the student might apply and write the examinations.
- (d) If successful in meeting all requirements she would receive a Diploma of Certification.

Explanation of Class (3)

- (a) The girls in this category, who meet the requirements as stated, would automatically receive the Diploma of Certification as an honorarium for their years of service to the profession.
- (b) Automatic Certification we feel would apply for the inaugural year only.

Summary

The field of Dentistry itself is enlarging its scope and the amount of knowledge required as is the field and responsibility of the dental assistant increasing each year. Certification can help both the dental profession and the dental assistant. The dental assistant who has achieved a high level of competence in her field through study and experience, is deserving of special recognition. Similarly, the dentists who employ dental assistants deserve to have a program through which their employees or potential employees may demonstrate the knowledge, competence and experience they have acquired. School diplomas are awarded for successful completion of a course of study, but certification will attest to an individual's competence gained through experience in a dental office as well as to the kinds of knowledge and skills that can be acquired in a school program.

It is the hope that the Board of Directors of the Royal College of Dental Surgeons will grant the Ontario Dental Nurses' and Assistants' Association the privilege of specifying that assistants who apply for Certification Examinations be members of this Association and once certified the assistant remain a member while employed in dentistry. We feel that by having these girls an integral part of our Association, the possibility of a separate group of assistants being organized would be remote. We now have three distinct groups. A fourth would only add to the confusion. The standards for certification must be kept high. If certification were easy to obtain or if the standards were set low, certification would have no meaning or significance. It would be of little use either to the dental assistant or to the dentist.

Our Association is made up of dental nurses and assistants who realize their responsibility both to the dental profession and our members do everything possible to uplift the standards of the dental assistant and to make her a member of the dental team that will do credit to ourselves and the profession we serve.

ACTION

- (2) That the President of the R.C.D.S. Board and Members of the Dental Services Committee apply for the incorporation of a Board to be known as the Ontario Dental Services Board for the purpose of instituting a pre-payment plan or plans within the Province of Ontario.

CARRIED

- (3) Budget allotment—\$500.00.
- (4) Appreciation expressed to those who developed Fluoridation Brief and appeared before the Ontario Fluoridation Investigating Committee.
- (5) Board prepared to assist in planning and financing an exhibit if a Mediscope is held in 1961.
- (6) Proposed Amendment to Dental Technicians' Act and Pursuant Regulations approved.

- (7) Dr. R. L. Twible and Dr. W. D. MacKay appointed to Joint Committee to consider a Course for Dental Technicians.
- (9) Appreciation expressed to Dr. R. A. Hugill and Dr. Ernest Rollaston.
- (11) Endorses proposed Bill on Hypnotism Control.
- (12) Budget Allotment—\$400.00.
- (13) Board sponsors Course in Dental Assisting and establishes the Committee to effect necessary arrangements: Dr. J. D. Purves, Chairman; Dr. V. A. Herron, Mrs. June Cook, Mrs. Irean Bruce, and the Secretary. Budget allotment—\$300.00 from Contingency Fund.
- (16) Whereas the Profession of Dentistry endorses the principle of continuing education for all dentists and
- Whereas the patient has the right to expect continuing profession education and
- Whereas the stimulus to continue one's education in dentistry is enhanced by attendance at post-graduate courses, clinics, and conventions and
- Whereas it is impossible to legislate effectively in respect to quality of professional service, therefore be it resolved
- That the Canadian Dental Association give consideration to the formation of a Society or Academy, membership in which would be granted to those who through post-graduate training and study have proved their continuing proficiency in the practice of dentistry.
- CARRIED
- (17) No change in registration procedure.
- (18) That the Board recommends to the Council on Dental Education of the C.D.A. that each Canadian Dental School which purports to conduct a course of study for the academic qualifications necessary for certification in a particular specialty provide transcripts for any Provincial Board to which a candidate makes application for Certification.
- CARRIED
- (19) Dr. R. S. Woollatt and Mr. Colin C. Rous appointed Scrutineers.
- (24) Honorary Membership granted to Dr. C. L. Eaton, Dr. W. S. Madill, Dr. W. H. McDonald, Dr. R. A. Patterson, Dr. H. A. Wilson, and Dr. C. E. Wright, commencing January 1, 1961.
- Commencing in 1961 and thereafter certificates given after fifty years of continuous registration in the R.C.D.S. are to be called Life Membership Certificates.
- (Conc.) Secretary re-appointed representative of the Board to the Research Advisory Committee.
- Report adopted.

REPORT

The surplus reported on this year's operation is somewhat offset by the fact that the Board's indebtedness to the Bank was only reduced by \$10,000.00. A principal of \$24,524.60 remains unpaid which now could be discharged. Also our Bond Reserve has not been increased for several years.

The grant made to the Canadian Dental Association was established on the basis of \$35.00 per capita which is \$5.00 less than the amount the Board of Governors indicated necessary to conduct the increased operations of our national organization. It is recommended that the grant for 1960-61 be based on a per capita allotment of \$40.00.

Board and Committee meetings show a significantly reduced expenditure because of a change in auditing procedure. Heretofore the expenses coincident with the Annual Meeting have been estimated and have been assessed against the fiscal year just concluded. As the R.C.D.S. is a non-profit organization and taxes, therefore, are not a matter of pertinence, no advantage can be seen in estimating these expenses when it is possible to ascertain actual figures by allowing the two meetings within the fiscal year to be charged to that fiscal year. Accordingly the expenses for the Annual Meeting of 1960 are not recorded in the Actual but they do appear in the '59-'60 Budget.

The Extramural and Extension Lecture program is well-below budget. The amount of \$1,294.85 shown reflects only the out-of-pocket expenses incurred by the clinicians. Apparently there has been a sufficient accumulation of funds in the Extramural Account at the University that it has not been necessary for the University to seek further amounts to augment the sums from which the Per-Diem Allowances are paid. There is no reason, however, to reduce next year's budget to an amount more closely approximating the 1959-60 Actual.

The greatly increased activities of the Board have reflected in a significant over-spending in postage and telephone. The audit fee provides further evidence of the same contention although the provision for the Audit Fee last year was insufficient to meet the actual amount. The Board agreed at the Special Meeting in the Fall of 1959 to increase our participation in Mediscope '59 which necessitated a considerably increased expenditure from the Budget adopted at the 1959 Annual Meeting.

A change is suggested in the manner of recording salaries in order to reduce an unreasonable amount of bookkeeping and an extensive audit breakdown. Salaries are shown in their entirety under Expenditures with no breakdown between R.C.D.S. and D.S.P.I. Under Revenue is indicated the amount paid by D.S.P.I. for "Office Assistance". For the year

1960-61 it is suggested that payroll be calculated for budget purposes with an amount of 5% added to the salaries assigned to D.S.P.I. to cover Unemployment Insurance, P.S.I. and Blue Cross, and pension payments.

The Revenue portion presents significant increases in Licentiate Fees and in Examination Fees. Registration fees appear low because the annual payment from the University for student registration did not arrive until subsequent to the close of the fiscal year. Appropriate budgetary cognizance will have to be taken of this amount.

In accordance with the law Notices of Annual Fee were mailed to the profession on the stipulated dates. A considerable period of grace beyond the April 1st deadline was granted in order that members in default of Annual Fee might bring themselves into good standing without the necessity of Division Court action being instituted. On April 25th the following unpaid accounts were entered into Division Court for collection:

1. Dr. H. G. M. Ayre, Rainy River
2. Dr. E. J. Bramah, North Bay
3. Dr. J. G. Dean, Toronto
4. Dr. E. L. Hardman, Wiarton
5. Dr. C. C. Smart, Ottawa.

Dr. Smart, through his Solicitor, remitted Postal Money Orders to cover the Annual Fee, Penalty and Court Costs.

The Auditor's Report is attached and the appointment of Auditors for the ensuing year is necessary.

AUDITORS' REPORT

We have examined the balance sheet of the Royal College of Dental Surgeons of Ontario as at April 30, 1960 and the statements of revenue and expenditure of the general account and the property fund and of receipts and disbursements for the Welfare Trust Fund and the Harry R. Abbott Memorial Library Fund for the year ended on that date.

In our opinion the accompanying balance sheet and statements of revenue and expenditure and receipts and disbursements present fairly the financial position of the College as at April 30, 1960 and the results of its operations for the year ended on that date, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

Investment firm to report on present Bond Holdings and offer direction.

Thorne, Mulholland, Howson, and McPherson re-appointed Auditors.

Budget adopted.

Report adopted.

GOVERNMENT AND LEGISLATION

MEMBERS: J. P. Coupland, Chairman; D. C. Stiles; W. J. Langmaid.

REPORT

1. Temporary Licence

The Government and Legislation Committee considered a proposal to establish a temporary licence in the Province of Ontario. While the Committee was in sympathy with the general purpose of the proposal it nevertheless felt that the problem surrounding the precedental establishment of a temporary licence was too significant to relax its regulations in this instance.

2. Extension of Role of Hygienist

The Ontario Society of Orthodontists propose that the Board give consideration to the extension of the terms of reference of dental hygienists. At the present time the Canadian Dental Association is making assiduous efforts to define the role of auxiliary personnel in dentistry and at the next meeting of the Board of Governors this subject will be considered very extensively.

The Committee felt that the problem presented by the proposal of the Ontario Society of Orthodontists was significantly greater than that of simply making a few additions to the services which a hygienist may legally perform. It was generally considered that the training of hygienists should be extended and regulations effected which place responsibility for service on the dentist with less definitive regulations respecting hygienists.

The Committee therefore recommends that the Board appoint a Special Committee to make an extensive study of the problem of auxiliary personnel with a view to making a definite proposal to the Fall Meeting of the Board.

3. Partnerships Between Dentists and Auxiliary Personnel

The Committee was asked to consider a proposal which would have permitted a legal partnership between a dentist and his wife, a dental hygienist. The principles of the By-Laws in this regard are:

1. That there shall be no interference between patient and dentist except by another dentist.
2. That the benefits accruing from the practice of dentistry shall be enjoyed exclusively by dentists.

The Committee felt it would be unwise for the Board to permit such an arrangement merely to enable a dentist to try to reduce his Income Tax by circumventing an expressed provision of the Income Tax Act

which he, the dentist, regards as being unduly harsh in its application to him. Again the Committee was unable to differentiate between a partnership in this regard and a partnership between a dentist and a dental nurse or a dentist and a dental technician. If the Board were to attempt to make an exception to the case presented a precedent could be established which might be embarrassing to the Board in other circumstances and it could lead to abuses of the privilege and perversion of the standards intended to be protected by By-Law No. 13, Section 2(a).

4. Employment of Dentists in Private Practice by Non-Dentists

Extensive correspondence was considered by the Committee relative to dentists being employed in Medical Centres ostensibly as employees of a physician or physicians controlling such Medical Centres. The By-Laws as presently in existence would appear to prohibit such arrangement. After extensive discussion the Committee expressed the view that it could take no exception to the employment of a dentist by a physician in such an arrangement.

5. By-Law Amendments

The bulk of the work of this Committee is reflected in proposed By-Law No. 92. This By-Law is presented separately in order that the Committee may consider the By-Law within the procedure stipulated for the consideration of such By-Laws.

ACTION

Special meeting of Board re Auxiliary Personnel arranged for June 29, 1960. The following were invited as resource members: President and Secretary of the Canadian Dental Association, Chairman of C.D.A.'s Health Insurance Studies Committee, Dean of the Faculty of Dentistry, Toronto, and the President of the Ontario Dental Association.

Report adopted.

BY-LAW No. 92

ENACTED MAY 27th, 1960

Being a By-Law to Amend By-Law No. 2 Section 5; By-Law No. 3; By-Law No. 5, Section 3; By-Law No. 6, Section 1(e); By-Law No. 10, Section 1(d) and (g); By-Law No. 13, Section 1(b) (1), and 1(b) (2); By-Law No. 13, Section 2(a), (c), (d), and (i); By-Law No. 14, Section 13.

Be it enacted a By-Law of the Royal College of Dental Surgeons of Ontario as follows:

That By-Law No. 2, Section 5 be amended by the addition of "to open a Current Property Account, which account shall contain not more than \$10,000.00 at any one time"; following the word "time" in line ten and the word "account" in line ten be amended to "accounts".

That By-Law No. 3 be amended by deleting "\$10,000.00" in line three and substituting in place thereof "\$20,000.00".

That By-Law No. 5, Section 3 be deleted and the following be substituted in place thereof:

"Sec. 3—A dental student of the Faculty of Dentistry, University of Toronto, who desires to qualify for practice in the Province of Ontario must, prior to graduation, obtain from the Royal College of Dental Surgeons of Ontario a Qualifying Certificate which attests to the acceptance of his matriculation standing."

That By-Law No. 6, Section 1(e) be amended by the deletion of the words "to have resided continuously in Canada for a period of at least one year immediately previous to applying for membership in the College and."

That By-Law No. 10, Section 1(d) be amended by the deletion of the word "recommended" in line one and substitute in place thereof the word "certified".

That By-Law No. 10, Section 1(g) be amended by deletion of the words "a British Commonwealth University" and substitute in place thereof "the United Kingdom, Australia, or New Zealand."

That By-Law No. 13, Section 1(b) (1) be amended by the addition of the words "and in which no letters larger than four (4) inches are used" following the words "carried on". That Section 1(b) (2) be deleted.

That By-Law No. 13, Section 2(a) be deleted and the following substituted in place thereof:

"(a) No member of the said College shall, except with the consent of the Board, as employee, assistant, agent, partner, officer, shareholder or otherwise howsoever, engage in the private practice of his profession for the benefit, profit, or advantage of any Corporation, or of any person not being either duly qualified and lawfully entitled to practise dentistry in Ontario, or duly qualified and lawfully entitled to practise Medicine in Ontario, or in such a way that directly or indirectly any such Company or unqualified person may or shall make thereby any profit, reward or advantage. The Board shall determine whether or not any practice constitutes private practice within the meaning of this sub-section."

That By-Law No. 13, Section 2(c) be deleted and sub-sections (d), (e), (f), (g), (h), (i), and (j) be relettered (c), (d), (e), (f), (g), (h), and (i) respectively.

That By-Law No. 13, Section 2(i), now renumbered (h), be amended by the deletion of the word "a" in the last line and substitute in place thereof the words "the said".

That By-Law No. 14, Section 13 be amended by the deletion of the words "the sum of \$10.00 each" and substitute in place thereof "an allowance identical to the sum authorized for members of the Board while such members are in attendance at meetings of the Board or Committees".

DISCIPLINE

MEMBERS: A. H. Leckie, Chairman; J. R. Hurton; R. E. Diprose; D. C. Stiles; J. D. Purves.

REPORT

Since the last Annual Meeting of the Board in May, 1959 our Secretary acting on behalf of the Committee has dealt with 26 written complaints regarding members of the profession. This is the same number as last year.

These can be classified as follows:

1. Contravention of By-Laws	7
2. Excessive Fees	12
3. Unusual Procedure	1
4. Unsatisfactory Services	6

These complaints have all been very capably handled by our Secretary.

2. A complaint was received regarding a dentist being involved in a co-operative development. This was discussed at the November meeting of the Board and was successfully resolved.
3. A request was received regarding a sign to be used in a group practice. As a result of the informal discussion at the November meeting the Chairman gave his consent to the erection of this sign. The drawings submitted, however, proved to be out of proportion and the completed sign proved to be offensive. Many complaints were received from members of the profession.

The two dentists involved, who had acted in good faith and had gone to considerable expense, were not anxious to remove the sign. After the first few nights of illumination they decided that it was distasteful and it has not been turned on since.

At an informal meeting on April 6th, 1960, these men met with the Discipline Committee and discussed the problem.

The Committee were unanimous that the sign is inappropriate and should be removed. This feeling has been communicated to the dentists involved.

4. On April 6th, also, the Committee met with another dentist who had repeatedly refused to reply to communications from our Secretary regarding a complaint filed with the Academy of Dentistry of Toronto. Most of the interview was unsatisfactory, but towards the termination of the discussion the dentist admitted that he should have replied as requested and stated that his physical condition was

a contributing factor in his dereliction. The Committee emphatically pointed out his responsibility of discharging his obligation to the Board.

Shortly after the termination of the meeting he phoned our Secretary and apologized for his behaviour and stated that the Board could be assured of his full co-operation in the future.

5. It is the opinion of the Committee, that a policy should be established to deal with members of the profession who refuse to reply to communications.

The following suggestion is presented for consideration:

1. Where a Mediations Committee has requested the Royal College of Dental Surgeons' Board to take action, that the dentist be sent a registered letter in which he is requested to reply within two weeks. Should a reply not be received by the Board within the two week period, then the dentist be served with a summons to appear before the Discipline Committee
2. If a Mediations Committee has not been available and the Board receives the complaint from the patient, then the Board would write to the dentist requesting a reply in two weeks. If a written reply is not received then the same procedure as outlined in paragraph one would be followed.

Should disciplinary action have to be taken, the member then may be liable to suspension of his licence for a period of two months.

ACTION

The dentists associated in the Group Practice met with the Board relative to the sign employed in conjunction with the practice. They agreed to remove the sign and the Board reiterated its view that the dentists had acted in good faith from the beginning. Prior to the erection of the sign drawings and specifications were submitted to which the Board offered no objection. It was only after viewing the sign that its inappropriateness became apparent. The Board appreciated the actions of the dentists in rendering co-operation even at some financial loss to the Group Practice.

Report adopted.

DENTAL SERVICES

MEMBERS: D. C. Stiles, Chairman; R. P. Lowery; D. B. McAdam;
P. E. Willson; W. H. Feasby.

REPORT

I Pre-Payment Plans

The Canadian Dental Association's Health Insurance Studies Committee has now established a Sub-Committee comprised of Drs. P. G. Anderson, H. W. Reid, W. G. McIntosh, Wesley J. Dunn, Don W. Gullett, Mr. Ken Croft and Miss Isabel Boyd to study and make recommendations on Pre-Payment Plans for dental care services. The Committee has had several meetings and believes pre-payment, at least on a group basis, is both desirable and feasible. Efforts are continuing.

II Welfare Plan

- (1) **The Pamphlet**, "the Dental Welfare Plan", has been distributed to each Ontario dentist and the reaction has been most favourable.
- (2) **Financial Report**. An audited statement of receipts and expenditures for the contract year 1st Jan. 1959 to 31st Dec. 1959 is presented as follows:

WELFARE ACCOUNT

MOTHERS' ALLOWANCE & DEPENDENTS ACT

Calendar Year 1959

RECEIPTS—1st Jan. to 31st Dec. 1959	\$159,153.40
Grant Outstanding	<u>14,875.00</u>
<i>Total Grant applicable to 1959</i>	<i>\$174,028.40</i>
DISBURSEMENTS—Paid to dentists	\$142,654.00
Administration charges	<u>12,838.96</u>
TOTAL EXPENDITURES	\$155,492.96
Cash on hand	<u>\$ 18,535.44</u>
Unpaid 1959 accounts on hand	\$ 4,840.00
Estimated fees outstanding in dentists' offices	<u>14,000.00</u>
<i>Total estimated liability</i>	<i>\$ 18,840.00</i>

The above is based on a 75% of fee payment being acceptable as payment in full.

COST OF OPERATION

EXPENSES—Calendar year 1959

Salaries	\$9,493.50	
Stationery and supplies	2,722.11	
Postage	880.26	
Rental	1,406.25	
Travel	811.25	
Audit fee	300.00	
Depreciation	264.86	
Telephone	128.40	
Sundry	25.00	\$16,031.63
Expenses paid in 1960 applicable to 1959 operation		1,331.28
Total cost		\$17,362.91

NOTE: The above include organizational costs in the amount of \$2,211.25 which were incurred in acquainting the profession and the public with the operation of the plan. These are not recurrent.

Total cost of operation	\$17,362.91
Less: Non-recurring costs	<u>2,211.25</u>
ACTUAL COST	\$15,151.66

Therefore the actual cost of operation has been 8.7% of the grant available or 6.09 cents per recipient—month.

(3) Statistical Report

Statistics as compiled by D.S.P.I. are presented as follows:

Dentists

Total number of dentists participating	1,127
Largest amount paid to any one dentist	\$1,865.00
Total number of payments made to dentists	4,491
Average payment	\$31.79

Patients

Total patients participating	6,914
Average payment per patient	\$20.63
Largest payment on a/c of any single patient	179.00
Average number of children eligible per month	20,718
Total number of children eligible during year	27,096

Services Rendered

Fillings	23,556
Extractions—Posterior	8,574
Anterior	892
Prophylaxes	1,686
Bite Wing x-rays taken in	2,397 cases

Dentist Contribution

Unpaid fee based on O.D.A. Schedule

1959 payments	\$47,545.00
Outstanding	6,280.00
	\$53,825.00

or 30.9% of the Government grant.

This does not take into consideration all unauthorized treatment completed by individual dentists and not paid or accounted for.

(4) Extension of Program

The Secretary reports on conversations with Dr. Kohli, Director of Dental Services, Ontario, relative to the existing plan for Direct Relief Recipients.

"Dr. Kohli explained that in 1933 a Committee comprised of Drs. Mason, Husband, R. G. McLean, Fred Conboy, T. R. Marshall, and Angus Kennedy met with Dr. Bell the Deputy Minister of Health to establish the presently existing plan for repair of dentures and necessary extractions for those on direct relief only. This Committee was established by order in Council and therefore was not particularly representative of official bodies of dentistry.

This Committee met monthly to review the accounts submitted and authorized certain payments. Gradually the services of the Committee dissipated and only two members of the Committee survive. The Director of Dental Services acted as Secretary of that Committee.

The Director continues to oversee the payment of these accounts and realizes that the Fee Schedule which has not been altered since 1950 is quite unrealistic. He believes however that it is the responsibility of the profession to seek amendments to this Schedule. Dr. Kohli has made certain observations in this regard but he is a Civil Servant and therefore cannot, with particular forcefulness, be in a position of representing the profession.

Dr. Kohli has emphatically stated that should it be possible for the R.C.D.S. to extend its contract to include this group and therefore administer this Plan through D.S.P.I. that he would be entirely in favour and would support any observations we might wish to make to Mr. James Band, the Deputy Minister of Public Welfare.

The present Plan provides fees of \$3.00 for an extraction plus \$1.00 for each additional tooth extracted at the same sitting. The fee for general anaesthesia is \$5.00 and \$1.00 for each tooth extracted and the fee for repair is \$5.00."

The Committee reiterated our policy that we should attempt to undertake any reasonable procedures which will extend dentistry's services more broadly and that in any meeting with representatives of Government our willingness to serve be enunciated.

The members of the dental services committee recommend that the plan for dental services to Direct Relief Recipients presently being administered by the Department of Public Welfare with the

assistance of the Director of Dental Services should be investigated for the possibility of D.S.P.I. undertaking its administration on bases considered equitable.

And the Secretary was given the assignment of meeting with representatives of Government following the development of the Annual Report.

Special Notes:

- (a) During the fiscal year 1960 payments will be made to dentists on the basis of a 66% per cent pro-ratio as pertained in the fiscal year 1959.
- (b) The net loss to D.S.P.I. for administration of the Welfare Plan for the first year of operation (including the three months pre-operating period) amounted to \$4,523.95. This net loss incurred by D.S.P.I. has been paid to D.S.P.I.
- (c) A report to the Canadian and Ontario Journals has been prepared and embraces (1) purposes, (2) statistics, (3) finances, and (4) possibilities of future development.

III Post Payment Plan

(1) 1959 Financial Report

The Auditor's Statement of D.S.P.I. which presents a breakdown of the Post Payment Plan operation for the fiscal year 1959. (Appendix A)

(2) Utilization of the Plan

It is the general consensus that the Plan as conceived is sound and is capable of a significant contribution as a health service. Increased utilization is imperative. We suggest that further efforts be made to encourage those members who employ the plan reasonably extensively to act as promotional committees in their respective areas.

The Ontario Dental Association and the Canadian Dental Association have been approached relative to the participation of D.S.P.I. in their convention programs.

A lecture on the organization and administration of D.S.P.I. was given to the senior class on March 15th, 1960 by Dr. Dunn after permission had been granted through the normal channels.

(3) Credit Policy

The agreements submitted for whom credit ratings have not been readily available are to be accepted contingent upon the dentist agreeing to accept the normal service costs chargeable against the patient if the account is not collectible.

The Board of Directors of D.S.P.I. recommended that an amendment to the existing policy in respect to the Post Payment Plan be approved and further such policy to make possible a surcharge and collection charge for overdue accounts and further Mr. Jackson was requested to develop proposals to make the institution of such policy possible. This is now in progress.

Special Note:

A letter from Dr. R. P. Lowery was received at our meeting Mar 9, 1960 tendering his resignation as a member of the Dental Services Committee. The Chairman on behalf of the Committee expressed sincere regret and hoped that Dr. Lowery might yet reconsider and permit his name to stand as a continuing member of the committee.

AUDITORS' REPORT

To the Members of
Canadian Dental Service Plans Incorporated

We have examined the balance sheet of the Canadian Dental Service Plans Incorporated as at December 31, 1959 and the statements of revenue and expenditure of the operating account and of receipts and disbursements of the trust account for the period from January 9, 1959, the date of incorporation, to December 31, 1959.

Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances except that we did not perform an audit of the welfare plan payments and accordingly, are not in a position to express an opinion on the disbursements to dentists under the welfare plan.

Subject to the foregoing comment, we report that, in our opinion the accompanying balance sheet and statements of revenue and expenditure and receipts and disbursements are in other respects properly drawn up

so as to exhibit, in accordance with generally accepted accounting principles, a true and correct view of the state of the affairs of the corporation as at December 31, 1959 and the results of its operations for the period ended on that date, according to the best of our information and the explanations given to us and as shown by the books of the corporation.

ACTION

- (1) Final year students to be given opportunity to visit R.C.D.S. Headquarters and D.S.P.I. officials discuss matters of pertinent interest.
- (2) Dr. R. P. Lowery to be asked to re-consider his resignation and remain as a member of the Committee.
- (3) Report adopted.

MEMBERS: W. J. Langmaid, Chairman; A. H. Leckie; W. G. Woods.

REPORT

1. Inspection of Headquarters

An inspection of the Headquarters of the Royal College of Dental Surgeons of Ontario more than ever justifies the foresight of the Board in deciding to purchase its own building. Every office is being used to advantage not only by the R.C.D.S. Staff but by our excellent tenants as well. The building is in a most satisfactory condition with only a few items of upkeep required.

The Property Committee carefully inspected the building and grounds on April 13th, 1960 and the following actions were taken.

- (1) Dr. Diprose is to seek a quotation for repair to the stone-work at the front steps.
- (2) The Secretary is to obtain three quotations on the painting of the entire second floor and the rear hall on the main floor.
- (3) The drapes are to be sent for cleaning each spring.
- (4) The Secretary is to obtain quotations on cleaning the outside of all windows on a regular basis.

2. Contractor's Guarantee

On March 2, 1960 the one year Contractor's guarantee terminated. Prior to that date the Secretary arranged with the Architect to conduct a meticulous inspection of the building and instruct the Contractor to rectify those conditions which could rightfully be ascribed to his responsibility. Except for one area of painting all repairs have been satisfactorily completed.

3. Insurance

The Committee reviewed the insurance placed on building and property. The fire coverage was placed originally following a professional appraisal of the building by Dominion Appraisal Co. Insurance Coverage is outlined in Appendix A.

4. Borrowing Position

In March, 1960 the Secretary following consultation with the President further reduced the Board's bank indebtedness in the amount of \$10,000.00. Thus the unpaid balance as at April 30th, 1960 stands at \$24,524.60. The complete report on the Board's borrowing position with the Royal Bank of Canada appears in Appendix B. The Board might wish to provide further direction relative to a reduction in the unpaid balance.

5. Rents

It should be noted that the existing rent structure is providing accommodation to our tenants at cost. The rents could not be considered commercially sufficient. It is the Committee's belief that the Board should communicate with its tenants expressing our appreciation of them as tenants and pointing out that for the next year, at least, the rent structure will remain the same. It should be realized that any significant increases in such items as taxes, maintenance and repair could well make it impossible to maintain the present modest rent structure.

6. Budget

The proposed Budget for 1960-61 appears as Appendix C.

Appendix A

Insurance Coverage—R.C.D.S. Headquarters

The following insurance having a direct pertinence to R.C.D.S. Headquarters Property presently remains in force. All policies are written by London Guarantee and Accident Company Ltd., through Clarke and Till, General Insurance Brokers.

1. Fire —Policy No. 71006198
Limits—Buildings—\$65,600.00
Contents—\$16,000.00
Duration of policy—July 17, 1959 to July 17, 1962
Premium=\$342.40
2. Fire —Policy No. 71-003013
Limits—Contents—\$12,000.00
Duration of Policy—Jan. 2, 1959 to Jan. 2, 1962
Premium=\$70.80
3. Liability —Policy No. 34-006846
Limits—Bodily Injury—Property damage \$25,000.00
Duration of policy—July 17, 1959 to July 17, 1962
Premium=\$29.55

Appendix B

Report adopted.

PUBLIC RELATIONS

MEMBERS: J. R. Hurton, Chairman; B. M. Jackson; A. H. Leckie.

REPORT

FALL MEETING

There is generally one committee in each organization which is extremely difficult to bring into actions. The present one on public relations seems to enjoy that dubious distinction. Dr. Dunn stated our dilemma quite clearly "Public relations has been a subject of great complexity as far as our Board is concerned. Quite frankly, it is most difficult to know just where to start." The purpose of this report is to place before the Board information and ideas we have been able to gather that it may form a basis for discussion.

What Is Public Relations

The Transactions of the C.D.A. 1958 can give the reader much concise information and will help him understand the complexity of this subject and will lend support to the statement, "The basis of public relations is professional training and ethics practised in the environment of good practice management with trained auxiliary personnel and rendering accepted dental treatments to patients in a sincere and sympathetic manner within the legal limits of our profession." This basis must be presented first as an internal public relations program to our dentists in such a way as to improve their attitude, quicken their interest and increase their enthusiasm in the potential benefits of dental health. There must also be an external public relations program to present the story of dentistry truthfully and graphically to the public that our problems may be fully appreciated thus creating a more favourable medium for the practice of dentistry.

Why Has Public Relations Recently Assumed Such Importance

The impact and impetus of our changing socio-economic environment on the dental profession has been tremendous. The personal attitude of the individual entity of the group which we call the public has changed rapidly over the last fifteen years due to several factors: The increase in patient appreciation of dental treatment due to the dental treatment provided in the armed services and upon discharge . . . The industrialization of our communities with the continual movement of workers . . . The advent of fast convenient transportation makes specialized service more accessible . . . The immigration of citizens from countries with different customs and dental services. Dental treatment is no longer accepted or criticized on a local plane; it is also compared by the patient with specialized, national or international treatment that may have been experienced or discussed with associates.

Add to this enlarged although unreliable media, news releases on old methods of treatment reborn, new untried treatments, personality and glamour dentistry, exaggerated claims by manufacturers of dentrifices, releases on radio and television which are almost 100% written or spoken

by laymen either as news or as sales promotion. The continuous exposure of a credulous public to this potent mixture of half truths is indeed frightening. It is enough in itself to combat, but this is not all. The same public are being bombarded and harassed with every trick and gadget known to sales promotion for a greater share of their dollars. Dentists must realize that if we are to continue as a profession dedicated to the health and well being of our people, we must compete in this social and economic struggle.

There Is A Need For Public Relations

During the last several months we have asked numerous questions of both dentists and laymen. The dentists have similar opinions formed through meeting the public professionally and socially. It was almost unanimous that increased effort should be undertaken to increase the prestige of the dental profession in public esteem. The layman's impression, formed from similar association, while generally favourable, was in some cases distinctly critical. The complaints to a large extent were in the areas of diagnosis, treatment, prognosis and practice management. In both groups there was definitely a lack of appreciation of the other's problem.

We were able to discuss our problem with the director of public relations of a large industry. It appears industry is faced with a similar situation and they too must have an internal relations program for employees as well as the external policy because of the influence employees, especially in sales and service, can have on public opinion.

The Present Program

The National Level

There has been considerable activity, much more than is realized. The C.D.A. has an active internal relations program which must be recognized.

1. The Dental Journal.
2. The Public Relations Committee pamphlets and letters concerning dental practice and general information.
3. The Committee on Ethics.

In External Relations at National Level

1. The Public Relations Committee have made a modest start with news releases and tape-recordings.
2. The Dental Public Health Committee is active at legislative and organized group level.
3. The Red Cross.

We realize that this is but a partial review of the activity in public relations at the national level but it may help the reader assess the situation as it is to-day. This program is constant across Canada and must be shown when considering the individual regional efforts. In the chart following it is a constant factor in present regional and suggested

regional and national action. To obtain information of regional programs we wrote to the provincial chairman expressing interest in the following areas:

1. What present action on public relations are you taking in your province?
2. What is your budget for the purpose?
3. Do you prefer an individual regional effort or a more intensive C.D.A. program?

The first three columns endeavour to portray the program presently in effect both C.D.A. and provincial and the cost to each province. The following two columns present the suggested increased effort. With the exception of Saskatchewan all intend to continue the present program. All provinces except Manitoba, and, we think, there agreement is implied, are in favour of an intensified national effort.

<i>(Present) Regional</i>			PROVINCIAL COST	EXTERNAL	SUGGESTED REGIONAL NATIONAL	
INTERNAL						
BRITISH COLUMBIA	C.D.A. Bulletins Journal	Public Relations Counsel Provincial Survey	\$10,000	Public Relations Counsel	Public Relations Counsel	More intensive
			\$15,000			
ALBERTA	C.D.A. Bulletins Journal Provincial News releases	Public Relations Counsel	Cost not Stated	Public Relations Counsel	Coordinated with C.D.A. Public Relations program	
			\$300			
SASKATCHEWAN	C.D.A. Bulletins Journal	Legislation D.S.P.I.	\$7,000 \$1,000		Efforts Unsatis- factory	Definitely yes
MANITOBA	Mediation Committee Association Bulletins C.D.A.	Health Education in conjunction with government	\$6,000		Continued Health Education program in conjunction with Provincial Department of Health	
ONTARIO	C.D.A. Bulletins O.D.A. Magazine Journal	Career lectures Dental Public Health Junior Red Cross			?	Yes
QUEBEC	C.D.A. Bulletins Journal	Newspaper T.V. Career lectures Quebec Public Health \$85,000.	\$1,500 — 600 \$5,000		Yes because of language	More intensive
NEW BRUNSWICK	Considerable C.D.A. Bulletins Journal	News releases	25 @ per dentist		Interchange of ideas between provincial chairmen and C.D.A. for increased effort in both areas	
NOVA SCOTIA	C.D.A. Bulletins Journal	Provincial Public Health	—		None	No comment

We must be prepared to carry on constant research and evaluation of the existing social and economic environment if we are to derive the greatest benefit from our efforts. We realize that Public Relations must recognize the program of those committees which are complementary to it, thus avoiding duplication of effort. The program as it exists to-day seems to lack co-ordination. Some regional efforts are elaborate and costly with results considerably below expectations. The usefulness of outside public relation counsel is questionable. It is suggested that the provincial chairmen have discussions and interchange of ideas and with the C.D.A. chairman endeavour to co-ordinate and integrate regional and national programs.

The main public complaint seems to be disappointment with results of treatment and fees charged. The dentists feel that the public is too demanding and unfamiliar with the profession's problems. In Ontario we probably could improve our internal relations by placing more emphasis on examination, diagnosis and practice management. It could be suggested that clinicians on the extramural lecture service stress this aspect. It may be possible for our Faculty to offer a three day course on practice management. The courses sponsored by the dental trade leave much to be desired. Local Mediation Committees could be useful. Press releases could be more informative.

We have tried to obtain an overall picture of Dental Public Relations across Canada. I am aware of the lack of detail in this report but ask that you consider it as a background for discussion that this Board may be able to offer some direction regarding public relations in Ontario.

ACTION

Report adopted.

ANNUAL MEETING

This may be considered as a continuation of the report received at the fall meeting wherein an effort was made to define the basis of public relations and discuss the importance and need of public relations in relation to dentistry. Information was given on the present and suggested programs across Canada. It was thought best not to recommend a regional program for Ontario or to make suggestions towards the national program until such a time as the committee would be enlarged and have sufficient time to appraise the over-all situation. Beside completing this portion of the fall report you will notice it expands certain suggestions and repeats some recommendations.

Suggested Program in Regional Area

In Ontario the regional program could be expanded and improved without disrupting the present working media and would probably increase its effectiveness. The suggested program would be: continued

co-operation with the Dental Public Health Committee, the Red Cross and Junior Red Cross, and use of the Ontario Journal. The Extramural Lecture Program should emphasise the "Philosophy of Dental Practice." This designation would cover a broad area such as "current trends in dentistry", "Ethics in present day practice", "Functions of our dental organization", "Legislation and problems of administration", "Practice Management".

There should be continued presentation to the Faculty of Dentistry on the value of post graduate study of dental practice in improving our public relations.

Endeavour to have local societies increase their activities for recruitment through newspapers, radio, T.V. and service groups, with the releases of local societies cleared through the R.C.D.S. to avoid distortion of pertinent information. Career lectures in as many schools as possible and provide a film of the new building and facilities as an aid to the vocational guidance directors.

In the National Area

The deliberations of the Public Relations Committee of the C.D.A. have been carefully studied through the agenda and minutes of their meetings and by attendance of two meetings. This Committee is in general agreement with their program and recommends (1) the use of short films on T.V. This probably offers the most effective method of public presentation and should, if the cost is not prohibitive, be inaugurated; (2) continuation of their recruitment program; (3) completion of the story of C.D.A.; (4) continued circulation of pertinent facts of interest to Canadian dentists through the Journal, by letters and by pamphlets. This committee recognizes it is only by a rapidly increasing number of dentists that we can continue to give optimum health service, and recommends that every avenue of recruitment be explored in an effort to interest prospective dental students. Financial aid for students must be available at low cost.

X-Ray Hazards

We regret that the brochure on "The Utilization of X-Rays in Dental Practice" has not been published. It was decided that as considerable space had been given to this subject in dental literature no useful purpose would be served at present. It is granted that the dentist should be competent to explain this subject to his patients but think the collective explanations would be more consistent with a common formula for guidance. It is expected that when further research data are available a simple concise guide will be published. You can understand that any publication issued by the C.D.A. must be factual and based on research statistics.

It can be assumed that any release to the profession as a guide to dosage, tolerance, etc., would be unsuitable for patients' reading. We suggest that a release (brochure or leaflet) be prepared that could be given to the interested person for information. It would be written in non-technical phraseology and explain the value of dental X-rays in

health service. It should also comment on the reduction of exposure time and reassure the reader that the diagnostic value of the dental X-rays far outweighs the remote possibility of any side effects. Some thought should be given to a suitable title for this release as one suggestion, "Hazards of Dental X-Rays", would lessen rather than increase confidence and assurance in the patient's mind.

These two pamphlets will be of value to the profession and should certainly be informative to the patients. However this covers only 35% of the population. The only method of reaching the public in general would be in the form of a news release. The basic material of these pamphlets should be issued to press, radio, and T.V. to be used, preferably, in a series of releases. This method would go a long way towards eliminating public apprehension of this very valuable diagnostic aid.

Practice Survey

The reference to gross and net income is quite misleading. In the future there will, probably, be very few dentists practising to age 70. The increased demand for service and treatment rendered will certainly shorten his productive years. This added to the ever increasing portion of dentists' so called net income which necessarily must go for capital recovery and to establish some form of security to augment his income through the years of declining production leaves the average dentist a rather modest true net income.

This committee sincerely hopes that this Survey will be extended to produce a more accurate picture of the dentists' true net income as compared with his taxable income, i.e., taxable income less income tax and social security referred to in business as take home pay.

Dental Aides

There has been considerable publicity given to technical dental aides and should the dentist-population ratio continue to deteriorate this type of personnel may be necessary. The introduction of this group besides being controversial will change the present pattern of dental practice. A thorough study should begin immediately so that this Board will be able to keep our dentists fully informed of the socio-economic and legal impact the profession may expect. This information would also be invaluable in influencing public opinion and securing favourable legislation for expanded health services. We must realize that the public has given us a relatively free mandate in professional guidance. We shall enjoy this confidence only as long as we have the capacity to meet changing conditions and the ability to provide competent dental service sufficient for the demand.

Prepayment Plans

There has been an increased interest in this field by various groups and individuals. The only way we can eliminate the possibility of unions and other groups attempting to set up their own dental treatment units is to have a fully documented plan available specifying the services to be

supplied and yearly cost. Your committee believe this to be urgent and in the interest of good public relations. We recommend every assistance be given to the committee, set up by the C.D.A. Health Insurance Studies Committee for this study.

Health Education in the Dental Office

In the last several years practice procedure has changed from the presentation of dental disease to treatment of dental disease. Patient education or health maintenance has, in a number of practices, become non-existent. This is due, first, to the heavy demand for treatment and second, because such education is rated non-productive (financially). It is suggested that the dental nurse or receptionist, with a reasonable amount of training, could make a most significant contribution in this area.

Events of the Year

A review of the events of the past year shows a favourable impact on our public relations. The adverse legislation in Saskatchewan was probably the only way to alert our dentists to full realization of the necessity of constant vigilance. The subsequent favourable legislative amendments have proven the influence which can be brought to bear by all individual dentists exerting themselves in a united effort.

Dentistry's exhibit in Mediscope '59, while sponsored by this Board with some temerity, surpassed, by far, the expectations of the most optimistic. Our profession made a fine presentation and the display was well received by the public. The full effect of this effort on recruitment will not be realized for several years.

The completion and opening of the new dental building has been a source of pride for our dentists, an inspiration to our Faculty and has quickened the interest of the public in our profession. It can be expected to have a favourable influence on recruitment.

Fluoridation Brief

First, our Secretary must be commended for his efforts in the production of this very excellent Brief. It has been well prepared and ably presented. A year ago it was thought this would be a repetition of previously published statistics, costly in time and money but, advancing nothing new. It now appears we were unduly pessimistic. The opportunity of presenting this Brief before an impartial tribunal in a dignified and orderly manner has reacted favourably for the dental profession. We have been able to refute unfounded allegations and dissipate certain fallacies. The news coverage is excellent and should result in a more informed public.

This concludes the report of a study on our professional public relations begun last May with subsequent recommendations suggested to make our present effort more effective.

ACTION

Report adopted.

EXAMINERS AND PETITIONS

MEMBERS: J. D. Purves, Chairman; R. E. Diprose; A. H. Leckie.

REPORT

FALL MEETING

1. Application for Reinstatement

The Committee recommends that Dr. Thomas Earl McLaughlin be reinstated to membership in the Royal College of Dental Surgeons of Ontario when all remaining regulations of the Board have been met.

2. Application for Specialty Certification

The following having met the requirements of the Board for certification in Orthodontics are recommended for certification in the Specialty of Orthodontics:

Ralph L. Bull, B.Sc., (Dal), D.D.S. (Dal.), Dip. Orth. (Eastman Dent. Disp.).

W. Stuart Hunter, D.D.S. (Tor), M.S. (Mich), Ph.D. (Mich).

The following having met the requirements of the Board for certification in Oral Surgery is recommended for certification in the Specialty of Oral Surgery:

Albert J. Wilson, B.Sc. (St. F. X.), D.D.S. (Tor), M.S. (Georg.).

FALL MEETING

1. The Committee believes that some liaison should be established between the Board and each of the specialty societies in Ontario particularly when matters having pertinence or concern for the specialties arise. It is recommended that an application for specialty certification be referred to the appropriate specialty society for observations or comments of the society prior to the consideration of the application by the Examiners and Petitions Committee.
2. The Committee recommends that the Board give leadership to the encouragement of an extension of the functions of the National Dental Examining Board of Canada. Licensure arrangements in Canada are grossly inconsistent and major amendments are necessary if some logical solution is to be achieved. The committee is presenting, apart from this report, a resolution to be considered by the Board in the hope that some positive action may be initiated, thereby.

Resolution submitted by the Examiners and Petitions Committee for consideration of the Board at its November 23rd-25th meeting:

Whereas it is a sound and well-established prerogative that the dental profession itself must possess the responsibility of determining the educational requirements of those who propose to practise dentistry, and

Whereas by law, these rights and obligations are conferred upon provincial dental legal bodies which administer the dentistry acts in their respective provinces, and

Whereas all Canadian dental schools presently graduating dental students have been approved by the Canadian Dental Association, and

Whereas some provinces will license graduates of a specific school without further examination but will not consider others for licensure without such examination, and

Whereas each provincial licensing board has a common examining facility in the National Dental Examining Board of Canada, and

Whereas under the present system the National Dental Examining Board of Canada is not sufficiently serving the purpose for which it was intended as the number of candidates each year for the National Dental Examining Board Certificate represents only a very small percentage of those eligible, and

Whereas consistency in licensure could be achieved if the provinces participating in the National Dental Examining Board of Canada made the possession of the N.D.E.B. Certificate mandatory for registration, and

Whereas the Board of Directors of the Royal College of Dental Surgeons of Ontario is prepared to amend its By-Laws to make mandatory the possession of an N.D.E.B. Certificate before registration in Ontario may be effected provided conjoint examinations between the respective Faculties of Dentistry and the National Dental Examining Board of Canada are instituted, and

Whereas the Board of Directors of the Royal College of Dental Surgeons of Ontario is favourable to the principle of having the National Dental Examining Board of Canada conduct licensing examinations for those candidates not included above who possess registrable qualifications in Ontario and again making mandatory for licensing the possession of the N.D.E.B. Certificate by such candidates,
THEREFORE BE IT RESOLVED

THAT the National Dental Examining Board of Canada be respectfully requested to give concerned consideration to an extension of its present regulations to permit conjoint examinations with the various Canadian Faculties of Dentistry and the development of means whereby other candidates possessing registrable qualifications may have the privilege of obtaining the N.D.E.B. Certificate, and further

THAT the Council on Dental Education of the Canadian Dental Association which has representation on the National Dental Examining Board of Canada be respectfully requested to consider these proposals, and further

THAT the resolution be forwarded to each of the provincial dental legal bodies for their consideration, and further

THAT the resolution be forwarded to the Canadian Dental Association for consideration of its Board of Governors at the next annual meeting.

ACTION

Report adopted.

ANNUAL MEETING

1. That the resolution passed at the November meeting for presentation to the National Dental Examining Board of Canada and the Board of Governors of the Canadian Dental Association be withdrawn.

CARRIED

2. That the National Dental Examining Board of Canada give concerned consideration of the relationship which now exists between graduates of Canadian Schools of Dentistry which have been approved by a recognized professional agency and the continuing requirement of conducting separate examinations for licensure for such graduates.

CARRIED

ANNUAL MEETING

As a result of the increasing number of candidates applying for specialty certification, the Examiners and Petitions Committee has established a liaison sub committee of each specialty group. These groups will work with the parent committee so that a more complete and accurate appraisal of the quality and integrity of specialty qualifications may be effected. The Paedodontic specialty has not nominated representatives inasmuch as it does not at present possess an organization specifically representing certified Paedodontists.

The Representatives approved by each Specialty are:

Dental Public Health	— Dr. F. A. Kohli
	— Dr. A. R. Sutherland
Oral Surgery	— Dr. P. T. Smylski
	— Dr. J. H. Johnson
Orthodontics	— Dr. R. D. Leuty (Pro Tem)
	— Dr. D. W. Woodside
Periodontics	— Dr. C. H. M. Williams
	— Dr. W. G. McIntosh

The further function of this Committee offers the results of the Spring Board Examinations herein appended (Appendix "A").

The Committee wishes to extend its appreciation to the Dean of the Faculty of Dentistry for the privilege of conducting the Board Examinations within the Faculty Building.

REPORT ON BOARD EXAMINATIONS AND SPECIALTY APPLICATIONS

I. Application for Registration

(a) The Committee recommends that

1. George J. Breau, B.Sc., (St. Fran. X '53), D.D.S. (McG. '60).
2. Walter B. Bulchak, D.D.S. (McG. '60).
3. John Cohen, B.D.Sc., (West. Aut. '58) M.Sc.,D. (Mich. '60).
4. Cedric A. Dey, B.S. (Howard '54) D.D.S. (Meharry '59).
5. Ivanhoe F. Goodin, B.S. (City Coll. N.Y. '54) B.D.S. (Edinburgh '59).
6. Stanley Gertz, D.D.S. (Med. Evang. '60).
7. Mara Jindra (nee Ulmanis), B.D.Sc. (West. Aust. '59).
8. V. Julia Meilus, D.D.S. (Dal. '60).
9. John E. McManus, D.D.S. (Detroit '60).
10. Alexander J. Polawski, D.D.S. (McG. '60).
11. Ralph S. Sands, D.D.S. (Detroit '60).
12. Norman A. Shpikula, D.D.S. (McG. '60).
13. Joseph S. Uniat, D.D.S. (Med. Evang. '60).

be granted their Licentiates in Dental Surgery in the Royal College of Dental Surgeons of Ontario when all remaining regulations have been met.

(b) The committee recommends that when Philip Simon, B.A. (Mt. Al. '45), D.D.S. (Dal. '49) meets all the requirements of this Board, including an approved four-week refresher course in Prosthodontics, that he be passed and granted his L.D.S. Certificate.

II. Application for Specialty Certification

The following having met the requirements of their respective specialties are recommended for certification:

1. John Martin Armitage, D.D.S. (Tor. 1953), Dip. Or. Sur. (Tor. 1960), in Oral Surgery.
2. John Arthur Bimm, D.D.S. (Tor. 1957), Dip. Orth. (Tor. 1960) in Orthodontics.
3. Richard James Braden, D.D.S. (Tor. 1955), Dip. Orth. (Mont. 1960) in Orthodontics.
4. Alan Chapple, D.D.S. (Tor. 1951), Dip. Per. (Tor. 1960) in Periodontics.
5. Allen Feldman, D.D.S. (Tor. 1957), Dip. Orth. (Tor. 1959) in Orthodontics.
6. Jerome Harvey Giblon, D.D.S. (Tor. 1957), Dip. Orth. (Tor. 1959) in Orthodontics.
7. Harold Spencer Grey, D.D.S. (Tor. 1939), D.D.P.H. (Tor. 1959) in Dental Public Health.
8. Egil Peter Harvold, Cand. Odont. (Oslo 1937), Dr. Phil. (Oslo 1942) in Orthodontics.
9. Mark Roberts, D.D.S. (Tor. 1957), M.S.D. (Northwest. 1959) in Orthodontics.

ACTION

Licentiate in Dental Surgery granted to the following having been graduated from the Faculty of Dentistry, University of Toronto:

Roland Albert	Ahafia Luba Kozak
Manfred Paul Andreas	Robert George Edward Leggett
Robert Blake Baggs	Gerald Joseph Leavens
Bernard Jonathon Bassett	Norman Levine
William Douglas Beaton	Robert Keith Linghorne
Anita Rasma Bergs	James Ross Charles McElroy
John Court Binns	William Macfarlane
Raymond Gerald Albert Blahey	Frank Malcolm Stewart MacNiven
David Bordoff	Judita Marija Matulionis
Robert George Scott Burgoyne	David Franklin Miller
Robert William Stuart Cannon	Alan Richard Mills
Norayr Ceylanli	Sidney Moll
Donald Victor Chong	Peter Paul Morin
Milton Cohen	Marvin Neil Munro
Paul James Coulombe	Berkeley Gordon Newman
Philip Joseph Courey	Mark Saul Nusbaum
Bohdan Danylchuk	Karol Joseph O'Reilly
William Conner Deacon	Michael Paszti
Peter William Dean	Joseph Sweeney Pritchard
Edward Graham Derrett	Wallace Rice
Agnes Esso	Stanley Lionel Ross
William Jerome Evon	Donald Charles Scott
Thomas Arthur Fisher	Charles Siegel
Joseph Maxwell Flicht	Robert Edward Stasiak
Edward William Gazo	Leslie Stern
John Travers Gilmour	Michael Mislave Stipetic
Velta Gipters	George Clare Stirling
Andrew MacDuff Glenney	David Strain
Benjamin Goldberg	Joseph James Telesnicki
Nathan Greenberg	Olen Arthur Tucker
Douglas Weber Haller	Sherwin Paul Tucker
Douglas George Heathfield	Arthur Joseph Vachon
Terrence Wayne Hicks	Maria Viducis
Bernard Arnold Hink	Irvin Vinsky
Alfred Yau Ki Ho	Ivan Markeyan Wachna
Milton Israel Houpt	Murray Wagman
Donald James Hughes	Robert Donald Wansbrough
Alvin Herman Just	Alan Norton Winnick
Saul Kendal	Ronald Wollin
Marvin David Klotz	Gerald Zanvil Wright
Richard Ian Knowles	Julio John Yustin
Larry Koven	

Registration in Dental Hygiene granted to the following graduates of the Course in Dental Hygiene at the University of Toronto upon completion of all other regulations of the Board:

Veda Jane Astell	Mai Pohlak	Gunvor Voldner
Pamela Joan Johnson	Esther Sunohara	Joan Ann Wachna

Report adopted.

CLINICS AND EXTENSION LECTURES

MEMBERS: J. D. Purves, Chairman; J. R. Hurton; W. G. Bruce.

REPORT

The Committee has completed a comprehensive appraisal of the existing lecture service provided by this Board with the co-operation of the Faculty of Dentistry, University of Toronto. The value of the service to the existing Dental Societies throughout Ontario justifies a continuation of and indeed an extension of the present lecture service.

The following suggestions were an outcome of the committee's deliberations:

1. The possibility of revitalizing the Cornwall Society through amalgamation with the Brockville and District Society.
2. Relocation of the Norfolk Society with the Brant Society.
3. Inclusion of the Oxford Society with the London and District Society.
4. Reactivating the Peel and Halton County Societies into one Society.
5. Deletion of the South Temiskaming Dental Society as being at present defunct.
6. Establishment of the Wingham & District Society in answer to the requests of the men in this area.

Two Societies, the Academy of Dentistry of Toronto and the Hamilton Dental Association, have not drawn upon the speaker pool for many years. This was felt to be a laudable situation in that the size of large urban Societies allows for early autonomy. Other Societies with similar circumstances, should be encouraged to adopt this policy thus allowing the maximum use of clinicians by the smaller societies.

The Committee is indebted to Dr. Glenn T. Mitton who processes the speaker service through the Faculty Staff. In this connection it was found advisable to require two months' minimum notice from Societies requesting a speaker. This has been necessary due to the many demands occasioned by practice and teaching assignments of the Faculty Members. The Committee is of the opinion that the recommended appointment of permanent secretaries to the District Societies will further this objective.

The Extramural Lecture Service provides a potent stimulus in the organization of District Society activities and provides a most necessary medium of communication between the Board, the Faculty and the Dental Practitioners in Ontario.

ACTION

Per diem allowances for Lecture Service increased to \$45.00 per day for full-time staff members and to \$75.00 per day to part-time staff members and other dentists.

Report adopted.

CANADIAN DENTAL ASSOCIATION

REPRESENTATIVES: M. V. J. Keenan; J. P. Coupland; A. H. Leckie;
W. G. McIntosh; L. M. Grose.

REPORT

FALL MEETING

The annual meeting of the Board of Governors of the Canadian Dental Association was held in the Nova Scotian Hotel, Halifax, Nova Scotia, on June 17th-20th, 1959.

The details of the activities of the numerous committees have been duly recorded in the Transactions so there is no need of a lengthy report at this time. However, a few references to some phases of the deliberations which are of particular interest to this Board might be in order.

Acting on a motion directing the Executive Committee to inform the Corporate Members of the needs requiring increased expenditures of money in the near future ('58 Transactions, Page 72) the Board concluded that an increase in the per capita grant of \$15.00 per annum would be necessary. We, in our good judgment took appropriate steps to augment our grant by \$10.00. This action on the part of our Board was much appreciated and was the first positive action taken in this matter. Several representatives of other Corporate Members felt certain that similar action would be forthcoming in their provinces. This indicates that the members-at-large are sufficiently interested to assist the C.D.A. in its work in every possible way.

The unfortunate legislation which was passed in Saskatchewan was much discussed and hope was expressed that some correction would eventually prevail. Dr. Gullett, in his Secretary's Report outlined the "denturist" problem.

After many years of negotiations a positive step forward has been achieved for dental services in hospitals. The Legislature of the Province of Ontario has amended the Public Hospitals Act thereby clarifying the legal status of dentists in hospitals. The Bill provides for dental care and supervision of patients in hospital and provides facilities for the teaching of dental students in hospital. The Hospital Dental Services Committee is aware that other provinces have been awaiting the outcome of legislation in Ontario and it is hoped that they will shortly attempt to have amended their Hospital Acts accordingly.

It was with sincere regret that the nominating committee had to present a slate of officers which did not include Dr. W. J. Langmaid as president. Many deserving compliments were paid to Dr. Langmaid and many messages of appreciation were accorded for his unselfish consideration to the profession since his appointment to the board of governors. It is fortunate that the Canadian Dental Association was able to persuade Dr. W. G. McIntosh to assume the presidency. Dr. M. V. J. Keenan was elected to the Executive Committee.

ACTION

Report adopted.

REPORT

FALL MEETING

1. The annual meeting of the N.D.E.B. was held in Ottawa on June 29th, 1959.
2. The President, Dr. H. R. MacLean, in his annual report, referred to the reduction in the number of Candidates sitting for the Board examinations. The reason for the decrease in number was not apparent but it was suggested that greater efforts be made to point out the advantages of the N.D.E.B. certificate to graduating students.
3. In a report of a special committee on oral and clinical examinations, it was agreed that the oral examination be retained. Its purpose is to replace the clinical examination and to explore the candidate's knowledge of dentistry on a broad basis. The clinical examination is recognized as the responsibility of the Provincial Licensing Bodies.
4. Section 20 of the By-Laws respecting the eligibility of candidates to take the examinations was amended so that now any individual who is graduated with a dental degree from a recognized dental school approved by the Council on Dental Education of the C.D.A. may take the N.D.E.B. examinations. The holding of an enabling certificate from a Canadian Licensing Body is still required.
5. Dr. Gerald Casey, Secretary of the National Board of Dental Examiners of the U.S.A., attended the meeting and informed the Board that his Council were interested in working out reciprocal arrangements between the two National Examining Boards. A motion was passed that a meeting of the committees appointed by the Canadian and the United States' Boards be arranged soon.
6. An amendment to By-Law 26 with respect to allowing candidates two supplementary examinations instead of one, was made and now reads "That candidates failing in not more than two written examinations but who have, notwithstanding, obtained an average of 65% of the aggregate marks, may be permitted to be re-examined in those examinations in which he has failed to obtain a pass."
Another amendment to By-Law 26 was approved as follows: "In case a candidate fails in not more than two written subjects and obtains a mark of 50% or over, such papers may be reviewed by a committee of examiners appointed by the Board, their decision to be final".
7. The report of the committee of examiners appears in Appendix A to this report. A comparison of the number of candidates in 1958 and 1959 appears in Appendix B.

Dean Neilson of the Faculty of Dentistry, University of Manitoba, asked the Board to consider whether the proposed training course for dental technicians at his school might affect the relations between his Faculty and the N.D.E.B. The Board was of the opinion that while the

Board must be guided and conform to the standards of accreditation of the Council of Dental Education of the C.D.A., any additional course of training for dental technicians should not necessarily affect the status of dental graduates.

The following officers were elected or appointed for the ensuing year:

President	— Dr. H. M. Eaton—Nova Scotia
Vice-President	— Dr. W. F. Hancock—Saskatchewan
Executive Committee	— Dr. R. W. Ball—Newfoundland
	Dr. T. J. Cooke—Manitoba
	Dr. A. G. Racey—Quebec
Registrar-Secretary	— Dr. H. N. Beach

As my term as your representative to the N.D.E.B. expires shortly, I wish to say that I have enjoyed serving the R.C.D.S. in this capacity since the formation of the N.D.E.B. and I would venture to say that some progress has been made to meet the wishes of the R.C.D.S. particularly in the area of the eligibility of candidates.

Appendix A

REPORT OF COMMITTEE OF EXAMINERS

Members of the Board:

The Committee of Examiners convened in the Drawing Room of the Chateau Laurier Hotel on Sunday, June 28, 1959, at 2:00 p.m. to consider results of the examinations held June 1-4, 1959, and reports as follows:

Candidates passed in all subjects.....	54
Candidates with failure in more than one subject.....	2
Candidates with failure in one subject.....	3
	—
TOTAL	59

All of which is respectfully submitted.

H. R. MacLean,
Chairman.

ACTION

Appreciation expressed to Dr. R. J. Godfrey.

Report adopted.

WORKMEN'S COMPENSATION BOARD

REPRESENTATIVES: J. R. Hurton; W. G. Bruce.

CONSULTANT: T. R. Marshall.

REPORTS

REPRESENTATIVES

Subsequent to Dr. Marshall's comprehensive report given last annual meeting published in the annual proceedings, the new approved schedule of fees has been mailed to each dentist.

A satisfactory arrangement has been made in the relationship of our consultant and the Workmen's Compensation Board. Dr. Marshall now has desk space at the board office with a definite agreement as to time and remuneration. It may be assumed that the liaison between this group and the Workmen's Compensation Board has become more comprehensive.

Your representative, on February 24, spent considerable time with Dr. Marshall in an endeavour to become familiar with some part of his duties. It is quite true that the majority of claims are routine and present no problems, but others are quite involved with a mass of detail involving a great amount of time and patience in adjustments, conciliation and arbitration. One could not but appreciate our good fortune to have a man of understanding and experience, trained in this medium to represent our profession.

The present arrangement appears satisfactory with the exception of a small percentage of claims received. First—the unreasonable requests for treatment. These, while annoying, can be handled by re-examination and reappraisal at the discretion of the consultant. Second—the complicated claim where more than one dentist is involved. The person who signs the various forms is responsible for the treatment asked for and completed. It was rather interesting to see a claim for several hundred dollars of restorative treatment submitted by an oral surgeon, especially when his treatment fee was about \$25.00. The procedure is, and has been accepted by us and the Workmen's Compensation Board. It can be considered as established custom. Your committee is of the opinion that this "custom" (1) definitely contravenes the intention of this board, (2) does not agree with the opinions expressed during discussion with a representative group of oral surgeons at the fall meeting, and (3) could cause the R.C.D.S. considerable embarrassment especially if the present noted trend regarding auxiliary personnel continues.

The procedure of having a dentist designate treatment required and accepting payment for same when any part of treatment is to be given by another dentist who is not identified does not seem to be in the best interest of the parties concerned. Direction by this Board regarding cases involving more than one dentist is requested.

CONSULTANT

Your Consultant to the Workmen's Compensation Board of Ontario reports as follows for the period May 1, 1959 to April 30, 1960. Several matters herein discussed are presented for information.

Participation During 1959

During the calendar year 1959 some 871 dentists provided services to beneficiaries of the Workmen's Compensation Board. For treatment rendered the Board made expenditures to an aggregate of \$83,752.30.

Board Policy and Dental Care

Business executives are taking a closer look at costs and expenditures today than they have for many years. The Workmen's Compensation Board, too, through its representatives, is examining expenditures for services, for which they are liable, more closely and are seeking justification for these services and their costs. Perhaps a brief review of policy in respect to dental care would be of interest. The Board desires:

1. To determine justly the extent of injury to an injured person from accident or industrial disease affecting the teeth, jaws and oral tissues.
2. To provide **quality** service to restore health and masticatory function as nearly as possible to that existing immediately prior to the accident or industrial disease. Service for aesthetics alone is not compensable.
3. To permit its beneficiaries to make their initial choice of a dentist. However, it has been given statutory responsibility to conduct and supervise treatment and therefore, it may direct a beneficiary to attend a practitioner of its choice because of his known experience and ability. Service to the patient is of prime importance.
4. Expects dentists to co-operate with its Medical Aid Department as follows:
 - (a) To provide an injured beneficiary with necessary emergency treatment.
 - (b) To make a complete report of his examination, diagnosis and treatment plan as soon as reasonably possible. X-rays of injured teeth may be taken as an aid in diagnosis and a special dental form is provided for the report; it is either sent direct to the dentist or the injured workman who is expected to deliver it to his dentist. This report, together with X-rays, is to be forwarded to the Board.
 - (c) If consultation is desirable, it should be requested by letter or if urgent, by telephone at the Board's expense.
 - (d) To calculate fees for services after consulting the Board's schedule of fees. In case a service is contemplated that is not listed, indicate a fair fee for approval.
 - (e) Not to proceed with treatment beyond emergency care until the treatment plan has been submitted and has been approved and authorized.
 - (f) To recognize that the Board pays the dentist in full for services to its beneficiaries who are so entitled under the Compensation Act. The dentist **may not** make any additional charge to his patient for service that is the responsibility of the Board.

5. Broken Appointments

This matter has been discussed with the Board. It agrees that a missed appointment means a loss of income to the dentist, yet under the Act, they cannot assume responsibility. The Board feels it is a matter between dentist and patient and it is presumed a charge against the patient would not be unfair.

Dental Fee Schedule

On July 1, 1959, a new schedule for dental services was put into operation. A booklet has been prepared setting forth general provisions of the Compensation Board's order in respect to dental services, together with a list of services and fees. This schedule was prepared after long and thoughtful deliberation being based on fair recommendation for **quality dental service**. The booklet has been mailed to every dentist in Ontario.

By and large, the schedule is satisfactory to members of the profession. A few have protested that the fees are inadequate however one dentist writes as follows—"In discussing . . . (Board's Allowances for dental services) with other dentists, they were all pleased with the high standard of dentistry now being authorized by the Board." This letter was very much appreciated by the Medical Aid Department.

New Dental Form

A new Form 8(b) is ready for distribution. This form is quite new in its entire concept. The purpose in making the change has been simplification for both dentist and the Board's assessors. It is hoped the dentist will make a greater attempt to complete it in detail and thus provide the Board with essential information to appraise the claim.

Consultant's Activities

During the period under review some twenty-six claims have been reviewed at your Consultant's office. Written reports were submitted. In addition, there were the usual telephone consultations between the the Board's Medical Aid Department and dentists concerning problem cases.

In reviewing claims and discussing them with dentists, your Consultant gained the impression that there was a need for a better understanding of dental problems on the part of the Board's assessors. Dentists were often irritated because they were telephoned by Board representatives; some settlements were negotiated that were open to question. This situation prompted your Consultant to write a letter to the Chairman of the Board with a copy to the Chairman of the Medical Aid Committee.

As a result, your Consultant was invited to meet two representatives of the Board last December. The matter referred to in the letter was discussed and the meeting ended with an invitation to spend two half-days a month at the Board's offices.

This proposition was discussed with Dr. Dunn as to the advisability of your appointee being retained by the Compensation Board in the dual role of their Consultant too. In due course, Dr. Dunn advised that the invitation be accepted. The appointment was then confirmed and duties were commenced on February 17, 1960.

Since assuming this new duty, many more claims have come under review and more consultations with members of the Board's staff. The Medical Aid Director has plans for a program of education in dental matters and to this end a pamphlet is presently being prepared for use by the staff.

Over the years, very cordial relations have existed between the Board and the profession, and it is felt these relations have been brought closer by the Board's appointing a dentist as their Consultant.

Principles For Adjudicating Dental Claims

During the past year the principles outlined in Appendix "A", of the 1959 Report of the Consultant were used as a guide in assessing claims for dental care. These principles have been of great assistance in standardizing procedures. However, from time to time, cases come up whereby their application may not be entirely fair, e.g.—A case in point would be paragraph (e) as follows: "When only some of the workman's teeth are injured in the accident and the uninjured teeth require attention or there are teeth missing, such that it increases the number of teeth on the restoration, the claimant is to receive the dental care involved and he is to be advised that this completes his entitlement under the Act." Your Consultant has pointed out that when there is a choice of restoration—(a) whereby the claimant may retain his entitlement by a plan of treatment to restore his injured teeth reasonably to that condition existing prior to the accident or (b) whereby he would have his injured teeth restored plus any other missing teeth in the arch affected and lose his entitlement to further service—the beneficiary should be permitted to choose in consultation with his dentist.

It is proposed that when experience over a period of time indicates an amendment to any of these principles that the matter be reviewed by the Board.

During the year Mr. Don Palmer has replaced Mr. A. B. McCartney as Chairman of the Medical Aid Committee. Mr. Palmer is a competent executive with a desire to understand every situation and willing to co-operate in all matters to the end of a fair adjustment of every claim.

In conclusion, your Consultant desires to thank Dr. Dunn and your Compensation Board Committee for their assistance during the year. Also a "thank you" to members of the profession throughout the province for their co-operation in serving the Board's beneficiaries. And finally to you members of the Board goes a sincere appreciation for your entrusting this responsibility to me on your behalf.

ACTION

- (1) Appreciation expressed to Dr. T. R. Marshall.
- (2) If more than one dentist is involved in a treatment service for a beneficiary, all dentists must be identified in order to determine responsibilities for various treatment services.
- (3) Reports adopted.

REPORT

FALL MEETING

One hundred and thirty examiners and associates attended the 76th Annual Meeting of the American Association of Dental Examiners at the Hotel Biltmore in New York City, September 11th and 12th, 1959. This, the first meeting of this association attended by your representative, was most interesting and illuminating in the field of dental licensure.

The objective of the dental examiner in any state is to act in liaison with society at large and with the dental profession. The profession in this case consists of two phases—that of practice and that of the dental educator.

The attainment of this objective is both deterred and advanced subject to such problems arising from the human element, from geography, from population, from the proximity of the dental school and from the dogged retention of past philosophies. As such I learned, was amazed, was chagrined and was stimulated by the variety of observations expressed during the meeting. However I do feel the experience will allow a more coherent appreciation of the problems of licensure in Ontario, in Canada, and I hope, eventually, in the world scene.

Following the President's address the committee delved into the problem of establishing a National Board for Dental Hygienists. Inasmuch as the Hygienists are at the present time evaluating a series of practical tests it was felt that much would be gained through an understanding of the philosophies derived from these tests and although the principle has been agreed upon the details of its execution might better wait for further study.

The establishment of a permanent headquarters building and staff for the A.A.D.E. was felt to be high on policy decisions. Assistance from the A.D.A. and other bodies assures its beginning—however complete autonomy must be achieved within three years. Ways and means varied from suggestions of raising membership fees to asking the A.D.A. to release a proportion of the fee obtained from candidates writing the National Examining Board tests. Later this would be augmented by a percentage of the fees chargeable to the Hygienists' Board. This was the course to be investigated.

Concern was felt for the large percentage of dental practitioners who do not retain or further their dental education in the years following graduation. Attendance at conventions, post-graduate courses or short courses involves only a meager 10% of the dental population. Suggested remedies were:

(a) The establishment of a point system—whereby points were given for attendance at or participation in a convention, post-graduate short course or recognized study groups. A review of the points attained within a 3 or 5 year period would require a minimum total for the obtaining of a yearly licence.

(b) The establishment of correspondence courses as are at present operated by the U.S. Navy. Unfortunately there was not time available in the program to consider this problem. I personally feel it is a very vital part of the licensure program.

“Licensing and the Advancement of a Profession” by Dr. Wm. Frederick, Eastern Representative of the Council on State Governments, was the most enjoyable address given at the luncheon. His broad philosophies stressing the benefits derived from reciprocity, the blending of similar professional groups and trends of the future provided objectives beyond the realm of our present day vision.

During the afternoon a symposium on “Evaluation and Grading of Dental Operative & Prosthetic Procedures” provided a representative opinion of the faculty from two dental schools—Columbia University Dental School and New York University Dental School. The senior year in all dental schools seemed to be concerned primarily with the training of students in the passing of state board examinations instead of imparting a broad philosophy of clinical practice, as applied to the profession of dentistry—this in spite of the fact that 42 of the 47 dental schools in the United States are accredited by the American Dental Association. It would seem that rather than a sensible balance of professional and dental education the weighting is in favour of the state examining board. The question of authenticity in grading clinical procedures seems to point out some inadequacies and indeed some injustices in the assessment by unqualified and unschooled examiners.

The highlight of the Saturday deliberations was the provocative address by Dr. Maury Massler speaking upon “The Human Element in Dental Practice. The three prime purposes of dental education are:

- (1) To impart knowledge.
- (2) To impart skills.
- (3) To impart a professional attitude.

Although the first two functions seem to be having the greatest attention there is a greater need for developing the professional man, his behaviour and attitudes. Often the student arrives at the dental school keen and ambitious and leaves his senior year disillusioned, he observed. Again he took issue at the attitudes of some state boards relative to their professional outlook, maintaining that the Gold Foil had attained such a degree of reverence that in his opinion it revealed only the ability to be a finely developed craftsman—this he feels does not satisfy the requirements for a profession but merely that of a skilled trade. This provoked much comment among the group on a personal basis.

In conclusion I wish to thank the Board for the privilege in being your representative at this meeting. Our picture in Ontario and in Canada is vastly superior to that of the United States, in my opinion. There is much

to be done in our provincial and federal licensure arrangements. Our objective should be to have all graduating students qualify for a National Certificate in order that they might move freely from coast to coast, subject only to provincial registration and discipline. I am sure that once this is effected, our objectives should be the extension of international licensure from the present British Commonwealth graduates and United States graduates to other nations.

ACTION

Report adopted.

REPORT

I have the honour to report for your information the following investigations and prosecutions from May 1st, 1959 to April 30th, 1960.

1. Bains, Donald B., 172 Gough Avenue, Toronto, Ontario.

He was charged with supplying a denture and on June 3rd, 1959 pleaded guilty before Magistrate Rogers in E Court at Toronto and was fined \$100.00. He was also charged with performing a service, act or operation. This charge was withdrawn, as the same evidence applied to both charges.

2. Lindsay, Robert G., 54 James Street, North, Hamilton, Ontario.

He was charged with taking an impression, supplying a denture and having equipment and on December 4th, 1959 pleaded guilty to all the charges before Magistrate Robert Morrison in A Court at Hamilton. The charge of taking an impression was not dealt with. He was fined \$100.00 for having equipment and \$100.00 for supplying a denture or ten days to run concurrently. The \$200.00 was paid.

3. Tyrrell, Graydon, 48 Geneva Street, Toronto, Ontario.

He was charged with taking an impression, supplying a denture and having equipment and on December 7th, 1959 he pleaded guilty to the charges before Magistrate Butler in E Court at Toronto. The charge of supplying a denture was withdrawn. He was fined \$500.00 for taking an impression and this was paid in installments. The alternative would have been two months in jail. Sentence was suspended on the charge of having equipment.

4. Warren, Charles, 935 Bay Street, Toronto, Ontario.

He was charged with repairing a denture and on May 4th, 1959 pleaded guilty before Magistrate Foster in E Court, Toronto. He was fined \$100.00 or 30 days. The fine was paid.

There has been a sign checked which has since been corrected.

Following a complaint from the Sanitation Department of the City of Toronto a dentist's office was inspected for cleanliness. This office has since been thoroughly cleaned.

At the request of the Secretary, two dentists were located, relative to their renewal certificates, who had previously been impossible to contact in normal channels.

There have been a few complaints come to the office. Attempt is being made to obtain evidence for prosecution.

ACTION

That the Secretary be authorized to enter into agreement with Mr. Monahan as follows:

"That a deferred compensation agreement be entered into with Mr. Monahan whereby at retirement he be paid an annual pension based on 2% of his average salary for his last five years of service multiplied by his years of service with the College. Monthly payment of the pension be made on the first of each month for life."

CARRIED

Report adopted.

REPORT

A most memorable academic year for the Faculty of Dentistry has just ended. The 1959-60 session has been frustrating at times, but also exciting and stimulating. It is hardly necessary to remind the members of this Board of the significant events which have been responsible for these changing moods. However, for future reference, it may be well to record some of the highlights of the year.

Late in the summer of 1959, the new building neared completion. Last minute delays caused postponement of the moving date at least once, but the final move—a long, drawn out affair involving several weeks—commenced on September 14th. Classes—lectures only in the senior year—began a week later. At times it was difficult to determine whether workmen had been trapped, along with students, in the lecture rooms. The air circulation equipment was not “broken in” and during some of the hot-humid days of late September conditions in classrooms became unbearable. This was only the beginning of a long series of “growing pains”.

The clinical areas were not ready until about mid-October and the treatment of patients was considerably delayed. We can report now, however, that the delay did not reduce the experience gained during the session by the Fourth Year students, as indicated by the greatly increased clinical operations completed by the class. Several factors may be cited as important in this connection; better organized facilities; better selection and control of patients; availability of high speed equipment on each unit; more extensive provision of technical services for students and students obviously stimulated by the new surroundings.

Two or three of the points mentioned above warrant elaboration. The probable supply of patients following the move from 230 College Street to the new building had been discussed many times during the planning of the new building. There were no doubts in the minds of some, but we were moving into the established hospital out-patient district. The doors of the patients' reception area were scarcely opened when the trend became obvious. Three months later, we had to cease registering new patients. Furthermore, a new method of reception and screening resulted in better conditioned and more co-operative patients, so noticeable throughout the session.

The use of high speed equipment by all students increased their output, without undue accidents to the pulps of teeth. The further adaptation of this equipment to the second year technique course, now carried out on phantom heads in the main clinic, gave perhaps the most striking evidence of the “speedup” in work accomplished. This is a very significant development in dental education, pointing the way to urgently needed consolidation of the dental student's timetable.

Early in January, 1960, our former practice of permitting senior students access to the services of technicians for limited purposes was reviewed, and subsequently expanded. Again the effect was to increase the volume of clinical practice and provide the students with more experience in writing laboratory prescriptions, addressed both to our own technical service and to commercial laboratories.

It can, therefore, be stated that in the very early months of the occupation of the new building important trends were established in what may be described as the "new look" for dental education.

While all this was going on, a busy academic life for the staff was punctuated with frequent visitors from Canada and all parts of the world; the official opening ceremonies on November 25th, 1959, and a two-day "Open House"—February 13th and 14th, 1960. The years ahead should be restful in comparison with session 1959-60. Here once again, I should like to give full recognition to all members of the staff, both academic and non-academic, who have served so loyally through this history-making period. The psychological adjustment necessary in a transition of this nature is difficult to understand unless you have experienced it. Patterns of operation become established over the years and then suddenly things are different. I should also like to record with gratitude the important contribution made by the members of the Board of Directors of the Royal College of Dental Surgeons during the past decade, in obtaining the funds and the support for the new building project. The end result is a fine tribute to the tireless efforts of many men.

There are many problems still before us, but the Faculty is well and truly launched into an exciting new era in dental education.

Television

The use of television as a teaching medium has been expanded considerably during the year. As you are no doubt aware, an extensive closed-circuit dual camera installation was provided for, when planning the new building. The majority of the programs which have been televised originated in the well-equipped third floor studio and were received on a battery of 21" monitors in the auditorium. The staff agree now that this medium provides a useful adjunct to the conventional methods used in the classroom.

Recently instructors who have substituted televised clinical demonstrations to full classes (100 or more students) to replace individual demonstrations to groups of seven or eight students, met to review the year's work. Chief interest centered upon an attempt to evaluate the effectiveness of the instruction using closed circuit television. There was agreement that the somewhat impersonal relationship between the instructor in the studio, and the student audience in another part of the building was still a disadvantage. On the other hand, it was agreed that with closed circuit television each student's view of detail was equal to the best that could be seen by the few students who occupied the most advantageous position when a small group crowded around a patient.

Again on the positive side the selection of a single suitable patient for the televised operation eliminated the variables which occur when many

patients are required for many small group demonstrations. This introduces the observation that to repeat a televised program some weeks after the initial run would have advantages. It has always been true that a viewer sees more in a motion picture film the second time of viewing. And that raises the comparison between an effective film and a televised live program. The consensus is that the film cannot be considered as "live" and is even more impersonal. Furthermore, it is not so easily changed from showing to showing and does not readily lend itself to questions and explanations of details along the way, whereas with the two-way sound communication between studio and audience, questions can be asked through the moderator with the audience at any time, and, if necessary, a point that was missed can be repeated and explained. Admittedly, the televised demonstration does not stimulate questions and discussion between class and teacher. The teacher on one end of the television cable and the class on the other, cannot be compared with Mark Twain's teacher on one end of a log and the student on the other. Can this weakness be satisfactorily resolved? Perhaps it can be alleviated by arranging a small studio audience of students who will be stimulated to raise questions and enter discussion with the instructor, and more important still, who will act as a mirror for the instructor, reflecting the effectiveness of his teaching. The problem of loss of contact—the impersonal relationship—is, after all, twofold.

Meticulous preparation has become the by-word for teachers using this medium, and the well-prepared script and prior rehearsal, the technician's mainstay.

Building Monograph

Many inquiries have been received from all parts of the world requesting information about the new facilities. It has therefore been decided to prepare an illustrated monograph of approximately thirty pages detailing the highlights of the building. The assistance of the University Publicity Department has been assured, and we hope that this project will be complete before the end of 1960. The student publication, *Hya Yaka*, was devoted to a review of the fifty year period 1909-1959. It recalls the "good old days" in the building at 230 College Street, opened in 1909, and the move to the new building at 124 Edward Street, in 1959. It is very commendable historical record of fifty years in dental education.

Registration

At this time a year ago I reported a registration of 450 students in the Faculty. This year, 1959-1960, shows the beginning of the long climb to a probable registration of over 700 students in dentistry by 1966. The figures for 1959-60 are as follows:—

Pre-professional Year	100	
First Dental Year	115	
Second Dental Year	85	
Third Dental Year	63	
Fourth Dental Year	94	
Occasional Students	10	467

Dental Hygiene (1st Year)	8	
Dental Hygiene (2nd Year)	6	
Dental Hygiene (occasional student)	1	15
Dental Nursing	3	3
Bachelor of Science in Dentistry, Post-graduate and Diploma	26	26
	Total	511

The total for 1959-60 exceeds the total for the previous session by 61, and that of two years ago by nearly 100. The recruitment efforts of the Dental Alumni Association and other organized groups and the individual members of the profession appear to be producing results. It is highly desirable however, to stimulate increased interest in the dental nursing and dental hygiene courses.

Dental Hygiene

The admission requirements to Dental Hygiene have been modified during the past session by removing the two *compulsory* mathematics papers and substituting for them, Latin or Mathematics (two papers). Two candidates who were accepted for the class which registered in September 1959, with Latin in lieu of Mathematics, have proven to be very desirable Dental Hygiene students. This appears to have been a popular move also insofar as the secondary schools are concerned.

Aptitude Tests

At a recent meeting of the Council on Dental Education of the Canadian Dental Association, a progress report was submitted by the representatives of the Ontario College of Education, and Dr. R. M. Grainger on Aptitude Tests. A pilot study is being conducted at the Faculty of Dentistry, University of Toronto, on aptitude tests. Commencing in the fall of 1960 this study may be extended to include some form of manual dexterity test on a strictly experimental basis, after the candidates have been selected for the Preprofession and First Dental Years. The present losses sustained in the routine process of examinations in these two years is such that a First Dental Year class of 150 or more will be required to assure a graduating class of 120 students.

Alumni

The strength of the Dental Alumni Association continues to grow, if membership figures are indicative of strength. The figures for the past four years are reported as follows:

1956—Membership—not available—Contributions—	\$2,743.00
1957—Membership—382 —Contributions—	3,151.00
1958—Membership—522 —Contributions—	4,644.94
1959—Membership—813 —Contributions—	5,642.35

The Dental Alumni Association's main financial program is devoted to student financial aid. They continue to provide two First Dental Year bursaries of \$200.00 each, and in addition their Revolving Loan Fund,

started a little more than two years ago, now has a capital value of \$7,631.25. Of this amount, \$4,231.25 was added in 1959. The importance of and need for student assistance increases each year.

Curriculum

Curriculum changes which were reported as imminent a year ago are proceeding according to plan. The second phase of this revision will include in session 1960-61, the transfer of General Pathology from the Third Year to the Second Year; similarly the transfer of the Crown and Bridge technique course from Third Year to Second Year, where it will follow immediately after the Operative Technique Course. When the present series of adjustments are complete it is expected that in 1961-62 the Third Year students will be free to commence their clinical practice in the fall term rather than some time after Christmas of the Third Year. A further step is being planned to increase the opportunity for clinical experience in the final two years of the dental course. The Third Year schedule will continue until approximately June 30th, and the same class, as Fourth Year students, will return on or about August 15th. This *may permit* (some time in the future) an earlier date for graduation. At least the continuity between Third and Fourth Year teaching and clinical practice will be improved. The prospective members of the 1960-61 Fourth Year class have been invited on a voluntary and experimental basis to commence clinical practice on August 15th, 1960. Approximately 66% of the class have agreed to accept this invitation in spite of the reduction in summer earning time. This is one of the disadvantages seen in the proposal, but it is believed that the advantages to the members of the graduating class outweigh the disadvantages. Financial assistance for some members of this class will be required.

School Survey

During the session, Dr. A. C. Lewis, formerly Dean of the Ontario College of Education, and Chairman of the Canadian Dental Association Dental School Survey Team, spent the week of March 7-11 inspecting the school. No formal report was issued by Dr. Lewis following his visit, but he offered valuable assistance to some departments in relation to their teaching program.

A modest list of short postgraduate courses was offered and fully subscribed during the past season. The Division of Postgraduate and Graduate Studies is now equipped to accommodate an increased number of full time students, and also more of the short courses. As staff in this area becomes more available, more courses will be offered.

At the request of this Board directed to the Faculty in the form of a resolution, a one-year training program at the postgraduate level will be established in Anaesthesia. The promise of the co-operation of the Faculty of Medicine, specifically the Department of Anaesthesia under Dr. S. M. Campbell, has been obtained. The Council considered the general outline of the course at a meeting on May 12th. The proposed course will comprise a study of the basic science courses, Physiology, Pharmacology and Anatomy. All aspects of anaesthesia, both local and general, will be dealt with in seminars. Practical training and experience

will be gained in the new facilities at the dental school and the Dental Service at the Toronto General Hospital. Other hospitals will be included as opportunity permits. At the outset candidates (one or two each year) will proceed to the Bachelor of Science in Dentistry degree.

The record of Extramural and Extension lectures for 1959-60 includes 22 societies participating. A total of 36 meetings were held at which 1,084 dentists were in attendance.

This Board's November 1959 resolution to the Faculty Council requesting the inclusion of "practice administration" as a topic for Extramural Lectures and a Postgraduate Course, was given careful consideration. The Council deemed it inadvisable to include such a topic for an official University course. It was agreed however, that this topic was suitable for an Extramural Lecture. Subsequently, Dr. Wesley Langmaid of Oshawa acted as observer on behalf of the Faculty at a practice administration course in Oshawa on January 20-21, 1960, sponsored by the Durham-Ontario Dental Society. Dr. Langmaid reported that the course given by Dr. Figg was excellent.

The Board's resolution urging expanded instruction of undergraduate students in hospital routine was likewise given favorable consideration. The resolution of the Dental Services Committee requesting coverage in a lecture to students of the graduating class of details respecting Post Payment Plans received immediate attention. Dr. Dunn gave a lecture on this and related subjects on March 15th, 1960.

Research

The interest in research activities in the Faculty has been increased with the occupation of the extensive, new, well-equipped quarters on the fourth and fifth floors of the building. Dr. Murray Hunt's work in the field of radioactive isotopes is attracting wide interest. The Burlington Orthodontic Research Study is increasing in importance and receiving recognition. Requests for use of the research data being accumulated have led to the formulation of the following policy in this respect:

- (a) The moratorium regarding the use of the Burlington data by outside groups is to be extended until the completion of the project around 1962.
- (b) The data, radiographs, models and so on relating to this study are to be housed in the Faculty of Dentistry, Room 506, when such material is no longer required at Burlington.
- (c) Applications for research involving the use of Burlington data are to be processed through the Research Committee of the Faculty. The actual work is to be done at Burlington or at the Faculty of Dentistry, and at no time may the material comprising the Burlington Study be removed from Burlington or from Room 506 of the Dental Building.
- (d) Dr. E. Harvold is to serve as the curator for the Burlington Orthodontic Research Study Collection.

Dr. R. M. Grainger's work on various aspects of records in the clinical departments, statistical studies of student evaluation, carries research projects, graduate courses in statistical methods and aptitude testing projects is gaining momentum and significance.

Staff

At the commencement of the session Dr. R. S. Locke assumed the rank of full professor; Drs. Marjorie Jackson and R. M. Grainger were promoted to the rank of Associate Professors on a full time basis. The number of staff nurses, secretaries and technicians was greatly increased, with the result that today the non-academic staff comprises:

- 20 secretaries and stenographers
- 29 technicians and laboratory assistants (includes research)
- 33 dental nurses and assistants
- 2 library personnel

The academic staff in 1959-60 included:

- 19 full time staff
- 100 part time staff

Staff Notes

Dr. W. G. McIntosh was elected President of the Canadian Dental Association at Halifax, in June, 1959, and Dr. D. W. Gullett became President of the American College of Dentists. The staff have received the usual extensive list of invitations to address societies and participate in courses given both in Canada and the United States. These are too numerous to list.

Conclusion

In conclusion it is my privilege to extend sincere thanks and gratitude to the members of this Board for their moral and financial support extended to staff and students during the past year. To all members of the profession and particularly the members of the Dental Alumni Association, we are deeply grateful for their interest and encouragement.

POST GRADUATE TRAINING

in

GENERAL ANAESTHESIA

The prevention and relief of dental pain is a basic and irrevocable responsibility of dentistry. Since its inception general anaesthesia has, of necessity, been an integral part of dental treatment and still remains so. With the increase in our population the number of cases requiring general anaesthesia for dental treatment will also be greater. There is also need for training in anaesthesia for conservative dentistry as well as oral surgery procedures.

New and improved anaesthetic agents and techniques bring with them the necessity of broader knowledge and experience if our services are to be of the highest standard of quality and safety. A rag and a bottle of ether no longer satisfy the anaesthetic requirements of general surgery and unsupplemented nitrous oxide and oxygen no longer fulfil the requirements of dental anaesthesia.

The dental curriculum is already overcrowded, combining as it does, the clinical training along with fundamental science. Consequently it is both impossible and unrealistic to attempt to impart competence in general anaesthesia to dental students during the undergraduate course. An adequate period of intensified postgraduate training is necessary to ensure that those interested will receive a comprehensive background in the fundamental biological sciences as well as adequate clinical experience in the art of general anaesthesia.

Dentistry has the moral obligation to so regulate itself that only well trained and competent dentists will undertake this phase of dental practice. It is consequently imperative that this Faculty, as requested by the Board of Directors of the Royal College of Dental Surgeons, make provision within the Faculty to provide the necessary background and clinical skill in general anaesthesia on a postgraduate basis so that we may morally, as well as legally, maintain and improve our professional birthright.

Prerequisites:

1. Doctor of Dental Surgery degree or equivalent qualification.
2. Preference should be given those who have spent at least one year in dental practice.

Duration:

1. Twelve consecutive months.
2. The number of students admitted to the course in any year to be governed by the demand and facilities.

Course Content:

1. Basic science courses in the following subjects:

- (a) Physiology—with special reference to the physiology of respiration and circulation. 100 hours
- (b) Pharmacology—with special reference to the pharmacology of anaesthetic agents. 50 hours
- (c) Anatomy—with special reference to the anatomy of the respiratory tract and circulation. 50 hours
- (d) Anaesthesia—this course would extend throughout the entire year and include the following: 300 hours
 - (i) Theories of Anaesthesia.
 - (ii) Agents.
 - (iii) Techniques.
 - (iv) Armamentarium.
 - (v) Emergencies.
 - (vi) Medical conditions.
 - (vii) Physical evaluation.
 - (viii) Laboratory procedures.

It is proposed that the course be integrated with the Department of Anaesthesia of the University of Toronto and that the students would receive clinical and didactic instruction in anaesthesia both in the hospitals and at the Faculty of Dentistry. Such an arrangement would have mutual benefit as it would provide the opportunity for dental graduates to obtain broader experience in history, techniques, laboratory methods and physical evaluation, while trainees in medical anaesthesiology also would gain much needed experience in dental anaesthesia through circulating through the clinic at the Faculty of Dentistry.

It is proposed that a member of the Department of Anaesthesia, Faculty of Medicine of the University of Toronto, should hold an official appointment on the staff of the Faculty of Dentistry. Similar appointments are now in existence in other areas of the Faculty of Dentistry.

2. Practical Aspects:

- (a) The major portion of the training program would take place within the confines of the Faculty of Dentistry. The physical facilities are now available in the Surgery Department and it is quite likely that patient material would be available in abundance. Additions in staff would be necessary.
- (b) As outlined, there would be much mutual advantage through a rotating anaesthesia service in the hospitals and Dental Faculty Clinic.

Registration and Degree

Candidates will register for the B.Sc.D. degree.

The Executive Committee recommends the adoption of this report and the establishment of the postgraduate course in anaesthesia. May, 1960.

ACTION

Report adopted.

REPORT

A major Library task during the past year was the packing of the books and journals at 230 College Street and transporting and installing them in the new Faculty Library at 124 Edward Street. When it is considered that this involved over 10,000 books and nearly 45,000 unbound pamphlets and journals, the enormity of the task becomes apparent. I am happy to report that the transfer was made with the minimum disruption of library services and that the Library was functioning within three days from the time of moving.

There are still a few unfinished items. The study carrels for the graduate area are not yet installed. These have been designed with doors to afford the maximum privacy and have locked cupboards providing safe storage for two graduate students in each carrel. Tenders for a design approved by the Library Committee have been called for and this area should be completed in the near future.

The special locked stacks for our rare book collection have been found unsatisfactory in certain respects and have been returned for alteration and there is also a minor adjustment necessary for the periodical shelving.

The judicious use of colour has given the Library an attractive appearance. The carved wooden crests of the University of Toronto and the Royal College of Dental Surgeons have been removed from the old Library and installed near the entrance of our new Library where they are, if anything, more attractive than in their previous location. I am also pleased to report that the memorial window to Dr. J. B. Wilmott has been installed near the entrance to the Auditorium in our new building. Suitable back lighting has been arranged for it and the general effect is a great improvement over its original location. A handsome illuminated address presented to Dr. J. B. Wilmott, when he was leaving Milton in 1871 to begin a dental career in Toronto, came to light during the removal from the old building. This handsome item has been suitably framed for permanent preservation and makes an interesting companion to the memorial window.

The "four-way" carrels designed for the reading room have proven to be extremely practical and provide virtually a private reading space for each student. This feature has created much interest in other libraries and the design is being incorporated into libraries now in the planning phase. The private reading room for the staff has been attractively furnished and is both pleasing and highly functional. A microfilm reader and storage files for microfilm have been installed in a special room provided for this purpose and books and theses on microfilm are in process of being collected.

The periodical area is also of special design. Each journal in the journal rack is held by a spring clip and exhibited on the sloping door of the cubicle so that the whole cover of the journal is plainly visible. In this way each journal is readily identified visually as well as alphabetically. When the cubicle cover is raised the back numbers of the respective journals are found in the cubicle. The ease with which the new rack makes journals available has received much favourable comment.

I regret to report that no action has been taken towards completing the Museum area. This room was not in the building contract and remains an unsightly box of concrete blocks. In addition its location immediately adjacent to the Library entrance detracts greatly from the Library. In view of the fact that a very generous donation by Mrs. Mendel Nevin in memory of her husband, is contingent upon completion of the room, it is hoped that completion may not be further delayed.

In the interim we are seeking out and collecting significant historical items and placing them in our basement storage room. This activity cannot be carried on without funds for transporting the articles, and, to a limited extent, for outright purchase. In addition many of the items could not be placed on museum exhibit without thorough cleaning and rehabilitation, which, in some cases, is costly.

For many years the Library has had a working arrangement whereby your Board supported our Museum activities with an annual grant of \$150.00 per annum on a non-cumulative basis and correspondence relative to this item was carried on in 1955 and 1956. We have recently learned that such authorization by your Board does not seem to formally exist, which is surprising in view of the fact that the procedure was inaugurated by Dr. Angus Kennedy when he assumed the responsibility of Librarian many years ago. Your Library Committee respectfully requests that if authorization for such a grant does not officially exist, that such a grant be now approved. We further request that the grant be cumulative and paid annually to the Library Contingency Fund at the Faculty of Dentistry and that disbursements from it be made on the recommendation of the Library Committee and the signatures of the Dean and the Secretary of the Faculty.

During the year there were 83 acquisitions of books and one new journal subscription was added. There were 39 out of town loans and 18 inter-library loans. Circulation figures for the last five years, which are appended herewith, show a total of 9,547 loans and an additional 1,800 items used in the reading room which were not charged out. The increase over last year is probably due both to the increase in the size of the graduating class and in the better library facilities afforded.

During the year the University of Toronto appropriation was increased \$303.00 over last year to a total of \$2,375.00 which appears to satisfy our current requirements. This increase is most gratefully acknowledged.

Donations of books and journals are gratefully acknowledged from many sources including: Drs. D. L. Anderson, R. G. Ellis, W. J. Dunn, G. C. Hare, H. A. Hunter, J. M. Hollinger, R. J. Godfrey, J. H. Johnson, A. W. Lindsay, A. D. A. Mason, Mr. P. W. Millard and Mr. C. C. Rous.

Donations of Museum items are also gratefully acknowledged from Dr. E. S. Barker, the late Dr. F. W. Murray and from Mrs. Borrow, the daughter of the late Dr. Hamilton of Stratford. These items have been placed in our storage area pending completion of our Museum.

There has been some decrease in the time elapsing between the order and delivery of books, but there is still much room for improvement. The inauguration of a "Professors' delivery service", operated from the main University Library to the departmental libraries, has been most successful and has been of great value to the staff in obtaining material quickly.

We are grateful to Dr. R. J. Godfrey for having supplied a complete file of the Faculty of Dentistry's Staff Letter in response to our efforts to complete our file of this item for our archives. Eleven rare books were purchased during the year, bringing our total to 258, dating back to 1623. Our American Journal of Dental Science is now complete with the exception of one issue of Vol. 8 (1874-75). The acquisition of 21 volumes of early dental periodicals from 1881 was also accomplished during the year.

Expenditures from the Abbott Fund during the year have again been restricted to rehabilitation of the books of the Abbott collection. Progress in this area has been hampered by the disruption of moving, but as of this date, approximately \$418.00 worth of binding and repairs is under way by the Carswell Company. This company has done excellent work at reasonable cost. Some of our historical items will be placed in special historical receptacles rather than be rebound due to the fact that re-binding would depreciate their historical appearance and value. This method has been employed and is recommended by the Central University Library.

I regret to report that Mrs. Rudd who has assisted in the Library during the year, is leaving to return to England, but I am pleased to report that the services of a second trained librarian have been secured. Comparative circulation figures for the past five years are herewith appended along with a financial statement of the Harry R. Abbott Fund.

This report is respectfully submitted with the recommendation that the customary grants be continued for the ensuing year.

Appendix A

CIRCULATION STATISTICS, MAY 1, 1959—APRIL 30, 1960

Year	Faculty	Students	Graduates	Periodicals	Totals
1955-56	521	6285	887	1797	9,490
1956-57	388	6151	737	1341	8,617
1957-58	415	6419	968	1132	8,934
1958-59	467	6329	940	1278	9,014
1959-60	693	6778	950	1176	9,547

Appendix B

HARRY R. ABBOTT FUND

Balance as of July 1, 1959.....	\$796.57
Spent to April 25, 1960.....	9.50
	Balance \$787.07

Binding has been sent to Carswells to the approximate cost of \$418.00.

ACTION

Budget allotment—\$150.00, Library Contingent Fund.

Report adopted.

DENTAL PUBLIC HEALTH

MEMBERS: Marjorie Jackson, Chairman; R. R. Butler; D. L. Rife; K. W. Davey; R. O. Fisk; M. G. Boyes; M. Buchman; K. F. Pownall; D. J. E. Mitchell; Glenn T. Mitton, Field Secretary.

REPORTS

COMMITTEE

It is my pleasure to present the report of the activities of the Dental Public Health Committee of the Ontario Dental Association for 1959-1960.

Field Secretary

On behalf of the Dental Public Health Committee may I express our thanks to the Royal College of Dental Surgeons of Ontario without whose financial support we could not have had the specialized advice and assistance of Dr. G. T. Mitton. As you will note from his report he is to be commended for the effort he has put forth on behalf of Dental Public Health.

Mediscope '59

The hard work that went into this presentation was well repaid when we realized that the public is anxious to learn more about health. Dental caries, malocclusion and periodontal disease were the three phases presented in panel form. Dr. Wesley J. Dunn and Dr. G. T. Mitton, who together did so much of the behind-the-scenes work, are to be congratulated. Without these two the success of dentistry's display would not have been possible. It is also interesting to note that through such exhibits much can be done to influence young people to consider dentistry as a career.

Student Dinner at Hart House

This year the procedure of this annual event was changed to allow the representatives of the Royal College of Dental Surgeons and the Ontario Dental Association more time to present a resume of their aims and activities along with those of the Canadian Dental Association as presented by the President, Dr. W. G. McIntosh. It is now evident that an annual meeting with the graduating class provided by the Royal College of Dental Surgeons and the Ontario Dental Association, planned and promoted by the Dental Public Health Committee, is of great value in enlightening and stimulating students.

Red Cross

The dental activities of the Red Cross are directed through their representative to the Dental Public Health Committee. Doctor S. A. MacGregor has been instrumental in placing enthusiastic graduates in

dental coaches throughout the province. We are also grateful for his efforts in procuring 25,000 Red Cross dental booklets for distribution at Mediscope '59.

Recruitment and Placement

We all must realize how urgent this question has become, and we have been pleased to work with the Canadian Dental Association, the Faculty of Dentistry, University of Toronto, Dental Alumni, the Ontario Dental Association and the Royal College of Dental Surgeons on the groundwork for a combined effort to recruit young people for dentistry.

One of our main projects this year has been in the equally urgent field of placement. Dr. G. T. Mitton has made many contacts in rural districts where the need is great, and has been instrumental in placing graduates in many of these areas.

Dental Health Day

The Chairman, Dr. K. Pownall, and Dr. M. Buchman, Chairman of Materials, and their committees were responsible for a very successful Dental Health Day. The originality of the new material that was used did much to stimulate local dental societies to increase their efforts toward the promotion of Dental Health Day.

Your Child and Mine

Preliminary work has been started under the Chairmanship of Dr. R. Butler on evaluation of this book, and its revision is anticipated by May, 1961.

Fluoridation

The preliminary work is now completed, and we are awaiting the results of the Ontario Fluoridation Investigating Committee's report.

Convention

The Dental Public Health Committee through its Convention Chairman, Dr. K. Davey, has prepared a new display which should provide much interest at the Ontario Dental Association Convention. Group clinics on Dentistry for Children and a table clinic on the promotion of Dental Health Day will be presented.

The Dental Public Health Committee's efforts to promote dental health throughout the province are made possible by financial support from The Ontario Dental Association and the Royal College of Dental Surgeons of Ontario. We are grateful for this assistance and for the opportunity to serve.

FIELD SECRETARY

Five regular meetings of the Dental Public Health Committee were held during the past year on June 2, September 22, and November 17, 1959, and January 19 and March 22, 1960.

The activities of the field secretary for the year were primarily directed toward assistance in placement of graduating students in county towns of the province requesting a dentist's services. Activities also include the development of dental health materials for special events during the year and other associated field work listed under the following headings:

Graduating Student Activity

1. Complimentary Student Dinner

The Dental Public Health Committee was again host to the students of the graduating year. The members of the Boards of the Ontario Dental Association and the Royal College of Dental Surgeons were invited guests. The Ontario members of the Board of Governors of the Canadian Dental Association with the president and secretary were also our guests.

After dinner in the Great Hall of Hart House and entertainment by Mr. Bernard Johnson, representatives of the three Boards spoke briefly on the functions of each in organized dentistry. To meet and hear at first hand, those who represent organized dentistry seems most opportune as a contribution to future understanding and well-being of the profession.

Each student was presented with the current copy and a year's subscription to the magazine "Health".

2. Screening of Dental Health Films

By special arrangement for times suitable for viewing by third and fourth year dental students and students in dental hygiene, dental health films were screened this year by the field secretary. The purpose was to acquaint the students of the material available for their use in dental health education.

3. Graduating Student Placement

During this session, approximately ninety requests and announcements of opportunity for dentists have been received at the Faculty of Dentistry. Many of these include requests from Chambers of Commerce, service clubs, co-operatives and citizens' groups. In many instances, these communities are without a dentist or have insufficient dental services for the people to be served.

Upon receipt of such a request, the information is posted and it is drawn to the attention of the students. By correspondence and through information available from the Department of Municipal Affairs and the R.C.D.S. register, information is secured as to population, dentists now serving the area, if any, and their age grouping, distances to dentists in areas surrounding, number of physicians, hospitals, if any, school population in elementary and secondary schools, the industries and type of employment of the people, public services and the availability of office and living accommodation. It is pointed out to the local representative making the request, that there is real competition because of so many

places with similar need. It is suggested that any assistance, financial or otherwise, which can be offered to help to establish a recent graduate may make the difference between getting a resident dentist or not. A trip to meet the influential citizens of the community is often helpful. With this information available and the information posted and by announcement to the class or by individual contact, the interest of likely students is aroused. Where real interest is shown, arrangements are made to take the student to the town to meet the local people and to be shown around the area served.

There are at least four graduates this year who will be establishing practice in such towns as a result of this activity, and there are others who have shown interest. Financial assistance has been made available to two and possibly the third to become established in practice. It is to be noted here that among other requests from municipalities and interested citizens that interest free money to the extent of \$5,000 in one instance, \$7,000 in another and a year rent free office space in the third place, has been offered. It points up the dire need for dental services felt by influential citizens of many Ontario communities. To date, in the three instances cited, we have no graduate that has shown interest. The people to be served are estimated in the first instance as 2,690 with one dentist in practice over forty years, the second, 10,700 population in a permanent military campsite area, and a third, 8,500 population with one resident dentist. While these places are small county communities, real opportunity for practice exists there.

There are two things which could assist in providing dentists for such communities. First, dental students should be recruited from the high schools of the county towns and villages of the province, who would be more likely to go back to some of these smaller county towns. Secondly, dentists individually, as well as through their societies could do much more, both in recruitment as well as by adopting a young graduate for such communities and making him feel needed there as a young colleague. The present dentists in practice there should accept their responsibility by seeing far enough ahead to have young men and women trained who will come back to accept future responsibility for dental care in that community. More students are inquiring about such opportunities of recent date, which augurs well for this public health activity. The Dental Trade Association has agreed to make no approaches regarding location when a student has become interested in a certain area under this program.

4. Recruitment into Dentistry

(a) Student Tours of New Dental Building

There is evidence of interest being shown in Dentistry which is difficult to credit to any one factor. It seems to be the result of a few dentists getting likely young people interested enough to visit the new dental building. On five occasions since the opening, I have had the opportunity of showing interested high school students through the building. If Career's Day activities in High Schools throughout the province could lead to such tours, I am quite sure a favourable impression would be left, towards prospective dental students later.

(b) Science Fairs

The "Science Fair" movement is intended to stimulate the interest of High School students and arouse this curiosity in the application of basic sciences towards vocations such as dentistry. This is a very comprehensive program in the United States and the American Dental Association has produced a manual "Dental Projects for High School Students" which should arouse real student interest.

At a recent Science Fair Exhibit in Toronto, the first prize winner was a dental science exhibit developed by two Scarborough High School students. This prize winning exhibit has been procured and will be shown at the Ontario Dental Association convention. Dentists will have a chance to view the exhibit, see the potentialities of this in student interest and recruitment, and meet the boys who developed it. A display designed and developed by students of the Danforth Technical School will also be on display.

Development of Dental Health Materials

Special events during the year stimulate the development of new dental health material. There is an ever increasing need for new material in several media to include, printed matter, graphic material, visual, audio and audio-visual material. The Dental Public Health Committee were involved in three such occasions when new material had to be developed.

1. "Mediscope '59"

A real opportunity was afforded dentistry to participate in this exposition sponsored by the Ontario Medical Association. The purpose to acquaint the public of all aspects of health, made it mandatory for dentists to be represented. The field secretary, on behalf of the Ontario Dental Association participated in the planning stages and then was assigned the responsibility of obtaining the visual material necessary for illustration of the four aspects presented, namely: dental caries and its sequelae and fluoridation information; periodontal disease; malocclusion and its aetiology and the opportunities for young men and women in dentistry.

This venture seemed most rewarding from the interest shown by the public and in particular by young people from High Schools of the province. Large quantities of literature was distributed during the week of this exposition. It did point out one thing that such visual material should be more readily available for such occasions. The extent of this visual material used is reflected in the items for photography and colour transparencies of \$244.50 for this display. These display panels now available can be used on similar occasions.

2. Dental Health Day

It was found necessary to develop new material this year. This included coloured flyers, radio scripts, television scripts and the props to

accompany them consisted of flip-cards and slides. The major effort was the development of a new television spot announcement on film. These were distributed to all 15 television stations in Ontario. Packs of other available material went to all dental societies in Ontario. Much free time on radio and television was made available as a public service. Where local societies were active such public service air time was most generous. A report of one such co-operative effort appears in the May issue of the Canadian Dental Association Journal. The fact that sound-on-film spot announcements of short duration are accepted so readily as public service material by television stations, it seems logical, with the rapid expansion of television across Canada, that the national body should consider production of this type of material. As in the United States, where the American Dental Association has such material produced and prints made available at cost, this would help to stimulate the wider use of this medium in Canada at all times of the year, even if the choice of a National Dental Health Day or Week seems at the present quite remote. To this end, a detailed report of our experience in producing a film spot announcement for television has been prepared and mailed to the Secretary of the Canadian Dental Association.

3. Convention Display

It was considered important to place emphasis on the dentist's responsibility for individual student recruitment into dentistry, if the program of graduate placement was to be successful. The Materials Committee proposed that our display panel be used to make this emphasis and captions and general plan for such a display was agreed upon. The field secretary then proceeded to have the pictures taken and transparencies made and mounted for display purpose. We again experienced the lack of visual material to portray aspects of vocational guidance.

Meetings and appointments necessary in these activities by the field secretary include:

"Mediscope '59"

Meetings	—	5
Appointments	—	8

Dental Health Day

Meetings	—	4

Trips Out of Town and Purpose

Brantford	—Fluoridation Conference.
Orillia	—Placement of recent graduate.
Coldwater	—2 trips—Women's Institute re a resident dentist.
Arnprior	—Graduate placement.

Stittsville	—Request for dentist.
Kemptville	—Graduate placement.
Burlington	—Graduating student interest.
Marmora	—Graduating student placement.
Norwood	—Re dentist services in district.
Peterborough	—Teachers' College student requests.
Trenton	—District interest in graduating student placement.
Burlington	—Procuring pictures for possible T.V. use.
Rockwood	—Visit to Child Health Conference; student interest —pictures.
New York	—Presenting paper on a panel at Federation Dentaire Internationale meeting, preceding the American Dental Association Convention.

Meetings Attended: (not otherwise reported)

- (a) Bimonthly meetings of Association of Public Health Dentists (2).
- (b) Ontario Public Health Association (2).
- (c) Academy of Dentistry (2).
- (d) Emergency Health Services Advisory Committee (Ontario).
- (e) American Dental Association 100th Annual Meeting.
- (f) Committee on preparation of Brief on Fluoridation (2).
- (g) Health League of Canada:
 - Fluoridation Committee.
 - Editorial Committee.
 - Council Meeting.
 - Annual Meeting.
- (h) Centennial Home and School, Scarborough.

Fluoridation

Dental Health Day material carried statements of the benefits of this public health measure. It was considered inadvisable while awaiting the hearings of the Ontario Fluoridation Investigations Committee to begin a promotional campaign

A very attractively prepared brief, representing the views of the dental profession in Ontario, as represented by the R.C.D.S. and Ontario Dental Association, was provided the Ontario Fluoridation Investigations Committee. The field secretary participated in the editing of this brief.

All Ontario dental societies were circulated asking that a supporting letter favouring fluoridation be mailed to the secretary of the provincial committee. It was suggested that they also encourage local medical societies and lay groups to send a similar letter.

Conclusion

I esteem it a privilege to represent the cause of dental public health on behalf of the Boards of the R.C.D.S. and the Ontario Dental Association. To work in association with the secretaries and executive officers of each Board has been a pleasant experience. My contacts with the

dental societies of the province have added opportunity for more effective field work. The problems we face in providing better dental health services to more of the people of Ontario can only be met by the active participation of every dentist in Ontario.

ACTION

Appreciation expressed to Ontario Dental Association for opportunity to participate in Student Dinner. Congratulations extended to Dental Public Health Committee on the success of the occasion. Hope is expressed that the practice be continued.

Reports adopted.

Auxiliary Personnel

Adopted Resolution

- Whereas the dentist-population ratio in Canada is inadequate to provide sufficient dental care services for the Canadian public, and
- Whereas the dentist-population ratio is continuing to deteriorate and according to future estimates will continue to worsen even with the recent additions to teaching facilities, and
- Whereas this adverse dentist-population ratio is further aggravated by great inequities in the geographic distribution of dentists, and
- Whereas there is an increasing demand on the part of the people of Canada to receive health care services including dental care, and
- Whereas, because of the essential nature of health care services, the Canadian public, generally, regards the enjoyment of these services as a right, and
- Whereas there is evidence of widely held views by the public that dental treatment is costly and the direct payment for dental services is a deterrent to obtaining treatment, and
- Whereas it is mandatory that the dental profession provide positive leadership in extending dental services as broadly as possible to all segments of our people, and
- Whereas the dental profession has the obligation to assume responsibility for the welfare of our people who receive dental care services, and
- Whereas the dental profession must retain full and complete responsibility for the provision of all treatment requirements, and
- Whereas it is fundamentally unsound for persons of superior training routinely to be engaged in rendering services which can just as effectively be provided by people of lesser training, and
- Whereas it has been amply demonstrated in other areas — scientific, professional, and business — that the employment of auxiliary services has increased output and lowered cost and concomitantly maintained or even enhanced standards,

THEREFORE BE IT RESOLVED

That services delegated to auxiliary personnel be rendered under the direct control and supervision of qualified dentists, and further

That the services which dental auxiliary personnel may presently legally perform be expanded but not to include case assessment, treatment planning, cutting or severing hard and soft tissue, or the making of prescriptions, and further

That each Provincial Licensing Board be encouraged to so amend its existing definitive regulations and/or legislation to effect a much broader scope of services by auxiliary personnel acting under the direct supervision of qualified dentists, and further

That each Canadian Dental School be encouraged to augment its present training program for auxiliaries or to institute training programs for auxiliaries giving due cognizance to those technical facets of dental service which can, under the continuing supervision of qualified dentists, be delegated to auxiliaries, and further

That this resolution be forwarded for consideration to the Board of Governors of the Canadian Dental Association.

Canadian Dental Association By-Laws

The following two resolutions were adopted following review of the proposed amendments to the By-Laws of the C.D.A.

(a) Duties of President

Whereas the holder of the office of President of the Canadian Dental Association is possessed of important information and informed opinions concerning many facets of the work of the Association, and

Whereas the position of Chairman of the Board of Governors of the Canadian Dental Association requires an impartiality in the conduct of the Annual Meeting of the Board of Governors thus largely precluding participation in the debate on the issues coming before the Board, and

Whereas it would be of inestimable value to the Association to enjoy the observations and opinions of the president at the Annual Meeting of the Board of Governors unhampered by his over-riding duties as Chairman,

THEREFORE BE IT RESOLVED

That Article 7, Section 1(a) of the C.D.A. By-Laws be reconsidered in order to relieve the holder of the office of President of the Association from the duty of acting as Chairman of the Annual Meeting of the Board of Governors, and further

That through some method acceptable to the Board of Governors the position of Chairman be created an appointive postCARRIED

(b) *Journal*

Whereas Article 8, Section 6(a) and Article 9, Section 4(e) (ii) and (iv) would appear to be inconsistent with each other, and

Whereas the positions of Editors are possessed of such sufficient importance that their holders should be created officers of the Association responsible directly to the Executive Council, and

Whereas the actual production of the Journal can be most satisfactorily achieved through the co-operative efforts of the Editors, Business Manager, and Advertising Manager, the Editors responsible to the Executive Council and the latter two to the Secretary, and

Whereas a great void exists in encouraging and developing an interest in and concern for dental journalism in Canada,

THEREFORE BE IT RESOLVED

That Article 8, Section 6(a) and Article 9, Sections 4(e) (ii) and (iv) be reconsidered in the light of the reasons stated above and further

That consideration be given to amending the name of this Council to Council on Journalism **CARRIED**

Fall Examinations

The dates of the Fall Examinations of the Board were established as November 16th, 17th, and 18th, 1960.

Fees

By By-law the Annual Licentiate Fee was established at \$75.00 in May, 1959 to apply commencing January 1st, 1960. Other fees were set as follows.

1. Inactive licence—\$40.00.
2. U. of T. Graduate in year of graduation—\$40.00.
3. Specialist's—\$1.00 renewal fee was eliminated.

General Anaesthesia

At the May 1959 Meeting of the Board a resolution was adopted relative to General Anaesthesia which was published in the 1959 Proceedings. In November 1959 a supplemental resolution pertaining to the same subject was approved. In order that the entire resolution may appear the portion published one year ago is repeated.

Whereas this Board holds the opinion that certain procedures are accomplished best in the dental office with the use of general anaesthesia, and

Whereas these services have been rendered acceptably for many years by Licentiates of the R.C.D.S., therefore be it resolved

THAT this Board of Directors approves continuation of a course in General Anaesthesia in the undergraduate curriculum and further, in the Board's opinion this course should familiarize the student with some of the recognized techniques and is intended to provide a background for more intensive study at the post-graduate level.

It would be expected to embrace:

- (a) Study of the properties and physiological action of various agents employed and equipment required.
- (b) An opportunity to observe the administration of general anaesthesia.
- (c) Some experience in operating under general anaesthesia.
- (d) Instruction in dealing with emergencies which might arise, and further

THAT a committee be set up to give further study to the subject of General Anaesthesia as it pertains to the profession in Ontario and further that the committee consist of Drs. Coupland, Purves, Diprose, Stiles and Leckie.

Moreover it is the opinion of the Board that the Faculty should undertake post-graduate courses in both Local and General Anaesthesia as they apply to dentistry and the following requirements should be filled:

1. Basic sciences appropriate to the study of local and general anaesthesia should form an integral part of such a course of study.
2. An intensive study of the composition, properties, action and dosage of all drugs likely to be employed.
3. A special study of agents and techniques most adaptable to office procedures.
4. Actual experience in the administration of general anaesthesia for oral procedures.
5. A medically trained anaesthesiologist should participate in the course of instruction.
6. Provision should be made for the actual administration of general anaesthetics in hospital operating rooms when this arrangement with the hospital is possible.
7. Integration of the general anaesthesia course into the training program of candidates for certification in Oral Surgery.

Inspector

A further resolution was approved at the June 29th meeting relative to the agreement to be prepared with the Inspector concerning a retirement income from him.

That if the Inspector should die before the expiration of five years after the date of his retirement, the pension provided shall continue to be paid to his widow for the unexpired balance of the said five year period, unless she shall have remarried, in which event no further pension shall be payable thereafter.

Mobile Clinic

Permission was granted to Dr. M. G. Sussman to operate a mobile dental clinic in Northern Ontario in communities in which no dentist is located. Dr. Sussman will report to the Board one year from the date of commencement of this service in Northern Ontario.

Ontario Association of Public Health Dentists

A communication was received from Dr. H. S. Grey informing the Board of the organization of the Ontario Association of Public Health Dentists. A roster of members was submitted.

Safety Deposit Box

That the said form of Lease and Rules, Regulations and Conditions applicable thereto, be and the same are hereby approved, and that Dr. M. V. J. Keenan, President and Dr. Wesley J. Dunn, Treasurer or any one of them be and they are hereby authorized to sign the said agreement and to have access to and control of the contents of such safe deposit box, with full power to each of them to appoint substitutes in their place and stead, and the present resolution shall apply not only to the said safe deposit box but to any other safe deposit box that may be leased by this College and that the present resolution be communicated to the Bank and remain in force until notice in writing to the contrary be given to the Manager of the Branch of the Bank in which any box is leased and receipt of such notice duly acknowledged in writing CARRIED

REGULATIONS

SIGNS

A member of the Royal College of Dental Surgeons, in connection with his profession:—

1. May not display or permit to be displayed any sign other than a sign which in its character, position, size and wording is merely such as may be reasonably required to indicate the location of and entrance to the premises in which a dental practice is being carried on and in which no letters larger than four (4) inches are used.
2. May not display more than two signs in addition to one at or on his entrance door.
 - (a) Not more than one of these may be a suspended sign.
 - (b) Not more than one of these may be an illuminated sign and if illuminated must not be intermittent, daylight, "Neon" or "Neon type" and no colours shall appear in such signs other than white or black.
3. May not display any sign on premises other than those in which his practice is actually carried on.

Notwithstanding the above regulations he may (using only unilluminated letters or figures not larger than two inches):

- (a) Add to his entrance sign, his office hours.
- (b) Add to any sign the words (when an entrance is difficult to find) "Entrance on . . ."

PROFESSIONAL CARDS AND ANNOUNCEMENTS

A member of the Royal College of Dental Surgeons, in connection with his practice:—

1. May not permit to appear in any newspaper or other publication, printed or written for distribution or display anything other than his professional card (which may contain at most his name, title or degrees, profession, address, telephone number and office hours) or an announcement of his commencement of practice, change of office location, absence from or return to practice, or the restriction of his practice. The announcement shall not contain any reference to qualifications, procedures or equipment. The space used, for either card or announcement, must not exceed one column (13 ems) in width by two inches in length and must not be in the nature of a display.
2. He may, however, observing the dignity and ethics of the profession, without reference to qualifications, procedures or equipment:
 - (a) Use private professional cards.
 - (b) Issue accounts and receipts.
 - (c) Issue appointment cards.
 - (d) Mail to his patients recall notices.
 - (e) Mail to his patients and acquaintances announcements of his commencement of practice, change of office location, absence from or return to practice or the restriction of his practice, provided he is a certified specialist.

SOLICITED ADVERTISING

For the protection of the Profession from solicited advertising, this Board prohibits any Member of the Royal College of Dental Surgeons from inserting his professional card in hand-bills, programs, year books or other printed matter of like character.

TAKING OVER A PRACTICE

When any member of the Royal College of Dental Surgeons takes over the practice or office of another member of the College, either by purchase or otherwise, the member so acquiring the said practice or office shall not after one year from the date of such acquisition use any sign or printed matter which suggests to the public that the retiring member was in any way associated or connected with the said practice or office.

RE LISTING OF DENTIST IN TELEPHONE DIRECTORIES FOR PROVINCE OF ONTARIO

1. No display advertising of any kind.
2. No black face listings in the yellow pages.
3. No specialists' list under separate group headings.
4. Mention of office hours is of no particular value, and is usually used only to increase space, therefore, to be excluded.
5. Mention of particular facilities or equipment, such as X-ray, gas extractions, etc., not acceptable in either section.
6. Residence listing on yellow pages, as well as on white pages, is acceptable.
7. Designation as specialists may be used in both yellow and white pages, provided the dentist is a specialist certified in and restricted to the designated branch of dentistry.

Wesley J. Dunn	July, 1956 -

*Deceased.

REPORT

In accordance with the provisions of the Dentistry Act of Ontario and the By-Laws of this College, an election of the Board of Directors for the Royal College of Dental Surgeons of Ontario was held from October to December, 1960.

On October 14th, 1960, nominations were called for by circular letters to each Licentiate resident in Ontario on October 1st. Valid nominations were received as follows:

District No. 1 — Dr. James P. Coupland, Ottawa

District No. 2 — Dr. R. C. Honey, Peterborough

District No. 3 — Dr. M. V. J. Keenan, Sudbury

District No. 4 — Dr. R. E. Diprose, Toronto

Dr. E. T. Guest, Toronto

Dr. H. M. Jolley, Toronto

District No. 5 — Dr. W. G. Bruce, Kincardine

Dr. J. E. Peterson, Stratford

District No. 6 — Dr. D. J. Ferguson, London

District No. 7 — Dr. A. A. Case, Waterloo

Dr. J. R. Hurton, Brantford

District No. 8 — Dr. Ivan Hrabowsky, St. Catharines

Dr. A. H. Leckie, Hamilton

Dr. J. E. Peterson of District No. 5 and Dr. Ivan Hrabowsky of District No. 8 when informed of their nominations communicated by registered mail with the Secretary instructing him to withdraw their names from nomination. Thus in addition to no valid nominations having been received for opposing candidates in Districts 1, 2, 3, and 6, Drs. Coupland, Honey, Keenan, Bruce, Ferguson, and Leckie were declared elected by acclamation.

Elections were held in Districts 4 and 7.

On December 1st ballots, together with necessary instructions, were mailed to all qualified Electors in the Districts in which elections were being held. The officially appointed Scrutineers counted the ballots on Wednesday, December 14th. Dr. E. T. Guest and Dr. Murray Cornish, representing Dr. Jolley, were present at the counting. The report of the Scrutineers (Appendix A) indicates that the following were elected:

District No. 4 — Dr. H. M. Jolley

District No. 7 — Dr. J. R. Hurton

A letter from the Secretary of the Faculty of Dentistry, University of Toronto (Appendix B) confirms the election of Dr. James D. Purves as Faculty Representative.

Therefore the duly-elected members of the Board of Directors for the ensuing biennial term are:

- District No. 1 — Dr. J. P. Coupland, Ottawa
- District No. 2 — Dr. R. C. Honey, Peterborough
- District No. 3 — Dr. M. V. J. Keenan, Sudbury
- District No. 4 — Dr. H. M. Jolley, Toronto
- District No. 5 — Dr. W. G. Bruce, Kincardine
- District No. 6 — Dr. D. J. Ferguson, London
- District No. 7 — Dr. J. R. Hurton, Brantford
- District No. 8 — Dr. A. H. Leckie, Hamilton
- Faculty — Dr. J. D. Purves, Toronto

The ballots as sealed by the Scrutineers are herewith presented and should be disposed of by direction of the Board.

Appendix A

SCRUTINEERS' REPORT ON ELECTIONS

District No. 4

Number of ballots received	622
Number of valid ballots	621
Number of invalid ballots received	1
Reason for declaring ballot invalid:	
Voted for 2 candidates.	

The 621 valid ballots were marked as follows:

For Dr. R. E. Diprose	206
For Dr. E. T. Guest	202
For Dr. H. M. Jolley	213

Showing a majority of 7 for Dr. Jolley.
Dr. Jolley is thereby declared elected.

District No. 7

Number of ballots received	131
Number of valid ballots	131
Number of invalid ballots	—

The 131 valid ballots were marked as follows:

For Dr. A. A. Case	57
For Dr. J. R. Hurton	74

Showing a majority of 17 for Dr. Hurton.
Dr. Hurton is thereby declared elected.

SCRUTINEERS

Toronto 5, Ontario. (Signed) Colin C. Rous
December 14th, 1960. R. S. Woollatt

**UNIVERSITY OF TORONTO
FACULTY OF DENTISTRY**

124 Edward Street,
Toronto 2, Canada
January 11, 1961.

Dr. W. J. Dunn,
230 St. George Street,
Toronto, Ontario.

Dear Dr. Dunn:

I wish to inform you that the Faculty Council has elected Dr. James D. Purves as its representative to the Board of the Royal College of Dental Surgeons of Ontario for the period 1961-63.

Yours sincerely,

(signed) P. W. Millard,
Secretary.

ACTION

Report adopted.

REPORT

As we convene for the 214th meeting of the Board, I wish to pay tribute to those who have preceded me in the office of President. Our noble profession (a proud heritage) owes much to these men. It has been my experience that democracy appears in its true colours when demonstrated by boards such as the R.C.D.S. To the members who sat with me for the past two years, I wish to express my sincere thanks and appreciation for their untiring efforts. All committees functioned well, no work request was refused and co-operation and harmony were abundant.

Since our last meeting, three members have retired Dr. W. J. Langmaid, Dr. D. C. Stiles, and Dr. R. E. Diprose. To them "Au Revoir" and may they spend their talents elsewhere for the good of Man as they did here for the good of dentistry. Here I would like to particularly mention Dr. Wes Langmaid who has served this board for the greatest length of time, and if I may say so, the quality of his service has been unsurpassed. He would have likely assumed the presidency had his health permitted — the spirit was so willing and capable. To Dr. Langmaid, I know his confreres hope and pray that his health will improve.

The profession of dentistry has changed tremendously in the last 100 years. I hope that history will consider the years 1959-1961 as progressive ones.

A few recent enactments by the Board:

(1) *Made provision for more adequate financial resources.* This was a particular action of the board which received wide approval of the members of the College. True, our Secretary received some letters of protest and a very few were of the abusive type, but on analysis it showed that the sickness was within the complainants rather than in the action of the Board.

(2) *Increased grant to the C.D.A.* The Board of the Royal College of Dental Surgeons of Ontario was the first to increase the grant to the C.D.A. When the requirements of the C.D.A. were reviewed with the full knowledge of the current financial position and the requirements of dentistry on a national level which it alone can provide, this was our only action. Other provinces have followed our lead and subsequent events have proved our decisions to be most beneficial to the profession.

(3) *Our Headquarters at 230 St. George Street is free of debt.* We are the proud owners of a very fine property and one which would seem to be adequate for our requirements for some time to come. This must be a source of satisfaction to our members. To be noted is the fact that the real estate value of our property is increasing yearly. This may not be too important as the R.C.D.S. is only concerned with suitable quarters but it is worthwhile mentioning.

(4) *Administration of Welfare Plan.* This is the first pre-paid dental plan in Ontario administered entirely by the profession. This has been a real success. The problem of dental treatment for dependents of recipients of mothers' allowances has been solved by per capita payment by the government, treatment by the profession, administration by D.S.P.I., and by no means last, the co-operation of the individual dentists.

Negotiations are proceeding to improve the above service and also to resolve other dental welfare problems in Ontario.

(5) *Administration of Post Payment Plan.* This particular activity of the Board has not progressed as well as at first anticipated. However, it is a service which is worthwhile to those who require payment for dental services on a budget plan. It is expected that new graduates will use the service more than the older practitioners who have their own particular system.

(6) *Group Liability Insurance.* Our experience in this endeavour has been most pleasant. It has shown that a group approach to the problems of insurance is profitable and further excursions into this field are to be considered in the near future.

(7) *Acquisition of permissive legislation for dental services in public general hospitals.* The title is self-explanatory. This contentious problem has been resolved through the efforts of this Board with grateful acknowledgment for the help from many members of the College and other interested parties.

(8) *Our new Faculty Building.* Our new dental faculty building is now a reality. The R.C.D.S. Board which has for many years been one of the chief petitioners for the building of same, is most appreciative of this accomplishment. The existence of this building solves our physical educational problems and is of great assistance in our recruitment program. Any member of the College who has not visited this new Faculty of Dentistry building is missing a great deal and cannot realize the heights dentistry has acquired among the professions.

(9) *Fluoridation of Communal Waters.* Government legislation on fluoridation of communal waters has been enacted. The enactment of this legislation was assisted immeasurably by the effective representation made by the profession. Among many was listed the very fine combined brief of the R.C.D.S. — O.D.A.

(10) *Pilot Model of Dental Assistants' Course.* The R.C.D.S. cannot claim the entire credit for the initiation of the pilot course, but let it be said that the merits were recognized and all assistance possible by this Board was forthcoming. For many of the 2,500 dentists of Ontario, losing a dental assistant in the office is a calamity. It requires the personal training of a replacement at great cost in time and efficiency. How convenient if she could be replaced with another trained assistant. I would suggest that we exert our best efforts to expand this very necessary plan.

(11) *The Board has assisted in encouraging the establishment of emergency dental services by local societies; encouraged the establishment of mediation committees in a few local societies; established definite policy*

in regard to foreign graduates and to British Commonwealth graduates; outlined policy re general anaesthesia in dentistry which guided the Faculty in establishing a post graduate course in this field.

As stated above, our Welfare Plan has functioned well and this Board is doing all in its power to expand welfare services into other fields, however, at this time there is nothing definite to report. The need of health services for people unable to pay for same is a major concern of governments. The demands of the people for these welfare benefits are also increasing. This has caused the Prime Minister to appoint a Royal Commission on Health Services. The report of the Ontario Fluoridation Investigating Committee was unequivocally favourable to fluoridation and more than justified the unselfish efforts of the dental profession encouraging this most important public health procedure. In the hearings of this commission on health services, certainly dentistry and dental services are going to be subjected to intense scrutiny and we must be prepared to supply information, co-operation and direction at any and all times even on very short notice and further, the profession must, as far as possible, not find its views and proposals among the provinces to be at great variance.

The Secretaries' Conferences will do much to keep all provinces informed and to present a united front when necessary.

Certain aspects of the work of our Headquarters staff is of a specialized nature requiring knowledge in fields in which dentists are not usually proficient. Since knowledge in these fields is to be had at the University, I think the Board should investigate the possibility of assisting Headquarters personnel in acquiring proficiency by enrolment in available University courses.

ACTION

Steering Committee appointed to consider ways and means toward the more effective use of the Secretariat.

Report adopted.

Presentation To Immediate Past-President

Dr. James P. Coupland, on behalf of the Board, made a presentation to Dr. M. V. J. Keenan of the inscribed gavel used by Dr. Keenan during the previous biennial term.

"Most appropriately, at the first assembly of a newly-elected R.C.D.S. Board of Directors, it is customary to pay tribute to the President of the previous Board.

"Michael Vincent Joseph Keenan, on behalf of your fellow Directors and on behalf of your colleagues whom we represent I have been asked to express congratulations and thanks. With pride we inscribe your name on the impressive list of distinguished dentists who have served this Board as President.

"Your term was an eventful period of notable accomplishment. It saw the completion of the new Dental Faculty Building which marks an important milestone for dentistry in Ontario. Retirement of all debt on the Headquarters property was another considerable achievement from which you must derive great satisfaction.

"Those of us who served under your Chairmanship shall retain with affection and respect a vivid memory of your incomparable conduct of our meetings. We rejoice that this Board, unlike some organizations who immediately lose the services of their retired President, can continue to benefit from your broad experience and sound judgment.

"Please accept this gavel as a symbol of our gratitude for your great and unselfish contribution to organized dentistry. We hope you will enjoy many more years to promote the best interests of the profession to which you have been so dedicated."

REPORT

It is a privilege to present my fifth annual report for the consideration of the Board.

1. Workshop Conference On Auxiliary Personnel

The Board, at its November 1960 meeting, authorized a Workshop Conference which was held in the Royal York Hotel, Toronto, April 10th, 1961. The Conference was open to all Ontario dentists but each local and each specialty society was requested to delegate at least one individual to represent the organization. In addition, each of the Clinical Teaching Departments of the Faculty of Dentistry, University of Toronto and the Director-General of the Royal Canadian Dental Corps were invited to participate. In all some 164 dentists attended.

Four discussion groups were arranged as follows:

Group No. 1 — Prosthodontics

Group No. 2 — Operative Dentistry (including Crown and Bridge and Endodontics)

Group No. 3 — Orthodontics, Paedodontics, and Dental Public Health

Group No. 4 — Periodontics, Radiodontics, Oral Surgery, and Anaesthesia.

The announced purpose of the Conference was an attempt to delineate what, if any, individual procedures presently being performed only by dentists could be delegated to appropriately trained auxiliaries acting under the responsible supervision and control of dentists. In Groups 1, 2, and 4 discussions held prior to the actual consideration of the procedures indigenous to their areas led to an amendment of the original purpose and rather than each of the groups directing its attention to what individual procedures presently being performed only by dentists *could* be delegated to appropriately trained auxiliaries. . . , the substitution of the word "could" with "should" received majority agreement. In Group 3 decisions were made on the basis of "*could reasonably*" be delegated. . . It is important, then, to consider the individual reports of the Group sessions in the light of the terms of reference which each group established for itself.

Group No. 1 — Prosthodontics

This group was virtually unanimous in its opposition to the delegation of any prosthodontic procedures with the exception of making primary impressions and performing minor repairs and even in these two areas the vast majority of the group was opposed to delegation.

Group No. 2 — Operative Dentistry

The following majority conclusions may be drawn from the deliberations of this group:

1. The dentist must select the operating field for the insertion of a rubber dam. Qualified auxiliary personnel may be permitted to punch the holes, select the clamps, apply the rubber dam, sterilize the operating fields where indicated in Endodontic treatment.
2. All phases of silver amalgam restoration must be performed by the dentist except construction of the matrix outside the mouth, proportioning, trituration, expression of the excess mercury, and passing of the amalgam to the dentist or into the cavity and polishing the restoration.
3. All phases of silicate and plastic restorations must be performed by the dentist except selection of the shade and preparation of the filling materials.
4. All phases of gold foil construction must be completed by the dentist including securing separation of the teeth.
5. All phases of direct gold inlays must be completed by the dentist.
6. In temporary treatments, non-fabricated dressings such as anodine dressings may be applied by an auxiliary but all phases of fabricated dressings such as aluminum shell crowns, plastic crown forms and temporary acrylic crowns with their impression procedures, must be carried out by the dentist.
7. All phases of crown and bridge procedures carried out in the mouth must be done by the dentist including impressions, shades, cementation, and the removal of temporary crowns.
8. All phases of endodontic treatment must be carried out by the dentist.

Group No. 3 — Orthodontics, Paedodontics, and Dental Public Health

It is important here to remember that the terms of reference of this group most closely adhered to the original purpose of the Conference and the Chairman of the Group has emphatically declared that the results of this group are different because of the greater specificity of the terms of reference and not because the group included many specialists who might be accused of being disinterested. This group considered the subject employing the phrase "*could reasonably be delegated. . .*" The following procedures might reasonably devolve to an appropriately trained auxiliary acting under the responsible supervision and control of a dentist:

1. Reception and clerical procedures.
2. Taking histories and recording findings.
3. Clinical examination for screening or epidemiological purposes.
4. Accessory-examination including the taking of radiographs, impressions for diagnostic models, vitality tests, measurements, and radiographic cephalometrics but *not* the interpretation of the results of these examinations.

5. Patient education.
6. Administration of topical anaesthetics.
7. Application of the rubber dam.
8. Finishing and polishing of amalgam restorations.
9. Holding silicates for setting.
10. Fabrication of temporary-permanent and final restorations for injured teeth.
11. Impressions for fixed and removable appliances used for paedodontic or orthodontic purposes and the fabrication of such appliances.
12. The administration of drugs taken by mouth and given intramuscularly.

Group No. 4 — Periodontics, Radiodontics, Oral Surgery and Anaesthesia

The conclusions of this group were as follows:

1. The patient must be seen first by the dentist and then the assignment of taking and processing the radiographs could be delegated to the auxiliary on the instructions of the dentist.
2. Auxiliary personnel may perform routine post-operative care following Oral Surgery and such services would include (a) removal of sutures, (b) irrigation of sockets, (c) chairside assistance (aspirating), (d) observation of the general condition of patients, (e) changing of surgical dressings.
3. The administration of topical anaesthetics.
4. Auxiliary personnel in periodontics should be entitled to perform (a) periodontal packings, (b) scaling, superficial and deep but not final, (c) changing surgical dressings, (d) oral hygiene instruction, (e) nutritional discussions, (f) polishing of teeth and fillings, (g) application of stannous fluoride.

NOTE — It should be stipulated that “periodontal packing” in Ontario jurisprudence does not reside within the legal purview of dental hygienists. Also there are no legal limits established in this province beyond which a dental hygienist must not venture in scaling procedures.

The General Session

There was unanimous agreement at the General Session with the amended stipulation that services of auxiliaries should not extend to diagnosis, case assessment, treatment planning, cutting or severing of hard and soft tissues, prescribing of drugs, guiding dento-facial growth and development and the correcting of orthodontic malfunctions.

The following motion was approved on a division of 75 for, 35 against, with 12 abstentions: “That the Conference does not approve of any auxiliary placing any permanent restoration in any human tooth.”

The participants in the Conference were generally agreed that another Conference should be held but after extended discussion there was no agreement relative to the form such a Conference should take.

The Conference terminated with a motion of appreciation to the Board for the organization of the Conference and to the general chairman, Dr. M. E. Lucyk, for his excellent conduct of the meeting. This motion was adopted unanimously by a standing vote of applause.

2. Secretaries' Conference

The Second Annual Secretaries' Conference was held at C.D.A. Headquarters, January 9th - 10th, 1961. Dr. Don W. Gullett was again elected Chairman and served in his usual effective fashion.

Each Secretary was asked, in advance of the Conference, to present any matters of concern of particular interest to his province. From these presentations a possible 21 points of discussion were elicited and these in addition to an already full agenda presented abundant material upon which the Secretaries could deliberate.

(a) *Specialists' Certification Board*

Dr. M. A. Rogers, the Chairman of the C.D.A.'s Specialists' and Specialization Committee, outlined the activities of his Committee in respect of the development of a possible Royal College of Dentists. After hearing the presentation the Secretaries recorded their interest in this proposal, encouraged the C.D.A. Committee to pursue its efforts, and recommended that the various Provincial Boards give support to the principle of this development.

(b) *Royal Commission on Health Services*

An extended discussion took place relative to the impending actions of the federally-appointed Royal Commission on Health Services. While it was proposed that the various provincial presentations should be original for each province, there should be uniformity in fact and in policy. Accordingly it was agreed that when a provincial body developed the first draft of its brief it should forward the draft to the Canadian Dental Association where fact and policy could be checked. The draft would then be returned to the province with any constructive observations listed and it would be hoped that the province might effect the appropriate amendments in order that consistency be achieved.

(c) *Mediations*

Dr. W. Ross Upton of British Columbia made a presentation on mediations. There seemed to be general agreement in most provinces that the number of complaints respecting dental services is increasing. A motion was adopted encouraging the various provincial boards to urge the Executive Council of the Canadian Dental Association to instruct the Council on Education to study the serious problems which arise through patient complaints and where necessary take such measures as may be required to adjust or amplify the course of instruction in patient-dentist relationships for the better understanding by and to the advantage of the new graduates and the profession-at-large.

(d) *Licensure*

Your Secretary presented a paper entitled, "A Plea for More Logical Licensing Arrangements". As a result of this presentation and subsequent discussion a resolution was approved which encourages the Council on Education to continue its efforts in the investigation of a proposal to establish final year conjoint examinations with the National Dental Examining Board of Canada, encourages the National Dental Examining Board to amend its regulations to permit of conjoint examinations with the approved schools, and encourages the provincial licensing boards, where applicable and where possible, and contingent upon conjoint examinations, to amend their regulations to require applicants for registration to possess the Certificate of the N.D.E.B. This resolution received the concurrence of eight of the ten provinces with British Columbia abstaining and Quebec voting in the negative.

(e) *List of Dental Hygienists*

The Canadian Dental Association has agreed to establish a list of dental hygienists on a similar basis to that respecting dentists with the co-operation of the provincial Registrars. This list will exist until such time as the hygienists themselves are organized to the point where they can maintain their own list of members.

(f) *C.D.A. Model Pre-Payment Plan*

The Director of the Bureau of Economic Research presented the model plan for pre-payment services. Ontario was the only province to report attempts to interest groups in plans based on the C.D.A. model. No success has been attained yet and it was suggested that the reason is that this type of plan may not be that which the people want. It seems apparent that the public desires a much more extensive coverage rather than simply provisions for some of the minor dental problems. The Conference did suggest that the Dental Services Committee of the C.D.A. again might review the model plan but no specific recommendations to this effect were made.

(g) *C.D.A. Journal*

Dr. Frank Compton, the Editor of the Journal of the Canadian Dental Association, made a presentation relative to some of the problems respecting the Journal. Prior to the appointment of a full-time Editor it was left to the Editor himself to select an individual with whom he might work as associate-editor for the Province of Ontario. Dr. Compton now wishes the R.C.D.S. Board to assume this responsibility and it will be necessary that this appointment be made.

(h) *Selection of Representatives to C.D.A. Board*

The Board of Governors referred the problem of the method of selecting C.D.A. Governors. It was obvious, because of legislation, if for no other reason, different methods must apply in different areas. The Conference having reviewed the various methods expressed and recorded its general satisfaction with present procedures and also vigorously objected to any association of ideas between evidences of apathy by the membership and the past and present efficient functioning of the Board of Governors.

(i) C.D.A. Bureau of Public Information

The Director of the Bureau, Mr. Ken L. Croft, made a presentation on behalf of the Bureau and summarized the public information activities in the provinces. The Secretaries were impressed with the developing contributions of this Bureau.

(j) Recruitment

Your Secretary, the Chairman of the National Recruitment Committee, presented an extensive report of the first meeting of this group. The Conference recorded its emphatic support of the program and each provincial body was encouraged to carry forward a vigorous recruitment program within the framework of the national program.

(k) Motion to Extend Conference

A resolution seeking an extension of the Conference to three days was unanimously approved in view of the fact that many items were not discussed nor could complete discussion be rendered to many of the subjects under discussion.

Several other matters designed to provide Secretaries with further information respecting their responsibilities were considered and appear in the minutes of this Conference.

Again your Secretary is impressed with the great value inherent in such an exchange of views and opinions and would encourage the Board to maintain both its financial and moral support.

3. The Fluoridation Act 1961

The Ontario Fluoridation Investigating Committee presented, in early March, 1961, its long-awaited report. To say that this report is one of the finest ever developed on this subject would, perhaps, be an understatement. The report is completely objective and its conclusions are unequivocally in support of fluoridation as a sound, efficacious, and desirable public health measure. In addition the report strongly avers that there is no issue of an infringement of civil liberties and that local councils should have the right to enact appropriate by-laws to institute fluoridation without the necessity of referenda. It is significant that the profession's Brief was quoted directly in three locations in the Report.

Notwithstanding this report the Provincial Legislature enacted temporizing legislation known as The Fluoridation Act 1961. Essentially this statute makes it possible for the council of a local municipality in Ontario to effect by-laws to conduct a fluoridation program without the necessity of a plebiscite. However, there are certain provisions which require the local council to conduct a plebiscite on this subject. Also provision is made for the council to conduct a plebiscite on its own volition should it not desire to assume personal responsibility. Once a plebiscite has been conducted the local council must act upon the wishes of the majority. Thus should the vote be affirmative the council then shall pass the necessary by-law. If the plebiscite is negative then the council is proscribed from enacting such a by-law.

Also where a fluoridation system presently is operating the local council may discontinue the program or again it can operate on the basis of the plebiscite as above.

A further provision enables ten percent of the eligible electors of any municipality to force the local council to conduct a plebiscite. Thus if the council proposes to fluoridate its water supply a certified petition of 10 percent of the eligible electors can require the council to conduct a plebiscite before instituting the procedure.

The reverse is also true. If a local council decides not to fluoridate its water supply it is possible for 10 percent of the electors again to force a plebiscite in the hope of achieving an affirmative result.

Where a common water supply is rendered to two municipalities then both councils must agree. Again the provisions for plebiscites remain the same. Where there are more than two municipalities receiving water from a common supply then the majority of the councils must be in favour.

Because of the nature of the legislation which has established the Municipality of Metropolitan Toronto there are special provisions for that area. The Metropolitan Council has full authority to fluoridate the water supply on its own volition. In addition the Council can fix a date for plebiscites to be conducted by each of the 13 area municipalities. Again the Metro Council must act upon the wishes of the majority. Where petitions are developed to require the Council to conduct a plebiscite it is necessary for 10 percent of the electors in a majority of the municipalities to indicate their desires by signing the petition. In Metropolitan Toronto this would mean that 10 percent of the eligible electors in seven of the area municipalities must have their signatures certified on such a petition. The Metro Council must act upon whatever the petition determines.

Final authority for the enactment of regulations respecting equipment, processes, and the nature and amount of the chemical compounds being employed rests with the Provincial Cabinet.

4. The Hypnosis Act 1961

The general terms of the provisions of this statute were reported to the last Annual Meeting and are summarized in the Proceedings. The Board encouraged the Minister of Health in the enactment of this statute.

This Act provides that no person shall hypnotize or attempt to hypnotize another person unless he is a physician or dentist using hypnosis in the practice of his profession, or unless he is a psychologist registered under the Psychologists' Act and using hypnosis on the request of or in association with a legally qualified medical practitioner. In addition permissive provision is made for students in the above disciplines.

The Provincial Cabinet has the authority to make regulations designating classes of persons other than those mentioned above who could engage in hypnosis. No such regulations have as yet been effected.

This Act received Royal Assent on March 29th, 1961.

5. The Dental Technicians Amendment Act 1961

The amendments to the Dental Technicians' Act as presented to the last annual meeting of this Board and recorded in the 1960 Proceedings received Royal Assent on March 29th, 1961. Essentially the legislation as presented was approved with the exception that the Governing Board has not been granted the right to issue subpoenas.

6. Course For Dental Technicians

Since the last Annual Meeting of the Board four meetings of the Joint Committee established to consider the creation of a course for dental technicians have been held. The Committee is composed of representatives of the Governing Board of Dental Technicians and of the R.C.D.S. Board.

Because of the provisions inherent in the legislation pertaining to dental education and to registration of technicians it was agreed that if any program were to be successful co-operation between the two Boards was mandatory.

The Committee agreed that some form of training program is desirable and the consensus was in favour of the establishment of evening courses in Toronto or seminar courses to be taken in various communities in the province to improve the skill and knowledge of those presently engaged in the dental laboratory industry. It was pointed out that there are already sufficient persons engaged in the dental laboratory pursuits to care for the needs of some 3,750 dentists.

The facilities of the Ryerson Institute of Technology were investigated but the academic admission requirements and the duration of the course made such a program impracticable at this time. Investigation of the Provincial Institute of Trades appeared, at first, to provide reasonable possibilities for the conduct of an evening course program but further investigation and consideration led the Committee to believe that a program within this Institute was not desirable.

It appears likely that in the reasonably foreseeable future the Governing Board of Dental Technicians will acquire its own facilities in which the statutory registration examinations may be held. It is believed that such quarters could adequately provide for the proposed training program.

The Committee has again presented reasonably forceful arguments to the University authorities pointing out that the only facility in dentistry in which technical training might be provided, comparable to the public general hospitals is the clinic at the Faculty of Dentistry. Further efforts should be made in this respect by this Board. The Committee, therefore, has neither definite progress nor program to report but it is much more acutely aware of many of the problems and considerations pertaining to the establishment of a training program for dental technicians.

7. Dentists Seeking Registration As Dental Technicians

There appears to be a developing trend among certain dentists to attempt to operate commercial dental laboratories by first applying to try the examinations set by the Governing Board of Dental Technicians and

then contingent upon successful completion of the examinations becoming registered as Registered Dental Technicians.

The Dentistry Act and the Dental Technicians' Act clearly recognize a distinction between the practice of the profession of dentistry and the incidental mechanical work of producing appliances pursuant to the instructions of a dentist. It is clear that under these statutes any dentist, if he so desires, can perform the technical phases involved in the production of prosthetic or orthodontic appliances. It seems equally clear that it is not contemplated that a person who is practising his profession as a dentist will engage in the mechanical work of supplying appliances on the prescription of or from the casts made by another dentist or other dentists.

The distinction between the practice of a profession and the performance of a mechanical trade or a commercial business and the desirability of maintaining the distinction has been recognized for many years. An illustration of this is found in connection with the legal profession. It has been authoritatively stated in England that a barrister who engages in business should not concurrently practise at the bar.

If a dentist spends even a portion of his time performing laboratory procedures he must necessarily spend less time in exercising the purely professional functions of a dentist. It seems reasonable to assume that such a man by experience could expect to become more competent as a dental technician but that conversely his professional skills as a dentist could deteriorate. It seems obvious that from a professional point of view such a result is undesirable and that it is also inimical to the interests of the public.

There is also the danger that any attempt by dentists to encroach on the field of dental technicians may provoke an effort to authorize direct communication between dental technicians and members of the public. Such a development which could deprive the public of the protection of professional knowledge and skill in connection with prosthodontic services could be properly regarded as an undesirable development.

Following the acquisition of legal advice it can be stated that it appears to be a proper exercise of the Board's power to pass by-laws for the proper and better guidance, government, discipline and regulation of members of the College and of the profession of dentistry, to enact that no dentist may concurrently practise as both a member of the College and as the operator of a dental technician's establishment. It could conceivably even be justifiable to go further and provide that no member of the College shall apply for qualification or registration as a dental technician while he continues to be a member of the College.

The justification for going that far would be that under the provisions of the Dentistry Act and the Dental Technicians' Act, no dentist needs to establish qualifications or obtain permission to produce prostheses or orthodontic appliances for his own practice. The only basis for seeking such qualifications would be to enable the applicant to undertake either by himself or through members of his staff the dental technician's service of producing these appliances for other dentists. Accordingly if a dentist

intends to engage in that type of business it appears appropriate that he should be asked to surrender the right to carry on the profession of dentistry.

This is a subject which might engage the concern of the Board.

8. Hospital Relationship

There has been little change in the legal environment in respect of the provision of dental treatment services in Ontario Public General Hospitals during the past year. Several hospitals have approved dental staff by-laws but all such by-laws cannot be stated to be in accord with desirable policies.

Recent conversations with officials of the Commission have made it possible to ascertain information that in all likelihood the General Regulations made pursuant to the Public Hospitals Act will be rewritten, hopefully to be approved by the Commission in, perhaps, the fall of this year. We have been assured that the presentations already made on behalf of our profession will be considered in the development of these regulations and we should anticipate that more reasonable regulations will accrue from these efforts.

The Claims' Division of O.H.S.C. has indicated that the policy mutually agreed to by the Commission and this Board, relative to hospital admissions for dental purposes, has been of inestimable value. Occasionally claims are being submitted for services which reside outside the terms of that policy. The view has been offered to the Claims' Division that if the Commission would develop regulations reasonably in accord with the previous observations of this Board many of these problems could be virtually eliminated.

Your Secretary has been asked to participate with the Chairman of the Hospital Dental Services Committee of the Canadian Dental Association to develop a Brief and serve as a deputation of two to meet with the Canadian Council on Hospital Accreditation at its Annual Meeting in September. As the regulations of the Canadian Council establish criteria for the accreditation of hospitals, this presentation to be made to the Council may well be an important one having a pertinence not only to Ontario hospitals but to hospitals in other areas of the country as well.

9. Prescribing Drugs In Dentistry

From time to time enquiries are received both from members of the profession and others relative to the legality of dentists prescribing drugs. In order that there be no confusion or misunderstanding the following observations, provided by our Solicitor, are presented:

"The provisions with respect to prescription of drugs by dentists are found in The Pharmacy Act Chapter 79, of Ontario Statutes of 1953 and The Opium and Narcotic Drug Act, Chapter 201, of Revised Statutes of Canada.

Under Section 44 of The Pharmacy Act, no person or corporation shall sell by retail any drug referred to in Part 1 of Schedule D (the barbiturates etc.), except on a written prescription signed by the prescriber.

According to Section 1 of the Act, "prescription means a direction from a legally qualified medical practitioner, *dentist* or veterinary surgeon directing the dispensing of any drug or mixture of drugs to a named person", and "dentist" is interpreted as a person legally qualified and entitled to practise the profession of dentistry in Ontario.

Section 36 prohibits any person other than a pharmaceutical chemist (except as otherwise provided in the Act) from selling drugs or dispensing or compounding prescriptions of legally qualified medical practitioners, dentists or veterinary surgeons.

Section 6 of The Opium and Narcotic Drug Act makes it an offence for any physician, veterinary surgeon or *dentist* to prescribe, administer, give, sell or furnish any drug (opium, cocaine, morphine, etc.) to any person, or to sign any prescription or order for the filling of which any such drug is required unless such drug is required for medicinal purposes in connection with his practice.

The right to prescribe drugs, therefore, is implicitly recognized rather than explicitly authorized in these statutes."

10. Organization Of Dentistry In Ontario

The organization of the statutory and voluntary agencies of dentistry in Ontario is, to most members, somewhat obscure. We have the Royal College of Dental Surgeons of Ontario as the legal body of the profession. The Ontario Dental Association is the provincial voluntary association in which every licensed dentist is a member but whose financial support is derived entirely from those who register at the annual convention. In addition there are upwards of forty local and specialty societies throughout the province with no direct lines of communication with either of the provincial organizations.

Unfortunately arrangements which have existed now for over ninety years are somewhat difficult to alter. However, it seems obvious that the time has come when some concerned consideration should be given to the problems created by our somewhat disjointed and haphazard organizational structure.

During the year the profession was publicly criticized for its alleged failure to cooperate with provincial authorities investigating the price and utilization of drugs. This Board learned of the invitation for dentistry's contribution less than two hours before the Legislative Committee's first meeting with a representative of the profession.

While your Secretary is not overcome with optimism respecting the achievement of an ideal solution perhaps the problem might be somewhat mitigated if a liaison committee representative of this Board and the Board of Governors of the Ontario Dental Association were created. This, at least, would permit an exchange of views and information.

11. Schools Alleging To Provide Courses In Dental Assisting

No school presently offering "courses" for dental assistants is responsible to the statutory provisions of the Trade Schools Regulation Act and thus the Department of Education of Ontario has no jurisdiction over the type

of training, course of study, or the sales tactics of such organizations. It is becoming increasingly obvious that these courses are far from adequate and many persons have contacted the Board respecting them.

In April 1960 the Provincial Cabinet placed Practical Nursing on the list of designated trades.

It is your Secretary's belief that, if some measure of control cannot be authorized within the Dentistry Act of Ontario, such courses might be included in the list of designated trades within the meaning of the Trade Schools Regulation Act administered by the Department of Education.

12. Recruitment Display

From time to time the profession is presented with the opportunity of participating in Career Expositions in communities throughout the province. For two such events during the past year a portion of the exhibit employed in Mediscope '59 has been utilized but these panels have not proven to be satisfactory.

It is recommended that a panel depicting the advantages of dentistry as a career be developed keeping in mind the necessity of its ready portability. The Dental Alumni Association has agreed to be responsible for the development of such a display providing financial support may be obtained for such a project. An artist's conception of a possible display is presented with the recommendation that favourable consideration be given.

13. Insertions In The Ethnic Press

By-Law No. 13, Section 1(c) stipulates clearly and concisely the nature and form of newspaper insertions which are acceptable. In the main, there are very few infractions of this subsection evident in the English speaking newspapers. There are many technical infractions of this By-Law, however, manifest in the ethnic press and in the press of certain religious denominations as evidenced by the insertions which are accepted by many such newspapers. As an example, the Polish Alliancer, in its Christmas issue, contained several greetings by dentists in which, apparently, compliments and good wishes were extended both to the patients of these dentists and to the Polish community as a whole. This, of course, is only one example which could be cited.

The College of Physicians and Surgeons of Ontario views this development with considerable seriousness and is making concerted efforts to eliminate this form of newspaper insertion.

While it is perfectly true that this Board has no authority respecting the policy of any newspaper it does have statutory oversight relative to the actions of its members. This matter is brought to the attention of the Board for observation and direction.

14. Radiation Control

The Secretary has continued to maintain a contact with Dr. L. B. Leppard of the Industrial Hygiene Division of the Ontario Department of Health. Dr. Leppard has been assured of the complete co-operation of our

profession in the discharge of the responsibilities of his Division. He has been informed that should he have any thoughts or ideas for transmission to our profession in advance of any official regulations which might be effected we should be pleased to forward such information to our members.

Dr. Leppard was appreciative of our proffered co-operation and indicated that a questionnaire had already been sent to physicians and chiropractors and that a questionnaire was being developed which would have particular pertinence to the dental profession. He indicated that Dr. H. G. Poyton, Professor of Radiology, Faculty of Dentistry, was assisting in the preparation of this questionnaire and undoubtedly our co-operation would be most important whenever the Division is prepared to seek answers to this questionnaire from members of the dental profession.

There is little more we can do, officially, until such time as the Division has prepared itself for the next procedure. Obviously, however, it is incumbent upon all dentists to establish and utilize their radiographic equipment appreciating contemporary knowledge of possible radiation hazards.

15. Group Insurance

(a) *Liability*

There were 13 claims issued against the Comprehensive Group Liability Program during the past year. This is an increase of 7 over the previous year and an increase of 11 over the first year of the program. While claims have increased somewhat the overall picture remains highly favourable.

Ontario has surpassed its 1,200 member participation but the three Prairie Provinces have not yet achieved their quota. Participation in Western Canada is as follows:

(1)	Alberta	192	(18 short)
(2)	Manitoba	92	(33 short)
(3)	Saskatchewan	43	(52 short)

It was agreed by these provinces upon entry into the plan that a 50% participation would be achieved. Since the present coverage and rate are predicated on the assumption that 50% participation will have been achieved by October 1, 1961, failure to meet this requirement could necessitate the cancellation of coverage for any provincial group not meeting its participation objective or, as a possible alternative, an increase in premium rates for any such province.

Unquestionably the premium contribution of Alberta, Manitoba and Saskatchewan to the total pool is out of proportion to the Underwriter's risk exposure, which is to say that an adverse claims' experience in one of these provinces could be incurred more readily and thus attract a penalty with respect to Ontario participants. While we were prepared to risk such a possibility at the outset of other-province participation in order that the plan might be extended more broadly it will now be necessary, somewhat firmly, to enunciate to these provinces the essentiality of a concentrated effort to increase the number of participants in the interest of all concerned.

As a further enhancement to the program we were successful in securing the Underwriting Company's agreement to

1. A three-year Certificate being offered on an individual basis as an option to the one year Certificate at a 10% premium discount, (\$64.80) or
2. Converting the entire program to a three year basis only, the premium being $2\frac{1}{2}$ times the current annual premium (i.e. $2.5 \times \$24. = \60.00)

While the Advisors and our Counsel, because of the highly-favourable premium structure to which the Underwriter would be committed for a period of at least three years, would have preferred the second alternative it was decided for this year, to make available the three-year certificate at a 10% premium discount and to encourage this form of participation. If a sufficiently large number within the membership recognizes the wisdom of having this premium structure 'locked in' for a three-year period and at the same time enjoy a premium discount it then might be possible to effect the conversion of the entire program to a three-year basis at a premium $2\frac{1}{2}$ times the annual premium. At the moment it would appear that the Plan has reached the point of minimum cost for maximum coverage consistent with sound underwriting principles.

(b) All Risks

Final negotiations have been effected, subject to the ratification of the Board, to institute a highly-desirable comprehensive group insurance program covering dental office equipment, furniture and supplies. The program covers the total *replacement* value of furniture, fixtures, equipment, and instruments plus the *actual* cash value of supplies. It insures against direct physical loss or damage from any external cause unless specifically excluded. The following would be included in the coverage: fire, lightning, windstorm, cyclone, tornado, hail, explosion, smoke, earthquake, vandalism, malicious damage, burglary, and robbery.

The unique feature of the plan is the facility to insure against *replacement* costs — a *feature which cannot be purchased on an individual basis*. After dental equipment has depreciated for a few years its actual value at that time bears little relationship to the cost to the dentist of its replacement should such become necessary because of its physical loss from one cause or another. This feature should be highly significant and of the greatest importance to practising dentists.

The premium structure is \$6.00 per \$1,000.00 of coverage with a minimum annual premium of \$30.00.

It is strongly recommended that the Board give its consent to the initiation of this program to coincide with the premium date (October 1st) of the existing Liability Plan.

(c) Administration

We have been successful in transferring from an outside organization, the administration of the Liability Plan and, if ratified, in making provision for the administration of the All Risks Plan within Canadian Dental Service Plans Incorporated. Thus D.S.P.I. will forward premium notices, account for premiums remitted by the members and, at an equitable

financial arrangement to be negotiated by D.S.P.I., pay over to the Underwriting Company, in company with appropriate records, the collected premiums. By this arrangement not only will D.S.P.I. be provided with another administrative procedure to be performed but the members will be able to more readily identify this program with their own organization.

(d) Group Life — Major Medical — Time Loss

The Advisors have given much thought to the fundamental principles indigenous to the offering of all insurance plans to members of any major profession under considerations such as practicality, economic desirability, responsibility, public reaction, and relevant attitudes. Without reservation the Advisors agreed that

only by means of some action on the part of an organization like R.C.D.S. could the individual be exposed to the major economies available,

the aggregate value to member dentists of the economies related to the limited range of services proposed for implementation initially, assuming no more than modest participation, could exceed \$200,000.00 per year,

it is within the legal capacity and purview of any properly constituted and well managed organization operationally related to the practice of a profession, to concern itself with the provision of such services,

there is a measure of responsibility falling on such an association or organization entity, where the need has been recognized and the accomplishments are capable of fulfillment without significant complication in its more normal day to day operations,

care should be taken to minimize conflict with any pre-existing arrangement operated by or for any segment of the profession,

any plans decided upon must be presented as a "service" of the Association sponsor, a 'facility' available to the individual practitioner, for voluntary acceptance or rejection,

it is now a relatively common practice for Associations responsible to and guiding the economic, social and public relations destinies of a profession to enter into contracts enabling its members to achieve a greater degree of economic protection, through exercise of the various advantages attributable to mass purchasing.

These conclusions led to the Committee's unanimous endorsement of proposals for three separate and distinct plans of insurance for the individual practitioner and his family. Each member dentist could select all or any one of the three benefits offered. This is unlike most other such arrangements which require participation in all or none. All benefits would be underwritten 'direct', that is excluding any loading for commissions.

While our investigations have not yet advanced sufficiently to make recommendations at this time it seems to be more than reasonably apparent that we shall have firm proposals to offer in respect of group life, major medical, and time loss cover for the Fall 1961 meeting of the Board.

(e) Advisors

Your secretary has regarded himself as privileged indeed to work with Dr. Russell A. Hugill and Dr. Ernest Rollaston as Insurance Advisors to the Board. Both members have served diligently, effectively, and conscientiously for the benefit of our profession. It is a most sincere recommendation that Drs. Hugill and Rollaston be reappointed as Insurance Advisors to the Board.

16. Provincial Sales Tax

The Provincial Government has announced the introduction of a 3% retail sales tax effective in September 1961. This tax will apply to a wide variety of items at the retail level. There is some concern that this tax may apply to dental equipment and supplies thus, in effect, creating a tax on health care services.

The Province of Saskatchewan possesses a somewhat similar tax and there the dentists pay tax on items of equipment and supplies not directly related to the construction of dentures. For the supplies necessary for prosthetic services no tax applies.

To date we have been unable to receive definitive information from provincial authorities relative to Ontario's sales tax and its possible applicability to equipment and supplies employed in health care services. We have communicated both with the Minister of Health and with the Provincial Treasurer in the hope that such equipment and supplies will receive similar consideration to the purchase of food and other necessities of life. Both Ministers have expressed interest in the profession's concern but the Treasurer of Ontario has made the general observation that dental equipment and supplies are taxed in other provinces where a sales tax has been in effect. Final regulations have not yet been approved by the Lieutenant-Governor in Council.

17. Workmen's Compensation Board

Elsewhere, the report of the Consultant to the Workmen's Compensation Board will appear. One further matter relative to our Workmen's Compensation Board relationship might well be considered by this Board.

Periodically it is necessary for the Consultant and Representatives of this Board to negotiate equitable fee arrangements with the Workmen's Compensation Board. The Ontario Fee Schedule, however, is developed and published by the Ontario Dental Association. Obviously the Representatives desire to employ the recognized schedule as a guide in negotiations with the Workmen's Compensation Board. Under the circumstances it might prove desirable to have a Representative of the Ontario Dental Association included in the Representatives to the Workmen's Compensation Board.

18. Employees' Coverage Under Workmen's Compensation Board

For some time the Secretary has been concerned with both the moral and legal liability of the Royal College of Dental Surgeons of Ontario should any employee be injured through accident while on duty. This concern was emphasized rather dramatically by an injury sustained in our

Headquarters by an employee of an organization which provides office assistance. While there was no liability on the part of the R.C.D.S. respecting this employee the fact remains that the accident could have occurred to a member of our own staff.

In certain industries it is compulsory for coverage under the Workmen's Compensation Act. For those engaged in office clerical pursuits coverage is not compulsory but application for this protection may be made. The amount of premium is computed using the wage estimate and applying the rate of 25 cents per \$100.00 of salary. It is possible for the rate of assessment to vary from year to year depending upon the accident experience in any industrial group. There is a minimum assessment for any one year or a portion of a year of \$10.00.

It is your Secretary's opinion that this coverage should be provided.

19. Income Tax Deductions For Post-Graduate Courses

From time to time your Secretary receives observations from members seeking information relative to tax relief for moneys expended for post-graduate courses. The fact that a precedent exists for such regulations in the United States tends to precipitate many queries.

There is a fundamental difference between the taxation policy in Canada and in the United States. It is one of capital gains. In the United States capital gains are taxed and in Canada they are not. Canadian taxation authorities consider a postgraduate course in the capital gains area.

The Canadian Dental Association has been told repeatedly that when capital gains are taxed in Canada then expenses in respect of post-graduate courses will be allowed for income tax purposes. Notwithstanding this information we have been assured by our national organization that efforts in this regard are continuing.

20. Office Management Committee

It seems desirable that an office management committee be created to suggest policies respecting the overall operations of the Secretariat. Matters of salary, pensions, and the like should be reviewed periodically by a committee of this Board. Office procedures of greater value to the Directors might well be suggested as well as procedures which could provide greater service for the membership.

21. New Inspector Appointed

Commencing June 1st, 1961 the position of Inspector of the College will be assumed by the former Sergeant J. H. Payzant of the Royal Canadian Mounted Police. Sergeant Payzant has had extensive investigative experience having been with the R.C.M.P. since 1935 except for three years as an N.C.O. attached to the Canadian Intelligence Corps, Field Security Section. For some years Mr. Payzant has been assigned to the Division quartered in Toronto and he is familiar with investigational methods and enforcement practices of other departments and police forces and is also familiar with court procedures in the province of Ontario.

We are pleased that it will be possible to continue the former relationship of our Inspector being engaged half-time by this Board and half-time by the College of Physicians and Surgeons of Ontario. We welcome Inspector Payzant to our staff.

22. Biographical Data

In 1940 a form to obtain biographical information was sent to each dentist in Ontario in order that he might complete the form and return it to the Secretary of the Board for the inclusion of this information in the members' files. This material has been invaluable as it provides an accurate source of factual information relating to the membership. Unfortunately this material is most frequently employed when information for obituaries is required. It has, however, other uses and is often invaluable when class reunions are being arranged, when members receive certain honours and information is requested by outside organizations and when potential employers seek independent information concerning dentists making application for certain positions.

As over 20 years have now elapsed it is felt there might be some merit in repeating this activity and thus acquiring as much up to date and accurate information as possible from the co-operating dentists.

23. Licences Issued For 1961

Dentists

Licences Issued—Active	2356	
—Inactive	6	
—Life Member	102	
Total licences issued January 1 - April 30, 1961	<u>2464</u>	
Deceased since issuance	5	
Out-of-province	41	
Licensed dentists in Ontario	2418	<u>2464</u>
Increase in Licences issued over previous year 2464—2438=		<u>26</u>

Additions

Graduates of University of Toronto	84	
N.D.E.B. Certificates	6	
Board Examinations	15	
Resumed Licence	<u>20</u>	125

Deletions *april 30, May 1*

Deceased (Life Memb. 11+Act. 21) + Retired 2	<u>34</u>	
Retirements	14	
Did not renew '61 Licence	30	
Left Ontario	7	
On Post Grad. Courses	<u>14</u>	99
ACTUAL INCREASE of practising dentists over previous year		<u>26</u>

Dental Hygienists

On April 30th, 1961 the number of Dental Hygienists on the Register was as follows:

Registered to date	58
Residing and Practising in Ontario	32
Inactive but licensed	<u>19</u> 51

24. Licentiates Deceased — Life Members — Extramural and Extension Lectures

Appended to this report will be found a list of the Licentiates who died during the year ended April 30th, 1961. (Appendix A).

A list of proposed Life Members is presented to be added this year. (Appendix B).

The Extramural and Extension Lecture Service is presented. (Appendix C).

The dentist-population ratio by counties and districts is presented (Appendix D). It will be noted that the provincial ratio worsened during the year from 1/2345 last year to 1/2394 this year.

25. Conclusion

During the past year your Secretary has represented this Board on the Council, Research Advisory Committee, and Library Committee of the Faculty of Dentistry and the Senate of the University of Toronto. In addition it has been my privilege to serve as a representative of the R.C.D.S. on the Dental Public Health Committee of the Ontario Dental Association. Within the Faculty it has been possible to participate in the deliberations of the Admissions and Scholarship and Awards Committees. Through these relationships it has been possible to acquire considerable information and, hopefully, to impart, when desirable, the policies and programs of the Board.

I would be remiss if I did not express appreciation to the members of our Headquarters Staff who have served this Board and the profession diligently and well. The atmosphere is always harmonious and each member of our staff contributes in no small way to the operations of the Secretariat. I know, too, that I express on their behalf and my own our very sincere appreciation to the Board for the creation of an environment which makes the discharge of our responsibilities so pleasant.

LICENTIATES DECEASED May 1st, 1960 to April 30th, 1961

* 1900	Armstrong, Robert Milton	Ottawa	Nov. 5, 1960
* 1900	Barker, Earl Stanley	Stouffville	Apr. 4, 1961

ACTION

- (1) The Faculty of Dentistry is to be requested to suggest to what limits the present two-year course in Dental Hygiene may be expanded to provide specific services of a broader nature to the profession.
- (2g) Dr. Donald L. Rife appointed associate-editor for Ontario of the Journal of the Canadian Dental Association.
- (7) By-Law No. 93 approved.
- (10) O.D.A. invited to participate in a Liaison Committee comprised of representatives of the Board of Governors of the O.D.A. and the Board of Directors of the R.C.D.S.
- (11) Concern was expressed with the fact that organizations may conduct "courses" for dental assistants outside of any regulatory authority. The Secretary was requested to meet with the Registrar of the Trade Schools to explore the matter.
- (12) A sum not to exceed \$600.00 was provided to assist the Dental Alumni Association in developing a display for recruitment purposes.
- (13) The provisions of By-Law No. 13, Section 1(c) are to apply with equal force to all newspaper insertions irrespective of language employed.
- (14) The Secretary was instructed to request the local dental societies to bring to the attention of their members contemporary knowledge of radiation hazards and where possible introduce programs to reduce excessive radiation.

- (15) The Board gave approval to the All-Risks Insurance Program. Dr. R. A. Hugill and Dr. E. Rollaston were extended appreciation for their diligent, effective, and conscientious services and they were reappointed Insurance Advisors to the Board.
- (17) Appointed Dr. R. C. Honey and an O.D.A. appointee as representatives to the Workmen's Compensation Board of Ontario. Dr. E. E. Johns was subsequently appointed with Dr. J. C. Broom assisting Dr. Johns.
- (18) Treasurer was authorized to apply to the Workmen's Compensation Board for coverage of R.C.D.S. employees.
- (20) Appointed an Office Management Committee consisting of the President, Vice-President, and Dr. D. C. Stiles (with power to add) to review Headquarters' administration.
- (21) Confirmed appointment of Mr. J. H. Payzant as Inspector.
- (22) Approved distribution of a biographical questionnaire.
- (24) Awarded Life Membership to nine members all registered in 1912 and having continuous registration since that time.

Report adopted.

REPORTS

FALL MEETING

1. Introduction

Your Treasurer has felt for some time that the Annual Audit could be significantly simplified and yet continue to meet all requirements of the Board of Directors. The Royal College of Dental Surgeons of Ontario is a non-profit, statutory body and therefore not subject to the many regulations which pertain to the tax requirements of profit-making organizations. Thus the continuing need of the Board concerning itself with adjustment entries for such items as postage on hand, pre-paid insurance, unpaid audit expenses, and the like is somewhat obscure.

The following observations and suggestions, therefore, are presented for the Board's consideration:

2. Property Account

The maintenance of a separate bank account for Property inflicts added bookkeeping complications which do not appear to be justified. It is suggested that this Board eliminate the Property Bank Account thereby making monies allotted for property purposes an item in the General Account. The Property Committee will continue to be supplied with a full and complete annual summary of revenue and expenditure without the necessity of maintaining a separate account.

3. General Account

(a) Revenue

1. Licentiate Fees

As the Annual Renewal Certificates are issued on pre-numbered control forms the Auditor should balance the forms issued during the fiscal year to the revenue as shown by the Cash Book.

2. Other Fees

As receipts are given for other fees received the Auditor should make spot checks to establish to his satisfaction that such funds are properly accounted for.

3. Bonds, Interest on Bonds

The Auditor should physically check all bonds on hand, make a reconciliation showing bonds on hand at previous audit with negotiable coupons, those sold or disposed of, and the balance on hand. Where bonds have been sold he should ascertain that the proper authority has been given for their sale. As bonds can only be sold on the direction of the Board such authority should be covered by an appropriate resolution in the Minutes of the Board.

4. Bank Interest

Bank interest should be checked to establish that such interest has been credited to the Savings Account in conformity with the Regulations.

5. Sundry Revenue

A cursory check should be made of sundry revenue.

(b) Expenditures

A visual check should be made of the individual pay records to establish that the officers and clerical staff are being paid in accordance with the wishes of the Board; that unemployment insurance, income tax, and other deductions are being made in the proper manner; that the records are being kept in a manner suitable for inspection by any authorized agency.

All other expenditures need be checked for authority only, i.e., that the signatures of the President and the Secretary have been obtained as authority for the expenditure and that the cheques are signed by the Treasurer. It should not be necessary to check the distribution of the disbursements in the Cheque Register unless the Auditor has reason to believe that such distribution is being deliberately falsified in order to mislead the Board of Directors or to conceal unauthorized expenses.

4. Bank Reconciliation

Records should be reconciled to the bank statements. An examination should be made to ensure that revenue is being deposited to the Savings Account as required by the By-Laws and that Transfers from the Savings Account to the Current Account have been made under proper authority.

5. Equipment and Equipment Depreciation

The Auditor should satisfy himself that proper records of equipment purchased are maintained. As indicated before we are not subject to income tax regulations insofar as the depreciation of equipment is concerned and as such depreciation of equipment does not present a true or actual picture of the value of the equipment on hand, equipment purchases could be charged as an expense in the year in which such equipment is purchased. It should be sufficient for record purposes to keep a permanent record of all equipment purchases showing serial numbers where possible, description, date of purchase, from whom purchased, and the price. Such records are presently being kept.

The Auditor could examine this record to establish that equipment is not being sold or disposed of without the knowledge of the Directors.

6. General

All expenditures should be charged to the year in which payment is made. We have, within the last two or three years been able to eliminate the necessity of estimating the cost of the May Board Meeting and charging it back to the previous fiscal year. This has been a most significant improvement. I can see no need to compensate for such items as those to which reference has already been made, postage on hand, pre-paid insur-

ance, unpaid audit expenses, any more than I see a need for making allowances for stationery we have in our cupboards or furnace oil in our tank.

7. Welfare Fund

The Auditor should establish that all grants paid by the Department of Public Welfare of the Province of Ontario have been credited to this account and that payments have been made to Canadian Dental Service Plans Incorporated in accordance with their billing.

8. Henry R. Abbott Memorial Fund

As this is a trust fund the audit should reveal that proper authorities exist and that acceptable accounting methods are being followed.

9. General Comment

Because of the fact that the Directors are issued, each month, monthly statements of receipts and expenditures it seems unnecessary to have detailed cost audit performed. It should be sufficient to establish that all revenue is being deposited in the bank and that all expenditures are made by cheque and under the proper authority. Our present staff and accounting procedures being followed can be depended upon to produce a sufficiently accurate break-down.

ACTION

Depreciated value of office furniture and equipment in the General Account and the furnishings and equipment in the Property Account written off against surplus.

Report adopted.

ANNUAL MEETING

1. The estimated surplus on the past fiscal year was considerably exceeded because of significant increases in receipts in registration and licensing fees and, except for two or three items of expenditure, actual disbursements were considerably below estimate. Disbursements for the Dental Assistants' Course and for the Workshop Conference exceeded the budget for contingencies. The expenditure on Library assistance was in excess of budget because at the time the Librarian presented his report it was not realized that a second trained librarian would be necessary for the Faculty Library. Because of the increased enrollment and the added responsibilities it was found necessary to engage a trained librarian rather than a clerical assistant. Thus as the Board has been responsible for one-half the salary of the assistant librarian plus one-half of the pension contribution there is a significant increase in this item.

2. Heretofore it has not been the custom of assigning the salary of the Inspector as a charge on "Enforcing the Act". It is recommended that such a procedure be followed.

3. The Fiscal Year of the Royal College of Dental Surgeons of Ontario has been May 1st to April 30th. There is neither statutory provision nor any By-Law regulation which requires the fiscal year to exist as it is. It is now recommended that the Board give approval to creating the fiscal year the calendar year. There are several advantages to such a change:

1. The licence year is the calendar year. At the present time we do not give a true picture by licence years as we take in parts of both.
2. The reporting of salaries, Directors' honoraria, Examiners' fees, etc., must be done, for Income Tax purposes, on the calendar year. At the present time it is necessary to compute two separate parts of two years. This tends to lead to some confusion.
3. The preparation of the annual audit would be greatly facilitated. For instance this year with our Board meeting on May 17th the Auditor was required to complete and produce his entire report sometime subsequent to April 30th but prior to May 17th. If the calendar year were used as the fiscal year then there would be no pressure upon the Auditor and thus the pressure upon our office staff would be greatly reduced. At the present time the auditors are in our office at one of the busiest times of our year with our staff making preparations for the annual meeting. Our auditors approve this proposal.
4. The pension plans which exist for Headquarters Staff are paid in advance on the calendar year. If the fiscal year were the calendar year this procedure would be greatly simplified.
5. It would make our fiscal year conform to that of the Canadian Dental Association. Each year we report to the Canadian Dental Association upon our change of register and we must report to the C.D.A. on the calendar year even though our own figures at that time do not reflect actual memberships. If our fiscal year corresponded with the Canadian Dental Association year we could always provide audited membership figures which could not be anything other than correct.

To effect this proposal it would be necessary to establish a short fiscal year, May 1st to December 31st. Thus the preparation of two budgets would be required but the budget for January 1 to December 31, 1962, could be reviewed at the Fall Meeting of the Board.

The only complication, which in reality is only a matter of bookkeeping, is the budget for the proposed short fiscal year. During the eight-month period receipts will be very low but disbursements will be high and it is probable that the budgeted excess of disbursements over receipts could approximate \$160,000.00. An additional reason for this condition is the fact that the Board has always made its grants in arrears but such grants have not been shown on statements as outstanding. This relatively minor complication is, in the opinion of the Treasurer, heavily outweighed by the advantages which would accrue from this suggested change.

4. It was agreed at the November, 1960 meeting of the Board that the Property Bank Account be eliminated but that the Property Committee continue to be provided with accounting of expenses pertaining to the Headquarters property. The By-Laws presently make provision for two

Current Accounts, General and Property, with a maximum sum on deposit in each of \$10,000.00. As the Treasurer is bonded in the amount of \$20,000.00 and as the disbursements on property will now be made from the General Account it is recommended that an appropriate By-Law be enacted to eliminate the Property Bank Account and increase the maximum balance in the General Account to \$15,000.00.

5. For signing authorities not stipulated in the By-Laws it will be necessary for the Board to provide such authorization.

6. In accordance with the provisions of The Dentistry Act of Ontario, Notices of Annual Fee were mailed to the profession on December 1, 1960. On January 15th, 1961, 389 Second Notices were mailed and 118 bank drafts were issued following the period of grace after February 1st. On March 4th it was necessary to apply the penalty for late payment to the fee notices of 15 members. Early in April the following unpaid accounts were entered into Division Court for collection:

1. Dr. H. G. M. Ayre, Rainy River
2. Dr. W. H. Dean, Toronto
3. Dr. J. V. N. LaFramboise, Cornwall
4. Dr. C. C. Smart, Ottawa

Dr. LaFramboise, prior to any action by the Court, remitted the fee, penalty, and incurred costs. Dr. Smart paid his fee into Court.

7. The Auditors' Report is attached and the appointment of auditors for the ensuing year is necessary.

ACTION

Report adopted.

AUDITORS' REPORT

To the Directors of the Royal College of Dental Surgeons of Ontario:

We have examined the balance sheet of the Royal College of Dental Surgeons of Ontario as at April 30, 1961 and the statements of receipts and disbursements of the general account, the Welfare Trust Fund and the Harry R. Abbott Memorial Library Fund for the year ended on that date.

In our opinion the accompanying balance sheet and related statements of receipts and disbursements present fairly the financial position of the College as at April 30, 1961 and the results of its cash transactions for the year ended on that date, in accordance with generally accepted accounting principles applied on a basis which differs from that of the preceding year as indicated in the accompanying note, and with which changes we concur.

THORNE, MULHOLLAND, HOWSON & McPHERSON
Chartered Accountants

Toronto, Canada
May 8, 1961.

BALANCE SHEET

April 30, 1961

— ASSETS —

General account:

Cash	127,417.37

Excess Disbursements over Receipts			154,716.84	
--	--	--	------------	--

NOTE:—The "Excess Disbursements over Receipts" during the partial year 1 May to 31 December, 1961 is caused by two factors:

- (1) The change in 'fiscal year' to coincide with the 'calendar year' which is also the 'licence year'. There is very little revenue during this eight month period.
- (2) The R.C.D.S. has always made its grants one year in arrears but such grants have not been shown on statements as outstanding.

ACTION

Budget for May 1, 1961 to Dec. 31, 1961, adopted.

Budget for Jan. 1, 1962 to Dec. 31, 1962, adopted subject to review at Fall 1961 meeting of the Board.

DISCIPLINE COMMITTEE

MEMBERS: A. H. Leckie, Chairman; J. R. Hurton; R. E. Diprose;
D. C. Stiles; J. D. Purves

REPORT

Since the last Annual Meeting of the Board of the Royal College of Dental Surgeons in May, 1960, our Secretary has dealt with 27 written complaints regarding members of the profession. This is one more than last year and the previous year.

These complaints can be classified as follows:

Contravention of By-Laws	3
Excessive Fees	1
Unusual Procedures	4
Unsatisfactory Services	19

These have all been resolved in a satisfactory manner to all parties by our Secretary.

During the sessions of the Canadian Dental Association in Ottawa, a member of the College made a statement to the press of a derogatory nature to the profession.

He was asked to appear before the Board during our meeting in November. The result was most unsatisfactory, but it was felt by the Board that further action would accomplish nothing.

ACTION

Report adopted.

EXAMINERS AND PETITIONS COMMITTEE

MEMBERS: J. D. Purves, Chairman; R. E. Diprose; A. H. Leckie

REPORTS

FALL MEETING

1. Board Examinations

Board Examinations were conducted for two candidates on November 16th - 18th, 1960.

2. Applications For Registration

The Committee recommends that

1. Richard Mosley McGinty, D.D.S. (Det. '59)

2. John Bertrand Scott, D.D.S. (McG. '52)

be granted their Licentiate in Dental Surgery in the Royal College of Dental Surgeons of Ontario.

3. Applications For Specialty Certification

The Committee considered applications in two specialties — Dental Public Health and Oral Surgery. Members of the Liaison Sub-Committee of the two specialties considered the respective applications and the eventual action by the Committee reflects the views and advice of the members of the Sub-Committee.

(a) That *Montague Elliott Jarrett*, D.D.S., D.D.P.H., having met the requirements for certification in the specialty of Dental Public Health be certified as a Public Health Dentist.

(b) That the application of *Henry Arthur Jensen Thompson*, D.D.S., L.D.S.R.C.S., B.Sc.D., for certification in the specialty of Oral Surgery be not approved because the specialty requirements of Oral Surgery have not been met.

4. Application For Reinstatement

The application of Louis Perlman, D.D.S., (R.C.D.S. '22) for reinstatement was considered. Dr. Perlman voluntarily withdrew from the active register to take up residence in California in 1955. The committee interviewed Dr. Perlman and offers the following recommendation:

That the application of Louis Perlman, D.D.S., for reinstatement to active status in the Royal College of Dental Surgeons of Ontario be approved.

ACTION

Report adopted.

ANNUAL MEETING

1. Dr. M. A. Rogers, Chairman of the Specialists' and Specialization Committee of the Canadian Dental Association, outlined the activities of his Committee with respect to the development of a projected Royal College of Dentists. Inasmuch as this action would ultimately require co-operation of Provincial Boards in respect of regulations pertaining to specialists Dr. Rogers was assured of the co-operative understanding of this Board. He and his Committee should be commended for their efforts in this direction. It was felt that certification qualifications on a national level would result in the maintenance of high standards and would, if acceptable to the Corporate Bodies, be a decided advantage in the standardization of specialty qualifications.
2. Dr. Robert Rapp and Dr. A. W. S. Wood have been appointed to the Liaison Sub-Committee of the Examiners and Petitions Committee as representatives of the specialty of paedodontics.
3. The increased utilization of the National Dental Examining Board of Canada by our Board does not seem practicable unless the N.D.E.B. Certificate were made mandatory. This, in the opinion of the Committee, should not be considered while regulations still exist requiring the student to take an extra set of examinations beyond those which apply to his final year in his school. Co-operation was extended to the N.D.E.B., however, as apparent in the action of the Secretary who appeared before members of the Senior and Junior Years of the Faculty to encourage the students to give sincere thought to the acquisition of the N.D.E.B. Certificate.
4. The results of Board Examinations and specialty applications are attached as Appendix A.

BOARD EXAMINATIONS AND SPECIALTY APPLICATIONS

Board Examinations were conducted for five candidates from May 10th to 12th, 1961, inclusively.

I. Applications For Registration

(a) The Committee recommends that

1. Edward Henry Mazak, D.D.S. (McGill '61).
2. John Reddon, D.D.S. (McGill '61).
3. Mrs. Sophie T. Rodriguez, D.D.S. (McGill '61).
4. Walter Robert Teteruck, D.D.S. (McGill '61).

having passed the licensing examinations conducted by this Board, be granted their Licentiates in Dental Surgery in the Royal College of Dental Surgeons of Ontario when all remaining regulations have been met.

(b) The Committee recommends that Thomas Michael Johnston, B.D.S. (Belfast '60), be informed that he failed to obtain pass standing.

II. Applications For Certification

(a) The following having met the requirements established for certification in the specialty of orthodontics be granted their specialty certificates:

1. Jack Gilbert Dale, B.A. (Tor. '53), D.D.S. (Tor. '58), Cert. Orth. (Hvd. '61).
2. Robert Morgan Hamilton, D.D.S. (Tor. '58), Dip. Orth. (Tor. '61).
3. Francis Harold Mader, D.D.S. (Tor. '57), Dip. Orth. (Tor. '61).
4. Peter Gerunsio Peloso, D.D.S. (Tor. '56), Dip. Orth. (Tor. '61).
5. Robert Bruce Ross, D.D.S. (Dal. '55), Dip. Orth. (Tor. '59).

(b) That William Fleming, D.D.S. (Tor. '50), Dip. Per. (Tor. '61), having met the qualifications for certification in the specialty of periodontics be granted his specialty certification in periodontics.

(c) An application for certification in periodontics was received from Madan Mohan Mehta, B.Sc. (Panjab '42), B.D.S. (Panjab '46), M.Sc.D. (Tor. '55), D.D.S. (Tor. '56). This application was carefully considered with the representatives of the Specialty of Periodontics. The basic requirements for the course leading to the Diploma in Periodontics in the Faculty of Dentistry, University of Toronto, and the basis upon which course equation is made, are as follows:

Anatomy (M1)	30 hours
Histology (M3)	50 hours
Physiology (M6)	24 hours

Oral Pathology (D7)	30 hours
Bacteriology (D1)	32 hours
Pharmacology (M5)	20 hours
Medicine (D4)	28 hours
Radiology (D9)	30 hours
Public Health Nutrition (SH7)	50 hours
Essay (D13)	

This does not include seminars and clinical instruction in Periodontics required by the Department. The transcript of the M.Sc.D. program cannot be equated with these requirements.

It is estimated that a total additional six months of course work and clinical teaching would be required to provide Dr. Mehta with training equal to the present requirements for the Diploma in Periodontics.

The Committee recommends that the application of M. M. Mehta be not granted.

ACTION

Report adopted.

Certificate of Licensure in Dental Surgery granted to the following having been graduated from the Faculty of Dentistry, University of Toronto and having fulfilled the other requirements of the By-Laws of the Royal College of Dental Surgeons of Ontario:

Melvin Arnold Abramson	Ralph Thorpe Hislop
Clare Thomas Arthur	Bryant Holmes Hunter
Jerome Becker	Darrel Wilson Hunter
George Adam Bedrosian	Garry Keith Hurd
Douglas Bell	Hagen-Goetz Jaeger
Morley Irvine Bernstein	Keith Ronald Johnston
Tiina-Ann (Vetka) Berrevoets	Ray Bing Jow
Harry Martin Bloch	Terry Terue Kameoka
Paul Ian Bodrug	John Earl Kennedy
Christena Chruszcz	Hugh Donald Kerr
Thomas Michael Aidan Curry	John Peter Kerr
Lawrence Samuel David	Charles Arthur King
Morley Norman Deyette	Marvin Kushner
Evert Lewis Dixon	Robert Edward David Lee
Oscar Pickering Doner	Sheldon Hubert Liebesman
William Dutka	Michael Philip Lococo
Douglas William Elmhirst	Raymond Earl McDermott
Rex Edward Fortescue	Michael Gerrard McKenna
John Boyd Fowler	Iain Murchison McLeod
Leonard Gaik	Kerry Seth McLean Mathers
Donald Robert Gratton	Mary Elizabeth Maynard
Harry Alexander Greig	Roderick Lawrence Moran
Gary Ira Gutmann	Maurice Edward Moreau
John Charles Hanvey	James Patrick John Morreale
James Kenneth Hicks	Robert William Mowbray
Robert Gladston Hiscox	Saul Nussbaum

Harvey Orfus
Joseph Zoly Pacsuta
Michael Patrick
Bruce Wade Robinson
Gaida Mirdza Roce
Jerry Stuart Smith
Clifford Bruce Sullivan
Norton Stanley Taichman

Ronald Victor Teitler
Donald James Weatherhead
Sheldon Arthur Weingarten
Albert Weinstein
William George White
Sydney Irving Young
Stephen William Zweig

Registration in Dental Hygiene be granted the following graduates of the Course in Dental Hygiene at the University of Toronto upon completion of all other requirements of the Board:

Linda S. Chenier
Rene Levitt
Ann MacIntosh

Sandra Mather
Carole Ono
Eleonor Perdue

DENTAL SERVICES COMMITTEE

MEMBERS: D. C. Stiles, Chairman; W. H. Feasby; R. P. Lowery;
D. B. McAdam; P. E. Willson.

REPORTS

FALL MEETING

1. Introduction

The Dental Services Committee has held two meetings since the 1960 Annual Meeting of the Board. One was a half-day meeting held October 5, 1960, and the other was a day-long session November 9, 1960.

2. Dental Welfare Plan

The Secretary met with both the Minister of Public Welfare and his Deputy in separate sessions and presented certain proposals for an extension of the Plan. Written reply was received from the Minister expressing satisfaction with the results and administration of the Plan and indicated that the proposals were under consideration by the Department.

Following the October 5th meeting the Secretary was instructed to obtain as much information as possible from local dental societies and social service agencies as resource material to be utilized for a possible re-approach to the Department of Public Welfare.

Approximately one-half of the province's local dental societies responded to the questionnaire. Some societies had been in receipt of requests from certain agencies for some assistance in providing welfare service but many had not. This information has been summarized and is available in the Secretary's office.

The replies from the social service agencies were not particularly helpful. In the main the concern of the various groups was for more or less specific cases although almost all of the reports indicated a real need in the marginal income groups. These reports are also available in the originals and in memoranda form in the Secretary's office.

Certainly there was insufficient information for the Committee again to communicate with the Minister to seek a broadened base for the Dental Welfare Plan. The Secretary will be communicating on behalf of the members of the Committee.

In the meantime the profession is to be circularized both as individuals and local societies to enunciate the terms of reference of the Dental Services Committee and the need to obtain as much continuing information as possible on all requests received for welfare dental services.

Special Items

(a) Upward Revision in Fees

The Ontario Dental Association has recently effected an upward revision of fees within its Schedule. This change will add, commencing January 1, 1961, and providing the utilization remains more or less constant, approximately \$1,000.00 to the monthly cost.

(b) Time Limit on Submission of Accounts

A significant administrative problem has been encountered by many accounts being submitted for payment many months following the conclusion of treatment. In the future accounts submitted for payment after ninety days following terminations of treatment are to be referred to the Dental Services Committee for approval of payment.

(c) Maximum Fee per Single Tooth

The Committee has established a maximum fee of \$12.00 for operative services on a single tooth.

(d) Comprehensive Statistical Survey of Claims

As I.B.M. equipment has now been installed in the offices of Canadian Dental Service Plans Incorporated it will be more readily possible to set up a more comprehensive statistical survey of claims on the Welfare Plan thus providing the Committee with more information to guide it in the future development of welfare programs.

3. Army Benevolent Fund

The Provincial Secretary of the Army Benevolent Fund sought assistance from the Dental Services Committee relative to the provision of dental services for those whom the Fund is assisting.

The Fund commenced operation in 1948 and it makes grants to assist veterans in distress. There are three principles which guide this program —(1) the debt must arise from some unexpected contingency, (2) there must be genuine distress and (3) there must be an assurance of some permanent solution.

The Fund, in the geographic area of its Toronto headquarters, does not experience too much difficulty in obtaining denture service from private dentists at fees considerably below average. Occasionally, however, estimates are presented for proposed treatment which greatly exceed the D.V.A. Schedule and lengthy, independent negotiation often ensues to arrive at a settlement equitable to A.B.F. The Fund is hopeful that the profession may agree to provide denture service and certain other treatment requirements at a fee comparable to that of D.V.A.

Thus the Dental Service Committee would propose the following arrangement:

1. The profession be advised of the needs of A.B.F. and that the members be requested to provide the necessary services to the approximately 20 to 25 veterans per month who may require certain treatment at a pro-rated O.D.A. Schedule which would bring the fee to the level of that authorized by D.V.A.
2. The veteran for whom dental treatment is authorized would present himself to the dentist of his choice and if the dentist accepted him for treatment the dentist would complete the service, fill out the chart form which would be given him by the veteran, have the veteran attest by his signature that the treatment was duly completed, and forward the chart for payment to D.S.P.I.

3. Once per month D.S.P.I. would bill A.B.F. for the aggregate amount spent.

It is estimated that within the administrative framework already existing this program could be effectively administered for 5 per cent of the authorized fees.

4. Pre-Payment Plans

The Board at its Annual Meeting in May, 1960, expressed the desire that the Dental Services Committee seek incorporation of an Ontario Dental Services Board in order that a legal entity might exist for the administration of approved pre-payment plans for dental care services. The Board's Solicitor has been requested to initiate the necessary legal procedures to effect this incorporation as required under The Act Respecting Pre-Paid Hospital and Medical Care Services.

The Committee carefully reviewed the Model Pre-Payment Plan as approved by the Board of Governors of the Canadian Dental Association. The Plan in essence would provide dental care to children under 16 years of age but this care would not include either orthodontic or prosthodontic services.

Lengthy discussions have taken place with two employee groups relative to the possibility of instituting this plan. The full details of these discussions form a portion of the Minutes of the Committee and are available through the office of the Secretary.

(a) Toronto Branch — Civil Service Association of Ontario

This Branch Association desires a plan which would provide basic dental care for both children and adults of all age groups. At the outset the premiums would be the responsibility of the members but the Association would certainly seek Government participation in all or part of the premiums. The representatives of the Association indicated there would be no interest unless adults were included. Also no interest was expressed in a pre-paid plan for the children and a post-payment plan for adults on a payroll deduction basis.

The Association expressed a desire to be kept informed of any developments in the area of pre-paid dental services.

(b) Surgical and Supplementary Hospital Plan — The Telegram

In 1949 the employees of The Telegram being dissatisfied with the plan provided by Ontario Blue Cross formed their own group on a non-profit basis. Each month the employee with dependents pays \$3.50 and the employer, The Telegram, pays a like amount. \$4.20 of this amount is paid to the Ontario Hospital Services Commission and the remaining \$2.80 is deposited in the Fund from which surgical and supplementary hospital care are provided. For surgical care the Plan simply makes payment to the surgeon on the basis of the Ontario Medical Association's Schedule of Fees. This Plan is in no way desirous of simply remitting an aggregate premium to another body to have dental services provided.

In discussing the model pre-payment plan with the Directors of the Plan no interest at all was forthcoming in a program which did not include adults. The Directors require only a Fee Schedule and some

technical assistance to permit the establishment of benefits for their members. Full co-operation was indicated in supplying statistical material to the Director of the C.D.A.'s Bureau of Economic Research. Both the Director of the Bureau and the R.C.D.S. Secretary assured the Directors of the Plan of every possible co-operation. It will be of great benefit to the profession in this area if a plan including adults is instituted to gain some knowledge of the elusive utilization factor.

While one certainly is unable to draw positive conclusions from the results of both these deliberations it seems reasonably obvious that the present plan is not attractive to employee groups which pay all or part of the necessary premiums. For the benefits to be provided the estimated premiums are beyond the point conducive to participation. The model plan provides coverage for those services not too difficult to meet financially by the average family but does not provide coverage for the more costly facets of dental treatment services. As indicated by The Telegram group it is customary to provide benefits directly for the members first and then as finances permit extend benefits to the dependents subsequently. The model plan would reverse that custom.

The model plan might possibly be of interest to a benevolent employer willing to provide a benefit to his employees. A positive case can readily be made out for a plan which provides care for children and thus seeks to prevent the terminal treatment requirements often apparent in adults. In industry, however, especially where the employee is bearing a portion of the cost, there is a great tendency to wish to provide the same benefits for all.

Efforts will be made to initiate enquiries with appropriate companies to investigate the possibilities of such companies participating in a pre-payment plan for dental services of benefit to their employees.

5. Post Payment Plan

The Committee directed the development of a new Agreement Form which now meets the legal requirements to include collection charges.

Quebec has appointed two directors to D.S.P.I. as this province now participates in the Post-Payment Plan. These directors are Dr. Gustave Ratté and Dr. Robert LeBlanc.

6. Visit to R.C.D.S. Headquarters by Graduating Class

Authority has been granted to the Secretary to arrange for visits of groups of students of the graduating class to R.C.D.S. Headquarters and there be apprised of the functions of the organizations located at Headquarters and more particularly, the plans which fall within the policy purview of the Dental Services Committee. The Canadian Dental Association and the tenants at R.C.D.S. Headquarters will be informed of these visits and be invited to participate if they wish.

7. Sponsorship of Courses in Practice Administration

At the suggestion of one of the R.C.D.S. Directors during the May, 1960 meeting the Committee was asked to consider undertaking arrangements for the provision of courses in practice administration. The Committee

after considering the suggestion agreed in principle that it is better to have courses in practice administration sponsored professionally but that, at the present time, such arrangements are beyond the capacity of this Committee.

ACTION

Report adopted.

ANNUAL MEETING

1. Introduction

The Dental Services Committee has held three meetings since the last annual meeting of the Board.

2. Welfare Plan

The Secretary met with both the Minister of Public Welfare and his Deputy in separate sessions and presented certain proposals for an extension of the Plan. Written reply was received from the Minister expressing satisfaction with the results and administration of the Plan and indicating that the proposals were under consideration by the Department.

Following the October 5th meeting the Secretary was instructed to obtain as much information as possible from local dental societies and social service agencies as resource material to be utilized for a possible reap-
proach to the Department of Public Welfare.

Approximately one-half of the province's local dental societies responded to the questionnaire. Some societies had been in receipt of requests from certain agencies for some assistance in providing welfare services but many had not. This information has been summarized and is available in the Secretary's office.

Certainly there was insufficient information for the Committee again to communicate with the Minister to seek a broadened base for the Dental Welfare Plan. In the meantime the profession is to be circularized both as individuals and local societies to enunciate the terms of reference of the Dental Services Committee and the need to obtain as much continuing information as possible on all requests received for welfare dental services.

Financial Report

DENTAL WELFARE PLAN — 1960

MOTHERS' AND DEPENDENT CHILDREN'S ALLOWANCES ACT

Grant received for the period 1 Jan., 60 to 31 Dec., 60	\$181,596.10
Paid to C.D.S.P.I. payments applicable to the Calendar Year 1960	174,324.12
Hold back for unpaid accounts	<u>\$ 7,271.98</u>

An initial payment of 66 $\frac{2}{3}$ % of the O.D.A. Schedule of fees, with a final payment increasing this to 75%, has been made. A monthly breakdown of receipts and expenditures from the Welfare Account, applicable to the Calendar Year 1960, is as follows:

Month	Grant Received	Expenditures	Changes in Eligibility	
			Added	Deleted
Jan.	\$ 14,933.10		558	475
Feb.	14,989.80	\$ 19,332.50	573	492
Mar.	15,060.50	10,529.20	571	470
Apr.	15,144.50	13,179.10	647	527
May	15,155.00	12,241.90	633	618
June	15,138.20	12,838.37	539	563
July	15,098.30		560	617
Aug.	15,121.40	13,449.78	597	564
Sept.	15,123.50	8,068.03	638	635
Oct.	15,141.70	12,719.21	668	642
Nov.	15,276.10	16,798.83	685	493
Dec.	15,414.00		710	513
Jan.		35,868.06		
Jan. 13		19,299.14		
	<u>\$181,596.10</u>	<u>\$174,324.12</u>	<u>7,379</u>	<u>6,609</u>

Statistical Report

The following is a comparison for the year 1959 and 1960:

	1959	1960
<i>Dentists</i>		
Total number of dentists participating	1,127	1,180
Largest amount paid to any one dentist	\$1,865.00	\$2,128.26
Total number of payments made to dentists	4,491	4,504
Average payment	\$31.79	\$35.18

Patients

Total number of patients participating	6,914	8,419
Average payment per patient	\$20.63	\$18.82
Largest payment on a/c of any one patient	\$179.00	\$236.47
Average number of children eligible per month	20,718	21,619
Total number of children eligible in the year	27,096	28,629
Additions during the year	—	7,379
Deletions during the year	—	6,609

Services Rendered

Fillings	23,556	28,573
Amalgams—one surface	—	13,205
two surfaces	—	9,202
three surfaces	—	1,699
Silicates	—	4,467

Extractions —

Posterior	8,574	—
Anterior	892	—
Permanent	—	4,301
Primary	—	4,713
Prophylaxes	1,686	2,422
Bite-wing radiographs (patients)	2,397	2,362

Government Grants

Total Grant received	\$174,028.40	\$181,596.10
Total expenditures made	\$155,492.96	\$174,324.12

3. Army Benevolent Fund

It has not been found possible to effect any satisfactory arrangements with A.B.F. relative to the administration of its plan.

4. Special Items

(a) *Developing Statistics re Welfare*

A coding system which might be national in scope is not yet available. Punch cards are presently being prepared relative to the Welfare Plan and a wide variety in utilization is possible.

(b) *Visit of Final Year Students*

The Secretary reported that at the Students' Dinner conducted by the Dental Public Health Committee of the Ontario Dental Association explanations of the functions of the R.C.D.S. Board were reasonably well delineated. In addition he reported upon an invitation he received from Omicron Kappa Upsilon to address the members of the graduating year on the subject of the R.C.D.S. and D.S.P.I. This meeting was held on Monday evening, January 23rd, and this presentation given on four different occasions during the evening constituted a portion of the program.

In view of these activities the Committee agreed that the essential purpose of the proposed visitation of the final year students had been achieved and would suggest that no further efforts be made this year.

(c) *Invitation, Ontario Medical Association*

The Secretary attended a meeting of the Ontario Medical Association's Long-Term Planning Committee on February 14th at O.M.A. Headquarters. During the morning several newspaper editors were in attendance to provide the Committee with the possible views of the public relative to existing and proposed insurance plans for medical care. During the remainder of the day the Committee, itself, was in session and the representative provided information relative to dentistry's policies and also acquired first hand knowledge of the position of the medical profession.

5. Conclusion

The Chairman wishes to extend his sincere appreciation to the members of the Committee for their conscientious and capable services. In addition he would express to the Board his appreciation of the privilege of

acting as Chairman of the Committee since its inception. Now upon his retirement from the Board and the Committee he extends to his successor the wish that he may enjoy the same rewarding experiences as Chairman of this important Committee.

ACTION

Dr. W. J. Dunn appointed to Directorate of Canadian Dental Service Plans Incorporated.

Report adopted.

REPORT

ANNUAL MEETING

The effectiveness of the Extramural and Extension Lecture Service is dependent upon close co-operation among the speaker, the society and the Faculty representative. Their smooth functioning ensures a constructive program of lectures for the district societies of Ontario. Again we reiterate the desirability of district societies retaining a permanent secretary who is both interested and acquainted with the procedures inherent in this program. In the past year, two societies have appointed permanent secretaries.

The Committee wishes to thank Dr. Glenn T. Mitton and those who participated as lecturers for the past year.

ACTION

The principle of including non-dental lecturers was approved subject to the approval of the Committee respecting the requested lecturer.

A request for official recognition of the Halton-Peel Dental Association was granted.

Report adopted.

PUBLIC RELATIONS

MEMBERS: J. R. Hurton, Chairman; B. M. Jackson; A. H. Leckie.

REPORTS

FALL MEETING

1. Recruitment

Last fall the Report of the Public Relations Committee consisted of a review of Dental Public Relations in Canada. At the Annual Meeting in May our Committee made suggestions and recommendations which in our opinion will have a favourable impact on our profession. It is gratifying indeed to see several of these suggestions being acted upon.

We especially mention the London and District Dental Society and the Inter-County Dental Society for their ambitious efforts in portraying dentistry as a career at London and Galt respectively. The Board supplied twelve feet of display panel used in Mediscope '59 and the printed pamphlets. The local dentists were in charge of the displays. The efforts of both local societies were well received and had favourable publicity in press and radio. Several suggestions have been made towards improving our display. The present display is cumbersome and costly to move. Some thought should be given to developing a light weight package kit sufficient for a 12 x 18 display which could be easily handled and much less costly to transport.

The effort of these two societies is mentioned as an example of the energetic renewal of activity which is being demonstrated by a number of our local societies throughout the province.

2. Communicating with The Membership

This increased activity and enthusiasm is encouraging and can be further stimulated by this Board improving the method of communications within the profession. We members of the Board are so familiar with Board business that we fail to recognize the difficulty of the individual dentist gaining, in one reading of the Annual Proceedings, sufficient background to understand the professional problems or to discuss them informatively with his colleagues or the public. The past several years have shown business corporations supplementing their annual reports with monthly or quarterly bulletins. Some are enclosed with monthly statements, some with dividend notices. Government bodies too, are moving into this pattern. It is suggested that periodic news releases supplementing the annual report be considered.

3. Public Relations Counsel

We are receiving some criticism from our member dentists regarding our failure to consider professional public relations personnel. This has been considered and studied in the light of known experience of other provinces. The present evaluation is that usefulness of outside public relations' counsel is questionable.

It is indeed fortunate that we will have the opportunity to hear a recognized public relation counsel during this fall meeting. This interview should prove interesting and may provide a more informed background for any future program.

4. Financial Aid for Students

It is an appropriate time to enlarge on the recommendations approved by this Board: "Financial aid for students must be available at low cost". We are told that there are funds at universities which are not being used. If this is true the procedure for obtaining this financial help should be explained to the profession and prospective students.

These funds may be substantial but will to a large extent be ear-marked for proficiency and special studies. Ways and means should be studied to provide a credit fund which will allow undergraduates to obtain loans which would be interest free until the first anniversary of graduation when payment with interest would begin. This means of finance should stimulate more applications to our dental faculties.

5. C.D.A. Bureau of Public Information

With the setting up of the Bureau of Public Information by the Board of Governors of the C.D.A. there will of necessity be a period of adjustment before the full effect of this move can be evaluated. It must be admitted that there is some disappointment in that no functional policy was suggested for guidance of this Bureau especially when an active Committee on Public Relations had been dissolved. However, we are assured of co-operation with consultation and it is sincerely believed that the recommendations and suggestions of this Board will receive every consideration.

ACTION

Production of a Newsletter following each meeting of the Board, authorized.

Production of a brochure outlining the historical development, functions, and activities of the R.C.D.S., authorized.

Dental Alumni Association asked to suggest a display for presentation to the Board for possible financial support.

Report adopted.

ANNUAL MEETING

This is the second annual report of the public relations committee that I have the privilege of presenting to this Board.

1. Recruitment

Your committee authorized participation in Mediscope '61 being presented during the C.N.E. this fall. This will be presented by the united effort of the O.D.A. and The Toronto Academy of Dentistry. The R.C.D.S. will arrange and provide the necessary financing. Because the space will be smaller and provided free, it is anticipated the cost will be less than the previous effort.

2. Communicating with the Membership

The first newsletter was prepared and mailed last December. The R.C.D.S. Brochure, which is a more ambitious effort, was completed for distribution by May 1st. Sufficient copies were made to take care of the necessary requirement for several years. The second newsletter will be issued soon after this annual meeting.

The newsletter and brochure were favourably received and the response with few exceptions has been enthusiastic and extremely gratifying.

T.V. Presentation

We were fortunate in being able to present a closed circuit television viewing of technical procedures from the Dental Faculty of The University of Pennsylvania. It was financed through the courtesy of Proctor and Gamble. This meeting gave us an opportunity to appraise the popularity of this type of presentation and gain information on the cost of participating in this type of program.

3. Public Relations Counsel

I think we were impressed by the presentation as to the probable role of a public relations counsel in dentistry. It appeared to be a majority opinion that the Board Members should give this problem some serious thought. We gained considerable information from this interview and after some discussion it was decided to postpone further study to a subsequent meeting.

4. External Public Relations

This past year had a marked increase in publicity directed towards the dental profession. The newspapers, national periodicals, radio and television have all shown a keen interest in our problems. Several areas have, though their local news media, provided extensive information and interesting coverage of dentistry and have created a greater appreciation of dentistry as a health profession. There also has been some unfactual and generally unfavourable publicity which must be seriously considered in assessing the functioning of public relations in Ontario. It would appear that properly co-ordinated local effort is more effective than a central body which has little or no direct contact with local conditions. It may be more realistic to have a limited program for the whole province with

concentrated effort, the responsibility of the local society. The City of Toronto, for example, requires a more intensive and vigorous effort than in a small centre where a larger proportion of the population have mutual acquaintances.

5. Conclusion

There will probably be a change of personnel in this committee and I would like to express my sincere appreciation to Dr. Leckie of Hamilton and Dr. Bruce Jackson of Kitchener for their help and co-operation. A special thank you to our Secretary, Dr. Dunn, for taking on a terrific load of extra work in such a cheerful and efficient manner.

Public relations is a very necessary, interesting and stimulating study. It has been a distinct pleasure to be connected with this committee. I hope our efforts have been informative and that the image of dentistry will become just a little brighter as a result.

ACTION

Participation in Mediscope '61 approved and a sum not to exceed \$2,500.00 budgeted.

Report adopted.

PROPERTY COMMITTEE

MEMBERS: W. J. Langmaid, Chairman; R. E. Diprose; W. G. Woods.

REPORT

ANNUAL MEETING

1. Bank Indebtedness Discharged

It is a pleasure to report that the bank indebtedness has been discharged and the Headquarters is now free of all financial encumbrance.

2. Inspection of the Building

Following an inspection of the building and grounds the Committee advised the following actions:

1. Repaint the fire-escape.
2. Replace a beam on the porch of the second floor if determined to be a supporting beam.
3. Investigate the heating in the Academy office with a view to improving it.
4. Wash the frame portions on the exterior of the building.
5. Repair the front steps.
6. Clean all carpets routinely, at least once each year.
7. Obtain at least three quotations for tiling the present hardwood floors on the first floor of the building and proceed on the basis of the lowest tender.
8. Countersink a floor mat in the front vestibule.

3. Insurance

The insurance in force was reviewed (Appendix A). It was agreed that Boiler Insurance be obtained with a limit of liability of \$25,000.00 for a three-year premium of \$91.00.

The Committee agreed to the principle of making a portion of the salary of the Business Manager of the College a charge on the Property Fund. For the necessary services respecting supervision of the Headquarters Property the Committee agreed that the proportionment should be \$50.00 per month.

4. Budgets

The Committee approved the Budgets as outlined in Appendix B.

INSURANCE COVERAGE — R.C.D.S. HEADQUARTERS

In force as of April 18, 1961

A. COMPOSITE MERCANTILE PACKAGE POLICY

London Guarantee & Accident Company — No. 31-052037

Coverage—(1) Fire, building — \$65,600.00

Fire, contents — \$16,000.00

(2) Premises Liability — \$25,000.00

Premium — \$362.52 for three year term.

Expiry Date — July 17, 1962.

B. LONDON GUARANTEE & ACCIDENT CO. — No. 71-003013

Coverage — (1) Fire, contents only—\$12,000.00

Premium — \$70.80 for three year term

Expiry Date — January 2, 1962*

* Our broker suggests that this policy be permitted to lapse and then be reissued within "A" above.

Appendix B

Property Budget

JOINT COMMITTEE — COURSE FOR DENTAL TECHNICIANS

MEMBERS: R. L. Twible, Chairman; E. T. Guest; J. D. Ley; W. D. MacKay; G. K. McKanday; H. H. Posen; D. Rollaston; S. P. Sweet.

Ex-Officio—C. R. Goodall, Secretary, Governing Board of Dental Technicians; Wesley J. Dunn, Secretary, Royal College of Dental Surgeons of Ontario.

REPORT

FALL MEETING

1. Introduction

Pursuant to Item No. 7 of the 1960 Report of the Registrar-Secretary (Proceedings 1959-60, page 18) a Joint Committee of appointees of the Royal College of Dental Surgeons of Ontario and the Governing Board of Dental Technicians of Ontario was created to consider the desirability and/or feasibility of the establishment of a Course for Dental Technicians in Ontario. Both voluntary organizations, the Dental Laboratories Association of Ontario and The Ontario Dental Association were provided with the opportunity of nominating members to the Committee to the respective legal bodies. Hence the membership is representative of all four organizations. Dr. R. L. Twible, Professor and Head of the Department of Prosthodontics in the Faculty of Dentistry, University of Toronto, was elected Chairman.

Two meetings have so far been held.

2. Statutory Authorities

The Dentistry Act of Ontario confers responsibility for dental education in all its facets upon the Board of Directors of the Royal College of Dental Surgeons of Ontario. The Act Respecting Dental Technicians places upon the Governing Board of Dental Technicians of Ontario all rights for registration and licensure of dental technicians. Obviously, then, for any program to be successful the co-operation and understanding of both groups are essential.

3. Desirability of a Course

The Committee was unanimous, after due deliberation, that some form of formalized training program for dental technicians is desirable.

4. Course Locations Investigated

Information was obtained between the first and second meetings of the Committee relative to the possibility of conducting a course at the Faculty and at the Ryerson Institute of Technology.

(a) Faculty

University of Toronto policy will not permit any course established at an academic admissability below Ontario Grade XIII

or its equivalent. The Committee unanimously agreed that this academic requirement was not practical.

(b) Ryerson Institute of Technology

The institution of a two or three year program is possible in this school. The admission requirement is Ontario Grade XII or its equivalent. The minimum class size would be ten or twelve with a maximum of approximately twice that number. The course content would be developed by the three agencies concerned and the annual academic fee is \$220.00.

5. Personnel Requirements

A report was prepared for the Governing Board outlining the relationship of numbers of persons employed in the dental laboratory industry with the number of practising dentists.

There are 218 registered dental technicians in Ontario. In addition other employees bring the gross number of those employed in dental technological pursuits to approximately 750. It is stated that if the average of large and small accounts is taken into consideration one dental technician is able to service five accounts. Thus the number presently engaged could care for the requirements of approximately 3,750 dentists. Ontario has, however, approximately 2,200 dentists engaged full-time in active general practice and thus, at the present time, there does not seem to be any great need to establish an extensive training plan to train new technicians. It was unanimously agreed that some program to improve the skill and knowledge of those who are presently employed in the industry and wish to avail themselves of such courses was required. Evening courses were agreed to be desirable to meet present requirements.

6. Provincial Institute of Trades

At the suggestion of Dr. Guest the possibility of utilizing the facilities of the Provincial Institute of Trades at 21 Nassau Street, Toronto was considered.

Discussions with the Principal and Vice-Principal of the Institute reveal there should be little difficulty in inaugurating an evening course program at the Institute. The room assigned to the Jewellery Arts Trade has, with certain equipment installations, significant possibility. There is ample bench space and bunsen burners could be readily installed. A casting room complete with burn-out ovens and centrifugal casting machines is already available.

The minimum enrolment would be 12 and the maximum, perhaps, 16. The fee payable to P.I.T. would be \$20.00 per student for the course but this would not preclude the Governing Board establishing a slightly higher fee to provide for special lecturers or demonstrators. The course would be held two evenings each week commencing approximately October 1st and terminating approximately at the end of March. This would provide approximately 24 sessions totalling 72 hours. At the termination of the course the Institute would provide an examination and issue

a diploma to those students who successfully met the requirements. This diploma could be assessed as a partial qualification leading to registration in any way the Governing Board so desired.

The Institute will require that one teacher be appointed and that teacher will be responsible for the quality of instruction. This will not preclude the attendance of guest lecturers or clinicians.

As an added advantage and provided the Governing Board were prepared to conduct its examinations in June or July, the facilities of the Institute could be utilized for this purpose.

This information will now have to be considered by the Committee. The one major disadvantage, obviously, is the fact that such a program would be of benefit only to those employed in the dental laboratory industry in reasonable proximity to Metropolitan Toronto. It would, however, be a start which might eventually lead to a more comprehensive program.

It is proposed, if the Committee desires to proceed, to appoint a relatively small Committee to consider the problems co-incident with the development of an appropriate curriculum in order that a course may be initiated in the Fall of 1961.

This submission can only be considered a progress report at this time.

ACTION

Report adopted.

REPORT

ANNUAL MEETING

The initial meeting of this Committee was devoted to the architectural problems inherent in a course of this type. The curriculum of a similar course approved by the American Dental Assistants' Association proved a valuable guide. A ninety-two hour lecture and laboratory course was proposed, lecturers approached and Miss Dorothy Hardwick was retained as the Course Co-ordinator and was responsible to the Principal of the School.

Admission requirements were set at Ontario Grade XI or equivalent, the fee for the course \$75.00 per session and the lecturers' honorarium established at \$15.00 per lecture. Through circularizing the profession and employing limited advertising in the Toronto newspapers 20 applicants were accepted. This was the maximum number suggested by the Principal of Central Technical School.

The Committee met again on January 12, 1961, to review the course to that date with the following observations:

- (1) Some lecturers required adjustment as to time allowed.
- (2) Since this course was a pilot course the representatives of the Academy of Dentistry were requested to discuss continuation of the course for the 1961-62 season. Dr. Vernon Herron, then president of the Academy, planned to present the matter to his Council.
- (3) Examinations of the objective type were set. In addition grades were to be given by those instructors whose assignments included laboratory procedures.
- (4) A certificate signifying satisfactory completion of the program was to be sent to successful candidates.

At the final meeting of the Committee the course was reviewed in total and the results of the various candidates assessed. This included two with honours, fifteen with passes, one requiring to sit for supplemental examination and one failure. There was one withdrawal from the course. The candidate who attempted the supplemental examination again failed to obtain a pass standing.

The district Dental Societies throughout the province have been circularized asking their co-operation in establishing similar courses employing the book of lectures supplied from this Board. In order that a co-ordinated program may result, it is felt that the projected course of participating societies should be submitted to the Board for approval. To date six societies have asked for the lectures and this Committee is heartened at the early number of requests and feels that the pilot course has been well justified.

An article entitled "The Organization and Conduct of an Evening Course Program for Dental Assistants" was prepared by our Secretary and this paper has been accepted for publication by the Journal of the Canadian Dental Association.

In order that the program might receive further publicity, it was hoped that the certification proposals submitted to the Board by the O.D.N. & A.A. might have received the unanimous blessing of this Board and thereby allow a small convocation at the time of the O.D.A. Convention when a large representation from the assistants of the province is present. This, however, has not been possible and awaits further discussion at this meeting.

This Committee initially was committed to a \$300.00 budget which early in our deliberations proved most inadequate. Mimeographing and typing of lectures, purchase of capital items (plaster bowls, spatulas, cement slabs, etc.) were felt to be outside the expendable items which were included in the \$75.00 fee for the course. Then the need for the development of a number of lecture books involved us in the heaviest expense extending the initial \$300.00 to approximately \$1,200.00. Recovery of a portion of the cost of the capital items plus some supplies from the Academy who will continue the course in Toronto can be expected. The final net cost to the Board was \$852.79.

This Committee has hereby served its purpose in carrying on a pilot course and as such should be forthwith dissolved. The only continuing exigencies would be those requiring sanction of new courses and the co-ordination of final examinations which would be best done from this office, since the certificate of successful completion of the course carries the sponsorship of the Board and the signature of the President of the Board.

As Chairman of this Committee I wish to laud the stellar efforts of our Secretary, Miss Dorothy Hardwick, the Co-ordinator, and those who prepared and delivered lectures thereby creating for us a course of enviable quality. Long may it continue.

ACTION

Suitable acknowledgments are to be sent to those responsible for the successful completion of the program.

Examiners and Petitions Committee authorized to evaluate the content of other courses proposed for other areas in the province in order to provide approval for the awarding of certificates to those who successfully complete the program.

Report adopted.

REPORT

FALL MEETING

The C.D.A. Board of Governors' meeting was held in Ottawa September 21st to September 24th, 1960. The Board Sessions and the Reference Committee Meetings were conducted in the Senate Chambers in the Parliament Buildings. The Convention, which followed, was held in the Chateau Laurier Hotel. Every last detail was attended to which made for a successful and enjoyable meeting and Convention. The attendance was much above expectation and the fine compliments received by Dr. Coupland and his Convention Committee were well-deserved.

Our national organization has been fortunate in the quality of its past leaders. This year Dr. William McIntosh was certainly no exception. His reports were of the very highest quality and supplied inspired and constructive direction.

The mass of business which came before the Board of Governors, as well as the necessity for most thorough discussion and solution, was such that adjournment did not take place until six p.m. on Saturday, September 24th.

The entire proceedings will be published so only those parts which are of interest to our Board need be mentioned. It is hoped that all our Members familiarize themselves with the important contents of the Annual C.D.A. Transactions. The Executive Report is particularly recommended. All those attending the Board of Governors meeting were aware that the consideration of supplying good dentistry to more people was our greatest concern, and that governmental action in three of the provinces, with regard to dental auxiliaries, was at variance with our method of providing good dental service. As a result many facets of dental auxiliary services and the training of necessary personnel came up for discussion in several different reference committees considering the Reports of Executive, Health Insurance Studies, Auxiliary Services, Dental Education, and Submitted Resolutions.

The resolution, which was forwarded by the R.C.D.S. Board on this very subject, was well received, and embodied the general principles which were finally adopted. It was mentioned that while Ontario has not an immediate problem, our resolution pointed up the fact that the profession must lead the way rather than appear to be on the defensive. The fact that our resolution was the outcome of the thinking, not only of the R.C.D.S. Board but also representatives of the Ontario Dental Association, the Faculty, and the Health Insurance Studies Committee was of considerable importance.

We presented three other resolutions, none of which was adopted entirely but each was given deliberate consideration:

1. Establishment of an Academy of General Practice — This was deemed to be impractical, but the contents of the resolution prompted the Reference Committee to make several progressive recommendations which were adopted by the Board.
2. Relief to President from duty of acting as Chairman of the Board — Referred to Committee on By-Laws and Executive Council for study.
3. Resolution pertaining to Editor of the Journal — Referred to Executive Council and Committee on By-Laws. Our suggestion that the name be changed to Council on Journalism was also recommended by the Reference Committee and confirmed by the Board.

Because of the activity of the Hospital Dental Service Committee, working in close co-operation with our Registrar-Secretary, it can be assumed that dentists can now legally practise in hospitals under reasonably favourable conditions. In Ontario the Ontario Hospital Services Commission recognizes the need for dental services and will pay for hospital care for our patients to an extent that should satisfy the reasonable requirements of both dentist and patient.

The work of the Public Relations Committee has been assumed by the Bureau of Public Information under the Deputy-Secretary, Mr. K. L. Croft. Miss Isabel Boyd's work as Director of the Bureau of Economic Research, has been of inestimable help to many committees and has been much appreciated. The establishment of this Bureau has been amply justified.

The R.C.D.S. Board's decision to increase our grant to the national organization was most favourably received. Other provinces either have increased their grant or where possible, are proceeding to do so. It is of great importance to have the C.D.A. finances in a position to underwrite new services to the members as the needs arise.

A Sub-Committee, of the Health Insurance Studies Committee, was set up in 1959 and attempted to develop a model plan for pre-payment of dental services. As a result of their efforts, a model plan was outlined and a resolution approved as follows:

"Resolved that the Model of a Pre-payment Plan for Dental Services and associated material be forwarded to each corporate member with every possible encouragement to

- (a) create the necessary administrative body to make the introduction of a pre-payment plan possible, and
- (b) utilize the model of a pre-payment plan as a basis for instituting a pre-payment plan for dental services".

ACTION

Report adopted.

REPORT

FALL MEETING

1. The Annual Meeting of the N.D.E.B. was held in Ottawa on June 27th, 1960.
2. The President, Dr. Hugh Eaton, in his annual report expressed satisfaction that 84 candidates had presented themselves for examination in June 1960. Only 59 were examined in 1959. (See Appendix A).

Dr. Eaton emphasized the importance of persuading undergraduates in all dental faculties to take the N.D.E.B. examination. Further, with this objective as its purpose, the preparation of a brochure was announced which is to be printed in both English and French. The advantages of possessing a N.D.E.B. Certificate are being pointed out and distribution to all Dental Schools is contemplated.

3. The Report of the Committee of Examiners appears as Appendix B.
4. The Break-down of Candidates according to Centres, Faculties and Provinces appears as Appendix C.

Note the small number of candidates from the University of Toronto!

5. The Board reaffirmed the policy that members of the National Dental Examining Board of Canada should not be eligible for appointment as examiners. It was unanimously agreed to implement this policy as soon as financially feasible.
6. No major changes in the By-Laws were made but three minor changes were approved. These were of a "housekeeping" nature and were related to the conduct of and the method of payment for examinations.
7. The resignation of Dr. R. J. Godfrey as examiner in Prosthodontics was accepted with regret. A motion which was wholeheartedly approved expressed the Board's thanks to Dr. Godfrey for his invaluable services both as Board Member and as an Examiner.

Dr. E. P. Downton of the Faculty of Dentistry, U. of T. was appointed Examiner in Prosthodontics to succeed Dr. Godfrey. Other examiners re-appointed were Drs. Neilson, Fortier, Eaton, Racey and H. R. MacLean.

8. The following officers were elected or appointed for the ensuing year:

President	— Dr. H. M. Eaton—Nova Scotia
Vice-President	— Dr. W. F. Hancock—Saskatchewan
Executive Committee	— Dr. R. W. Ball—Newfoundland
	Dr. T. J. Cooke—Manitoba
	Dr. A. G. Racey—Quebec
Registrar-Secretary	— Dr. H. N. B. Beach

9. The resolution submitted by the R.C.D.S. which, in essence, proposed that on application, and without further examination, a licence may be granted by the licensing board of any province to a graduate of a Canadian Dental School which has been approved by the Council on Dental Education and the approval has been ratified by the Board of Governors of the Canadian Dental Association, was considered. If the N.D.E.B. Representatives from some provinces accurately reflect the attitude of their Corporate Bodies there appears to be little hope that this proposal will enjoy early acceptance.

Report of the Committee of Examiners

Appendix B

June 26, 1960.

To the Members of the Board:

The Committee of Examiners convened in the Drawing Room of the Chateau Laurier Hotel on Sunday, June 26, 1960 at 2:00 p.m., to consider results of the examinations held in June, 1960 and beg to report as follows:

Total number of candidates	84
Candidates passed in all subjects	80
Candidates failed in one subject	1
Candidates failed in more than two subjects and/or did not attain the required average	3

Following the review and assessment of examination results a general discussion was held on questions relating to examination procedure and content.

- The structure of the Paediatric Dentistry paper relative to specific questions in orthodontics and paedodontics.
- Questions of a legal nature and application to the various provincial statutes.
- Religious affiliations interfering with examination dates.
- Weighting of certain subjects to increase their mark value.
- Broader coverage through more questions.
- Increase in hours allowed for each paper.

After discussion however, no recommendations were considered advisable in these matters.

It is recommended that the Board consider the following:

- (1) The by-laws be amended to state that all examinations be taken at one session.
- (2) The full fee for examination be assessed at the time of application.

The meeting adjourned at 4:30 p.m.

All of which is respectfully submitted.

H. R. MacLean, Chairman.

Report adopted.

REPORT

FALL MEETING

The 77th Annual Meeting of the American Association of Dental Examiners was held in Los Angeles October 14th and 15th, 1960. Perhaps the most significant evidence of progress throughout the past year was the Report of the Committee to establish a permanent headquarters. Through the financial assistance of the Kellogg Foundation the budget for the initial three years will be profoundly assisted. Following this time the Association must then be self-supporting. The advantages to be gained from such a central office may be listed as:

1. Continuing education for dentists.
2. Establishment of board member qualifications.
3. Unification of Dental Practice Acts.
4. Improvement of co-operation between board members and university faculties.
5. Co-ordination of specialty practice requirements.
6. Reciprocity and the National Board of Dental Examiners.
7. Development of a communication service.
8. Strengthening enforcement of Dental Practice Acts.
9. Exercise of Mediation functions.
10. Role in the problem of dentist distribution.
11. Evaluation and co-operation with foreign dental schools and dentists.

Dr. Harry Lindersmith, Attorney for the California State Board of Dental Examiners, speaking on the subject "Socio-economic Trends and Your Dental Practice Act" stressed the adherence to the open panel system when approaching employers and enlarged upon the dangers inherent in the closed panel system. Recently the California Supreme Court upheld the principle in the unlicensed person employing dentists. This may be the first step toward disintegration of the professional relationship presently existing. California has been the spearpoint for many experiments in pre-paid dental plans.

The facilities of the University of Southern California were loaned for the illustrated address by Dr. Rex Ingram on the subject "The Value of Gold Foil in Clinical Teaching". In addition to the several reports your representative had the pleasure in presenting the report of the International Relations Committee whose Chairman Dr. Archie Albert was absent through illness. His paper on "Dentistry in Japan" was most enlightening to the assembly.

ACTION

Held in abeyance until Annual Meeting final consideration of retention of membership in A.A.D.E.

Report adopted.

At Annual Meeting membership in American Association of Dental Examiners was discontinued.

REPORT

This report covers the period from May 1, 1960 to April 30, 1961. Your Consultant has completed a full year of regular attendance (once every two weeks) at the Board's offices. In addition, several claims have been reviewed at home and a number of office consultations for examination made with written reports for all submitted to the Board.

The work assigned during the year has varied:

1. It has consisted mostly in reviewing claims for dental service and advising Workmen's Compensation Board claims' assessors. This necessitates frequent discussions with members of the profession and with members of the Board's staff. In other words, liaison between the Board's beneficiary, the Board's staff, and the members of the profession.
2. Material for a booklet of information relating to dental terminology and dental services was prepared for circulation among the Board's Medical Aid Staff. This booklet will be illustrated by photographs which were obtained through the courtesy and co-operation of Dean R. G. Ellis, Faculty of Dentistry.
3. A survey of treatment results obtained in maxillo-facial injuries for a 12-month period in 1957-58 was made among Board beneficiaries. The number of cases reviewed was large enough only to indicate a trend in improved results when a general or plastic surgeon had the assistance of a dental surgeon in the reduction and fixation of fractured jaws.

In connection with jaw fractures I would direct your attention again to your Consultant's interim report presented to this Board last November. Jaw fracture treatment often presents problems that are of concern to the Board and as its Dental Consultant, I feel frustrated because the dentist is usually called in too late for an optimum treatment result. Representations have been made to the Chief Medical Officer of the Board (who is a general surgeon himself) indicating the advantages to be gained through team work in dealing with maxillo-facial injuries. He is in accord but feels it is a matter for the two professions to iron out themselves. Is it possible for this Board to promote the establishment of maxillo-facial services in representative hospitals with a dentist (preferably an oral surgeon) as a member of the Service?

There is precedent for this in England where the Health Service has set up Maxillo-facial Clinics in hospitals of representative districts. These clinics are manned by men specially trained to deal with jaw fractures. The Workmen's Compensation Board already provides for such co-operation between the two professions in its schedule of fees and would welcome the teamwork in the interests of improved treatment results.

Further to the interim report presented to this Board six months ago, mention was made of complaints by some members of the profession relative to dental fees. The following observations are presented for information:

1. There is increasing criticism that fee allowances for services involving fixed bridgework (crowns, inlays, three-quarter crowns, etc.) and endodontic treatment need revision. It has been pointed out that fees for fixed bridgework are out of line with those allowed for removable prostheses.

To support the above, it is interesting to note that a very common injury to the Board's beneficiaries is the loss of a maxillary incisor.

- (a) The very popular method of restoring this tooth is by way of a removable cast chrome steel appliance for which the fee is \$110.00.
- (b) The next popular method is a fixed bridge using full coverage gold acrylic veneer crowns as abutments for which the fee allowance is \$137.00.
- (c) The more conservative method of using two three-quarter crown or pinlay abutments is seldom recommended.

Is the reason that the fee allowance would be \$81.00?

Undoubtedly the fee allowance for good conservative dentistry in (c) is much below the allowance in (a) or (b).

2. Here is another observation—There is an increasing number of dentists who feel their services are worth more than fees allowed by the Board's schedule. These men consider themselves experts (better than average dentists) in certain branches of dentistry—e.g. Complete Dentures, Crown and Bridge, Endodontics, etc. In this group might be included our registered dental specialists in Oral Surgery, Periodontics, etc. but these groups are recognized as registered specialists.

The Workmen's Compensation Board's attitude is fair fees for good service that can be expected from an average dental practitioner. (This principle also applies in medicine). It is intended that the dental schedule of fees is computed on such a basis.

If it can be shown that a given case presents unusual difficulty requiring more than average skill and service, then the Board will consider an increase in fee. Otherwise, the fee schedule stands for all dentists. It is admitted this may seem a little unfair to the practitioner who provides a very high quality in a particular service. Yet it also should be admitted that quality of service varies from individual to individual and a standard fee can only be computed on a basis of good service on average capabilities.

3. A further observation has to do with Endodontic treatment of non-vital teeth. There is a wide variety of practice.
 - (a) Some practitioners employ a meticulous and commendable technique which perhaps should entitle them to a higher remuneration. They actually do give more service to the patient to get the result they desire.

- (b) In the great majority of treatment practice the case is completed in 2 hours over 3 appointments which is the basis of the \$30.00 fee allowance.
- (c) In some cases the treatment is completed in one appointment for the same fee allowance of \$30.00.
- (d) In some other cases the treatment includes root resection and can still be completed in the hour or slightly more and the fee is (\$30.00 + \$15.00) \$45.00.

It has been argued that (a) group of practitioners can often obtain the same result without root resection as (d) group of practitioners with it, yet group (a) is only allowed \$30.00.

The problem is complex and in some respects can be unfair as the above illustrations indicate.

In this whole matter of fees, it is respectfully suggested your Board appoint a committee with adequate representation to review the whole schedule at a date as early as possible.

There can be no quarrel with the dentist who wants to provide his patient with the best restorative treatment he can. However, sometimes it is felt the type of restoration is inspired by the fee rather than the service result. Further, high fees do not always ensure high quality.

To be specific — It seems that the micro-bond porcelain veneer crown is a popular restoration for an anterior tooth. The requested fee has been \$90.00. The Workmen's Compensation Board Medical Aid Committee asks "What is a micro-bond porcelain crown?" "How much better is it than the gold acrylic veneer crown?" "How is the dentist's fee computed?" To my knowledge only two such crowns have been allowed by the Board at a fee of \$70. All others have been turned down and I have been requested to seek direction from your Board.

A dentist in Toronto with a reputation for good dentistry turned down a case requiring a fixed bridge for a Workmen's Compensation Board beneficiary. In discussing the matter with him he said the Crown & Bridge fees allowed in the Workmen's Compensation Board Schedule were ridiculously inadequate. Further he indicated that in his lectures to dental students (he is a member of Faculty staff) he urged them to charge good fees and do good work. It seems to me the emphasis at least should be on the services rather than on the fee. But the more important thing is, here is a man capable of excellent services indicating to graduating students what their fee should be when they begin practice. Is the young average graduate capable of service performance of the master? There are more complaints concerning fees among graduates of the last ten years than any other group.

The question of fee determination is a very real problem to young graduates and also to those not so young. Has sufficient consideration been given to establishing a guide in dentist fees for services of good quality that the average dentist should be capable? Is it possible to set up a basic formula such as average time plus costs of service for given operations? Indeed I feel there should be one schedule of suggested fees

for the province that would provide fair compensation for good services within the capabilities of the average dentist. This schedule to be set up by a representative group of practising dentists including representation from specialists' groups. This schedule to apply in all types of insurance and negotiated dental health services plans. It is important that this matter be given another examination. The need for some action in giving professional help in practice administration is evident from the success of commercially promoted classes in practice management during the past year.

In previous reports I have indicated that the Workmen's Compensation Board would welcome an opportunity to have a representative address a dental meeting. This has been arranged through Dr. E. A. White during the Ontario Dental Association Convention. Dr. J. L. Johnston, Chief Medical Officer of the Board, will address a meeting of representatives from Dental Societies throughout Ontario at a breakfast meeting on May 23. The Board is always anxious to promote a better understanding of its services and policy among professional and other groups at all times. Dr. Johnston will make a good presentation.

In concluding this review of the year's activities your Consultant would like to report —

That in 1960 the Workmen's Compensation Board paid over \$106,500 to dentists of Ontario for services rendered its beneficiaries. In 1959 the amount was slightly under \$84,000.

That he has had the utmost cordiality and co-operation from members of the Workmen's Compensation Board staff, especially Dr. J. L. Johnston, Dr. Davey, Medical Adviser to Medical Aid Committee, Mr. Don Palmer, Chief Medical Aid Officer and his assistant Mr. Cecil Gary. Your representative was re-appointed Dental Consultant of the Board for one further year dating February 15, 1961.

Finally your Consultant desires to thank Dr. Dunn for his help and co-operation during the year. A special "thank you" to members of the profession for their co-operation in serving compensation patients. And to you members of the Board goes a sincere appreciation for entrusting this responsibility of representing you on Workmen's Compensation Board matters.

ACTION

Dr. T. R. Marshall reappointed as Consultant to the Workmen's Compensation Board of Ontario.

Report adopted.

REPORT

I have the honour to report for your information the following investigations and prosecutions from May 1st, 1960 to December 31st, 1960.

1. Bende, Charles, 50 Walmer Road, Toronto

He was charged with supplying a partial denture on June 17th, 1960. He entered a plea of guilty on July 14th, 1960, before Magistrate Donald Graham, in E Court, Toronto, and was fined \$100. The charge of performing an act or operation was withdrawn, as the same evidence applied to both charges.

2. Gaulin, Herbert, Napanee

He was charged with three offenses under the Dentistry Act. On July 26th, 1960, the accused entered a plea of not guilty before Magistrate Garvin, at Napanee, Ontario. He was found guilty on all three charges as follows:

- 23(1)(b) An act or operation \$100.00 or 2 months.
- 23(1)(c) Supplying a denture (2nd offence) \$200.00 or 2 months.
- 23(5) Having equipment \$100.00 or 2 months.

Time to run concurrently.

This case was appealed by the accused.

On December 5th and 6th, 1960, the appeal was heard by His Honour Judge Smith, at Napanee, Ontario.

On January 20th, 1961, Judge Smith handed down his findings. He dismissed the appeal and upheld all three convictions. He did reduce the fine for 23(1)(c) from \$200.00 to \$100.00.

Mr. Gaulin has subsequently been stricken from the register of Registered Dental Technicians.

Some signs were reported that did not meet with your regulations. These have since been corrected and are now in order.

On this the final occasion for the submission of my annual report I do wish to express that it is with happiness that I look back upon the years of my association with the Royal College of Dental Surgeons and the friendships I have made with the members of the various Boards and of the staff during that time. Your gift will ever keep me mindful of the pleasant associations and friendships which I trust will long continue.

ACTION

Report adopted.

DEAN: Roy G. Ellis.

REPORT

Registration

Registration figures are shown below for the last year in the former dental building, 230 College Street, and the first two years in the new building, 124 Edward Street.

	1958-59	1959-60	1960-61
<i>Undergraduate Course</i>			
Preprofessional Year	98	100	116
First Dental Year	90	115	113
Second Dental Year	76	85	119
Third Dental Year	79	63	77
Fourth Dental Year	74	94	72
Special Students	5	10	10
<i>Dental Hygiene</i>			
First Year	5	8	21
Second Year	9	6	8
Special	—	1	—
Dental Nursing	—	3	—
<i>Post Graduate & Graduate</i>			
Diploma Courses	15	15	11
Bachelor Science Dentists	2	3	4
Master Science Dentists	—	8	7
	453	511	558

Worthy of note is the significant rise in registration in the first year of the dental hygiene course. Recruitment efforts probably contributed to this improvement. On the other hand insufficient applications for the dental nursing course resulted in there being no class in session 1960-61 and subsequently a recommendation by the Faculty Council that in session 1961-62 the course in dental nursing be not offered by this Faculty.

This Board is urged to make strong representation to the University Administration to accept the view that the dental school facilities must be recognized as the only dental educational facilities in this area which can be compared with hospital training facilities. The hospital facilities are used to train ancillary personnel as well as professional personnel, and therefore the dental school facilities provide the only satisfactory environment in which to train dental nurses and dental technicians, as well as dental hygienists, as part of the dental health team.

It could be pointed out that the training of dental assistants and dental technicians, might be undertaken in co-operation with this Board, and without formal academic recognition by the University.

While this approach to the University has already been made by the Dean, on a previous occasion, it is felt that strong representation *on behalf of the profession*, might be successful.

During the 1960-61 academic year, recruitment of more students, particularly students with good academic standing, has been actively pursued. Strong support from the Dental Alumni Association, individual members of the profession, Dental Societies and this Board, has resulted in increasing interest in Dentistry as a Career. Throughout the year high school students have visited the dental building, either individually or in groups, and frequently have been escorted by dentists, who have taken "time out" to accompany the students. On "Open House" day, a very large number of high school students visited the Dental Building.

The climax of the year's activity in this field was reached during the recent Easter vacation in the Secondary Schools.

These events should be included in the record:

1. On Wednesday morning, April 5, a group of fifty high school students from Hamilton and the Burlington area visited the dental building. This group was organized and sponsored by members of the Hamilton Dental Association who have been particularly active in the work of recruitment.
2. The Dental Public Health Committee of the Ontario Dental Association organized a recruitment project following contact with Mr. F. Clute, Director of Vocational Guidance for the Province of Ontario. As a result of this effort, an invitation was issued to the Guidance Teachers Section of the Ontario Education Association to visit the dental building during their Easter meeting in Toronto.

Between sixty-five and seventy guidance teachers viewed demonstrations by television and work in the clinical areas. Special reference was made to the training of the Dental Hygienists.

3. The visit to the dental building on April 6-7, of forty-three top grade students from the areas covered by five dental societies of Eastern Ontario was a further project of the Dental Public Health Committee of the Ontario Dental Association. This followed several months of planning with the active co-operation of members of the following societies: Renfrew County, Rideau District, Brockville, Kingston and District, and Bay of Quinte Dental Societies. Ninety-one students with academic records of 70% or better were invited by the local societies to individual dinner meetings in the five centres. These students had indicated an interest in proceeding to university. Dr. S. A. MacGregor was the speaker at these dinner meetings and in two instances addressed a Home and School Association meeting where the students and dentists were present.

Within the next two weeks, a Selections Committee consisting of the principal and guidance teacher of the high school involved and the society's representative, provided lists of qualified students who wanted to know more about dentistry as a career. Out of a total initial list of fifty-two students, forty-two acceptances were received in reply to the individual invitations of the Dental Public Health Com-

mittee. A chartered bus was arranged and the students were brought to Toronto. Three of these were young women. Arriving at 3.30 p.m., a tour of the building followed. Arrangements were made with Mr. Silcox, undergraduate Secretary, to see through Hart House prior to a dinner in the Great Hall. Following dinner, Toronto dentists took the students home as their guests. The cost of the project was borne by the Dental Public Health Committee of the Ontario Dental Association with some financial assistance from the Canadian Section of the American Dental Trade Association.

These events are commendable because they represent the personal activity of many dentists in the field of recruitment. From my personal observations, dental schools the world over are in need of more applications from good students.

Our responsibility in the matter of recruitment, does not end with the enrolment of students in the Preprofessional or First Dental Years. The failure rate in these two years has led to the establishment, in this Faculty, of a counselling and guidance program for the students of the Preprofessional year in session 1960-61. The purpose of this program is to try to reduce academic failures caused by difficulty of transition from high school to University, and to determine whether means are readily available to assess the students mechanical or clinical aptitudes. This is a long range project, and the information gathered in respect to the 1960-61 Preprofessional class will be reviewed along with the performance record of these students in subsequent years.

Cost of Dental Education

We see frequent reference to the rising costs of dental education. Tuition fees have risen from \$500.00 a year in 1956-57 to \$600.00 in 1960-61. However, instrument costs which averaged \$260.00 a year in 1956-57 have dropped to an average of \$124.00 a year in 1960-61.

The total cost to the University in educating a dental student, in this Faculty, is slightly below \$2,000.00 per student per year. In the recently concluded Survey of Dentistry in the U.S.A., the cost to the University in educating a dental student was approximately \$3,000.00 per student per year, and it is estimated that by 1970 it will be \$5,000.00. The average tuition fee in U.S.A. dental schools is \$750.00 per year and may go to \$1,300.00 by 1970.

Financial Aid to Students

It is of interest that during session 1960-61, approximately 34% of the students registered in the Faculty of Dentistry have received some financial assistance of one kind or another for a total of \$68,000.00. Rising costs and reduction in the summer vacation period between the 3rd and 4th Dental years, and increasing difficulties experienced by University students in obtaining employment in the summer months, will accentuate the need for more generous provision of student financial aid in the immediate future.

Survey Committee Visit

The fourth inspection of this Faculty by the Survey Committee of the Canadian Dental Association took place during the week of February 20-24, 1961. Previous visits were made in March, 1951; January, 1954; and February, 1956. Following the 1956 visit the school was approved by the Council on Education of the Canadian Dental Association, and accepted by the American Council on Dental Education for purposes of accreditation. The following excerpts are taken from the 1961 report to the President of the University:

"There have been amazing achievements in this school since the first survey ten years ago. The University and the Provincial Government have co-operated in great measure to make dental education among the best to be found anywhere. Further financial support however, is needed now for the acquisition and retention of full-time and part-time staff and for courses to improve the teaching program." Referring to the new building they report "The building speaks for itself. It is a highly satisfying memorial to staff, architects and builders." The library facilities drew this comment "Excellence again is found in this area. The staff is capable, the library spacious, accessible and well furnished. The staff and students appear to be making good use of the superb facilities provided."

Further general statements include "The Committee was very favourably impressed with the appearance and professional attitude of the students. They were at all times industrious and anxious to make the most of the superb laboratory and clinical facilities. The small group of students interviewed gave a good account of themselves and their work." Constructive comment on the curriculum will be useful to the Departments concerned. We are grateful to the Survey Committee for their help in the past and their recent observations.

Curriculum

A year ago it was reported that curriculum changes were being made which would permit Third Year students to commence clinical practice early in the third year, rather than, as formerly, after the Christmas vacation. The schedule for 1961-62 has already been prepared and the third year students will have some time in the Clinic immediately after registration in September.

The increased time for clinical practice in the Third Year and the early start in the Fourth Year, and the release of the students in the Fourth Year from many of the time consuming technical procedures will increase considerably the extent of clinical training. In line with this prospect and the desirability of motivating senior students to improve the quality of their work, the idea of "Senior privileges" has been carried a step further in the main clinic. A student who achieves "Senior privileges" because of superior clinical achievement, is permitted to proceed to more advanced clinical operations. One of the recommendations of the Commission on The Survey of Dentistry in the United States was that "The dental schools make their curriculum more flexible and stimulating. Where possible honours programs should be arranged for gifted students." Toronto had initiated such a program before this recommendation was made. It will be observed very carefully for advantages and disadvantages.

The early start of the Fourth Year may also permit earlier graduation. An earlier start in practice is therefore possible.

Research

The activities of the Division of Dental Research have been maintained during the past year on a basis comparable to former years. The average annual budget for the Division, during the past five years, has been \$75,000.00 per annum. The bulk of this money is derived from Federal Government sources (National Health Grants, and National Research Council) and from the Division of Dental Research (campaign money). The United States Public Health Department, through the National Institute of Health, has supported a program during the past three years to an extent of approximately \$9,000.00 per year. The Canadian Dental Association and the University of Toronto Research Advisory Committee contribute small but significant amounts.

However, the great need in the research field is for support for training research workers, and after they are trained, provide funds to maintain them in research without burdening them with heavy teaching and administrative duties. Four undergraduate students will be employed this summer in the Division of Dental Research, on research projects, supported by Undergraduate Assistantships as provided by the Associate Committee on Dental Research of the National Research Council. It is significant that a total of twenty-seven students applied for these Assistantships.

Future Projects

The study which has recently been initiated to determine the best predictors of success in dental education and making the most of student talents, will be continued.

Worthy of critical examination is the effectiveness or otherwise of present procedures being employed in training the dental students how to work with the other members of the dental team in the practice of dentistry. A good beginning has been made in bringing the dentist-technician functions into focus and to a lesser degree the dentist-hygienist. But the education of the dental student in the effective use of a chair-side assistant leaves much to be desired. This matter is not related to the training of dental assistants (nurses) because only trained experienced assistants can be used effectively in training dental students how to use the chair-side assistant. We intend to pursue this matter further.

Closed Circuit Television

The use of closed circuit television has been further developed during the past session. It has become a reliable means of instructing a large class in both table demonstrations and clinical procedures. During the session a Television-microscope system has been installed which makes possible instruction in the fields of bacteriology and pathology.

Other Departments of the University of Toronto and other Dental Schools in Canada who are planning installations of their own have sought advice from the staff who are working with and operating the television equipment.

Civil Defence Lectures

The members of the Fourth Dental Year were provided a series of five lectures in Civil Defence Measures during the current session. These lectures were sponsored by the Emergency Measures Organization for students in medicine and dentistry. The subjects covered included Emergency Health Services, Nuclear War and Its Medical Aspects, Biological Warfare, Chemical Warfare, and The Immediate Care of Mass Casualties.

Short Courses

In addition to an active group of post-graduate and graduate students working toward diplomas in the specialty fields, the seven short courses offered by the Division of post-graduate studies have been very successful. A total of eighty-one dentists registered in these courses in the fields of Occlusion and Occlusal Correction, Paedodontics, Endodontics, Orthodontics, Dental Radiology, Oral Surgery, and Periodontics.

Extramural Lectures

A special word of thanks is extended to the members of the staff who have undertaken extramural assignments during the past year. To Dr. Mitton who has been responsible for organizing this schedule, we extend sincere appreciation for a job well done. Few people realize the enormous amount of detail involved in arranging these meetings. It is a time consuming and sometimes thankless task in trying to reconcile speakers, dates, travel arrangements and, when more than one Society is involved as in the case of the Northern Ontario schedule, it can become a very frustrating problem. During the 1960-61 session, thirty-six societies were visited and the attendance was in excess of one thousand dentists.

Staff

When Dr. R. J. Godfrey retired at the end of the 1959-60 session, he was named Professor Emeritus. His successor was Dr. R. L. Twible, appointed Professor and Head of the Department of Prosthodontics.

As the 1960-61 session comes to a close, we look forward to the arrival soon after July 1st, of J. A. Pedler, B.D.S. (London), M.R.C.S. (England), L.R.C.P. (London), M.D.S. (London), F.D.S.R.C.S. (England), presently Senior Lecturer—Dental Histology and Pathology, London Hospital Medical College, who has accepted the appointment as Professor and Head of the Department of Oral Diagnosis in this Faculty. Dr. Pedler visited this Faculty during October, 1960, as a guest lecturer.

While we take pleasure in making the above announcement, we record with sincere regret, the decision of Dr. Egil Harvold, to resign to return to Europe, for reasons of a family health problem. Dr. Harvold joined the Faculty two years ago. His presence among us, even for this brief period has been pleasant and stimulating. We wish him every success in the future.

Acknowledgments

In recording acknowledgments of gifts, awards and other assistance, we are always aware of the great danger of omitting an important item. Our apologies are extended in advance for these omissions.

Our thanks are extended to The Ladies' Auxiliary of the Academy of Dentistry for the donation to the Faculty of a series of stone Eskimo carvings. These fine pieces of Eskimo art have been placed in the Conference Room in the Dental Building.

We record with pleasure a very generous gift from Mrs. Mendel Nevin which will provide for furniture and possibly a mural in the Dental Faculty Museum in memory of her late husband, Dr. Mendel Nevin. When the Museum is completed, it will be one of the show places in the new Dental Building.

The Dental Alumni Association has provided financial assistance during the current session in the form of bursaries and loan funds for students and assistance in financing the "Open House" on February 12th, 1961. In addition, the Dental Alumni Association has taken an active part in the Recruitment Program.

Sizeable donations have been received from Dr. H. A. Ross and Dr. H. Davidson for use in carrying out special projects in the new Dental Building. To these generous donors, we express our sincere thanks.

In conclusion, we offer to this Board our appreciation for support in many of our projects. Very substantial assistance with the Extramural program is provided year by year; timely help with the "Open House", grants to the Faculty Contingent Fund and Dental Research Fund are but a few concrete examples of the aid given to the Faculty by this Board. We extend sincere appreciation to every member of the Board for their interest and encouragement.

ACTION

Appointed Special Committee of Drs. Leckie, Dunn, Purves, and Jolley to make strong representation to the University Administration in an attempt to have the university authorities accept the view that the dental school facilities must be recognized as the only dental educational facilities in this area which can be compared with hospital training facilities and therefore the dental school facilities provide the only satisfactory environment in which to train dental nurses and dental technicians as well as dental hygienists as part of the dental health team.

Report adopted.

DENTAL PUBLIC HEALTH

MEMBERS: Marjorie Jackson, Chairman; R. R. Butler; D. L. Rife; K. W. Davey; R. O. Fisk; M. Buchman; K. F. Pownall; D. J. E. Mitchell; F. B. Burns; G. T. Mitton, Field Secretary.

REPORTS

COMMITTEE

Dental Health Day

Under the convenorship of Dr. D. L. Rife, a very successful Dental Health Day was held on Wednesday, March 15, 1961. Radio, television and press coverage helped to promote the day throughout the Province. We are indebted to Dr. M. Buchman, the Health League of Canada and the local Dental Societies, without whose assistance the aim of Dental Health Day would not have been brought to the attention of the public.

Your Child and Mine

Dr. R. R. Butler and his committee have completed the revision of this book and it will be ready for distribution during the May Convention of the Ontario Dental Association. On the recommendation of the Committee, copies will be distributed to the students of the Final Medical as well as the Final Dental Year.

Mediscope '61

A smaller edition of Mediscope '59 will be held this year during the Canadian National Exhibition and Dentistry has been invited to participate. Dr. F. B. Burns is the Chairman of the Committee which will be responsible for preparing the material for this project. With the experience gained from the first presentation and with new ideas already in evidence, we feel that Dentistry will be well represented.

Canadian Dental Health Index

The Dental Public Health Committee has agreed to create an Ontario Dental Survey Committee to co-operate within the program of the Canadian Dental Health Index.

Student Dinner

Again we were privileged to act as hosts at the annual dinner for the Graduating Class in Dentistry at Hart House. This dinner has proven to be very stimulating to the students and we are grateful for the financial assistance given by the Boards of the Royal College of Dental Surgeons of Ontario and Ontario Dental Association. The students appreciate this opportunity to meet with Board Members in this informal way and to learn more about the objectives and fields of service of the organizations.

Pro Liberis Prize, Faculty of Dentistry, University of Toronto

The Dental Public Health Committee is now sponsoring the award of the Pro Liberis Prize to the student of the Fourth Dental Year who ranks second in the subjects pertaining to Dentistry for Children.

Fluoridation

Following the favourable report of the Ontario Fluoridation Investigating Committee being tabled in the Legislature, letters were sent the next day to the Minister of Health and the Prime Minister expressing the Committee's favourable reaction to the recommendation and encouraging early enactment of appropriate legislation to activate these recommendations. Letters were also sent to the Presidents and Secretaries of all local Ontario dental societies urging them to stimulate action in their respective jurisdictions to help the cause.

Convention

The Convention Chairman, Dr. K. F. Pownall, has been responsible for the organization of a table clinic on Dental Public Health at the Winter Clinic of the Toronto Academy of Dentistry and also for the presentations at the Convention of the Ontario Dental Association. These will include a table clinic and a group clinic on Dentistry for Children, a display booth showing all educational material available, and the Dental Public Health Luncheon at which Dr. G. E. Hall, President and Vice-Chancellor of the University of Western Ontario, will be the speaker.

Red Cross

The Dental Public Health Committee is the Committee through which the Red Cross carries out its dental program. Dr. S. A. MacGregor as its representative has reported that 100,000 Red Cross Booklets have been reprinted and are being distributed free of cost to dentists and interested organizations. The Dental Coaches and the project to provide orthodontics and operative care for children are only a few examples of the contribution which they are making to promote good dental health for the children of Ontario.

Project for the Year 1960-1961 — Recruitment and Placement

Statistical evidence has shown that in order to place dentists in smaller areas where the need is great, we must recruit students from small towns and rural areas. If a student comes from one of these locations, he is more likely to return to one of similar size on graduation. Therefore it was decided that our major field of activity this year would be a pilot project in which we would endeavour to recruit prospective dental students from rural areas and towns.

The Field Secretary, Dr. G. T. Mitton, has made this project the basis for his field work for the year. The project has been an overwhelming success and I express the grateful thanks of the Committee to Dr. Mitton for the work he has done on our behalf. A complete report of the project will be found in the Field Secretary's report and I commend to you the activities which he has so successfully completed.

Conclusion

Being Chairman of the Dental Public Health Committee for the past two years has been an experience which has been most rewarding for me. The Committee is comprised of members who are enthusiastic and eager to accept the responsibility which such membership demands. I wish

to express my thanks to those with whom I have been privileged to work and to the members of the Boards of the Royal College of Dental Surgeons of Ontario and Ontario Dental Association who have given not only financial assistance but what is more important, have shown genuine interest in our efforts on behalf of Dental Public Health.

FIELD SECRETARY

During the past year, seven regular meetings of the Dental Public Health Committee were held on June 21, 1960, September 22, November 8, January 11, 1961, February 21, March 27 and May 16, 1961. Each of the Committees on Materials, Dental Health Day, Book Promotion, Convention and the Recruitment Project met many times during the year.

Following the difficulties experienced the previous year in the placement of young graduates in the smaller towns of the provinces, it was obvious that recruitment of top students from more rural Ontario was necessary if we hoped in the future to provide adequate dental health services in these communities. It was decided in June to embark on a Recruitment Project in five of the smaller local dental society areas in Eastern Ontario. This was to be the major field work effort for the year.

Dinner to Graduating Class

The annual dinner in Hart House for the graduating class was held November 23, 1960, with Rabbi A. Feinberg as guest speaker. It is recommended that the speaker be invited much earlier this year.

Dental Health Day

Ontario dentists were contacted as well as all societies, suggesting activities and providing materials for their use. This included two thousand posters, developed by our Materials Committee. All radio and television stations were sent material as well as urging them to utilize the three new Canadian Dental Association television spot announcements. Through the well-known "Romper Room" television programme, it was possible to have dental health emphasized and we were able to suggest dentists to be interviewed in the various centres carrying the programme. We succeeded this year in enlisting more local dental society activity in these new media; the Field-Secretary appeared on Barrie radio and television stations on Dental Health Day.

Book Revision

The booklet "Your Child and Mine" is being revised and brought up-to-date and some changes are being made in layout and illustrations. This required a number of new pictures. A "Part 4" on "Fluorides and Dental Health" is being added. A run of 5000 copies is anticipated of the second edition, to be ready by May, 1961, Ontario Dental Association Convention.

Field Trips — re student placement and recruitment projects

During August, 1960 — To Haliburton, Barrys' Bay, Pembroke, Smiths Falls, Brockville, Cornwall, Kingston, Belleville, Marmora and Campbellford.

During October, 1960 — Visited and addressed societies at meetings in Renfrew, Smiths Falls, Brockville and Tweed. (Bay of Quinte Dental Society).

During March, 1961 — To local society dinner meetings entertaining students interested in university; accompanied the dinner speaker, Dr. S. A. MacGregor, to Pembroke, Smiths Falls, Brockville, Kingston and Belleville.

During Easter Week—April, 1961 — By bus to Pembroke; from Pembroke to Toronto by bus via Renfrew, Carleton Place, Smiths Falls, Kingston, Napanee, Belleville and Port Hope, where students were picked up for the charter coach trip to Toronto. Returned via the same route next day to Pembroke and returned to Toronto by bus the next day. (Bus mileage in three days — 1,028 miles.)

Recruitment Project

The visit to the dental building on April 6-7, of forty-three top grade students from the areas of five dental societies of Eastern Ontario was the culmination of months of planning and field work. The societies involved included the Renfrew County Dental Association, Rideau District, Brockville, Kingston and District and Bay of Quinte Dental Societies. Ninety-one students with academic records of around 70% or better, were invited by the local societies to individual dinner meetings in the five centres. These students had indicated interest in proceeding to university. Dr. S. A. MacGregor took one week out of his office to speak at these dinner meetings and in two of these instances spoke to a Home and School Association meeting where the students and dentists were invited following the dinner.

Within the next two weeks, a Selections Committee consisting of the principal and guidance teacher of the High School involved and the Society's representative, provided us with a list of qualified students who were interested to know more about dentistry as a career. Out of a total list of fifty-two students, forty-two acceptances were received in reply to the individual invitations of the Dental Public Health Committee to be our guests. One other joined us in Toronto. A chartered bus was arranged and with the Field-Secretary as guide coming from Pembroke and returning, the students were brought to Toronto. Three of these were young women.

Arriving at 3.30 p.m., a tour of most of the dental building followed. Arrangements were made with Mr. Silcox, undergraduate secretary, to see through Hart House prior to the dinner in the Great Hall. Following dinner, Toronto dentists, who volunteered to act as overnight hosts and who were present for dinner, took the students in pairs home for overnight. Returning at 9.30 a.m. next morning, the students visited the Children's Clinic, Orthodontics, Preventive and Dental Public Health departments and left at 11.00 a.m. by chartered bus to their respective home towns.

The cost of the project was borne by the Dental Public Health Committee of the Ontario Dental Association with some financial assistance from the Canadian Section of the American Dental Trade Association.

Although grades XI, XII and XIII were included, there are at least three applications among grade XIII students already submitted for the fall term, with one other expected as of this date.

The success of the first phase of this recruitment project was made possible by the active participation and co-operative effort of the local dental societies. The splendid co-operation and assistance of Mr. Frank Clute, Director of Personnel and Guidance, Ontario Department of Education, added greatly to this success.

Through contacts with the Director of Personnel and Guidance, the Field-Secretary was successful in having the guidance teachers' section of the Ontario Educational Association accept an invitation to visit the Dental Building during Easter week. While not a Dental Public Health Committee project, it ties in very closely with the recruitment project and should contribute to a better understanding of the training of dentists and of the opportunities for young people in dentistry as a vocation in life.

Other Meetings Attended

Northern Ontario Dental Association, September 8-9, 1960.

Council on Public Health, Canadian Dental Association.

Opening—Health Centre, Wellington County Health Unit.

Annual Meeting—Canadian Milk Foundations—(Panel Member).

Bi-monthly meetings of the Ontario Association of Public Health Dentists.

Annual Meeting—Ontario Public Health Association.

Career Day—Lawrence Park Collegiate.

Nutrition Conference—Sponsored by Dr. W. E. McHenry and Nutrition Foundation Inc., of New York.

Workshop Conference on Use of Auxiliaries.

Conclusion

The experience gained over the past year in association with the Recruitment Project has assured me of the interest of many dentists in the county towns and smaller cities of Ontario to see that top grade students in their High Schools are informed about the opportunities dentistry offers as a professional career. This type of a recruitment project does this in a very practical and challenging way. The next phase of the follow-up is most important, and will involve the members of local societies for at least three years or until grade XI students have completed grade XIII. The central committee's close association with the local society and the students, is a continuing activity. The Recruitment Project committee have some very forward looking plans to keep the student interest alive with the assistance of members of the local societies.

The nature of this work is such that it should be established on an overall three year plan, covering three geographical areas of more rural Ontario where the need for more adequate dental services seems most apparent. This would mean the important follow-up of the grade XI students in the third year of the plan, would continue until they become

grade XIII students in 1965. This also being associated with placement activities and with complete records being kept of students, an assessment of such methods would be possible and more effective refinements would likely develop as the project progresses.

The public relations aspect of this project offers great opportunity to have the public understand the professional concern for inadequate dental services and to show by past records, the possibility of improving on the present inadequate distribution of dentists by this means of recruitment from smaller towns and cities of the province. It is the Dental Public Health Committee's desire to work closely with the Dental Alumni and other interested committees in this "combined operations" aspect of providing for the future dental health of all residents of Ontario.

It is heartening to see the Public Relations Committee of the Royal College of Dental Surgeons suggesting the implementation of the work of recruitment by the use of aids such as news releases, radio and television material, being made available for local society use. The development of films and video-tape recordings does not come within the budgets of provincial Dental Public Health Committees. I agree that a well-planned documentary film of the training aspects of dentistry photographed in the new dental building would be most helpful in vocational guidance and recruitment activities.

It has been my pleasure in the broadening aspects of field work and in the close affiliation with the dental societies in the recruitment project to be associated with an effective medium for dental public health activity and service to the community and to the dental profession.

ACTION

Suggested that Final Year Medical Students at Western, Queens, and Ottawa Universities might also derive benefit from the publication, "Your Child and Mine".

Reports adopted.

REPORT

During the year the unfinished structural details in the Library were completed. The study carrels for graduate students have been installed in accordance with the design requested by the Library Committee. The defects in the locked stacks for our rare book collection have been remedied and the entire Library is now in completed functional operation. I am pleased to report that no defects have become apparent in either the basic planning or equipment in the Library. It is proving to be a highly efficient functional entity, which both the students and the profession should prize highly.

Much headway has also been made with the Museum during the year. The walls have been artistically completed and the windows have been attractively curtained. The display cases are cherry wood and bronze in a very pleasing design. The east wall is a cheerful blue with hidden recesses for brackets permitting an unlimited variation of display shelving or pinboards for poster or photographic displays. The west wall still remains as plain plaster, but is the projected site for a mural representing the history of dentistry. An artist's preliminary sketch has been submitted and approved by the Library Committee and an activating committee has been set up to direct implementation. Completion is predicated upon some private bequest sufficient to defray the cost of this somewhat sizeable undertaking. It is hoped that this matter may be finalized in the near future. Details of the Museum have been under the direction of Mr. John Hall who was delegated as special architect for this project. His efforts have been highly commendable and the Museum when completed will greatly enhance the entrance to the Library because of its modern, artistic decor as well as fulfilling a valuable educational role for the Faculty, graduates and students.

Consideration should be given as to how the Museum is to operate on completion. The museum specimens are still in dead storage, packed as they came from the movers and will require many weeks of work on the part of someone to label and classify them. This can only be done by a person with special interest and knowledge in the field. It is proposed that from this central depot a rotating exhibit be maintained in the Museum which, in itself, will require not only planning and forethought, but considerable time as well. To be effective, this program requires more time than can be given on a voluntary basis. It is suggested that the Board give consideration as to how funds for this purpose might best be made available.

Donations of books and journals are gratefully acknowledged from many sources including Drs. F. W. Clement of Toledo, R. G. Ellis, R. J. Godfrey, G. C. Hare, H. A. Hunter, J. H. Johnson, F. C. Lackie, A. W. Lindsay, G. T. Mitton, Oral Health, the estate of the late G. Pollock, Miss W. C. Riddle and Mr. C. C. Rous. Two dental chairs of historical

significance were presented to us from the estate of the late Dr. E. S. Barker of Stouffville, through the courtesy of Mr. Ray McTavish of the National Refining Company. Through the courtesy of Mr. C. Reynolds we received two sets of periodontal instruments, designed and used by the late Dr. H. K. Box, and bearing the manufacturer's stamp of Mr. E. C. Platt who pioneered, along with Dr. Box, in this field. These instruments are of considerable historical value.

Dr. Harold Cummer very kindly presented us with a copy of "The History of the Church at Willowdale". This interesting manuscript is closely associated with the history of the Cummer family in Toronto since 1798 and is a valued addition to our Library.

The Alpha Omega Fraternity donated a sum of money for purchase of Orthodontic texts with the gift book plate acknowledging the donation in the name of Dr. and Mrs. A. Posen. For the second consecutive year the Crown and Bridge Study Club also made a cash donation to the Library Contingency Fund.

The delivery service from the main University Library has now been expanded to include all the departmental libraries. The service has been most successful and is very greatly appreciated as it has eliminated the necessity of engaging a special messenger which was often extremely difficult in the past.

The University appropriation for the current year remained the same as last year. The revenue from the Abbott Fund has again been largely used for the rebuilding of the older books in the collection and much headway has been made in this area. The Abbott Fund has also permitted us to purchase an Atlas of Canada, published by the Department of Mines and Technical Services, Ottawa. This atlas is monumental in character and will undoubtedly be a landmark in the publishing field for many years to come. It is a highly valued acquisition.

Circulation for the current year shows a very gratifying increase, inclusive of Faculty, students and graduates, which may, in part, be due to the excellence of the facilities and services available. 155 loans were made to out of town borrowers during the year. Comparative figures for the last five years are herewith appended. (Appendix A). The financial statement of the Harry R. Abbott Fund is also herewith appended, (Appendix B) showing a balance of \$211.57 as of this date.

During the year there were 175 acquisitions of new books and 7 new journal titles were received. There are 47 orders outstanding and the time lag in this respect has shown some improvement.

I am happy to report that a second trained librarian, Mrs. Makletzoff, has been secured to assist Miss Smith and I would be remiss if I did not call to your attention the highly efficient and courteous service they have rendered. It is not boastful to say that for physical facilities and courtesy and efficiency of operation, our Library is now equalled by few and excelled by none. Grateful appreciation is also due to the members of the Library Committee for their interest and co-operation throughout the year.

This report is respectfully submitted with the recommendation that the customary grants be continued for the ensuing year.

CIRCULATION FOR THE LAST FIVE YEARS

Year	Faculty	Students	Graduates	Periodicals	Totals
1956-57	388	6,151	737	1,341	8,617
1957-58	415	6,419	968	1,132	8,934
1958-59	467	6,329	940	1,278	9,014
1959-60	693	6,778	950	1,176	9,547
1960-61	809	7,340	1,207	1,886	11,442

Spent to April 1, 1961	575.50
Balance	\$211.57

ACTION

Report adopted.

BY-LAW No. 93

Enacted May 20th, 1961

Being a By-Law to amend By-Law No. 2, Section 5, and By-Law No. 13, Section 2.

Be it enacted a By-Law of the Royal College of Dental Surgeons of Ontario as follows:

That By-law No. 2, Section 5 be amended by deleting "\$10,000" in line 9 and substituting in place thereof "\$15,000.00" and commencing on line 10 delete the words "to open a Current Property Account, which account shall contain not more than \$10,000.00 at any one time." Delete, in line 12, the word "accounts" and substitute in place thereof the word "account".

That By-Law No. 13, Section 2 be amended by inserting the following as sub-section 'd' and by renumbering the succeeding sub-sections of Section 2 as sub-sections e, f, g, h, i, and j respectively:

- (d) No member of the College who engages directly or indirectly in the business which a dental technician is authorized to carry on pursuant to the provisions of the Dental Technicians' Act shall concurrently practise the profession of dentistry or any branch thereof. The licence of any member of the College who engages in the business of a dental technician may be forthwith suspended by the Board. Use by any member of the College of the designation "Registered Dental Technician" or of the letters "R.D.T." or the description as a dental laboratory of any business carried on directly or indirectly by a member of the College shall be prima facie proof of the carrying on by such member of the business which a dental technician is authorized to carry on. The employing by a member of the College or by not more than three members of the College in association in the practice of their profession, of the full time services of a dental technician where no dental laboratory services are furnished to others by the employer or employers or by the employee or the doing by a member of the College in the exercise of his profession of anything which is part of the practice of dentistry, shall not be deemed to be a breach of the provisions of this sub-section."

Admission Scholarship

As a further aid to the provincial recruitment program and as a scholastic stimulus the Board made a budgetary provision of \$600.00 for an admission scholarship or scholarships into the Faculty of Dentistry which will be tenable at the Ontario Grade XIII level.

Canadian Dental Association Annual Meetings

In view of socio-economic trends in Canada the Board suggested that time be made available during C.D.A. Convention programs for the membership to have the opportunity of discussing pertinent issues affecting Canadian dentistry. The R.C.D.S. Director also serving on the Executive Council of the Canadian Dental Association was asked to consider if he might take the suggestion to the Executive Council.

Canadian Science Fair

A request was received from Canadian Science Fair for the Board to provide a scholarship award in one of the categories of the Science Fair competition. The matter was referred to the Joint Committee on Recruitment for any observations which might accrue. The Board did not find itself in the position to provide a scholarship at this time.

Certification of Dental Assistants

The recommendations contained in the following Brief of the Ontario Dental Nurses' and Assistants' Association were approved:

Suggestions and Recommendations Re Certification of Dental Assistants In the Province of Ontario by the Ontario Dental Nurses' and Assistants' Association

1. Qualifications for Certification:

- (a) Applicant to have taken R.C.D.S. Study Course and passed examinations.
- (b) Applicant to have spent a minimum of six months in a dental office.

2. Honorary Certification:

- (a) Applicant to have fifteen years service in dentistry. (not necessarily in the employment of one doctor).
- (b) Applicant to be a member in good standing with the O.D.N. & A.A. for ten consecutive years.
- (c) Honorary certification for the province to be for the inaugural year only.
- (d) Those members receiving Honorary Certification to pay an honourarium of twenty-five dollars to the O.D.N. & A.A.

3. O.D.N. & A.A. Certification:

- (a) Applicant qualifying for certification will receive a certificate which includes both the names of the Royal College of Dental Surgeons and the Ontario Dental Nurses' and Assistants' Association.
- (b) Applicant who has passed examinations and meets the requirements of Item (1), Clause (b) may (on or before April 15th or October 15th of any year) apply to the O.D.N. & A.A. for Certification.
- (c) An O.D.N. & A.A. member not qualifying for Honorary Certification may apply for examination privileges after eight years service in dentistry and five years membership in the O.D.N. & A.A. A fee for this examination privilege to be levied. On successful completion of examination member may apply to the O.D.N. & A.A. for Certification Certificate.

In the event that the preceding recommendations and suggestions meet with the approval of the Board of Directors of the Royal College of Dental Surgeons of Ontario, the Ontario Dental Nurses' and Assistants' Association would like to institute the following:

1. Appoint a Certification Committee:

Duties of said Committee:

- (a) This committee to administer approved rules of Certification.
- (b) To keep accurate records of all certified assistants in the Province of Ontario.
- (c) To be responsible for the distribution of Certification Certificates in co-operation with the Royal College of Dental Surgeons.
- (d) To be responsible for the distribution of Certification Pins.

2. To design and purchase a suitable Certification Pin.

3. To enquire into the possibility of having some identifying band for the caps of Certified Assistants.

Dentist Interviewed

At the Fall meeting a licentiate was requested to appear before the Board to give explanation of comments he made to the press during the Ottawa meeting of the Canadian Dental Association. The interview terminated with the Board emphatically suggesting that the views expressed were derogatory to the profession.

Hamilton Dental Association Proposes A Faculty of Dentistry For McMaster University

Dr. W. H. Feasby presented the following Brief:

"We consider it a privilege to present to you a proposal in dental education submitted on behalf of the Hamilton Dental Association.

The basic problem under consideration was well stated in the preamble of the resolution on auxiliary personnel as published in this Board's most recent Proceedings on page 112.

"Whereas the dentist-population ratio in Canada is inadequate to provide sufficient dental care services for the Canadian public, and

Whereas the dentist-population ratio is continuing to deteriorate and according to future estimates will continue to worsen even with the recent additions to teaching facilities, and

.....

Whereas there is an increasing demand on the part of the people of Canada to receive health care services including dental care, and

Whereas because of the essential nature of health care services, the Canadian public, generally, regards the enjoyment of these services as a right, and

.....

Whereas it is mandatory that the dental profession provide positive leadership in extending dental services as broadly as possible to all segments of our people."

In September of this year, Dr. R. G. Ellis read a paper at the meeting of the Canadian Dental Association entitled, "Manpower in Canadian Dentistry". This material is to be published at an early date in the Journal of the Canadian Dental Association. At this time it would be useful to review certain significant parts of his paper.

In his second paragraph he stated, "Suffice it to say, I believe there will be a need for more and more dentists — come fluoridation, more public health education, or positive preventive measures". He also pointed out that our population of 17,814,000 is running ahead of the Gordon Report estimate for 1960. The corresponding estimate for 1980 is 27,530,000. He also projected the ratio of dentists to population. He showed that the full capacity of our present teaching facilities would fail to produce any improvement in this ratio. Dr. Ellis suggests one dentist to 2,500 population as a realistic objective for the next twenty year period. This involves an additional 133 graduates from 1968 on. He suggests that this could be achieved by the building of two or three moderate size schools — that is, one for each of 1968, 1973, and 1978.

Thus, this Board and Dr. Ellis have recognized the projected need for more dental personnel. This Board has recognized that the profession must show leadership in helping to solve this problem. Dr. Ellis' remarks suggest that this leadership might take the form of organizing two or three dental schools of moderate size. It is assumed here that dental recruitment will be stimulated to a suitable level of quality and quantity to implement the proposed program.

This committee of the Hamilton Dental Association has reviewed the foregoing circumstances. They have taken cognizance of their local environment and recommended to the Hamilton Dental Association that they take steps to encourage the establishment at McMaster University of a dental faculty. The executive of the Hamilton Dental Association concurred and asked the committee to proceed.

This committee submits for your consideration the following:

A. Community Environment

1. Hamilton is a progressive modern community with a good record for its support of educational and cultural projects.
2. Situated at the apex of the "Golden Horseshoe", adjacent to some of our richest farming areas, and possessing a thriving industrial and business complex with a magnificent harbour, Hamilton has promise for future development and growth that compares favourably with any community in Canada.
3. With a metropolitan population of 375,000 people, Hamilton, with the exception of Vancouver, is the largest city in Canada without a dental faculty. In Ontario it stands supreme in providing a community environment for additional dental teaching facilities.

B. Academic Environment

1. In Hamilton is located McMaster University. This is an expanding ambitious institution with high academic standards. McMaster has recently added Engineering to its Arts, Science and Divinity faculties. It is well known for its achievements in pure and biologic sciences as well as the humanities.
2. Dr. Gilmour and Dr. Thode have assured a member of this committee that there is property set aside for an anticipated medical faculty and university hospital. This has since been reported in the press as the next medical faculty in Ontario. McMaster officials predict that this addition will be completed between the 1968 and 1973 dates of Dr. Ellis.
3. The College of Physicians and Surgeons of Ontario recognizes the desirability of establishing a medical faculty at McMaster.
4. Several Universities testify to the many advantages of a close association of medical and dental training in pre-clinical years. Further economy and efficiency are possible when medical and dental students share the same facilities. Here then is an opportunity to develop a harmonious medical-dental relationship from the planning stage on.

C. Dental Environment

The dental environment of the Hamilton area is exceptional, comparing favourably with any similar sized community in Canada. In certain respects we feel it surpasses some communities that already possess dental teaching facilities.

1. Hamilton area dentists are alert and well organized. They are served by the Hamilton Dental Association which has a long history of continuous service to the profession. With a membership of about 130 it represents one of the larger and more active local associations in Canada, and the largest in Ontario after the Toronto Academy.
2. The academic level of the Hamilton dentists is revealed by the following: There are nineteen specialists certified by this Board. Dentists

with post graduate diplomas of at least one academic year number eleven. Master's degrees are held by five and there is one Ph.D. in dentistry.

3. Hamilton dentists are rich in dental teaching experience. There are at least twelve who have served the University of Toronto in a teaching or demonstrating role. In addition, Hamilton claims eight dentists with experience in active dental research work.
4. The existence in Burlington of the Burlington Orthodontic Research Centre enhances the dental environment and attests to the good dental public relations in the area.
5. The wives of the Hamilton dentists are presently offering bursaries to local dental students attending the University of Toronto.

After a review of the foregoing, this committee, on behalf of the Hamilton Dental Association, asks this Board to consider the following at your earliest convenience:

1. Recognize the need for early planning action that would result in new dental schools being organized in Ontario to at least partially implement the recommendations of Dr. Ellis.
2. Recognize the validity of the claim the Hamilton Dental Association makes outlining its favourable environment for a new dental faculty.
3. That this Board endorse the proposal of the Hamilton Dental Association which is that its committee lay before the Governors of McMaster University the above enumerated facts and recommend to them that they include in their expansion plans along with a University hospital and medical faculty, a McMaster Faculty of Dentistry."

ACTION

Proposal endorsed and Hamilton Dental Association commended for its foresight and enthusiasm.

Public Relations Consultant

At both the Fall meeting and Annual Meetings of the Board serious consideration was given to the advisability of retaining a Public Relations Consultant for the profession. The Board on both occasions was impressed by the presentation but, in the main, is not yet convinced that from the necessary expenditure in this regard will accrue at least a concomitant value to the profession. The matter has been left for the consideration of a Special Committee appointed to consider the overall operation of the Secretariat.

Resolutions of Appreciation

The following resolutions of appreciation were enthusiastically approved:

1. Whereas the efficient quarters now enjoyed by the R.C.D.S. of Ontario can be credited to the foresight and wisdom of the Property Committee under the Chairmanship of Dr. Wesley J. Langmaid, and

Whereas Dr. Langmaid has in all respects been a valuable Director of this Board

THEREFORE BE IT RESOLVED

That appreciation be expressed to Dr. Langmaid for the important and diversified contributions he has made.

2. Whereas the establishment of Canadian Dental Service Plans Incorporated represents one of the most challenging undertakings of this Board in recent years, and

Whereas this service was established by the Dental Services Committee under the Chairmanship of Dr. Douglas Stiles, and

Whereas Dr. Stiles has served this Board capably and diligently in many activities

THEREFORE BE IT RESOLVED

That this Board expresses its appreciation to Dr. Stiles on his important and unselfish contributions which are too many to enumerate.

Both Dr. Langmaid and Dr. Stiles expressed appreciation and regrets at leaving the Board and assured the Board of their continuing interest and concern.

Select Committee on Cost of Drugs

The Board appointed Dr. Clifford Reynolds, Dr. John F. Methven, and the Secretary a Committee of three to prepare and present the requested Brief to the Select Committee on the Cost of Drugs.

Special Meeting of Discipline Committee

On the basis of a written application by four licentiates and pursuant to the provisions of Section 24 (iii) of the Dentistry Act, the President instructed the Discipline Committee to enquire into cases in which it was alleged that two members of the College were guilty of improper conduct in a professional respect because of statements made by them to the press.

The Discipline Committee met on May 18th, 1961 to enquire into the cases so referred to it and reported to the Board that it had reviewed in detail the press clippings attached to the application and deliberated on the matter on the assumption that all comments and quotations contained in the press clipping were a correct reflection of facts, but that even on this assumption no improper conduct in a professional respect would, in the opinion of the Committee, be established. The Committee accordingly recommended that no action be taken.

The report of the Committee was received and considered by the Board which had the further advantage of hearing submissions in support of the allegations as presented by a deputation of four members of the College. The report of the Committee was unanimously adopted by the Board.

While this decision was unanimous the Board reiterated its policy that all members of the College and particularly those holding offices in dental bodies or appointments to Dental Faculties or organizations should most carefully consider the possible interpretations and consequences of any statements, comments, or opinions they might give to the press or other public information media.

Specialists' Addresses in List of Members

The Board agreed that on the request of a certified specialist dual offices be listed in the R.C.D.S. List of Members for those possessing specialists' certification only.

REGULATIONS

SIGNS

A member of the Royal College of Dental Surgeons, in connection with his profession:—

1. May not display or permit to be displayed any sign other than a sign which in its character, position, size and wording is merely such as may be reasonably required to indicate the location of and entrance to the premises in which a dental practice is being carried on and in which no letters larger than four (4) inches are used.
2. May not display more than two signs in addition to one at or on his entrance door.
 - (a) Not more than one of these may be a suspended sign.
 - (b) Not more than one of these may be an illuminated sign and if illuminated must not be intermittent, daylight, "Neon" or "Neon type" and no colours shall appear in such signs other than white or black.
3. May not display any sign on premises other than those in which his practice is actually carried on.

Notwithstanding the above regulations he may (using only unilluminated letters or figures not larger than two inches):

- (a) Add to his entrance sign, his office hours.
- (b) Add to any sign the words (when an entrance is difficult to find) "Entrance on . . ."

PROFESSIONAL CARDS AND ANNOUNCEMENTS

A member of the Royal College of Dental Surgeons, in connection with his practice:—

1. May not permit to appear in any newspaper or other publication, printed or written for distribution or display anything other than his professional card (which may contain at most his name, title or degrees, profession, address, telephone number and office hours) or an announcement of his commencement of practice, change of office location, absence from or return to practice, or the restriction of his practice. The announcement shall not contain any reference to qualifications, procedures or equipment. The space used, for either card or announcement, must not exceed one column (13 ems) in width by two inches in length and must not be in the nature of a display.
2. He may, however, observing the dignity and ethics of the profession, without reference to qualifications, procedures or equipment:
 - (a) Use private professional cards.
 - (b) Issue accounts and receipts.
 - (c) Issue appointment cards.
 - (d) Mail to his patients recall notices.
 - (e) Mail to his patients and acquaintances announcements of his commencement of practice, change of office location, absence from or return to practice or the restriction of his practice, provided he is a certified specialist.

SOLICITED ADVERTISING

For the protection of the Profession from solicited advertising, the Board prohibits any member of the Royal College of Dental Surgeons from inserting his professional card in hand-bills, programs, year books or other printed matter of like character.

TAKING OVER A PRACTICE

When any member of the Royal College of Dental Surgeons takes over the practice or office of another member of the College, either by purchase or otherwise, the member so acquiring the said practice or office shall not after one year from the date of such acquisition use any sign or printed matter which suggests to the public that the retiring member was in any way associated or connected with the said practice or office.

TELEPHONE DIRECTORY LISTINGS

1. No display advertising of any kind.
2. No black face listings in the yellow pages.
3. No specialists' list under separate group headings.
4. Mention of office hours is of no particular value and is usually used only to increase space, therefore to be excluded.
5. Mention of particular facilities or equipment, such as X-rays, gas extractions, etc., not acceptable in either section.
6. Residence listing in yellow pages, as well as in white pages, is acceptable.
7. Designation as specialists may be used in both yellow and white pages, provided the dentist is a specialist certified in and restricted to the designated branch of dentistry.

REPORT

The 60th annual meeting of Canadian Dental Association was held in Saskatoon, Saskatchewan, on May 30th to June 3rd, 1961 and had its Headquarters in the Bessborough Hotel. The National Convention of the Canadian Dental Association which followed was held in conjunction with the Convention of the Western Canada Dental Society.

The setting was one of great attractiveness. The Bessborough Hotel is located on the banks of the fast flowing Saskatchewan River, and the grounds which surround it are beautiful to behold. Since the weather during our entire stay was extremely warm, sometimes reaching 94°, the foot paths located on the grounds were frequently used by the delegates for refreshing walks after they had attended the meetings.

Since returning home to Ontario we have learned that the Convention Committee considers it impractical to hold any further meetings of this size in Saskatoon owing to the fact that available accommodation is limited. This is most unfortunate. The Convention Committee, the local dentists and their wives were wonderful hosts and hostesses.

Dr. J. P. Whyte presided at the annual Board of Governors' meeting and he performed his duties admirably. His energy at that time was boundless, and we sincerely regret the fact that he has not enjoyed good health since last July. We earnestly hope for his speedy recovery.

The Canadian Dental Association Transactions of 1961 have already been published and copies have been sent to all the members. However, it seems appropriate to comment upon a few of the more salient points discussed during the meeting.

The knowledge that the Federal Government had appointed a Royal Commission on Health Services was uppermost in the minds of all attending delegates. Since at that time with the exception of Mr. Justice Hall, the Chairman, the personnel of the Commission had not been named, the subject of what type of personnel might constitute the membership was a topic which received much discussion. Some of the Governors were in favour of dentistry formally requesting representation while others felt that the profession would be in a more advantageous position if it did not request to have a dentist appointed to the Commission.

In the light of subsequent events it now appears that we were well advised to have submitted no formal request for representation, since the Government has seen fit to appoint members of both the medical and dental professions to serve on this Commission.

It became apparent to all of us that the work required to prepare a worth while brief to submit on behalf of the Dental Profession would require an astronomical amount of effort on the part of those chosen to

draw up the brief. Dr. Dunn, our R.C.D.S. Secretary provided us with a great deal of assistance and guidance in his work on the Steering Committee, which was subsequently appointed and to which this task was delegated.

From time to time certain Committees are called upon to do more work than others owing to the problems which arise. In this day and age of state intervention in the health fields, there have been a great many problems presented to the Auxiliary Services Committee. It was unfortunate that Dr. Rooney the Chairman of this Committee was unable to attend the annual meeting but he did forward a very comprehensive and informative report which was of great assistance to us. It is with deep regret that we record his passing since that date. His report faithfully set out the changes which are taking place in this phase of dental service in the various provinces. Since Dr. Rooney's death, Dean H. R. MacLean of the Faculty of Dentistry of the University of Alberta has been appointed Chairman of this Committee and his task though certainly not an enviable one is one which I am sure he will perform most ably.

The Dental Services Committee has also had some assignments which pose difficulties. They have been asked to make a study of fees, to study the economics of group practice, and to study the practicability of prepaid dental plans.

The study dealing with fees is proceeding but has not yet arrived at a point where any conclusive recommendations can be made. The study of the economics of group practice has proved interesting and we look forward to any observations which may be contained in their report of 1962. Past recommendations by this Committee with regard to Pre-paid Dental Plans have been found to be impractical, and up to now no real step forward in this direction has been made. The plans of at least two dental supply companies in the United States and the plan for the employees of the Canadian Dental Association are being watched.

The Council on Public Health has been very active, and among their many accomplishments it is important to note that the progress of our National Dental Health Index is such that we are in the fore-front among the members of W.H.O. Of particular concern to Ontario is the fact that the Committee on Hospital Services has succeeded in gaining the recognition of the Council on Hospital Accreditation, and they are being asked to assist in setting up requirements for hospital dental programs.

The serious situation that has prevailed for the last decade, with regard to recruitment of dentists and hygienists, has now changed for the better. For the first time in many years there have been sufficient applicants, and it is possible that as a result the students will be of a higher standard. Tribute was directed to the National Recruitment Committee on which our Secretary serves as Chairman.

ACTION

Report adopted.

DENTAL PUBLIC HEALTH COMMITTEE

MEMBERS: K. F. Pownall, Chairman; M. Jackson; R. R. Butler;
D. L. Rife; K. W. Davey; R. O. Fisk; M. Buchman;
D. J. E. Mitchell; F. B. Burns; G. T. Mitton, Field Secretary.

REPORT

1. Recruitment — Placement

Because of the success of our recruitment drive last year in Eastern Ontario the decision was made to repeat the project this year in Western Ontario. Last summer our secretary, Dr. Mitton, contacted representatives from the three local dental societies involved, namely Grey-Bruce-Dufferin, Wingham and District, and Stratford District. Arrangements were made for him to speak at a society meeting in each of these areas in the fall with the principals and guidance teachers present. At these meetings Dr. Mitton told of the need for good students from the areas outside the big cities to consider dentistry as a career and of our plans to take interested students of high academic standing to Toronto for a visit to the Faculty and an overnight stay at a dentist's home. Following this a memorandum was sent to each principal and guidance teacher from the Chief Guidance Officer for Ontario asking for their co-operation in this recruitment effort. Arrangements were made for Drs. G. T. Mitton and S. A. MacGregor to visit these areas on April 2nd, 3rd and 4th, 1962. While there they appeared on T.V. and radio, they spoke to those students of university calibre who were invited to the dental society meeting, and they spoke to Home and School rallies. They stressed that dentistry recognized the needs of the people in these areas for more dental services and this recruitment campaign was the initial phase for improvement of these services. From the interested students one busload of 37 with the highest academic standing were selected to come to Toronto on April 26th.

In order to sustain interest among the students from Eastern Ontario who visited the Faculty last year an essay contest was held. The title chosen was "Dentistry — A Challenging Career." Thirteen students have competed and awards will be made to the top three at the dinner in Hart House on April 26th when we greet the student guests from Western Ontario.

Pursuant to placement of final year dental students, Dr. Mitton has in his office at the Faculty a loose leaf book entitled "Opportunities." This book contains the letters from Chambers of Commerce, citizens committees, Home and School Associations, etc. asking that dentists start practice in their community. These he makes known to the dental students, pointing out advantages of practice outside the larger cities.

2. Mediscope '61

The dental display in Mediscope at the 1961 Canadian National Exhibition was a huge success. We are grateful for the suggestions and advice of the representative of the Canadian Section of the American Dental

Trade Association who provided a beautiful 3' x 4' colour transparency developed especially to illustrate our theme "Dentistry Contributes to a Happy Healthy Life." The Boards of the R.C.D.S. and the O.D.A. were generous financial contributors to the project which cost \$5,551.60. Through this contact with the general public 23,000 copies of the Junior Red Cross Dental Booklet and 28,000 fluoridation pamphlets from the Health League of Canada were distributed. Eighty-one high school students who indicated their interest in dentistry as a career subsequently received information and encouragement from our Field Secretary. We are grateful for the many dentists, nurses, hygienists and dental students who gave their time to man the exhibit throughout the days and evenings. The possibility of a like display in 1962 looks quite probable.

3. Canadian Dental Health Index

This is being conducted in co-operation with the C.D.A. The sample areas for dental examinations were chosen by Dr. R. M. Grainger. The eight dental societies involved were in south-western Ontario this year. Following the initial contact by Dr. W. J. Dunn these societies appointed members to conduct the examinations. All M.O.H.'s in these areas were advised. Drs. Grainger and Mitton developed simplified instructions for the dentists as to the method of sampling and the content of the examination. In some areas this has now been done and all should be completed by the end of April.

4. Annual Events

(a) *Student Dinner*

This event jointly sponsored by the Board of the R.C.D.S. and the O.D.A. was held in Hart House on November 22nd, 1961. The speaker was Dr. George Goth of London, Ontario. Student opinion of this dinner was most favourable and we expect to continue the practice.

(b) *Dental Health Day (March 14th, 1962)*

A new poster "Count Down on Dental Health" was produced. Copies were sent to every dental society in Ontario for distribution to schools, libraries and clinics. One new T.V. slide was developed with announcer's script. The new C.D.A. filmlets were released for first showing during National Health Week.

(c) *Convention Activity*

We are featuring the work of the Burlington Study at this year's convention. Dr. John Hastings of the School of Hygiene is to be our guest speaker at the luncheon.

5. The Field Secretary

Special commendation should be extended Dr. G. T. Mitton for his efforts on behalf of dental public health in Ontario. Last year he gave up most of his summer holidays to work on Mediscope. Every week he spends two or three evenings at committee meetings. He represents us

ably at such organizations as the American Public Health Association, the Ontario Public Health Association, the C.D.A. Council on Public Health, the Health League of Canada, the Canadian Health Forum and many others. He has taken on the added work of treasurer this year. His telephone rings continually with dentists across the province wanting advice on public health matters. None of the projects listed here would have been as successful without him.

ACTION

Committee Chairman reported that the Medical Faculties of Ottawa, Queens and Western Universities had been offered copies of *Your Child and Mine*.

Chairman agreed to bring the matter of the prevention of traumatic injuries to the teeth of children to the attention of the D.P.H.C.

Appreciation expressed to the Chairman, Field Secretary and Members of the Committee.

Report adopted.

DENTAL SERVICES COMMITTEE

MEMBERS: H. M. Jolley, Chairman; D. B. McAdam; P. E. Willson;
James Sim; R. H. Finlayson; W. S. MacKenzie.

REPORT

FALL MEETING

1. Dental Welfare Plan

The Dental Welfare Plan is operating well. The average monthly receipts have approximated \$14,966.00 and the average monthly expenditures, \$13,658.00 leaving an average monthly excess of \$1,308.00. This amount is considered reasonably satisfactory to cover the needs of services not reported.

There has been a gradual growth in receipts of \$14,028.00 to \$15,661.00 over the period March, 1959 to August, 1961. In addition the average number of children at the outset was 20,041 as compared to 22,374 as of the end of August.

There have been no legitimate complaints respecting this plan from either the Department, the public, or the profession. The Minister of Public Welfare and the Deputy Minister have both been most laudatory in their comments respecting the effectiveness of this program.

It is the view of the Committee that an attempt should be made to extend the services of the Welfare Plan to other beneficiary groups presently receiving assistance through the Department of Public Welfare. A Subcommittee has been appointed to consider what other groups might be included and the methods of approach whereby the Department of Public Welfare could be encouraged to include such groups. This committee will report back to the Dental Services Committee for approval.

The initial draft of material for submission to the Department has been prepared and this material is presently receiving consideration.

2. Post Payment Plan

It is the opinion of the Committee that the Post Payment Plan, per se, has made a rather inconsequential contribution to the basic purpose of its creation — the enablement of persons of modest means to obtain the dental services they require when they need it and pay for such services on an extended basis. This Plan has, however, stimulated the profession as individuals to take a more objective look at their methods of conducting practice.

The Secretary-Treasurer of Canadian Dental Service Plans Incorporated reported that D.S.P.I. was undertaking a project wherein an IBM accounting system would be made available for members of the profession and he felt that in this program a significant benefit existed for the profession.

3. Prepayment Plans

There has been a paucity of further information respecting a professionally sponsored pre-payment plan. The Committee is looking with interest

upon plans developed for two dental manufacturing concerns in the United States as well as for the employees of the American Dental Association. The Committee, regretfully, has been unable to make any progress in this regard but it is hoped that the Dental Services Committee of the Canadian Dental Association may be able to provide some positive assistance.

ACTION

Report adopted.

REPORT

ANNUAL MEETING

1. The Committee as a whole met only once since the last annual meeting of the Board. A sub Committee met to investigate the practicability of the expansion of certain activities.

2. Welfare Plan

As reported at the Fall Meeting the Dental Welfare Plan is operating well. There have been no legitimate complaints received from Department, the profession, or the public. The Secretary has received laudatory comments from both the Minister and Deputy Minister of Public Welfare in connection with the effectiveness of the program.

The total number of children eligible for service under the Plan as of December 31st, 1961, was 22,250. The number of dentists participating was 1,204. The number of patients participating was 8,970 which represented 37.6% of the number eligible for benefits.

The monthly grants for the year 1961 averaged \$15,541.40. The payments to dentists varied in amount monthly. Participating dentists were paid 70% of their submitted statements based on the O.D.A. fee schedule. A reserve of approximately 10% or somewhat in excess of one month's grant is maintained to cover the needs of services not reported and other contingencies. Prompt payment of accounts plus the feeling of contribution to a worthwhile and necessary public service no doubt contributed greatly to the generally satisfactory relationship with the dental participants up to the end of 1961. A detailed summary of statistics in connection with the operation of the Plan since its inception is appended. (Appendix A).

Extension of Services

As reported at the Fall Meeting it is the feeling of the Committee that an attempt should be made to extend the services of the Welfare Plan to other groups at present receiving assistance through the Dept. of Welfare. An examination was made of the beneficiary groups and the areas of greatest need and practical alleviation estimated. To a sub-committee consisting of Dr. J. Sim and Dr. R. H. Finlayson was assigned the task of suggesting to what extent the plan might reasonably be extended. The Committee members made the following recommendations:

1. The age group of children under the Mothers' and Dependent Children's Allowance Act be extended beyond age 15 to include the *16, 17, & 18 year olds*.
2. The mothers themselves be included with services identical to those provided for their eligible children.
3. Beneficiaries of the Dept. of Public Welfare age *65 to 69* and the *Old Age (over 70)* beneficiaries of the Dept. They would be entitled to the same service at present provided for the children. In addition repair of existing dentures would be an entitlement. Complete dentures should also be provided on the basis of an equal apportionment of cost between the beneficiary and the plan.

Correspondence has been entered into with the responsible Minister in an attempt to arrange to have a Sub-Committee of the Services Committee to meet with him to discuss extension of the Dental Welfare Plan.

3. Pre Payment Plans

No further progress in this area is to be reported at this time. A considerable volume of material has been accumulated and a study is proceeding. It is hoped, not very optimistically, that some benefits may ensue from these deliberations. In the meantime it is felt that the Committee might be of service in enunciating and codifying a set of principles which could be used for guidance by groups or individuals interested in establishing such schemes.

On a more practical level the Dental Care Plan for Employees of the C.D.A. may after its one year trial provide experience and statistics of value in considering this problem.

4. Sale of Professional Accounts

Several inquiries have been received from dentists as to the attitude of the Board in regard to their participation in so called "Professional Service or Acceptance Corporations." The members of the profession have been advised not to enter into these schemes. General consideration of this matter with resultant enunciation of policy is deemed advisable.

ONTARIO DENTAL WELFARE PLAN

1959 - 1961

	1959	1960	1961
Grant Received	\$174,028.40	\$181,596.10	\$186,496.80
Expenditures	155,492.96	174,324.12	186,236.46
Total number of dentists participating	1127	1180	1204
Total number of payments made to dentists	4491	4504	4312
Average payment	31.79	25.18	43.13
Total number of patients treated	6914	8419	8970
Average payment per patient	20.63	18.82	20.76
Largest payment on a/c of one patient	179.00	236.47	268.00
Average number of children eligible per month	20,718	21,619	22,135
Total number of children eligible in the year	27,096	28,629	29,212
Additions during the year	—	7,379	7,192
Deletions during the year	—	6,609	6,962
Dentists' contributions based on the pro-ration factor	\$ 53,825.00	\$ 58,108.04	\$ 79,815.60

ACTION

Report adopted.

DISCIPLINE COMMITTEE

MEMBERS: M. V. J. Keenan, Chairman; J. D. Purves; R. C. Honey;
H. M. Jolley; J. R. Hurton.

REPORT

FALL MEETING

1. The Discipline Committee met in an extensive session on Saturday, November 18th, 1961. The meeting was not called within the statutory provisions of Section 25 of The Dentistry Act but rather the Committee met in informal session to permit interviews with members of the profession whose professional conduct was a matter of some concern.

2. Dr. _____

This member had been the recipient of a charge brought against him under Section 141 of the Criminal Code of Canada alleging indecent assault on a female person. Although four charges were dismissed by the Magistrate the provisions of Section 24(2) of The Act were enunciated to the member. The Committee questioned the member in depth and following the interview portion the Committee concluded that it would demand of the said member to make his own arrangements to seek the necessary appointments with a certified psychiatrist for examination and, if necessary, treatment with a full report to be submitted to the Committee.

3. Dr. _____

The Board in a period of approximately 13 months had received five written complaints from patients who had received service from this member. The complaints generally alleged unsatisfactory services complicated by an entirely unsatisfactory patient-dentist relationship. It seemed apparent to the Committee that there was an entire lack of satisfactory case presentation complicated by an apparent inability on the part of the dentist to communicate effectively and precisely.

The Committee has strongly advised this member of his serious disabilities in case presentation and suggested a complete reassessment of his office procedures which have a bearing on the patient-dentist relationship. In addition it was recommended that the member avail himself of public speaking or remedial English courses hopefully to increase self-confidence and, perhaps, thereby assist in attaining the above objectives.

4. Dr. _____

This member had appeared in Magistrate's Court charged with common assault within the Criminal Code of Canada. The evidence of the prosecution was directed toward some indecent contact with an indecent attempt. In dismissing the charge the Magistrate indicated that the unsworn evidence of the child had not been sufficiently corroborated as required by the Criminal Code. Two other charges of a similar nature were then withdrawn by the Crown Attorney.

Again the provisions of Section 24(2) of The Act were read to the member following which he emphatically stated there was no substance in the charges. His wife was questioned at his request and she indicated that she was present during the time the alleged offences were alleged to have been committed.

Because of the absence of corroboration the Committee gave the member the benefit of very considerable doubt but indicated strongly that his wife or some other responsible adult female should be present at all times during his office hours.

5. Dr. _____

The Committee had been in receipt of both written and verbal complaints relative to this member's professional services with particular emphasis upon an alleged unsatisfactory patient-dentist relationship.

While during the interview the member indicated that the allegations presented were, in the main, fallacious, he did agree that perhaps a reassessment of his method of conducting practice would be desirable. The Committee was of the opinion that his practice was characterized somewhat by an aggressive commercialism.

The Committee feels that following the exchange of ideas and philosophies a conciliatory attitude was taken by the member and that he himself agreed that a reassessment of his own practice philosophies would be most desirable.

6. Interviews with Patients

The Committee having received certain complaints from three patients respecting the services of a particular dentist decided to interview these patients with a view to a precise clarification of the complaint submitted. Essentially each complained that services were proceeded with by the dentist without an explanation of the services by the dentist. In each instance fees of considerable magnitude were assessed for services which the patients, apparently, did not fully comprehend. The information adduced from the interviews is to be employed when informal discussions are to be held with the dentist concerned.

ACTION

Report adopted.

EXAMINERS AND PETITIONS COMMITTEE

MEMBERS: J. D. Purves, Chairman; D. L. Ferguson; W. G. Bruce.

REPORT

FALL MEETING

1. Evening Course for Dental Assistants

At the Annual Meeting of the Board in May 1961 this Committee was granted broad responsibilities relative to the approval of courses for dental assistants conducted by local dental societies. The pilot programme in Toronto was adjudged most successful and is being continued with Committee approval.

In addition five other programmes are presently in existence and all are being conducted using the pilot programme as a guide. The Committee, therefore, recommends the granting of approval to the following courses being conducted by the following societies:

1. London and District Dental Society,
2. Orillia Dental Society,
3. Ottawa Dental Society,
4. Sudbury and District Dental Society.
5. Windsor (Essex County Dental Association).

This acceptance of responsibility by the profession is most commendable and other dental societies are encouraged to establish similar programmes.

2. Fall Board Examinations

Application for Registration

It is recommended that

1. Henri Larocque B.A. (Ott), D.D.S. (Mont. '51), having passed the licensing examinations conducted by this Board, be granted his Licentiate in Dental Surgery of the Royal College of Dental Surgeons of Ontario when all remaining requirements have been met.
2. John Albert Pedler, B.D.S., M.D.S., F.D.S.R.C.S., having met the requirements established by the Board, be granted his Licentiate in Dental Surgery of the Royal College of Dental Surgeons of Ontario when all remaining requirements have been met.

3. Application for Specialty Certification

It is recommended that the following having met the requirements established for certification in their respective specialties be granted certification:

1. Albert Vachon, B.A., B.Ph., D.D.S. (McG. '56) M.Sc. (Mont. '61) — Orthodontics.
2. Frederick James Servos, D.D.S. (Tor. '50), Dip. Per. (Tor. '59) — Periodontics.

4. Application for Re-Certification

Dr. Douglas M. Tanner, on his own volition, when initially undertaking professional responsibilities for the Department of Veterans' Affairs within Sunnybrook Hospital, withdrew his name from the Register of Specialists. Dr. Tanner, on July 1st, 1961 was appointed Chief of Service (Dentistry) at Sunnybrook Hospital and as his services are now entirely in the areas of oral surgery and administration he has applied for re-certification. It is recommended that re-certification in oral surgery be granted.

ACTION

Report adopted.

REPORT

ANNUAL MEETING

1. Applications for Specialty Certification

Because of the earlier date of the Annual Meeting of this Board confidential transcripts from the Secretary of the Faculty of Dentistry of the University of Toronto are not yet available. Thus a portion of the recommendations to follow are contingent upon receipt of transcripts indicating the awarding of the respective specialty diploma to the applicants.

The Committee, therefore, presents the following recommendations:

1. That Steven Eugene Hegedus, D.D.S. (Tor. '57), DIP. ORTH. (Tor '59) having met all requirements for certification in the specialty of orthodontics be certified as an orthodontist.
2. That Clyde S. Whitman, B.Sc. (McG '51), D.D.S. (Tor. '56), upon presentation of a transcript attesting to his successful completion of the graduate diploma course in periodontics of the Faculty of Dentistry of the University of Toronto, and having met all other requirements for certification in the specialty of periodontics be certified as a periodontist.
3. That (a) George Murray Dewis, B.A., D.D.S., (Dal. '59)
(b) Gustaf Herbert Hanson, D.D.S., (Tor. '59)
(c) Gunnar Lie, D.D.S., (Tor. '53)
(d) William James McLuhan, D.D.S., (Tor. '58)
(e) Kenneth Neil Munro, D.D.S., (Tor. '55)

upon presentation of transcripts attesting to their successful completion of the graduate diploma course in orthodontics of the Faculty of Dentistry of the University of Toronto, and having met all other requirements for certification in the specialty of orthodontics be certified as orthodontists.

2. Applications for Registration

At the Fall Meeting of this Board, the Examiners and Petitions Committee was authorized on behalf of and in the name of the Board to review the results of the licensing examinations to be conducted from May 16th to 18th, 1962 and grant registration to the successful candidates. It would appear that from eight to ten candidates will be examined. The Committee will report the names of the new registrants to a subsequent meeting of the Board.

ACTION

Report adopted.

Following presentation of evidence that Messrs. Butler, Ceroni, Bearss and Morandi have cleared their academic conditions, the Registrar was authorized to effect their registration.

The following have been recommended for the Degree of Doctor of Dental Surgery from the Faculty of Dentistry of the University of Toronto and having met all other requirements of the Board were registered as Licentiates in Dental Surgery:

Abe, Uno Leonard	Dinniwel, Edward Raymond
Balfour, Betty Margaret	Ellis, William Bateman
Bartalos, Ronald Stephen	Emon, Joseph Michael
Bastien, Victor Gerard	Fawcett, John Edgar Purvis
Beber, Godfrey Basil	Feher, Andy Alex

REPORT

1. Introduction

It is fairly safe to state that members of the dental profession assuming responsibility on behalf of dentistry, whether it be education, the practice of dentistry or matters concerning licensure, have been actively involved, during the past few months, in the preparation of briefs to the Royal Commission on Health Services.

The submission from the Faculty of Dentistry, was prepared by the Dean and then reviewed by a small steering Committee. The recommendations were subsequently examined by the Executive Committee of the Faculty Council and finally these recommendations were approved by the Faculty Council at its meeting on February 27th, 1962. They appear as Appendix A. to this report.

2. Student Aid

Financial aid for students has been referred to in the recommendations to the Royal Commission. In particular, reference is made in the main part of the report to the need for support for students from modest income families, who live in smaller and rural communities. The expectation is that such students are more likely to return to practice in the areas where their services are most urgently needed. In this connection, the announcement by the Minister of Health on March 26th in the Ontario Legislature is significant. Dr. Dymond proposed that ten bursaries be established for dental students, each to provide \$1000. per year for three years of the four-year undergraduate course. Each recipient would be required to undertake practice for two years in a designated area.

One year ago I reported that approximately 34% of the students registered in the Faculty of Dentistry had received financial assistance during session 1960-61, totalling in excess of \$68,000. During the current session, approximately 40% of the students have received assistance totalling in excess of \$100,000. Sixty-five percent of the assistance provided was in the form of loans and thirty-five percent as bursaries. This amount does not include scholarships and prizes awarded in course, nor does it include those receiving assistance through the Reserve Officer Training Plan (R.C.D.C.)

New Bursaries established during the current session include:

1. Two Bursaries of \$300. each for students in the Fourth Dental Year, donated by the Board of Governors of the Ontario Dental Association.
2. A Bursary of \$100. established by the Ottawa Dentists' Wives Association to be awarded to a student in the Preprofessional Year.

3. One or more Bursaries to a total value of \$1000., the generous donation of Dr. C. A. Corrigan and to be known as the C. A. Corrigan Bursary Fund.

To the donors, we extend very sincere appreciation for this timely assistance.

Commencing in session 1962-63, two new scholarship awards will be available on the basis of admission to Pre-professional Year.

The first of these scholarships is provided by the Royal College of Dental Surgeons of Ontario and is of the value of \$600. It will be awarded to the student registered in the Preprofessional Year who has obtained the highest standing in the Grade XIII papers, required for admission to the Faculty of Dentistry. The recipient must have at least an average of 75% on the Grade XIII papers.

The second of these admission scholarships is established by the Dental Alumni Association. Provision is made for the winner to receive a minimum of \$250. and in the case of need, the winner may receive up to a maximum of \$500. The successful candidate must obtain at least 75% in the Grade XIII examinations and demonstrate financial need.

In the case of a student not being awarded more than \$250., the balance may be awarded as a Bursary or Bursaries to students in the Predental Year.

3. Recruitment of Students

The effectiveness of the recruitment programme is encouraging, both in respect to numbers of applications and quality of applicants. The increase in numbers is seen in the figures for the five-year period 1957-62.

Year	Applications	Fully documented applications	Number Registered
1957-58	145	118	85
1958-59	166	133	98
1959-60	125	102	100
1960-61	236	159	115
1961-62	365	220	123

As of this date there are approximately three hundred and fifty applications for the Preprofessional Class for session 1962-63.

While no comparable figures are available for previous years, the academic achievement of those accepted and registered in the Predental Year in September 1961 comprised 12% with First Class Honours in Grade XIII, 57% with Second Class Honours and the remainder in Third Class.

The Dental Public Health Committee of the Ontario Dental Association is sponsoring another tour of the Dental Building for high school students. During the Easter holidays in 1961, students from the eastern counties of Ontario were given a "recruitment tour."

This year (1962) the Grey-Bruce-Dufferin Dental Society; the Wingham and District Dental Society and the Stratford Dental Society are co-operating with the Committee so that on the afternoon of Thursday, April 26th, about forty high school students from these areas of Western Ontario will tour the Dental Building. These students will be the guests of the Dental Public Health Committee and members of the Ontario Dental Association at a dinner at Hart House, and afterwards as overnight guests of dentists in Toronto. They will return the next day by chartered bus to their homes.

The Open House at the Dental Building held on Sunday, February 11th, 1962, was highly successful, particularly from the recruitment standpoint. Approximately 1500 visitors were in the building that afternoon and it is estimated that at least 25% of these were prospective dental students. The following extracts from letters received after the event are significant:

"The tour of the School of Dentistry increased my respect for this profession; it certainly was a striking example of the progressive steps it is taking."

"I think this Faculty stands as a symbol of progress in medical science — an institution that we, as Canadians, can present as a challenge to the rest of the world."

"It was my pleasure to provide the transportation for five students to visit the Faculty of Dentistry building. They all reported having seen and heard much to their advantage on their tour and were impressed with the careful organization, the graciousness of the instructors (students) and the opportunities available for learning in the field on Dentistry."

4. Registration

The progressive registration figures for the past four sessions are shown below:

	1958-59	1959-60	1960-61	1961-62
<i>Undergraduate Course</i>				
Preprofessional Year	98	100	116	123
First Dental Year	90	115	113	120
Second Dental Year	76	85	119	110
Third Dental Year	79	63	77	114
Fourth Dental Year	74	94	72	85
Special Students	5	10	10	4
<i>Dental Hygiene</i>				
First Year	5	8	21	42
Second Year	9	6	8	16
Special	—	1	—	—
Dental Nursing	—	3	—	—
<i>Post Graduate and Graduate</i>				
Diploma Courses	15	15	11	20
Bachelor Science Dentists	2	3	4	5
Master Science Dentists	—	8	7	5
	453	511	558	644

It is interesting to note that in October 1957, in a report to the University Administration, we projected enrolment in the new dental building, (then only on the drawing boards) for the period 1960-1966. Our estimate was 655 students. The actual figure as reported above was 644 students. It seems probable that the original projection of 700 students by 1963-64, will become a reality.

5. Curriculum

Changes which have been made during the past three years, have made it possible to introduce the student to clinical practice at an earlier stage in the course. Many of the Second Year students now qualify by the middle of the second term of that year, for assignment of their first patient. From the standpoint of motivation this "privilege" based on "merit", has a most stimulating effect on the class. The beginning of the long range plan of "Special Privileges" was reported a year ago to this Board. It is now three years since it was first introduced, and while it is too early to make a final assessment of the programme, we are confident it has many good features.

Recently, Dr. P. G. Anderson, was invited by the programme Committee of the American Association of Dental Schools, to report on "The merit system and programme of special privileges of the Faculty of Dentistry at the University of Toronto." This report was presented at the Annual meeting of the Association in St. Louis and was received most favourably. Many requests for more information have been received since that meeting.

When students in the final year attain "Senior Privilege" status they are permitted to:

1. Concentrate their clinical efforts in specific areas of their choice.
2. Undertake more difficult cases, not usually assigned to students.
3. Proceed with clinical cases without formal step by step approval.
4. Elect to do a limited amount of teaching in the course in the earlier years.
5. Spend some time as an observer in the research areas.
6. Increased attendance in the dental department of a teaching hospital.

It may be that this arrangement will become a reliable means of recruiting teachers, research workers and future specialists.

6. Preprofessional Year

For some years, doubt has been expressed as to the wisdom of retaining the Predental Year as such, in the Faculty of Dentistry. While the Predental students are selected for admission by the Faculty and are registered in the Faculty, all their instruction has been given by departments in the Faculty of Arts and Sciences. From time to time a psychological problem has been raised by this arrangement, in that students feel they don't belong to either Faculty.

Therefore, after careful deliberation, the Faculty Council recommended to the Senate and the Board of Governors that commencing with Session 1963-64, the Preprofessional Year offered at the University of Toronto, through the Faculty of Dentistry, be discontinued. The 1962-63 Calendar of the Faculty will also give notice that "Candidates are advised that completion of either the first year of the General Course in Science at the University of Toronto, or the equivalent at another University, will make them *eligible for consideration* for admission to the Faculty of Dentistry."

Two immediate advantages will follow this action which has now been approved by the University at all levels, namely, students may attend the University of their choice to complete this year, and the selection of students for admission to dentistry will be delayed until after their pre-dental education is complete.

7. Auxiliary Personnel

Pursuant to action taken by this Board at its Annual meeting in 1961, namely, that "The Faculty of Dentistry is to be requested to suggest to what limits the present two year course in Dental Hygiene may be expanded to provide specific services of a broad nature to the profession", the Faculty Council appointed subcommittees to study various aspects of the use of auxiliary personnel.

One group directed its attention to the expansion of the duties generally recognized as being within the scope of the Dental Hygienist. Their recommendation for the establishment of an experimental training programme as outlined in Appendix B, was approved by the Faculty Council at a recent meeting. It must be recognized that this is an *experiment* to provide information and it is not intended, during the early stages, to establish limits to which the services of the Dental Hygienist should be extended. If this Board concurs in the proposed experiment, the Faculty will proceed to implement it, without delay.

A second Committee is presently studying ways and means of training the dental student to utilize effectively, the services of the dental assistant. It is believed that graduation of dentists, who recognize the need for integration and utilization of the dental hygienist and the dental assistant in practice, is one significant way to increase dental service to the Canadian people.

8. Training Dental Assistants

Following the cessation in 1959 of the one year course for dental nurses at the University of Toronto, there has been no formal day course of training for dental assistants. The evening course sponsored by this Board and the Academy of Dentistry, has provided an excellent extension course for dental assistants already employed in the dental office.

Recently the Registrar-Secretary of this Board and the Dean of the Faculty were consulted on a proposal made by the administration of the Scarborough Board of Education, for the training of dental assistants. Their plan is to combine practical training as a dental assistant with general education and commercial instruction in Grades X, XI, and XII.

Approximately one third of the timetable in each of the three years would be devoted to dental assisting. In the Grade XII year, field training in dental offices will provide practical experience. The profession is urged to cooperate in this significant new project.

A specially equipped classroom for twenty-four students is well advanced. Dr. M. Jackson of our staff has given willing leadership in the project. Looking to the future, the success of this venture could lead other municipalities to institute such a course. The potential, in terms of trained dental assistants, is important to the profession.

9. Continuing Education

At the beginning of the 1961-62 Session, a new one-year course of training in Anaesthesia as applied to Dentistry, was initiated. Enrolment was limited to one candidate, who was chosen from several applications. The student in the course receives some instruction with the medical candidates proceeding with specialty training in Anaesthesiology. This cooperative arrangement is warmly welcomed.

Ample clinical experience for the student in this course was assured when the Faculty entered into an agreement with the Department of Health of the City of Toronto, whereby the Faculty provides a general anaesthesia service for the treatment of up to two thousand school children a year.

Seven short courses for dentists during the current session have been fully enrolled. Any future increase in the number and variety of these courses is dependent upon staff available and the demand for such courses.

The extramural lecture service continues on a well established pattern. Twenty Societies participated during the year and a total of thirty-six meetings were arranged. We are grateful to the staff who undertake these assignments, and to Dr. G. T. Mitton who organizes the schedule.

10. Research

Activities in the Division of Dental Research continue to be characterized by their diversity and flexibility. In addition to the financial contribution made indirectly by the University to the functions of the Division, grant awards to members of the Division totalled \$85,000.00. Sources of these funds included the National Health Grants (43%) of the total, the National Research Council (25%), the United States Public Health Service (21%), and Lever Brothers Limited (11%).

The Summer Assistantships in Dental Research established by the National Research Council and the Canadian Dental Association, provide valuable opportunities for students to become acquainted with research methods and the potential of a research career.

The Chairman of the Division, Dr. G. Nikiforuk, presented a paper at the "International Symposium on the Present Status of Caries Prevention by Fluorine" held at the Kariesforschungsstation, Zahnärztliches Institute, at the University of Zurich, Switzerland, in November 1961. Dr. R. M.

Grainger, who holds an appointment as a member of the World Health Organization Expert Advisory Panel on Dental Health, presented a paper in Geneva, Switzerland, in November 1961 at a meeting of the Committee for "Standardization of Reporting of Dental Disease."

The first Canadian Conference on Dental Research was held at the Dental Building, University of Toronto, in October 1961. It was organized under the auspices of the Canadian Dental Research Foundation and the Canadian Dental Association. A total of twenty papers were submitted by research workers representing the six Canadian Dental Schools and the Royal Canadian Dental Corps. Proctor and Gamble Co. of Canada Ltd., provided the financial support for this successful conference.

11. H. K. Box Memorial Lectureship

When a Committee was established in 1955 to plan and provide for recognition of Dr. Harold K. Box's outstanding contributions to dental science, it was agreed that a portrait should be prepared and presented to Dr. Box. It was further agreed, that "Donations in excess of the cost of the portrait be devoted to dental research at the discretion of Dr. Box and the establishment of a lectureship in his name if funds permit." On the recommendation of the Faculty Council, the Box Testimonial Fund Committee have agreed to the establishment of the Box Memorial Lecture.

The first lecture is scheduled for Monday, October 15th, 1962. Dr. Harry Sicher of Loyola University, Chicago, has accepted the invitation to be the guest lecturer on this occasion.

12. Staff

It is with regret that we record the passing of Dean-Emeritus Arnold D. Mason. The Council at its meeting on April 3rd adopted unanimously the resolution of tribute respecting Dr. Mason. This appears as Appendix C to this report.

On a happier note, the announcement that a former member of the staff had been appointed President-Elect of the University of British Columbia, introduced a sense of deep satisfaction. We wish for the former Chairman of the Division of Dental Research, Dr. John B. Macdonald, distinction as a University President, and every happiness in his new responsibilities.

Mrs. Berniece Brown will relinquish her duties as Supervisor of the Course in Dental Hygiene at the end of June 1962. She has given outstanding leadership in this field for the past five years and we express sincere thanks to her and best wishes for the future.

On July 1st, 1962, Dr. D. G. Woodside will assume the Headship of the Department of Orthodontics. Since the departure of Dr. E. Harvold, a year ago, Dr. Woodside has been Acting-Head of the Department.

13. Acknowledgment

In addition to appreciation expressed elsewhere in this report, to donors of new student awards, we record the generous action of the Board of Governors of the Ontario Dental Association in providing timely assistance in respect to our Museum project. Their contribution of \$4000. will

expedite the refurbishing, cataloguing and preparation for displaying the extensive collection of Museum material.

Our perennial acknowledgments include special reference to the Dental Alumni Association and to this Board. Once again we are indebted to both organizations for help received in many ways, during the 1961-62 session.

Summary of Submission to
THE ROYAL COMMISSION ON HEALTH SERVICES
by
THE FACULTY OF DENTISTRY
UNIVERSITY OF TORONTO
SUMMARY OF CONCLUSIONS AND RECOMMENDATIONS

R.1 Need for Additional Educational Facilities:

- (a) To maintain the present ratio of dentists to the population in Ontario through to 1980, it will be necessary to establish a new dental school in Ontario.
- (b) Planning and construction schedules should provide for the first graduating class of sixty students by 1968.
- (c) The capital cost of this project would be not less than \$4,000,000.00.
- (d) These funds should be provided on a matching-grant basis, shared by the Provincial and Federal Governments.

R.2 Need for Training Additional Dental Teachers and Research Personnel:

- (a) A long-range programme for training full-time teaching and research personnel is urgently needed.
- (b) Generous Fellowships are essential to encourage carefully screened applicants who have demonstrated aptitude for a full-time University career.
- (c) The Ontario needs in this respect would amount to \$50,000.00. to \$75,000.00. per year.
- (d) The national character of this project suggests that the major responsibility rests with the Federal Government.

R.3 Need for Support for Faculty Clinic:

- (a) It is recommended that Universities maintaining a dental school, should receive a grant from public funds to offset the cost of operating the extensive out patient clinic.
- (b) An annual grant of \$1,000.00 for each student registered in the Faculty is necessary to maintain these clinical facilities for teaching dental students.
- (c) The municipalities in which these clinical facilities are located should share the costs of this service with respective Provincial Governments.

R.4 Need for Student Aid:

- (a) Promising students from low income families should be encouraged to seek dentistry as a career.
- (b) Many such students reside in the rural districts and small communities.
- (c) It is recommended that bursaries and loan funds be provided so that more students in these categories who seek admission to the Faculty of Dentistry might be assured of substantial financial assistance, providing they maintain satisfactory standing each year.
- (d) Dominion-Provincial bursaries should be greatly increased.
- (e) Loan funds created by contributions from governments and the profession are required.

R.5 Need for Extending Public Education in Dental Health:

- (a) Dental disease affects Canadians almost universally, and constitutes a major health problem.
- (b) Education is necessary to impress upon the individual his personal responsibility in the control of dental disease.
- (c) Financial backing is needed for a comprehensive dental health education programme.

R.6 Need for Expansion of Dental Research:

- (a) Research is vital to the future reduction of dental disease.
- (b) It is recommended that greatly increased funds be made available for training research personnel and for the support of projects.
- (c) It is estimated by 1975 the current expenditures for dental research in Canada must be increased twelve-fold to \$3,000,000.00 per year.
- (d) The sources of research funds include government, industry and private individuals.

R.7 Need for More Dental Hygienists:

- (a) The dental hygienist plays an increasingly useful role in the dental health team.
- (b) Dental hygienists are in very short supply, hence adequate training facilities should be part of all Canadian dental schools.
- (c) Financial assistance should be available for dental hygiene students.

R.8 Need for Dental Assistant Training Course:

- (a) The establishment of courses for dental assistants is essential to the overall dental manpower requirements.
- (b) It is recommended that courses for dental assistants be established in the science, technology and trades branch of the Secondary Schools of Ontario and of Vocational Schools.

R.9 Need for Training Dental Students in the Use of Assistants:

- (a) The productivity of the dental profession can be significantly increased by the more efficient utilization of the dental assistant.
- (b) Dental schools must study and experiment in the most effective procedures in teaching dental students to utilize the services of the dental assistant.
- (c) It is estimated that \$50,000.00 to \$60,000.00 per year will be required for an experimental period of five years.

R.10 Need to Study Extension of Duties of Auxiliary Personnel:

- (a) No new types of auxiliary personnel should be introduced into the practice of dentistry until the profession has fully explored the effect of the maximum utilization of the services of the dental hygienist and the dental assistant.
- (b) Experimentation should be conducted in dental schools to develop ways and means of broadening the scope of service of the dental hygienist under the supervision of the dentist.

R.11 Need for Closer Association Between Dental Schools and Teaching Hospitals:

- (a) A much closer association between the dental schools and the teaching hospitals would ultimately be reflected in improved health services for the people of Canada.
- (b) The agency or agencies responsible for hospital administration and financing, are urged to recognize that dental services are an integral part of the provision of all health care services.
- (c) Dental departments should be created in hospitals which do not already possess them, and in most instances dental departments which do exist need to be broadly expanded.
- (d) In addition to teaching, outpatient dental departments in hospitals could provide much needed services for people with marginal incomes.
- (e) Dentists appointed to the professional staffs of such hospitals should be permitted to render their professional services under by-laws and regulations which give full cognizance to their education, training and licensure.

EXPERIMENTAL TRAINING PROGRAMME DENTAL HYGIENISTS

INTRODUCTION

The following experiment has been designed primarily to obtain statistical data to establish whether or not dental hygienists can be taught to perform technical procedures in addition to those now being taught, and, by comparison with the undergraduate dental programme, to determine approximately the time that will be required for this additional instruction. While this should provide information that will be of use in future planning for increasing the usefulness of auxiliaries, *it is not intended to suggest the limits to which their services should be extended.*

This experiment should provide answers to three basic questions related to the problem of extending auxiliaries' training. (1) Can dental hygienists be successfully trained for duties which demand a greater variety in digital performance than at present? (2) Can each new duty be learned in a period of time similar to that required of the dental students? and (3) Will the work done by hygienists be comparable in quality to similar work done by dental students?

To derive maximum information, the three basic essentials for the study — subjects, their training, and evaluation of their work — must be standardized as much as possible. The subjects should have backgrounds similar to one another in knowledge and experience, and comparable to those of present dental hygienists. The training periods during which new techniques are taught should be similar to those for undergraduate students so that useful comparisons can be made; and initially the projects that are undertaken should produce a tangible item that can be accurately assessed qualitatively and compared with similar items produced by dental students.

With these basic principles and purposes in mind the following programme is suggested.

EXPERIMENTAL DESIGN

1. Student Subjects

Current undergraduate dental hygiene students should be used in the study. These students most ideally meet the basic requirements for a known and standardized background of knowledge and experience, and enough hygienists are enrolled in the course that a good evaluation of ability to learn additional techniques could be made.

2. Testing Period

The first test (see below) should be given early in the first year of the hygiene course, with further instruction concentrated in the second term of that year and in the first term of the second year. Although this arrangement will take some time from the present regular dental hygiene pro-

gramme, it is thought that this will not jeopardize quality in the hygienists' present assignments. Indeed, the interest and excitement of participation in the study may actually enhance routine performance.

3. Sequence of Tests

The following proposed projects are listed in two groups, the first of which includes those which will produce a tangible item well-suited for accurate evaluation and comparison. In the second group are additional assignments which, while more difficult to evaluate in a standardized way, may in some instances be of more immediate practical value. They are suggested for later inclusion in the study, however, because of the need to compile accurate marks as the experiment proceeds.

GROUP I

The following projects are listed in order of increasing complexity. Each new assignment should be added only after a satisfactory performance in the previous one has been obtained.

(a) *Digital Dexterity Test*

Hygiene students should be required to perform the carving and spatial relations tests at the beginning of their course, as dental students have already done for Dr. R. M. Grainger. The pattern of performing the tests, undergoing a standard period of instruction and practice, and then repeating the tests should be followed. Thus assessment can be made of inherent digital ability, and of ability to learn digital skills following a period of instruction and practice.

(b) *Study Models*

The students should next be taught to take impressions with compound, hydrocolloid and alginate, and to pour study models for (a) manikins (either edentulous or with teeth), (b) one another and (c) a group of II and III year dental students who have already made models of their own mouths. This sequence will make it possible to compare each phase of the experiment with undergraduate dental students' work.

(c) *Removable Space Maintainer*

Hygienists should construct a removable space maintainer with clasps and a Hawley retainer, for a manikin. Although this project could not be compared with a similar project by undergraduate dental students who construct space maintainers of this type only for individual patients, the hygienists' work could be assessed for general overall acceptability.

(d) *A Cast Space Maintainer*

The fourth project should be that of casting a space maintainer for a model on which the operative procedures have been completed on the tooth to be covered. This exercise will involve taking an impression, packing an amalgam model, waxing up the space maintainer, and casting. This project is now done by III year dental students so that again comparison could be made.

GROUP II

(a) *Intra-oral Examination and Charting*

This procedure is now taught to dental hygienists. To compare relative accuracy and efficiency, III year dental students and II year dental hygienists could examine and chart a number of patients, each patient being examined twice, once by a dental student and once by a hygienist. By comparing records, a measure of their relative accuracy of detection and recording could be made.

(b) *Finishing and Polishing Fillings*

This project is listed for inclusion next because of the practical value of having hygienists entirely complete the final prophylaxis for patients. In some areas of the school at present patients are required to make an extra appointment and have restorations polished by the dental students although a hygienist may have performed what should have been the final prophylaxis. This extra appointment could be avoided if the hygienist could complete all phases of the prophylaxis at one sitting.

(c) *Additional Services*

Under this heading could be listed a large series of additional assignments such as those agreed upon at the Conference on the training of auxiliaries held in Toronto last year (Proc. R.C.D.S. 1960), and others that might become added as the experiment proceeds and as time and circumstances dictate.

While it will be more difficult to grade quality of performance in the assignments in Group II, it seems reasonable to expect that if hygienists can adequately perform the projects listed in Group I, they will be able to satisfactorily do those in Group II.

4. Instruction — Time and Costs

Instructing the student hygienists should be done by each department that now teaches each assignment to the dental students, and the time and method for instructing the hygienists should, as closely as possible, duplicate that for the dental students.

On this basis, the time that should be required for teaching the projects listed above in Group I is 75 hours (see Appendix A), i.e. about one-half day per week for one academic year.

In estimating the cost of this teaching, calculations were based on a ratio of one instructor to each ten hygienists, and on an average of \$25.00 per hour salary for each instructor. On this basis the total cost for salaries would be \$9,375.00.

The materials and equipment required for this aspect of the study, an item of \$1,625.00, has been included, which brings the total estimated cost of instruction to \$11,000.00.

5. Evaluation — Method and Costs

Each item produced by the hygienists (i.e. models, space maintainers, etc.) should be evaluated (1) in terms of general overall quality and acceptability (2) for ranking within the dental hygiene class and (3) for

comparison with similar projects completed by undergraduate dental students, and in all instances the grading should be performed "blind", i.e. without the examiner knowing the origin of the item being graded. This is particularly important for the last phase of marking.

Analysis of the results will involve considerable statistical handling of data, and for this purpose an item of \$4,000.00 has been included in the estimated cost of the project. This includes the salary of a part-time technical assistant and I.B.M. services.

SUMMARY

An experiment has been outlined to determine whether the scope of training of dental hygienists can be successfully broadened without lengthening the time for their course.

It is recommended:

1. That first and second year dental hygiene students currently enrolled in the course be used as subjects for the study.
2. That the following assignments be accepted for test projects to be completed in the order listed. Those in Group I are those most easily and accurately evaluated. The projects in Group II, while in some cases of more immediate practical value, are suggested for later testing because of the difficulty in accurately grading quality of performance.

Group I (a) Digital dexterity and spatial relations tests.

(b) Taking impressions and pouring study models.

(c) Manufacture of a removable space maintainer.

(d) Manufacture of a cast space maintainer.

Group II (a) Intra-oral examination and charting.

(b) Finishing and polishing amalgams.

(c) Additional services to be determined as the experiment proceeds.

3. Instruction should be given by each individual department concerned with the teaching of each of these projects to undergraduate dental students, and the instruction should, as closely as possible, be similar to that given undergraduate dental students for the same assignments.
4. Evaluation of each completed project should be done to determine overall excellence and acceptability and for comparison with similar projects completed by dental students where possible.
5. The time involved for carrying out the study will be 75 hours.
6. The cost has been estimated at \$15,000.

Resolution of Faculty Council

A TRIBUTE TO DEAN-EMERITUS A. D. A. MASON

A few days ago news was received that the Dean-Emeritus of the Faculty of Dentistry, Dr. Arnold D. A. Mason, had passed on.

One of the last of many academic honours to be bestowed on him, and perhaps the most significant, was the conferring of the Degree of Doctor of Laws, *honoris causa*, on the occasion of the opening of the new Dental Building on November 25th, 1959. This event pleased Dr. Mason and the profession, because it signified recognition of his many contributions to the University and to the health professions. The citation presented on the occasion reads in part:

"The first dental school in Canada was established in Toronto in 1875 by the Royal College of Dental Surgeons of the Province of Ontario: Three years later, Arnold Mason was born. The youthful dental school and the youthful Arnold Mason grew up side by side. After occupying space in a number of downtown buildings, the dental school was moved to a new building at 230 College Street in the year 1909. By that time, Arnold Mason was one of the graduates of the dental school and soon to become a staff member. For a long period thereafter, his paedagogical talents, his administrative wisdom, and his personal warmth enriched the dental school and the University as a whole."

Between the lines of this citation are to be found an impressive array of contributions to Dentistry, the Arts and Letters, and his fellow man.

After graduation from Chicago in 1901 and from Toronto in 1902 he went into private practice, and joined the teaching staff of the University of Toronto in 1911. That year he was President of the Toronto Dental Society. From 1915 to 1940 he was a member of the Board of the Royal College of Dental Surgeons in Ontario, and served as its President from 1922 to 1924. He served dentistry on a national basis as Secretary of the Dominion Dental Council of Canada, during the period 1934 to 1936. In 1947, he was recognized for his leadership in dental education when he was chosen President of the American Association of Dental Schools. That same year, after serving dental education in this University for thirty-six years, he retired as Dean. Chancellor H. J. Cody, under whom Dr. Mason had served when Dr. Cody was President of the University of Toronto had this to say of Dr. Mason on the eve of his retirement:

"I wish to express to him my gratitude for all his help to me during my presidential term, as a loyal and progressive colleague. Dentists in all parts of the world cherish kindly recollections of the fine teacher, the wise adviser, and the courteous gentleman who stimulated them to be worthy members of a great profession. The whole University appreciates the unifying influence of his attitudes and personality in our varied and vital academic community."

In addition to his activities within the Dental Faculty, Dr. Mason lectured on dentistry and its relation to the health sciences in the Faculty

of Medicine, the School of Nursing, the School of Physical and Health Education, and the School of Hygiene. He was also active in the development of the early dental service at the Toronto General Hospital. For his contributions in the general field of health sciences, he was honoured by the Academy of Medicine in Toronto, when he was elected to honorary life-membership in that organization in 1951.

His special interest in preventive dentistry and dentistry for children was climaxed in his association with Dr. W. Dafoe in the care of the Dionne quintuplets. This story he recorded in 1939 in a monograph entitled "The Dental Story of the Quintuplets."

In spite of a busy life within the field of dentistry, Dr. Mason found time to enjoy the Arts. Through the years he accumulated an outstanding collection of items by Canadian artists. This interest was explored further through his active membership in the Arts and Letters Club of Toronto.

His many service contributions to the community were focused in his activity with the St. George's Society, of which he was a Past President.

There are hundreds of colleagues and friends who will relate for years to come, anecdotes and memories of their association with him on the golf course. His homely philosophy, his sly sense of humour, and kindly advice permeated every field of his varied activities, and in his days of retirement he was in his element on the golf course.

RESOLVED THAT: This statement be recorded in the Minutes of the Council of the Faculty of Dentistry, and that a copy be sent to members of Dr. Mason's family.

ACTION

Approval granted to the Experimental Training Programme respecting Dental Hygienists.

Faculty congratulated on the many progressive accomplishments outlined in the report.

Report adopted.

GOVERNMENT AND LEGISLATION AND EXAMINERS AND PETITIONS COMMITTEES

MEMBERS: A. H. Leckie, Acting Chairman; J. P. Coupland, Chairman,
G. & L. Committee; J. D. Purves, Chairman, Examiners and
Petitions Committee; W. G. Bruce; D. J. Ferguson.

REPORT

FALL MEETING

On October 13th, 1961 a joint meeting of the Examiners and Petitions Committee and Government and Legislation Committee was held. A view was expressed that inasmuch as all Canadian Dental Schools presently graduating students had been approved by a responsible and representative agency of the profession, the Board could now consider the registration of such graduates without further examination. The Committee, however, is reluctant to make such a proposal without full opportunity being accorded to the National Dental Examining Board of Canada to express itself on this matter. The Committee is most cognizant of the contributions already made by the National Dental Examining Board and desires to suggest only such policies and procedures which will enhance the contribution of the National Board in the future.

Accordingly the following resolution is presented for the consideration of the Board:

Whereas the Canadian Dental Association through its Council on Education has established minimum requirements for the approval of a Dental School, and

Whereas the Canadian Dental Association, again as a consequence of the informed and conscientious activities of the Council on Education, has approved all Canadian Dental Schools presently graduating students, and

Whereas the standards stipulated for approval of Canadian Dental Schools and surveys conducted by the Council on Education of the Canadian Dental Association are acceptable to the Board of Directors of the Royal College of Dental Surgeons of Ontario, and

Whereas the Canadian Dental Association has undertaken to review the requirements for approval of dental schools and to withdraw approval should any dental school fail to maintain the established standards, and

Whereas the National Dental Examining Board of Canada exists as an important agency of Canadian Dentistry which establishes a facility whereby provincial licensing authorities are enabled to assure themselves that applicants for provincial licensure who possess the certificate of the National Dental Examining Board of Canada have given evidence of possessing high minimum qualifications for the practice of dentistry, and

Whereas through the mechanism of conjoint examinations arranged between the National Dental Examining Board of Canada and the approved Canadian Dental Schools a means could be created to enable the provincial licensing authorities, through the National Dental Examining Board of Canada, to assure that individual graduates have achieved high minimum standards to permit the granting of registration and licensure, and

Whereas the Board of Directors of the Royal College of Dental Surgeons of Ontario encourages the expansion of the present role of the National Dental Examining Board of Canada to permit the examination of all candidates for whom a provincial licensing authority grants an enabling certificate

THEREFORE BE IT RESOLVED

THAT the Board of Directors of the Royal College of Dental Surgeons of Ontario, at its meeting in November 1962, proposes, in the absence of an arrangement which permits the acquisition of the certificate of the National Dental Examining Board of Canada by all graduates of approved Canadian Dental Schools without the present necessity of qualifying through two separate examinations, one by the approved school and the other by the National Dental Examining Board of Canada, to give approval to the following resolution and to enact the appropriate by-laws and regulations within the authority granted by The Dentistry Act of Ontario:

“THAT the Board of Directors hereby confers its official approval upon the Canadian Dental Schools which have been approved by the Canadian Dental Association and further

THAT such approval of a Canadian Dental School be immediately withdrawn upon any such date that the Canadian Dental Association withdraws its approval of the said School, and further

THAT the Examiners and Petitions Committee be authorized to create and institute any measures it deems desirable or expedient to consider and deliberate upon the credentials and qualifications of applicants from Canadian Dental Schools other than the Faculty of Dentistry of the University of Toronto, and who otherwise are not in possession of a registrable qualification, and further

THAT such credentials should include a confidential transcript of the applicant's undergraduate academic attainments and in addition an assessment of the character and abilities of the applicant provided by the Dean or other responsible official of the Dental School in which or from which the applicant is enrolled or has graduated, and further

THAT the Committee have the authority to require the applicant to pass a licensing examination conducted by the National Dental Examining Board of Canada should, in the opinion

of the Committee, the credentials and qualifications presented by the applicant not provide sufficient evidence of knowledge or competence, and further

THAT the provisions of this resolution be made applicable to applicants graduating from approved Canadian Dental Schools in the year 1963 and in succeeding years contingent upon the continuing approval of the respective school."

and further

THAT the National Dental Examining Board of Canada be strongly encouraged to provide the facilities whereby all applicants, possessing registrable qualifications in a participating province and for whom the provincial licensing authority grants enabling certificates, may be examined by the National Dental Examining Board of Canada.

Should the Board give approval to the above resolution then it is suggested that such proposals be outlined in a Brief to be presented in person to the next meeting of the National Board and that any two or all three of the President, Chairman of the Examiners and Petitions Committee and the Secretary be delegated to make the presentation.

The Fourth Dental Year Students in the Faculty of Dentistry, University of Toronto will, this year, be recommended for their degrees at approximately mid April. The Committee suggests that an April meeting of the Board would be desirable. There is a problem in that graduates of other Dental Schools would not be in a position to try their licensing examinations until the mid May period. Thus if the Board did decide to hold its Annual Meeting in April some authority would, of necessity, be required to be vested in the Examiners and Petitions Committee in order to make provision for the consideration of the results of the Board Examinations.

ACTION

Vested authority in Examiners and Petitions Committee to consider the results of Board examinations in Spring of 1962 and grant L.D.S. certificates to successful candidates.

Report adopted.

BY-LAW NO. 94

Enacted April 19th, 1962

Being a By-Law to amend By-Law No. 2, Section 5.

Be it enacted a By-Law of the Royal College of Dental Surgeons of Ontario as follows:

That By-Law No. 2, Section 5 be amended by inserting "and/or Trust Company authorized to engage in business in Ontario under the Loan or Trust Corporations Act" following the word "bank" in line 3 and the same to be inserted following the word "bank" in line 5.

REPORT

The following is respectfully submitted concerning prosecutions and investigations for the period May 1st, 1961 to December 31st, 1961.

1. Prosecutions (Dentistry Act)

(a) Skobe, Elmars, 51 Laws St., Toronto

Upon complaint from a member of the profession he was charged with 'supplying a prosthetic denture', Sec. 23 (1)(c), and also 'having dental equipment', Sec. 23 (5). A plea of guilty was entered on each charge at Magistrate's Court, Toronto on May 3rd, 1961 and fines totalling \$200.00 were paid.

(b) Hockey, Denis W., 1472 Tourangeau St., Windsor

As a result of an unsuitable denture supplied and complaint being made the following convictions were registered on pleas of guilty at Magistrate's Court, Windsor, on June 7th, 1961:

Sec. 23 (1)(c) 'supply a prosthetic denture' (previous conviction) — Fine of \$200.00 paid.

Sec. 23 (5) 'have dental equipment' — Fine of \$100.00 paid.

(c) Boisvert, Rene, 1522 Holland Rd., New Sudbury

Upon complaint from the local society, Boisvert was charged with 'having dental equipment' Sec. 23 (5). He entered a plea of guilty at Magistrate's Court, Sudbury, on June 27th, 1961 and paid fine of \$100.00.

(d) Proulx, Guy, 321 Queen St., Sudbury.

He was associated with R. Boisvert in the operation of supplying dentures and was observed in the process of delivering a wax denture for fitting purposes. Charged with 'furnishing a wax denture' Sec. 23 (1)(b), he pleaded guilty in Magistrate's Court, Sudbury, on June 27th, 1961 and paid fine of \$100.00.

(e) Boisvert, Rene, 46 Nicolet St., Sudbury.

This was a second offence and the evidence consisted of relating to the court the equipment, supplies and activities noted during search of his premises. He pleaded 'not guilty' to a charge of 'having dental equipment' Sec. 23 (5) at Magistrate's Court, Sudbury, on October 16th, 1961. A conviction was registered and fine of \$200.00 was paid.

(f) Nixon, Robert, 2 Langford Ave., Toronto.

A complaint concerning an unsuitable denture resulted in a search of the premises and the following charges being laid:

Sec. 23 (1)(c) 'supply a prosthetic denture'

Sec. 23 (5) 'have dental equipment'

He entered a plea of 'not guilty' as charged at Magistrate's Court, Toronto, on December 5th, 1961. A conviction was registered and fine of \$100.00 was paid in each case.

2. Advertising in Foreign Language Newspapers Contrary to By-Laws

A number of complaints concerning advertisements in special and regular editions of foreign language newspapers were received during the period. These advertisements were found to be contrary to By-Laws due to phraseology exceeding limits and by being oversize and of a display nature. As a result a number of cautionary type letters were issued from the office of the Registrar-Secretary. Results appear satisfactory in that present insertions have not been subject to complaint.

3. Investigations

Investigations of the following nature are included in the above:

- (a) Public complaints concerning unhygienic condition of dentists' offices.
- (b) Signs not conforming to regulations by reason of being oversize, displaying 'X-Ray' also 'specialist' without having the necessary qualification.
- (c) Complaints from patients concerning unsatisfactory work performed by dentists.

The above were effected by inspections, interview and/or correspondence and if indicated, by the Registrar-Secretary, who issued any directives necessary.

4. It is mentioned that prosecutions of **E. Skobe** and **D. W. Hockey** were handled by ex-Inspector G. A. Monahan. I would like at this time to express my appreciation for the excellent cooperation received from all members of the profession contacted during prosecutions and inquiries.

ACTION

Report adopted.

REPORT

During the year, 182 new books and six new journal subscriptions were added to the Library. There are 57 orders outstanding as of this date. 123 loans were made to out-of-town borrowers. Circulation during the year showed an increase of 1,160 items and there has been a gratifying increase in the use of all the library facilities. This increase may in part be due to the increase in registration but is also due to the instruction which the students receive in library procedures during the early years of their course. It is planned to continue these library seminars with more extensive instruction in library procedures being given to the first year. The carrol type of reading spaces are proving particularly effective. They are much appreciated by the students and received much favourable comment from the visitors on Open House Day.

Donations of books, journals and museum items are gratefully acknowledged from Drs. H. E. Armstrong, D. L. Anderson, Ford Butler, J. T. Coyne, Charles Dent, R. G. Ellis, R. J. Godfrey, Wallace Graham, G. C. Hare, H. A. Hunter, Marjorie Jackson, A. W. Lindsay, J. C. Mabey, Marshall Nevin, James Parish, J. E. Peterson, Bruce Ross, Percy Smith, Ernest Sparks, George Zimmerman and the late Dr. A. D. A. Mason.

Valuable museum donations were also received from the National Refining Co. who donated a Cavitron and many other items of historical significance. The Dental Co. of Canada donated an early X-ray machine, and the Ash Temple Co. of Canada have donated a series of early dental catalogues, some dating back to 1870, which will be of invaluable service during the indexing of the collection. A historical pilot model of the Hanau Articulator was donated by the manufacturer and through the courtesy of the Ash Co. of England we received a historical book and important historical guidance. We gratefully acknowledge the generosity and thoughtfulness of these donors.

We further gratefully acknowledge a generous gift from the Ontario Dental Association of \$4,000. ear-marked as a drawing account to be used for the restoration and display of museum items. This donation is a main-spring of progress for the museum project as, prior to its receipt, no funds of any kind were available for the development of the Museum.

Work on the Museum mural has progressed to the stage of a preliminary sketch on the wall. The basic theme is the history of Dentistry with the eastern development depicted on the left and western progress represented on the right, fusing into the present in the centre. It is proposed that the centre of the mural should give the sense of depth with the future receding in an abstract manner. This facet has not yet been finalized in the design.

Due to this support the larger items have been cleaned and restored; the smaller items have been cleaned of the gross dirt and grouped in

divisions such as prosthetics, operative, surgery, etc. The task of removing the rust and polishing the smaller items, of which there are hundreds, remains to be done. At the completion of it, there is the task of completing the accession records and the card index file, so that each item is indexed and filed so as to be readily available. This will be a costly and time-consuming operation.

There is also the necessity of considerable expenditure for physical facilities such as storage cabinets which will give maximum protection from dust and the provision of hanging space for the framed pictures. The rehabilitation of these pictures of which there are several hundred is itself a major task involving considerable expenditure. A source of funds for these activities is not presently available.

When cataloguing is finally completed there still remains the task of arranging the displays with the associated labelling and art work which must be provided, such funds are of the first order of importance.

On the whole, satisfactory progress can be reported although certain phases have progressed more slowly than anticipated. Much interest is already taking shape and if the rotary exhibits can be maintained in the display area, it will provide an interesting and highly educational opportunity for both students and the profession at large.

Grateful acknowledgment is also given to the Crown and Bridge Study Club for a donation of \$25.00 to the library contingency fund. Through these funds the library has been able to purchase a photo-copier for reproducing pages from books or theses. This copier will be invaluable in setting up the museum accession records and for duplication material which we do not wish to go out of the library.

For some time the University library has been working on a Union Catalogue which it is reproducing by photographic methods and in the near future is reproducing the cards from the Abbott collection so that they may appear in the Union Catalogue. This will involve drawing almost 6,000 cards from the catalogue which will be done by central library staff and without expense to the Dental Faculty or the dental library budget.

I am happy to report that the University has increased the dental library appropriation by \$400.00 to a total of \$1,600. Last year our appropriation was slightly over-spent and the present budget seems in accordance with our needs. The financial statement of the Harry R. Abbott fund showing the balance as of April 2nd, 1962 of \$295.17 and the comparative circulation figures for the past five years are herewith appended.

My sincere thanks are extended to the members of the Library Committee and the Assistant Librarians for their interest and cooperation throughout the year. Without them the high quality of library service that has been achieved would have been impossible. This report is respectfully submitted with the recommendation that the customary grants be continued for the ensuing year.

CIRCULATION FOR THE LAST FIVE YEARS

REPORT

FALL MEETING

1. The Annual Meeting of the N.D.E.B. was held in Ottawa on June 26th, 1961.

2. Report of the President:

Dr. H. M. Eaton expressed his appreciation of the gracious cooperation he had received from the Deans of the following dental schools which he had visited: Dalhousie University, University of Montreal, McGill University, University of Toronto and University of Manitoba.

With understandable satisfaction Dr. Eaton reported that 96 candidates had taken the N.D.E.B. examination in June, 1961. This number was compared with 84 candidates in 1960 and only 59 in 1959.

The resignation of Dean J. W. Neilson as examiner in Oral Medicine was announced with regret.

3. Report of the Registrar-Secretary — Dr. H. N. B. Beach:

A breakdown of candidates according to centres, Universities and Provinces for 1960 and 1961 appears in Appendix A.

4. The Report of the Committee of Examiners appears as Appendix B.

5. Dr. Lyman Francis of McGill University was elected by ballot to succeed Dean Neilson as examiner in Oral Medicine. The following examiners were reappointed: Dean H. R. MacLean, A. Fortier, H. M. Eaton, A. G. Racey and E. P. Downton.

6. The following officers were elected:

President	— W. F. Hancock (Saskatchewan)
Vice-President	— R. W. Ball (Newfoundland)
Executive Committee	— A. G. Racey (Quebec)
	— T. J. Cooke (Manitoba)
	— J. P. Coupland (Ontario)
	— H. N. B. Beach
Registrar-Secretary	

7. The retiring President, Dr. Hugh Eaton, was thanked for his long and valuable service to the Board and particularly for his special effort in the area of solicitation which had produced a record number of candidates in 1961.

8. Because of a conflicting engagement it will be impossible for your Representative to attend the 1962 meeting of the N.D.E.B. on June 29th. It is recommended that a replacement be chosen at the earliest date possible.

OFFICE MANAGEMENT COMMITTEE

MEMBERS: A. H. Leckie, Chairman; W. G. Bruce; D. C. Stiles.

REPORT

FALL MEETING

1. A meeting of the Office Management Committee was held on November 5th, 1961 with the purpose of reviewing policies respecting R.C.D.S. staff and to render consideration to the existing office pension plan.

2. Staff Policies

The following areas respecting pertinence to R.C.D.S. staff were reviewed: salaries, increments, bonuses, vacations, fringe benefits, sick leave, on resignation or release, and statutory holidays.

The existing policies now with the addition of Workmen's Compensation Board Coverage appear to be satisfactory for all present requirements.

3. Office Pension Plan

The Pension Plan presently in existence for eligible employees was reviewed and the Committee felt that it is highly inadequate. There were reasonable grounds to believe that moneys expended both by the R.C.D.S. and the employee were not producing benefits commensurate with such expenditures. The Secretary was requested to prepare specifications and seek observations and proposals from at least three organizations capable of providing group annuity benefits.

The Committee was unanimous in its view that the contributions of the Royal College of Dental Surgeons of Ontario within the office pension plan, on the death of an employee, should accrue directly to the designated beneficiary of the said employee.

4. Operation of the Central Office

The terms of reference of the Committee are sufficiently broad to include a review of internal office procedures. While the Secretary did express the wish that the office might be so conducted to provide the maximum contribution to the Board and the profession at large the Committee is of the opinion that the office is operating with efficiency and effectiveness and no further observations were made.

The telephone system has recently been altered in order that should the line through which the person is attempting to call into the office be busy then there is an automatic transference of call to the second line. This has assisted, significantly, in reducing the delays occasioned by persons telephoning the office.

The Committee would request authority from the Board to take whatever action it deemed necessary upon receipt of information respecting the office pension plan in order that should any new plan be found desirable it could be instituted on January 1, 1962.

Canadian Dental Association advised that a plan to provide dental care for C.D.A. and R.C.D.S. employees is worthy of consideration.

Authority vested in Office Management Committee to alter existing pension plan arrangements if desirable.

Report adopted.

REPORT

A year has now passed since you honoured me by election to this high office. I would like to thank each and every one of you for the cooperation you have given me and the way in which you have carried out your allotted tasks.

I would like to thank the Secretarial staff for their excellent and efficient handling of Board affairs. Our Registrar-Secretary-Treasurer has spent many hours in the preparation of the briefs to be presented to the Royal Commission on Health Services. As a member of the Steering Committee for the brief presented by the C.D.A. he has spent much time and effort in assisting to bring that excellent piece of work to fulfillment.

In the preparation of our own brief, to be presented to the Commission during the month of May, he has performed the task with his usual enthusiasm, in addition to keeping this office operating well and efficiently.

Our Secretary has spoken to a number of the local Dental Societies throughout the Province on the subject of Auxiliary Personnel and how they may be utilized. It is felt that as a result of this a much better attitude is now held by most of the profession.

On the evening of Mid-Winter Clinic Day in November, it was the pleasure of your President to present the certificates and pins to those young ladies who had successfully completed the Evening Course for Dental Assistants offered by the Toronto Academy. Also to those assistants who received honorary certification by virtue of their long and faithful service to the profession and to their Association.

This year courses are being offered in five other centres. In this way we will eventually have a considerable number of Certified Dental Assistants throughout the Province.

Many dentists in our Province spend a great deal of time, effort and money attending conventions, post graduate courses and seminars, to improve their knowledge, ability and service to the public. Others unfortunately do no more than attend their local society meetings while still others make no attempt whatsoever at post graduate study.

Some means should be instituted to reward those men who do so much and inspire those who do so little. This might be effected by the formation of an organization similar to Medicine's College of General Practice. This Board might consider such a proposal and if it feels it has merit, a resolution could be forwarded to the C.D.A. urging that such an organization be instituted.

Our Secretary attended a Workshop Conference on "Future Dental Manpower Requirements and the Training and Utilization of Auxiliary

Personnel", January 15th to January 19th sponsored by the University of Michigan in Detroit. You have all received his excellent report of this meeting. In this report our Secretary gave brief synopses of several of the papers presented. It is felt by some members of the Board that it would be good to bring such men to Ontario and give all the members of the profession the opportunity of hearing such presentations. This Board might consider taking steps to make this possible.

The special committee appointed to examine our pension plan met and reviewed our existing policies and examined the plans presented by our present insurer and those of four other companies. It was found that for the same premium we were paying, to provide pensions for our staff, placed with several other companies could result in a much greater financial return on the retirement of our employees. With the consent of our trustees, our existing contract was cancelled and a new contract entered into with another carrier. It is felt that we now have a most desirable pension plan for our employees.

The shortage of dentists in our Province continues and is only somewhat relieved by our new school and its greater capacity. Last Fall there were over 300 applicants for the Predental Year and of these 198 qualified for entrance to the University having 60% average or better in Grade XIII. This year, as of April first, again more than 300 applications have been received. The Predental Year can accommodate only 125 of these. It would seem that our recruitment efforts have been very successful. It is most unfortunate however that with the extreme shortage of dental personnel that exists that we can utilize much less than 50% of those desirous of entering our profession. A new dental school is needed immediately and our efforts should be directed toward this end.

There are men from the profession who act on committees on our behalf. There are the Trustees of our Pension Plan, our Representative to the Workmen's Compensation Board, The Insurance Committee, the Librarian of the Harry Abbott Library and the Steering Committee which assisted in the preparation of our Brief on Health Services. To all these men we are deeply indebted and offer our most sincere expression of appreciation.

It is to be hoped that all matters coming before this meeting with regards to policy, plans for the future and affairs of immediate concern may be dealt with to the satisfaction and advancement of the profession and that your labours will not be unnecessarily burdensome.

ACTION

1. The recommendation respecting the need for the creation of a new dental school is to be brought to the attention of appropriate governmental and university authorities. The President and Secretary are to seek an appointment with the Minister of Health.
2. Report adopted.

PROPERTY COMMITTEE

MEMBERS: R. C. Honey, Chairman; W. G. Woods; V. A. Herron.

REPORT

1. The Committee met at Headquarters on April 4th, 1962. A careful inspection of the building was made. Because of the impending building programme of the Canadian Dental Association and the consequent effect on the driveway and parking lot it is not proposed that any attention be directed to the grounds and exterior of the building until subsequent to the construction of the C.D.A. addition.

2. Maintenance Procedures to be Undertaken

The Committee authorized the following maintenance procedures:

1. Painting — one coat to apartment, all washrooms, O.D.A. and Academy offices, woodwork of main staircase, main floor reception and stenographic offices, brickwork in rear entranceway, and employees' lounge in basement.
2. Electrical — additional outlet in mailing room.
3. Plumbing — repair to toilet in basement washroom.
4. Drainwork — installation of floor drain in laundry room.
5. Carpentry — hinged doors on boardroom radiator covers to gain access to radiator valves and installation of two screens on windows of employees' lounge.
6. Furniture Repair — leather patches on arm rests of chair in Secretary's office.
7. Caulking — all windows not necessary for ventilation to be caulked and sealed.
8. Plastering — small area on wall of lower staircase at basement level.

3. Business Manager's Office

Because of the ever-increasing number of interviews and discussions being held in the office of the Business Manager and because the Committee is of the unanimous opinion that the appointments of this office do not reflect favourably upon the remainder of the main floor of the building it is recommended that the office of the Business Manager be completely refurbished to achieve the standard of function and aesthetics which exists in the adjoining offices.

4. Insurance Coverage

The Committee has authorized the substitution of the existing insurance coverage on the building and contents to a 'replacement cost coverage'

with the same carrier who underwrites the R.C.D.S. All-Risks Group Insurance Plan. In addition to the increased protection achieved there is a modest saving in premium.

5. Budget

The Committee approved the 1963 Budget as outlined in Appendix A.

PUBLIC RELATIONS COMMITTEE

MEMBERS: J. R. Hurton, Chairman; H. M. Jolley; R. C. Honey;
B. M. Jackson.

REPORT

It is my pleasure, on behalf of the Public Relations Committee, to present this the third annual report.

"The basis of public relations is professional training and ethics practised in the environment of good practice management with trained auxiliary personnel and rendering accepted dental treatment to patients in a sincere and sympathetic manner within the legal limits of our profession."

Internal Public Relations

The area of internal public relations has probably shown most activity. There is definitely an increased interest in board activities which has been influenced by the R.C.D.S. Brochure, inauguration of the *Newsletter*, closed circuit television programme, the workshop conference, and by increased activity of our directors towards bringing board problems to the individual dentists through letters and personal discussions.

There is no question of the importance of this activity and we feel that the *Newsletter*, at present, is probably the most efficient medium. The present composition is reasonably satisfactory and not only acceptable but appreciated by our members. Items referring to other than board business could be included providing they were endorsed by the Board. It might be advisable, in some circumstances, to enunciate a definition of board policy in certain specific areas. This action would prevent misunderstanding and also dissipate suppositions and rumour.

The R.C.D.S. assistants' training programme has shown a satisfactory beginning and as it develops it is certain to have a favourable influence on dental practice and will undoubtedly increase the prestige of the dental assistant.

Auxiliary Personnel

There have been many presentations on this group regarding their training and area of application. Auxiliary personnel has been defined as dental hygienists, dental nurses or assistants, receptionists, and dental technicians. It is of interest to note in the last C.D.A. Career Booklet that the duties of a hygienist may include chair-side assistance. The statement that an increased volume of service can be provided by employing at least one auxiliary can be accepted. It is unfortunate, although dentists have this information and are continually exposed to written and verbal encouragement towards the advantages to be gained by such employment, the practical acceptance is and will continue to be limited.

There are several factors which colour this situation. The pattern of dental offices is well known. It is generally an expensive project based on a limited floor space. Granting that all dentists were desirous of employing a hygienist, very few present day offices would have sufficient physical accommodation for this type of service.

The dentists practising today are usually following the precepts taught in their undergraduate training. True the majority have adopted some deviations and refinements but the basic fundamentals will be very close to training received which included the minimum or no practical experience towards the value of chair-side assistance. We can be reasonably sure that, unless the dentist has developed a practical appreciation of the value of this service during the undergraduate training, there will be no great demand for a university trained auxiliary.

We sincerely endorse the action of the Faculty of Dentistry in the setting up of a committee to study this problem and hopefully suggest that in the senior year a course of integrated training can be given in dental practice which will provide the dental undergraduate practical experience and knowledge of the value of the trained auxiliary.

External Public Relations

Significant progress has been made in this area. The public are showing increased appreciation of dentistry both as a profession and a vocation. They are beginning to recognize the seriousness of our problems and realize that only a larger professional dental personnel can provide the health services required and desired. Our profession is receiving generally favourable presentation from news media, newspapers, magazines, TV, short films and Mediscope. Activities of the Dental Public Health Field Secretary Dr. G. T. Mitton, cooperation of collegiate guidance teachers and Faculty Open House all have been effective. The final result of these efforts will depend almost completely on what measures are taken to capitalize on this increased public interest. "We must be prepared to carry on constant research and evaluation of the existing social and economic environment if we are to derive the greatest benefit from our efforts."

What is our problem? "It is only by a rapidly increasing number of dentists that we can continue to give optimum health service." It is only by providing sufficient volume of this health service that our profession can hope for continued public appreciation. The situation presented by the shortage of dental personnel being steadily aggravated by the increase of population and an *expanding* desire for dental service can provide a reaction which could prove disastrous to our profession.

The shortage of dentists has been influenced by too few undergraduates to fill our dental faculties or can be caused by insufficient dental faculties to graduate the necessary number of personnel. This is our present concern. The active recruitment programme has increased the number of students wishing to enter the dental profession. This with the changing trend towards auxiliaries in dental practice presents two necessities.

Firstly, because the dentist is the anchor or the key individual in dental practice the most urgent need is another Faculty of Dentistry in Ontario, that there may be sufficient dentists for key personnel requirements. Secondly, there should be a plan to integrate auxiliary personnel into dental practice.

Financial Aid to Students

There is a lively interest in this area. Each individual has his own picture of what the extent of financial aid to students should be. The opinions are varied but when studied in relationship to the student grouping all are applicable.

The financial grouping of the qualified students wishing to enter the Faculty of Dentistry seems to complement the necessity of extended financial aid.

Those students who are financially able to maintain themselves, and those students who may be able to maintain themselves are taken care of by the present system of bursaries, scholarships and loans.

Those students who definitely need financial help and those students interested and even anxious to enter the Faculty of Dentistry but with no possible means of meeting the financial requirements will form the largest pool of students available for increased recruitment.

It is possible to expect an increase in dental manpower, with the development of greater training facilities and more financial assistance. Part of this assistance will, of necessity, be a responsibility of our governments and will be in addition to any optimum increase in the provision of bursaries, scholarships and loans as presently understood. Suitably qualified students interested in advancing to a dental degree but financially unable to proceed should be able to apply for a conditional bursary provided by the provincial government or interested municipalities. This aid should also be available for dental hygiene students.

Public Relations Counsel

This could be a useful facet in external dental public relations. The role of a counsel in our field would differ greatly to his role in business ventures. In business there is the presentation of a favourable image of the purveyor and the introduction and/or promotion of products that sales may be increased. We have public recognition of dentistry. There is an appreciation of our health service. The public are confident that we can render competent dental service and in fact are quite insistent in seeking this service. This favourable acceptance will continue if we are able to present our ideals, desires, plans and problems in a manner which will influence the laity thought pattern towards accepting a benevolent image of the dental profession.

The use of a consultant in public relations could be advantageous, providing there is need of promoting some definite project; providing we are certain what we wish to accomplish; providing the terms of references are clearly defined and adhered to.

Brief to The Royal Commission on Health

Because the R.C.D.S. is responsible for dentistry in Ontario it is very necessary that our problems and thoughts towards future expansion of dental service to meet increasing demands should be factually and knowledgeably presented. This Brief will not only provide factual information to the Commission but will also provide an opportunity for more extensive news coverage than otherwise could be hoped for.

C.D.A. Bureau of Public Information

The Bureau of Public Information presented its first report in the C.D.A. Transactions 1961. Because this is definitely a statement of policy, function and objectives it merits close appraisal by each member of this Board.

The Director is to be commended on the concise factual manner in which the Canadian-wide public relations activity is set out. The programmes detailed in the section termed publications will not only be a guide but also a terrific aid to all regional public relations efforts.

It is natural the policy stated is designed to enhance the prestige and influence of the C.D.A. however, there will be many benefits shared by the Corporate Members. The production and distribution of the TV filmlets is a good example.

Summary

1. We have made progress in internal public relations.
2. The recruitment effort is showing marked success.
3. There is improved cooperation with our dental groups.
4. The public image of our dental profession is still favourable.

Less Favourable are:

1. Health education in dental offices has not improved.
2. No noticeable progress has been made in prepayment plans.
3. There is a continuing deterioration in the dentist-population ratio.

The increasing number of dental nurses receiving certification and the graduation of more dental hygienists suggest that this is an opportune time to prepare an educational programme concerning ways and means of improving health education in our dental offices and increasing patient appreciation of dental services.

This meeting will have information on progress of prepayment plans in the report of the Dental Services Committee. It was interesting to note that within the profession there is no great demand for such plans. Some felt that with proper communications between dentist and patient there would be no need and little demand for such a plan. Some expressed the opinion that it would be a wasted effort to develop any plans because of

the almost certain introduction of complete government health services. Others maintained the shortage of dental manpower would prevent successful operation of either prepayment or government plans but thought we should have one or more practical plans prepared as insurance against an unexpected demand.

The shortage of dentists is, and will be, our biggest problem until there is an improvement in the dentist-patient ratio. The population of Ontario has increased 33% in the past 10 years while the dental register gained but 16.5%. Throughout Ontario there is a great variation in the availability of dental treatment. A number of dentists in some of the larger urban centres maintain there is no shortage of service and that many offices are not being used to capacity. In other localities dental appointments may require up to six months of waiting and may even be unobtainable. In the more unfortunate areas dental treatment is not available. Dental offices, fully equipped, are vacant and being dismantled for lack of replacement personnel. The situation is serious. The members of this Committee are agreed that continued improvement in external public relations is largely dependent on the ability of our profession to provide dental health services in sufficient volume to satisfy the requirements of those persons seeking this service. We must accept realities. It is going to be very difficult to plan an effective external programme unless we are given something definite to build on. It is the hope of our Committee that before the conclusion of this meeting the Board will define a statement of policy.

There is still much to do in this field. We have tried to give you some information on the state of dentistry in the area of public contact. The effort towards more intensive internal organization is sound and will take several years to develop; however, this is a defensive approach and will not solve our urgent problems. We have stated there is no improvement in health education in dental offices. We must also recognize that continuous pressure of an increasing demand for dental service will cause gradual deterioration of treatment provided. In some areas this is becoming evident.

There is a rapidly changing pattern of thinking towards both education and health services. Dr. Dymond of the provincial government has shown interest in our problems in a practical way. It is reasonable to anticipate further cooperation. The R.C.D.S. Board should present plans to increase the volume of dentistry and should provide leadership towards fulfillment of these plans.

I would express my appreciation to Dr. Ralph Honey, Dr. Harry Jolley, and Dr. Bruce Jackson for their help, cooperation and encouragement toward the preparation of this report. On behalf of our Committee I sincerely hope the contents will be stimulating and helpful in the deliberations of the Board.

ACTION

Report adopted.

REPORT

It is a privilege to present my sixth annual report for the consideration of the Board.

1. Brief to The Royal Commission on Health Services

Much of your Secretary's time during the past several months has been consumed in the development of presentations to the Royal Commission on Health Services. He was privileged to serve on the Steering Committees for the Briefs developed by the Canadian Dental Association and the Faculty of Dentistry of the University of Toronto. Many hours were spent on the former and the product of the work of the C.D.A. Headquarters Staff, the deliberations of the Steering Committee, and the ratification of the Executive Council was presented to the Commission in March 1962. This Brief is now obtainable from the Association, without charge, by any member who requests it.

The development of the Ontario presentation occasioned certain difficulties because it seemed inappropriate to repeat the extensive factual information included in the C.D.A. Brief. Thus only those considerations of particular applicability to the provision of dental services in Ontario were enunciated in the combined R.C.D.S.-O.D.A. Brief.

In all, some 26 recommendations were made. For each recommendation a supporting statement was offered. In addition the organization and function of both the R.C.D.S. and the O.D.A. were enunciated. Four tables having pertinence to the contents were also included.

The 26 recommendations referred to the following:

1. A new dental school for Ontario.
2. Dental teachers and research personnel.
3. Dental clinic — Faculty of Dentistry.
4. Specialists.
5. Expenses of post-graduate courses.
6. Recruitment.
7. Students from rural areas.
8. University fees and expenses.
9. Student financial aid.
10. Dental research.
11. Fluoridation.

12. Dental health educational programmes.
13. Salaries of public health dentists.
14. National dental health index.
15. Demands for dental service.
16. Extension of auxiliary services.
17. Dental hygienists.
18. Training dental technicians.
19. Training dental assistants.
20. Training dental students in the use of assistants.
21. Dental services in hospitals.
22. Outpatient dental services.
23. Cleft palate centres.
24. Public assistance treatment programmes.
25. Placement of dentists in rural areas.
26. Dental services in remote areas.

The Steering Committee for this Brief was comprised of Dr. Edward R. Bilkey, Chairman; Dr. J. G. Chalmers, appointed by the Ontario Dental Association, and Dr. John Speck, appointed by the President of this Board. This Committee, in reviewing the initial draft, made significant and important contributions to the presentation. Your Secretary is most appreciative of their many pertinent comments and observations.

Both the Board of Governors of the Ontario Dental Association and this Board have had opportunity to review the content of the Brief. It is hoped that the document will be found to be satisfactory and its contents ratified for presentation to the Royal Commission on Health Services during the week of May 7th, 1962 at the Public Hearings in Toronto.

2. Workshop Conference on Auxiliary Personnel

From January 15th to 19th, 1962, your Secretary attended the Workshop Conference on "Future Dental Manpower Requirements and the Training and Utilization of Auxiliary Personnel." This conference was presented by the University of Michigan with the support of the W. K. Kellogg Foundation Institute, Graduate and Post-Graduate Dentistry, with the cooperation and assistance of the American Dental Association and the American Association of Dental Schools.

It would be an impossible task within this report to attempt to outline a conference as extensive in its purposes and activities as this conference proved to be. In addition to the 40 pages of source material we received at the outset, we listened during the course of the first four days of the conference to some 15 papers presented by highly competent and knowledgeable individuals. The eight Workshop Committees, in turn, presented an aggregate of 77 pages of reports upon which the general assembly acted on the final day.

The full proceedings of this conference will, shortly, be published by the University of Michigan. It is strongly recommended that each member of our profession read this important report.

Although many views and opinions were expressed during the conference one must unhesitatingly conclude that there is a changing appreciation within the profession of the developing role of auxiliary personnel. There was unanimous agreement that a guiding principle in professional pursuits should be that wherever possible and feasible personnel of superior training should not routinely be performing procedures which can, with comparable effectiveness, be performed by those of lesser training to whom such procedures have been delegated under the responsible supervision and control of the fully qualified professional person.

In providing dental care a dentist must assume *full* responsibility for all dental treatment services rendered for his patient. He must not delegate to others any services which require for their provision the scientific knowledge and competence of the licensed dentist.

If there is agreement that these principles are sound then it should not be too difficult to create an academic and legal environment which would make the application of such principles possible.

3. Licensing Regulations

In the more than ninety years of Dentistry's statutory existence in Canada our profession has made outstanding progress in dental education, treatment procedures, organizational efforts, research, and public health. It is suggested, with respect, that regulations pertaining to the rights and privileges of practice have not kept pace with the growing maturity of Canadian dentistry.

As the British North America Act confers upon the provinces of Canada the right to legislate in matters of health and education we have a multiplicity of regulations in respect of dental licensure. Each province possesses its official licensing board charged with the responsibility of determining who shall practise dentistry within its boundaries.

The dental profession itself must retain the responsibility of establishing the educational requirements of those who propose to practise dentistry. It is a firmly established tenet of any profession, whose members are registered and provide professional services for the public, that the profession is the only group capable of determining and understanding the various qualifications and requisites for membership in it. The profession must have the indisputable right to ascertain whether or not the various schools of dentistry are selecting students with appropriate pre-professional training and once admitted that these students acquire an educational and training experience sufficient to permit them to provide a high standard of dental care to the public following graduation.

The Council on Education of the Canadian Dental Association, following the establishment of principles for the approval of schools, appointed a most competent Survey Committee to assess the various Canadian dental schools in respect to their overall relationship to the established

principles. Eventually all Canadian schools were approved by the Council and as an indication of the standards insisted upon, the comparable Council of the American Dental Association granted its approval to the Canadian dental schools as well. Canada's most recent dental school will undoubtedly enjoy official accreditation by the time the first class is to be graduated. Thus the profession, through the Canadian Dental Association, a voluntary organization comprised of the ten provincial corporate members who within themselves are responsible for licensure arrangements, has assured itself that these schools are providing a high standard of dental education.

In view of the above one may be forgiven if he believes there are inconsistencies in our licensing arrangements. One example may be cited.

In Ontario, The Royal College of Dental Surgeons, in effect, accepts the final examinations of the Faculty of Dentistry of The University of Toronto as the licensing examinations for the class graduating from that Faculty. Providing the student possesses his qualifying certificate he can be registered in Ontario immediately upon notification by the Faculty to the Board that he has successfully completed his final examinations. A similar arrangement exists in Nova Scotia wherein the Nova Scotia Board accepts the examinations of the Faculty of Dentistry of Dalhousie University as the licensing examinations for the final year students from that institution. This Board will not recognize, on the same basis, the Dalhousie graduate, nor will the Nova Scotia Board accept the Toronto student. In each instance a further examination is required.

In effect, what is being said in this situation? Is not this Board saying, "While we have confidence in the calibre of the graduate of Toronto, we do not regard the Dalhousie graduate as being similarly qualified?" And is the Nova Scotia Board not expressing the same sentiments only with the geographic locations reversed?

I am positive that informed and thoughtful dentists in both provinces really do not believe, geographic pride aside, the students of one Faculty, generally, are more competent than those of the other. This is even more incongruous when it is realized that Ontario and Nova Scotia accept the lowest passing standard of their respective students but would examine the highest academically qualified from the other province's school.

How then may a reasonable and justifiable procedure be developed keeping in mind the prerogative of the profession and the attained approval of all the dental schools? There are, I believe, two methods and each can engender many arguments to support it.

Firstly, as the Canadian dental schools have all been accredited by an agency of the profession in which the provincial licensing boards participate, evidence of graduation from such a school might be sufficient in itself to assure professional competence and permit registration without further examination. Secondly, a further development of the National Dental Examining Board of Canada could be the means of synthesizing a solution which would retain the prerogatives of the profession, give recognition to the attained approval of all dental schools, and provide a facility for examining candidates, who although possessing registrable qualifications are not graduates of Canadian dental schools.

If this Board made possession of the N.D.E.B. certificate mandatory for registration in Ontario two immediate benefits would accrue:

1. The graduates of all approved Canadian dental schools would be considered for registration on an equal basis.
2. The Board would not be required to conduct any licensing examinations.

This Board is already on record in expressing its willingness to make the possession of the N.D.E.B. certificate mandatory providing the N.D.E.B. does not require that candidates write an additional set of examinations subsequent to graduation from their respective approved schools. Such graduation is obviously indicative that the candidates have already satisfied the minimum requirements of the approved schools as determined by the examinations of the schools.

The N.D.E.B. could establish its own requirements for approval of Canadian dental schools or it could associate itself with the Council on Education of the Canadian Dental Association in this venture. The N.D.E.B. could satisfy itself that the final examinations of the respective dental schools are sufficiently comprehensive to warrant their recognition for N.D.E.B. purposes.

The National Dental Examining Board of Canada must be encouraged to so amend its regulations that it will be prepared to conduct a licensing examination for any candidate for whom a provincial registrar provides an enabling certificate. Thus candidates who possess the B.D.S. degree of a United Kingdom, Australian, or New Zealand dental school and candidates who possess the F.D.S. of the Royal College of Surgeons of England or Edinburgh could obtain their academic entitlement to registration through the acquisition of an N.D.E.B. certificate.

Unfortunately, the position of Ontario in respect of the National Dental Examining Board of Canada appears to be misunderstood in several quarters. By the above suggestions it should be perfectly obvious that Ontario would be not only anxious to assure the continuance of the N.D.E.B. but indeed would desire that the function of the N.D.E.B. be expanded to meet contemporary requirements.

4. Specialists' Qualifications

The method at present being followed by this Board in respect of the certification of Specialists perhaps needs some review. Regulations have been established in respect of the five certifiable specialties and with the assistance of a Liason sub-committee the Examiners and Petitions Committee of the Board attempts to determine the suitability of the various candidates. While this method has, in practice, worked reasonably well, it is difficult to believe that this is the best method which should be employed.

It seems reasonable to suggest that the persons most competent to determine the requirements of specialization in, let us say, periodontics, are the periodontists themselves. While the Ontario system certainly

utilizes the consultative services of appointed periodontists, these consultants would, I am sure, be desirous of having a more formalized procedure established.

As the profession has, over the years, worked assiduously toward the establishment of national standards of undergraduate dental education perhaps now a similar effort should be expended toward the development of national standards for specialty certification.

The Canadian Dental Association, through its Specialists' and Specialization Committee is giving concerned consideration to the possibility of creating a Royal College of Dentists of Canada. Such a college, it is understood, would be established only to provide a Fellowship in one or more of the constituent specialties. To date the suggestion of an extension of the role of such a Royal College to include a certification programme has been resisted. Thus such a Royal College would not serve as a facility through which the requirements for speciality certification could be determined and verified.

There appear to be two avenues through which national uniformity in specialty requirements could be met. The first has already been alluded to. Should a Royal College of Dentists of Canada be constituted then it would seem desirable that consideration be given to the establishment of a certificate which could be presented to a provincial licensing board for specialty certification. An alternative would be for the National Dental Examining Board of Canada to establish a "Specialty Division."

Thus either in the Royal College or in the Specialty Division specialists themselves could determine the criteria upon which certification in a specialty should be based. Either through specialty examinations or through approval of graduate course programmes such a national agency could provide a successful candidate with a certificate in his designated specialty which could, in turn, be presented to a participating province for specialty registration.

I believe the time is long overdue for a national consideration of this problem.

5. Temporary Registration

As the Board conducts licensing examinations only twice each year the interval between examinations occasionally causes some inconvenience for candidates possessing registrable qualifications. Should, for instance, a B.D.S. candidate from the United Kingdom arrive in Ontario in June he would be unable to obtain registration until subsequent to successful completion of the licensing examinations in November. In the meantime he might have opportunity to become associated as an employee of an R.C.D.S. licentiate.

Perhaps it would be judicious for the Board to review whether or not the lack of a means for temporary registration is justified. Dentists possessing registrable qualifications might be considered for registration on a Temporary Register for the purpose of holding a locum tenens or temporary assistantship in Ontario, or employment in a hospital in Ontario. A

person so registered should be able to charge or accept professional fees, prescribe drugs regulated by the Opium and Narcotic Drug Act and the schedules under the Pharmacy Act and the Food and Drugs Act.

Temporary registration if instituted should be permitted only until the next succeeding set of licensing examinations.

The administration involved does not appear unduly complicated. An appropriate registration fee would be assessed. The applicant would complete all forms now required for acceptance for the licensing examinations. No new procedures would have to be instituted other than the necessary follow-up at the time the candidate would be required to take his examinations.

6. Commercially Sponsored Dental Assistants' Courses

The Board, at its 1961 Fall Meeting, authorized a communication being forwarded to the Minister of Education suggesting that schools which allege to provide courses in Dental Assisting or Dental Nursing be required to adhere to the provisions of the Trade Schools Regulations Act. Section 20 now includes 'Dental Assistant Training' and 'Dental Nursing' as a calling, vocation, or trade, within the meaning of the Act.

Thus it will henceforth be required for any such school to register with the Department of Education. The various regulations which apply to the other callings, vocations, or trades now apply with equal force in respect of schools offering Dental Assisting or Dental Nursing programmes. This inclusion of Dental Nursing or Dental Assisting in Section 20 is a most desirable development as the abuses which have been so rampant in the past should, in the future, be minimized.

This development in no way affects a privately operated school directed and controlled by an Ontario religious organization or by a corporation or organization legally constituted under Ontario law and not operated for profit.

7. R.C.D.S. Admission Scholarship

The Senate of the University of Toronto has approved the creation of an Admission Scholarship established in the Faculty of Dentistry with a value of \$600.00 per year. The awarding body is the Council of the Faculty and the Donor is the Royal College of Dental Surgeons of Ontario.

A candidate must:

1. be an Ontario resident,
2. register in the pre-dental year
3. have the highest average in the Grade XIII examinations, having taken these examinations in one year;
4. have an average of not less than 75% in these examinations.

No application is required and the first award is to be enjoyed in session 1962-63. The award is an annual one subject to one year's notice of withdrawal by the donor. It is tenable with other awards except other admission awards confined to dental students. Financial need is not a factor. The scholarship is non-cumulative, that is, if not awarded in any year the money for that year will revert to the donor.

By action of the Faculty Council, subsequently ratified by the Senate and the Board of Governors, the Predental Year will be withdrawn from the Faculty of Dentistry for the Session 1963-64 and admission to the Faculty will be directly to the First Dental Year. Thus it will be necessary, should it be the desire of the Board to perpetuate this award, to alter its terms in accordance with the new situation.

8. Subsidization of Dental Students from Rural Areas

On December 12th your Secretary met with the Honourable M. B. Dymond, Minister of Health, at his request. Dr. Dymond expressed the government's concern relative to the unavailability of dental care in many rural communities. He sought our opinion on student subsidization as a means of obtaining services for these rural communities.

While, at this moment, plans have not been completed, the Minister has had his estimate approved by the Legislature. Commencing, presumably in the fall of 1962, there will be available \$10,000.00 to assist ten dental students from rural areas to pursue dentistry as a career. The methods by which these students will be selected and the requirements placed upon them for service subsequent to graduation have not been determined. It is expected that students, thus assisted, will undertake to return to areas where there is a shortage of dentists. The first year programme will probably be in the nature of an experiment and if it proves successful there is every reason to hope that the same ten students will receive support in their second year and an additional ten students will be aided in the first year.

A similar programme for medical students attests to the Minister's concern that our rural communities should receive their proportionate share of practitioners.

9. Recruitment Display

Your Secretary has been assured by the Dental Alumni Association that the Recruitment Display, for which the Board has given budgetary cognizance to the extent of \$500.00 and whose creation and development have been undertaken by the Association, will be ready for use this Fall. The content of the display has long since been determined but considerable difficulty was encountered in acquiring appropriate illustrative material.

10. Group Insurances — Liability and All Risks

(a) Liability

The Comprehensive Group Liability Programme continues to enjoy enthusiastic acceptance by the profession. The following is the participation on April 1st, 1962:

Province	1 Year Premium	3 Year Premium	Total
Alberta	165	73	238
Saskatchewan	38	20	58
Manitoba	68	39	107
Ontario	1016	319	1335
	1287	451	1738

Since the inception of the plan, 22 settlements have been made, 16 of them for bodily injury and the remaining 6 for property damage. These settlements represented an expenditure of \$5,354.00. In addition there are 10 claims for which some financial settlement may yet be required. The 7 claims for bodily injury involve a sum of \$3,225.00 and the 3 claims for property damage total \$525.00.

On behalf of the Insurance Advisors it is requested that the Board grant authority to the Advisors to negotiate and, if successful, institute improvements to the existing plan without increase in premium. Rather than the three-year rate which now exists as three times the annual premium less 10%, attempt should be made to establish it at 2½ times the annual premium. This should increase participation on the three-year basis. For the members already holding Three-Year Certificates a pro-rated allowance would be given. Voluntary medical payments to the extent of \$100.00 and an increase on the property damage to a limit of \$10,000.00 appear justified on the basis of claims' experience of the plan.

It is gratifying to report that the New Brunswick Dental Society will soon be joining the participating dental organizations of the provinces of Alberta, Saskatchewan, Manitoba, and Ontario.

(b) All Risks

Participation in the All-Risk Replacement Cost Insurance has not risen to expectations. By March 30th, 1962, 246 policies had been issued with a total premium of \$14,574.63. There are, probably, two main reasons for this relatively low participation. Firstly, prior to the inauguration of this programme it was difficult to find any member who had replacement cost insurance. This type of coverage was not encouraged by representatives or agents of general insurance companies. In fact, many members have indicated that they did not know of the existence of replacement cost insurance. In order to be competitive with the group plan there is now fairly active promotion of this type of coverage. Secondly, the premium structure has not been particularly persuasive with dentists whose offices are located in buildings of minimum fire risk.

Again, on behalf of the Advisors, it is requested that the Board grant authority to the Advisors to negotiate and, if successful, institute appropriate improvements to the plan. It seems reasonable to suggest a premium structure in, perhaps, three categories—(1) preferred risks, (2) good risks and (3) ordinary risks. We should not accept any premium increase for ordinary risks but we should seek decreases in the other two categories.

Administration

Canadian Dental Service Plans Incorporated has assumed administrative oversight of both plans. Not only has the administration been effective

and efficient but the direct relationship between D.S.P.I. and the R.C.D.S. has permitted an attention to the interests of the profession not heretofore possible. As an example of the value of this relationship it has become standard practice that upon acquisition of information respecting the death of a licentiate by the R.C.D.S. there is an automatic referral of this fact to D.S.P.I. Should the deceased member have been a participant in either plan there is an immediate transmission to the estate of a premium rebate for any unexpired coverage period. The Administrator is increasingly being consulted by members of the profession relative to their insurance coverage in these areas and he is able to give sound and objective advice.

11. R.C.D.S. Employees' Pension Plan

Acting on the authority granted by the Board, the Special Committee on Staff instituted a new office pension plan effective January 1, 1962.

The new plan is a money-purchase group annuity with all eligible employees being covered under one master contract. On the January 1st following the 65th birthday of an employee he will receive a pension that is guaranteed for life but in any event for ten years certain.

An employee may select any other form of annuity which is actuarially equivalent to the normal form, e.g., a pension complementing the old age pension programme, a joint or last survivor type of pension, or any other type of pension that is satisfactory to the carrier.

While the normal retirement age is January 1st following the 65th birthday, there is an optional retirement from age 55 to age 70 with the consent of the employer.

The employee's contributions vest immediately in the employee and the employer's funds also vest immediately in the employee providing funds are taken in the form of a deferred annuity at retirement age.

Should an employee leave the employ of the Royal College of Dental Surgeons there is a cash return of employee's contributions plus interest at 4%. If taken as a deferred annuity employee's contribution plus employer's contribution are returned with interest at 4%. The death benefit is return of all contributions (both employer and employee) with interest at 4%.

The features of the plan are:

1. Rates guaranteed for five years.
2. No withdrawal charge upon termination of employment.
3. In the case of a total and permanent disability the employee, with the consent of the Board, may receive a lump sum as opposed to a deferred annuity.

There were cash values established in the old plans and these were transferred to the new carrier. It is interesting to note that on these sums

alone the paid-up pensions were increased anywhere from 30% to 70% dependent upon the length of time the money would be on deposit on behalf of each employee.

12. Pension Plan for Dental Auxiliaries

Some time ago the Board circulated the Ontario profession with a questionnaire respecting the interest of the members in establishing a pension plan for their employees. It was recognized that individual action was difficult and did not lend itself, generally speaking, to economies and ease of administration. Approximately 125 dentists indicated they might be interested. Because the advisor we consulted at that time made no mention of group annuity programmes it was thought there was insufficient interest to warrant the Board proceeding further. The information obtained was then forwarded to the Canadian Dental Association for any action it saw fit to follow. To date, none has eventuated.

By the utilization of the group annuity programme it is now possible to establish a participating pension plan for employees of dentists with relatively few individuals necessary to initiate the arrangement. That there can be a need for such a programme is scarcely arguable. It is suggested that this Board might now wish to provide the machinery to establish a programme in Ontario.

The purpose of such a group annuity programme would be to provide a more advantageous pension than the dental assistant could obtain individually and, in addition, provide the dentist with a means of control which he would not enjoy should he be subsidizing the individual programme of his assistant.

It is suggested an employee complete two years of continuous service with the same dentists in order to reduce excessive turn-over in the plan. Both the employee and the employer should contribute. The employee contributes 5% of her regular monthly salary. For the purpose of the pension plan salaries may be adjusted once a year and any change in salary would be reported on the anniversary date following such change. Employees should be able to make arrangements to contribute additional amounts over and above the basic 5% into the pension plan. The employer contributes an additional 5% of monthly salary on behalf of each participating employee.

If the employee leaves the service of the dentist for any reason other than death such an employee should be entitled to a percentage of the contribution made by the dentist on the employee's behalf. The vesting provision might be as follows:

- 50% after ten years of continuous service;
- 60% after eleven years of continuous service;
- 70% after twelve years of continuous service;
- 80% after thirteen years of continuous service;
- 90% after fourteen years of continuous service;
- 100% after fifteen years of continuous service.

If the employee lives through to retirement then the employee will receive a pension payable as long as the employee lives. The employee may elect any optional form of pension — that is the employee might select a pension which would complement the old age pension.

If the employee dies after retirement but before the employee receives 120 monthly payments, then the balance of such 120 monthly payments would be paid to the employee's designated beneficiary or estate. If the employee dies prior to retirement then all contributions (both the employee's and the dentist's) plus interest at 4% would be paid to the designated beneficiary or estate.

If the employee withdraws from service before retirement the employee would receive:

- Option (a) The cash return of all the employee's contributions plus interest at 4%.
- Option (b) A paid-up deferred pension purchased by the employee's contributions and any of the dentist's contributions that might be vested in the employee at the time of termination.

In the case of the employee terminating her employment the dentist would receive a credit equal to 96% of the total contribution (both employee and employer) made on behalf of such employee with interest at the rate of 4% per annum, less the cash reimbursement to the employee.

If the dentist retires, dies, or voluntarily terminates the plan then the moneys that he has paid in on behalf of his employees until that date, vest fully in his employees and each employee would receive a deferred paid-up annuity that could be purchased by the total contribution on the employee's behalf.

The following is a projection based on female lives retiring at age 65 and based on a premium payment of \$300.00 a year, payable monthly in advance:

Age 25 — \$189.71 per month

Age 35 — \$113.59 per month

Age 45 — \$ 56.44 per month

Should the Board feel there is merit in pursuing this proposal it might see fit to authorize the Insurance Advisors to institute the necessary arrangements.

13. Purchase of Dentists' Current Accounts

During the year we have been apprised of the efforts of an organization to enter into contracts with dentists to purchase their current accounts and subsequently effect collection from the patients involved.

Once the dentist sells his current accounts he no longer has any jurisdiction over their collection. Any criticisms which could arise through such collection procedures will, of necessity, be experienced by the professional man who provided the services and by the profession of which he is a member.

Your Secretary has expressed to several dentists who have communicated with him and to two officials of the Company involved, his view that such a practice is professionally unacceptable. The Chairman of the Ethics Committee of the Canadian Dental Association shares this view. The College of Physicians and Surgeons of Ontario has taken a like position. In the Legislature the Honourable M. B. Dymond, Minister of Health, expressed his opposition to this practice in a most forceful manner.

The Board, here, may wish to provide further direction.

14. Biographical Data

The Board, at its last annual meeting, authorized the distribution of a Biographical Questionnaire to the profession. Approximately 1,500 questionnaires were returned and have been filed in the respective members' folders. The cooperation of those who returned these questionnaires is much appreciated. Valuable information is now on file for reference when required.

15. Past President, Arnold D. A. Mason

It is with profound regret that we record the death, on March 26th, 1962 of Dr. A. D. A. Mason, Dean Emeritus of the Faculty of Dentistry, University of Toronto and a Past President of this College.

Following graduation from Chicago in 1901 and from the School of Dentistry of the Royal College of Dental Surgeons of Ontario in 1902 he entered private practice later joining the teaching staff of the School of Dentistry of the Royal College of Dental Surgeons in 1911. That year he was President of the Toronto Dental Society. From 1915 to 1940 he was a member of this Board and functioned as its President from 1922 to 1924. He served dentistry on a national basis as Secretary of the Dominion Dental Council during the period 1934 to 1936. In 1947, he was recognized for his leadership in dental education when he was chosen President of the American Association of Dental Schools. That same year, after serving dental education in the University of Toronto for thirty-six years, he retired as Dean.

One of the last of many academic honours to be bestowed on Dr. Mason and perhaps the most significant, was the conferring of the Degree of Doctor of Laws, *honoris causa*, on the occasion of the opening of the new Dental Building on November 25th, 1959. The citation presented on that occasion included the following comment — "... his paedagogical talents, his administrative wisdom, and his personal warmth enriched the dental school and the University as a whole."

Arnold Mason will be missed by all who knew him.

16. Board Elections

It will again be necessary this fall to conduct the biennial election for positions on the Board of Directors of the Royal College of Dental Surgeons of Ontario. For this purpose it is required that Scrutineers be appointed in accordance with By-Law #14, section 13.

17. Licences Issued for 1961

Dentists

Licences Issued — Active	2438	
— Inactive	6	
— Life Members	102	
Total licences issued December 31, 1961	2546	
Deceased since issuance	16	
Out-of-province	46	
Licensed dentists in Ontario	2484	2546
Increase in Licences issued over previous year	2546—2438	108

Additions

18. Licentiates Deceased — Life Members — Extramural and Extension Lectures — Dentist-Population Ratios

1. Appended is a list of Licentiates who died during the eight-month period, May 1st to December 31st, 1961 (Appendix A).
2. A list of proposed Life Members is presented to be added this year (Appendix B).
3. The Extramural and Extension Lecture Service is presented for the eight-month period, May 1st to December 31st, 1961 (Appendix C).
4. The dentist-population ratio by counties and districts is presented (Appendix D). The ratio is almost unchanged from last year—1/2394 to 1/2396.

19. Conclusion

It has been a privilege for all of us at Headquarters to serve the Board, the Public, and the Profession during the past year. As Secretary I would be remiss if I did not extend to all members of our staff personal appreciation for the concerned and conscientious manner in which they have discharged the many responsibilities assigned to them.

In a sense it has been a year of some frustrations because achievements, it seems to me, have not been commensurate with time and effort expended. Activities in respect of the development of various presentations to the Royal Commission on Health Services and the presentation of many addresses to dental and lay groups have drastically reduced available time for efforts of greater practical pertinence to the various committees of this Board. I hope that subsequent to the Public Hearings of the Commission it will be possible for us to focus our attention on matters of future concern and importance unencumbered with a continuance of the disproportionate amount of time and effort which has been consumed in the documentation and explanation of policies and projects previously conceived and activated.

LICENTIATES DECEASED

May 1st, 1961 to December 31st, 1961

	1932 Alstad, Trygve Atlo	Toronto	May 25, 1961
	1923 Bruce, Harold Leroy	Toronto	June 9, 1961
	1924 Davey, Harold Keith	Toronto	May 31, 1961
r	1921 Dixon, Elliott Rupert	Walkerton	Oct. 5, 1961
r	1909 Fisher, Robert Elward	Toronto	Oct. 28, 1961
	1917 Gilbert, Roy Alexander	St. Thomas	Nov. 2, 1961
*	1912 Hall, Robert Vernoy	Deseronto	Aug. 28, 1961
	1926 Hewitt, Charles George	Islington	June 27, 1961
*	1912 McDonald, Ernest Carlyle	Toronto	Sept. 17, 1961
*	1903 MacMurray, William John	Toronto	Nov. 10, 1961
	1914 Roos, Edward Aaron	Mount Forest	Nov. 8, 1961
	1958 Schwabe, Hans Joachim	Toronto	July 4, 1961
r	1916 Sinclair, William Stewart Hay	Ottawa	June 13, 1961
	1930 Stanley, Howard O. Edward	Ottawa	May 21, 1961
	1923 Wentworth, Frederick John	Brantford	July 21, 1961
	1936 Wildfong, Harry John	Toronto	Aug. 27, 1961
	1917 Wood, Russell Clifford	Tottenham	Aug. 28, 1961

* Life Member r Retired

ACTION

1. The working papers and initial draft of the Brief to the Royal Commission on Health Services had been prepared by the Secretary. A Steering Committee comprised of Dr. Edward R. Bilkey, Chairman; Dr. J. G. Chalmers, and Dr. John Speck reviewed the Brief on March 22, 1962 and at that time appropriate amendments were effected. The Brief was then referred to the Board of Directors of the Royal College of Dental Surgeons of Ontario and the Board of Governors of the Ontario Dental Association, having received the approbation of the Steering Committee. The Executive Committee of the Ontario Dental Association received the Brief on April 10, 1962 and, except for a few typographical errors, the Brief was approved as presented to them. The Brief was then reviewed in detail by the Board and a resolution unanimously adopting the Brief and complimenting those responsible for its development ensued.

A printing of 3,000 copies was authorized to enable distribution to each member.
3. The Secretary was instructed to prepare a Brief for presentation to the 1962 Annual Meeting of the National Dental Examining Board containing proposals for changes in the regulations of the N.D.E.B., the Brief to be supported by a delegation consisting of the President, Vice-President and Secretary.
5. The Examiners and Petitions Committee was asked to consider the factors pertinent to Temporary Registration with a view to reporting to the Board at a subsequent meeting.
10. Authority was granted to the Insurance Advisors to negotiate and institute appropriate improvements to the Comprehensive Group Liability Programme and to the All-Risks Replacement Cost Insurance without increase in premium.
12. Approval was given to the creation of a facility to permit, on a group annuity basis, the development of a Pension Plan for Dental Auxiliaries and the Insurance Advisors were requested to take appropriate action.

13. The following resolution was adopted unanimously:

"That the conduct of the practice of dentistry in the Province of Ontario is based on a personal relationship between the dentist and the patient which applies with equal emphasis to the financial as to the professional aspects of practice, and further

That the interposition of a third party not directly under the control of the dentist in this relationship prior to the exhaustion of all reasonable efforts for the collection of unpaid accounts by the dentist or his controlled agent is therefore contrary to the established policy of the R.C.D.S. and further

That this would preclude the sale of patients' accounts and the employment of other financial arrangements not in keeping with the letter and the spirit of good personal dentist-patient relationships."

16. Dr. R. S. Woollatt and Mr. Colin C. Rous were appointed Scrutineers at the forthcoming Board elections.

18(b). Approved Life Membership to eleven members all registered in 1913 and having continuous registration since that time.

Report adopted.

REPORT

1. For the period May 1st to December 31st, 1961, actual income was significantly higher than budget and expenditures were considerably less. An estimated excess of disbursements over receipts for the period was \$154,716.84. The actual is \$144,206.22. Explanation of excess disbursements over receipts during the partial year May 1st to December 31st, 1961, was provided in the report of the Treasurer, last year.
2. The two items of expenditure significantly in excess of budget were (1) Printing, Stationery, Office Supplies, and (2) Postage and Telephone.
3. The content of the Auditor's Report reflects the decision of the Board, made at the November 1960 meeting, to simplify the Annual Audit. The Auditor, therefore, has presented only the Balance Sheet and the bond holdings of the Board.
4. On the basis of the authority granted at the 1961 Fall Meeting of the Board, the Treasurer contacted the investment firm of A. E. Ames relative to the possible investment of approximately \$10,000.00 in some suitable bond issue. Following a discussion of the merits of several issues and following consultation with the Chairman of the Finance Committee, bonds having a par value of \$10,000.00 were purchased. The bonds are Ontario Hydro Bonds, guaranteed by the Province of Ontario, 5%, due October 15th, 1976-78. The price was 98¾ and the yield is 5.11. It will be noted from the list of bond holdings that the maturity date blends rather well with the progression of maturities. The bond is callable in 1976 and if that eventuates its yield would be slightly higher.
5. Perhaps some consideration should be given to the basis upon which the grant to the Canadian Dental Association is calculated. For the 1960-61 period the C.D.A. grant was 53.8% of revenue derived from fees. For the period 1961, the percentage rose to 54.4%. The grant is at present calculated on a per capita basis of \$40.00 for each member, active, life, inactive, and student who holds a licence on the last day of the year previous to the year in which the grant is to be paid. Thus for 1962 the grant would be calculated on the basis of 2,546 licences issued. At a per capita grant of \$40.00 the aggregate would then be \$101,840.00.

However, the revenue derived from fees is acquired in the following way:

Regular active members	— 2,380 @ \$75.00 =	\$178,500.00
New graduates	— 58 @ 40.00 =	2,320.00
Inactive members	— 6 @ 40.00 =	240.00
Life members	— 102 @ Nil =	—

Total licence fee revenue	\$181,060.00
---------------------------	--------------

Thus for the 102 Life members the Board would make a direct grant to the C.D.A. of \$4,080.00 for which no revenue is received. For the 64 new graduates and inactive members the Board would make a grant of \$2,560.00 which is the entire amount of revenue derived from these groups. The date of payment of the C.D.A. grant should also be carefully considered. It is possible to arrange with the bank, for deposits in excess of \$25,000.00 investment in Canadian Dollar Deposit Receipts. Although interest rates are subject to change the following is in effect, for deposits in excess of \$25,000.00, from April 16th, 1962:

30 - 59 days —	3%
60 - 89 days —	3%
90 - 179 days —	3¼%
180 - 209 days —	3½%
270 - 364 days —	3¾%

Should it be necessary to withdraw funds prior to maturity the rates would then be as follows:

30 - 59 days —	2½%
60 - 89 days —	2½%
90 - 179 days —	2¾%
180 - 269 days —	3%
270 - 383 days —	3¼%

Thus if the moneys in the Savings account were employed on May 1st as investment in Canadian Dollar Deposit Receipts and permitted to remain until approximately the end of July an increase of ¼ of 1% interest could be experienced. The payment of the grant to the C.D.A. then could follow on approximately August 1st.

6. It should not be necessary for the Board to engage itself at this meeting with the development of the 1963 budget. This matter could now be referred to the agenda of the Fall Meeting.
7. The Auditor's Report is attached and the appointment of auditors for the ensuing year is necessary.

AUDITORS' REPORT

To the Directors of the Royal College of Dental Surgeons of Ontario:

In accordance with your instructions we have examined the accounts and records of the Royal College of Dental Surgeons of Ontario for the eight months' period ended December 31, 1961, and the balance sheet of the College as at that date. Our examination included a general review of the accounting procedures and such tests of the accounting records and other supporting evidence as contained in the recommendations adopted by you at your 1960 fall meeting.

In our opinion the accompanying balance sheet presents fairly the financial position of the College as at December 31, 1961.

Toronto, Canada.
February 27, 1962.

THORNE, MULHOLLAND, HOWSON & MCPHERSON

ACTION

Firm of Thorne, Mulholland, Howson and McPherson reappointed Auditors for 1962.

Report adopted.

WORKMEN'S COMPENSATION BOARD

REPRESENTATIVES: R. C. Honey, E. E. Johns, J. C. Broom.

CONSULTANT: T. R. Marshall.

REPORT

FALL MEETING

1. The Representatives of the Board to the Workmen's Compensation Board of Ontario met with the Consultant on July 5th, 1961.

2. **Basis For Fee Computation**

The Consultant indicated that, among some members of the profession, there had been some expressed dissatisfaction with certain aspects of the Fee Schedule negotiated between the Royal College of Dental Surgeons of Ontario and the Workmen's Compensation Board of Ontario. It was agreed that the principle which should guide the profession in deliberating upon a Fee Schedule for dental services to beneficiaries of the Workmen's Compensation Board is the establishment of fees for good dentistry which services reside within the capacity of the average dentist. The Consultant presented certain information having a pertinence to the computation of fees.

3. **General Provisions**

The eleven existing General Provisions were reviewed and amendments are suggested for numbers 3, 4, and 5.

4. **Fee Schedule**

In developing the revised Fee Schedule some concern was expressed by the Representatives that all fees enunciated must be susceptible of logical and justifiable supporting reasons. It was felt that the matter of fee determination should be a study to engage a much more broadly represented group than just the Workmen's Compensation Board Representatives. The Dental Services Committee of the Canadian Dental Association has assigned such a task to a Subcommittee and it is hoped that some helpful information may be elicited from this source.

ACTION

Report adopted.

NOTE: The General Provisions and Fee Schedule as finally approved appear as appendices to the report presented to the Annual Meeting.

REPORT

ANNUAL MEETING

This report covers the period from May 1st, 1961 to March 31st, 1962.

Consultant Activities and Duties

Your Dental Consultant to the Board has been in regular attendance at its offices two Thursday mornings each month except during vacation. Duties continue much the same as previously reported:

1. Consultant to Medical Aid Department of the Board in reviewing claims for dental treatment.
2. Discussing cases with Board staff explaining dentists' point of view in treatment plans recommended.
3. Discussing Board policy by telephone with dental colleagues anywhere in province with the object of harmonizing viewpoints of Board and dentist.
4. Reviewing Board files at home in the interval between Board visits and making written reports.
5. Examining Board claimants in my office and reporting findings to the Board.
6. On occasion, at the request of the chief medical officer, who is director of treatment, giving assistance in solving treatment problems.
7. Being available for telephone discussions both to colleagues and Board staff as occasion arises anytime.

Arising from these activities, certain observations might be of interest. Some of these are repeated from previous reports, but the situations have not been remedied:

1. The taxing (claims' appraisers) staff of the Board seem to have difficulty in understanding many reports submitted by dentists. It would greatly facilitate processing of claims if dentists would realize that their reports will be reviewed by laymen and therefore, should be professionally conceived but clear and easily understood. The fee for examination has been increased from \$3.00 to \$5.00 on the understanding that poor reports may not be allowed.

The dentist, in making his examination and in submitting his treatment plan, should keep in mind the basic concept of entitlement to dental service. This concept should be to provide the claimant with dental service that will restore his oral condition as near as possible to that existing prior to the accident or onset of industrial disease in terms of health and masticating function.

This is not as simple in application as at first appears. Here is an illustration: a workman has most of his teeth but they have been neglected and there is severe generalized periodontal disease. The man has an accident to one upper incisor tooth; the treatment is extraction. The dentist reports dental conditions and recommends removal of all remaining teeth and

complete dentures. What is the man's entitlement? It is admitted this is an extreme case, but it is an actual case. There are many claims where the claimant has given his teeth no attention whatever until he has an accident which is sometimes very minor; then he becomes very interested in dental care. He wants all his teeth treated or restored at the Board's expense. A fair professional evaluation and opinion as to the entitlement is greatly appreciated by the Board in such cases — indeed in all cases.

2. A second observation has to do with accident cases where jaw fractures occur. These injured workmen so often arrive in the dentist's care months after the accident with gross abnormal jaw relationship.

Your Board Consultant has mentioned previously the desirability for specialized maxillo-facial services in representative hospitals in our larger cities; these services to include a team consisting of plastic surgeon and dental oral surgeon. There is one such service functioning well in Toronto and there is a good possibility that another service will be set up in Toronto before too long. Is it possible to encourage these specialized services in other cities? In connection with these special maxillo-facial services, there is a reluctance on the part of some plastic surgeons to work with dentists. There may be different reasons, but two have been suggested:

(1) there is a lack of capable, hospital-trained dental personnel experienced in jaw fracture treatment and (2) there is need for Dental Oral Surgeons to be strictly ethical and confine their work within the field of dental oral surgery. To establish a successful service there should be mutual respect for the ability and sphere of operation on the part of members of both professions.

3. At a regular meeting of your Board in May, 1961, the Board's Consultant presented certain complaints in regard to fees allowed for some dental services by the Workmen's Compensation Board. You appointed a committee, with additional representation from The Ontario Dental Association, which met to revise the fee schedule. This in turn you considered at your interim fall meeting last November. This revised schedule was presented to the Medical Aid Committee last December and has now been adopted with only minor changes. The new schedule appears as an appendix to this report (Appendix A).

It should be noted that in giving favourable consideration to this revised schedule, the Workmen's Compensation Board desires to co-operate with the dental profession. This schedule has been set up to compensate fairly the dentist of average capability for the performance of good dental service. Undoubtedly there are dentists who operate at a higher scale of fees and provide a service superior to the capabilities of the average dentist. Unfortunately there is no provision for a higher fee unless it can be established that the service problem is unusual. When a difficult service problem presents, the Board may consider a further fee when justified.

It should be understood when a dentist undertakes to serve a patient who is a claimant of the Workmen's Compensation Board, he agrees to accept the Board's Schedule of Fees. The Board does not recognize any other schedule.

4. In the year 1961 the Board paid out \$105,100.00 for dental services to 862 dentists in Ontario. This figure is about \$1,400.00 less than in 1960. Generally speaking, dentists in every section of the province have been quite cooperative in providing treatment for compensation beneficiaries. It is unfortunate, however, that there are a few, a very few, whose services are believed to be below the quality expected by the Board. The Board desires to provide a satisfactory dental service through members of the profession. Its beneficiaries are permitted to attend the dentist of their choice (often a drop in), but it reserves the right to direct its claimants where they should go for treatment when considered in the claimant's interests. These situations come to the Board's attention from complaints. When such circumstances occur, an unfavourable reflection is cast on the profession as a whole.

There have been some queries about the new fee schedule, but very few dentists have refused Board claimants as patients; most dentists are quite satisfied with Board fees except in a few services. An attempt to remedy this has been made in the revised schedule.

5. At the Ontario Dental Association Convention in May 1961, an opportunity was provided for Dr. J. L. Johnston, Chief Medical Officer of the Board, to address a breakfast meeting. Representatives of various dental societies in Ontario were invited to attend. Dr. Johnston spoke of the work of the Board, what it was trying to do and referred to matters of interest to dentists. There was a question and answer period and the meeting could easily have continued on beyond available time allowed for it. Further meetings of this nature would be helpful.

Perhaps it would be worth noting here that accident coverage for the dentist and his staff is available and includes all activities during business hours from arrival in the morning until leaving the office at the end of the day. Benefits include medical and surgical care, hospitalization, dental service, and compensation for lost time. Premium is based on 25¢ per \$100.00 annual salary.

Your Board Consultant wishes to report cooperation and cordial relations with all members of Board staff. Perhaps special mention should be made regarding Dr. J. L. Johnston, Chief Medical Officer; Dr. L. M. Davey, Medical Advisor to Medical Aid Committee; Mr. Don Palmer, Chief Medical Aid Officer and his assistant Mr. Cecil Garry. It is with these officers in particular that problems are discussed and resolved, and they are understanding men who lean backwards to be fair.

In conclusion, your Consultant desires to thank Dr. Dunn and the Workmen's Compensation Board Committee of your Board for assistance during the year. And to you gentlemen of the Board goes a sincere appreciation for entrusting this responsibility of representing you and the profession at the Workmen's Compensation Board.

GENERAL PROVISIONS RELATING TO DENTAL SERVICES AND FEES SET DOWN BY THE WORKMEN'S COMPENSATION BOARD

1. Entitlement to dental service under the Act, is limited to treatment of oral conditions which result from an industrial accident or industrial disease with the object of restoring as nearly as possible the health and masticatory function existing prior to the accident or onset of industrial disease.
2. A dentist, in accepting a case for treatment for which the workman has entitlement under the Workmen's Compensation Act, agrees to accept the Schedule of Fees authorized by the Workmen's Compensation Board of Ontario and approved by the Royal College of Dental Surgeons of Ontario.
3. In uncomplicated cases the fees as listed cover complete treatment and submission of reports.
4. In complicated cases additional fees may be submitted. Additional payment in complicated cases is dependent upon the nature of injury and the detail of treatment and attendance submitted by the attending dentist.
5. A dentist may, without prior authority, render emergency treatment to an injured workman and take necessary X-ray films to diagnose the extent of injury, all of which will be paid according to the Schedule of Fees providing the said workman has entitlement under the Workmen's Compensation Act, Ontario. The dentist may not, with the exception of the above, proceed with treatment without prior authority from the Workmen's Compensation Board of Ontario.
6. The receipt of any form from the Workmen's Compensation Board of Ontario does not imply entitlement under the Act, but the submission of a completed form is necessary in order to adjudicate the claim.
7. This Schedule is to be used when submitting accounts to the Board. Approval of accounts will be based solely and finally on the information given in the written reports and itemized estimates furnished to the Board.
8. Supplies and appliances are covered by the fees in this Schedule except in cases of mandibular or maxillary fractures.
9. Porcelain Jacket Crown. This type of restoration is fragile and may easily fracture. It is allowed only in selected cases and requires prior authorization.
10. When it is necessary to extract injured anterior teeth and a fixed bridge replacement is contemplated, a provisional denture may be supplied to permit a better final restoration.
11. Accounts are to be submitted on form 34, provided by the Board, within 30 days of the conclusion of treatment. This is the due date. Under Section 51, subsection 8, of the Workmen's Compensation Act, the Workmen's Compensation Board of Ontario may impose a percentage reduction penalty if an account is submitted beyond the permitted time limit.

SCHEDULE OF FEES

1. **Emergency Services: (See Item 5 of General Provisions)**
 - (a) Urgent treatment as necessary following accident\$ 5.00
(See Item 4 of General Provisions)
 - (b) Repair of fractured denture (plus \$1.00 for each tooth supplied) 8.00
 - (c) Repair of fractured denture restoring a section of labial or buccal denture flange necessitating an impression (plus \$1.00 for each new tooth) 15.00
 - (d) Replacement of broken facing 10.00
 - (e) X-rays as necessary to determine extent of injury.
(See Item 14 for X-ray charges)

2. **Examination, Diagnosis and Treatment Plan in detail** 5.00
(This fee will not be allowed unless complete reports are submitted and does not apply in respect to repair of dentures or broken facings)

3. **Extractions**
 - (a) Extraction of each tooth 2.00

4. **Anaesthetics**
 - (a) Local anaesthetic — per visit 3.00
Local anaesthesia in all procedures other than extraction is included in the service fee.
 - (b) *General Anaesthetics*
 - i Short anaesthesia — minor procedures not exceeding thirty minutes 10.00
 - ii Prolonged anaesthesia — for the first hour 20.00
 - iii Each successive one half-hour or fraction thereof 5.00

5. **Endodontic Therapy**
 - (a) Root canal treatment each visit, give dates of treatments .. 10.00
Complete canal obliteration is a requisite of successful treatment. An X-ray should be submitted to the Board showing root filling result.
Maximum fee allowed for one tooth 40.00
 - (b) Root resection when necessary:
X-ray to be submitted to the Board indicating need for resection.
 - (1) Root canal therapy and root filling preparatory to resection per treatment 10.00
Maximum for one tooth 20.00
 - (2) Root resection 15.00

6. **Gold Inlay Where Specially Indicated**
 - (a) 2 surface 25.00
 - (b) 3 surface 30.00

7. (a) Silicate restoration with cement base	6.00
(b) Silicate or self-curing plastic facing in anterior inlay	6.00
8. Silver Amalgam Restorations	
(a) 1 tooth surface	5.00
(b) 2 tooth surfaces	7.00
(c) 3 tooth surfaces	8.00
9. Crown Restorations	
(a) Full or three-quarter gold bicuspid crown	35.00
(b) Full or three-quarter gold molar crown	40.00
(c) Anterior three-quarter crown	35.00
(d) Anterior or bicuspid gold acrylic veneer crown (heat cured acrylic)	55.00
(e) Porcelain Jacket Crown	60.00
(See Item 9 of General Provisions)	
10. Fixed Bridge Restorations	
(a) Abutments as per #9	
(b) Pontic	27.00
11. Dentures	
Complete upper or lower denture with plastic base	85.00
12. Partial Dentures: Design and description of all partial dentures must be included in treatment plan submitted for fee justification.	
(a) Provisional partial denture without clasps preliminary to constructing a fixed bridge	
1 to 4 teeth	30.00
(b) Partial denture with plastic base	
5 to 8 teeth including necessary cast clasps	75.00
(c) Cast chrome steel partial denture — 2 clasps	
restoring 1 or 2 teeth	75.00
(d) Cast chrome steel partial denture, bilateral, restoring 3 or more teeth using necessary clasps and rests	110.00
13. Denture Reline	
(a) Processed reline complete or partial denture	27.00
(b) Rebase (removing all old base material)	35.00
(c) Self-curing plastic reline complete or partial	15.00
14. X-ray Service	

The following are fees for X-ray surveys made by a dentist. No fee will be allowed unless X-ray films submitted are of satisfactory diagnostic value. A written report of X-ray findings together with films is to be forwarded to the Workmen's Compensation Board of Ontario with treatment plan.

(a) First single X-ray	3.00
(b) Each succeeding film	1.00
(c) Maximum for each arch	6.00
(d) Maximum for complete 14 exposure survey	12.00
15. Hospital Services	
Hospital visit	5.00
16. Fractures: Maxilla or Mandible	
(Where special appliances are necessary, standard fabrication charges will be allowed)	
(a) Consultation and report only	15.00
(b) Consultation and participation at reduction	50.00
(c) Fracture reduction and fixation (alveolar process excepted) complete responsibility	75.00
Certified Oral Surgeon	
(a) Open reduction (complete responsibility)	125.00
(b) Open reduction (shared responsibility)	125.00

ACTION

Consultant complimented for his outstanding services.

Dr. T. R. Marshall re-appointed Consultant to Workmen's Compensation Board of Ontario.

Report adopted.

OCTOBER 13TH, 1961 MEETING

Brief to Royal Commission on Health Services

The Board instructed the Secretary to prepare a Brief for presentation to the Royal Commission on Health Services. An invitation was extended to The Ontario Dental Association to cooperate in the presentation of the Brief. Dr. E. R. W. Bilkey was requested to act as Chairman of the Steering Committee with one member to be proposed by The Ontario Dental Association and a third member to be added on the appointment of the President of the R.C.D.S.

An outline of the Brief was presented and was approved.

FALL MEETING

All Risk Insurance and Liability Insurance

After reviewing both insurance plans (see report of Registrar-Secretary) and being cognizant of the confusion which exists because of the many and varied plans in existence, the Board proposed to initiate meetings among the various groups now providing insurance coverage to develop, if possible, a coordinated plan.

Appointment of C.D.A. Governor

Dr. Owen J. Yule was appointed to the Board of Governors of the Canadian Dental Association for the year 1962.

Conduct of a Practice Following Death of a Practitioner

By-Law No. 13 (2)(a) precludes someone not a member of the Royal College of Dental Surgeons of Ontario deriving profit from the services of a dentist. This section creates difficulty following the demise of a practitioner during the interval of time before the practice may be sold to a successor. The Board instructed the Government and Legislation Committee to review the pertinent section of the by-laws with a view to offering appropriate suggestions.

Dr. _____

(See Item #6 — Report of Discipline Committee — Fall Meeting).

On the basis of information provided by three dissatisfied patients, Dr. _____ was interviewed in respect of the allegations and on his apparent unwillingness to cooperate with the Board in mediating the problems which arose. While it was obvious that this member had little or no appreciation of his professional obligations and no understanding of the responsibilities placed upon the Board by the provisions of The Dentistry Act of Ontario, he did agree to cooperate more readily should such cooperation from him be required in the future.

Dr. _____, in stating his position in respect of the allegations presented, denied that he had not given appropriate information to permit the patients to have a reasonable understanding of the treatment services to be rendered and their approximate cost. The Board could find no reason for not accepting the information set out in the complaints and the patients were advised that they had every right to question the propriety and amount of the fees in Court should Dr. _____ press for payment.

Liaison Committee — O.D.A.

On May 20th, 1961, the Secretary communicated with the Ontario Dental Association outlining the Board's recommendation for the creation of a Liaison Committee representative of both organizations. On May 31st the Association Secretary reported that the O.D.A. Board agreed that closer cooperation is desirable. The O.D.A. appointments are Dr. E. A. White, Dr. F. H. Shepherd, Dr. M. G. Boyes, Dr. W. W. Philp and Dr. G. K. Chapman.

Mediscope

The Dental Exhibit which formed a part of the Mediscope Exposition held during the Canadian National Exhibition in August 1961 was of a high quality and received most favourable reaction from those who viewed it. R.C.D.S. expenditures exceeded budget by \$51.60. The following is the financial statement on this venture:

Receipts	
Canadian Section, American Dental Trade Association	\$1,500.00
Ontario Dental Association	1,500.00
Royal College of Dental Surgeons	2,551.60
	\$5,551.60
Disbursements	
Cleaning	50.40
Insurance	15.00
Sundry Expenses	16.56
Staples Display Advertising Limited	5,469.64
	\$5,551.60

At the request of the Immediate Past Chairman of the C.D.A.'s Council on Education, estimates for the shipping, erection and dismantling of the display have been obtained. It would appear that costs involved might be prohibitive.

The Ontario Medical Association is somewhat reluctant to participate again in the Canadian National Exhibition because of organizational difficulties during the summer months.

The Board approved the installation of a display at the 1962 Canadian National Exhibition if suitable arrangements could be made. An expenditure not to exceed \$2,500.00 was authorized.

Radiation Hazards

A member, in two communications, expressed concern for the possible hazards which could arise through the improper use of radiographic equipment and urged the Board to create a by-law to make mandatory the inclusion of safety measures in equipment owned by Licentiates. While the Board is fully cognizant of its responsibilities in regard to drawing the facts of X-ray hazards and safeguards to the attention of the profession it is of the opinion that it is not within the powers of the Board to enact by-laws or regulations in regard to radiographic equipment. The Board has cooperated and continues to cooperate with the Ontario Department of Health in respect of this area of concern.

Retail Sales Tax

On Wednesday, October 23rd, 1961, in company with representatives of Ash Temple Company Limited, Dental Company of Canada Limited, National Refining Company and Dominion Dental Company, the Secretary met with Mr. Severn, a senior official in the Retail Sales Tax Branch of the Treasury Department of Ontario. The purpose of the meeting was to determine those items normally purchased by a dentist which are exempt from the provisions of the regulations.

Essentially those items which are exempt are products which are "used up" on one occasion in the mouth of a patient. This includes anaesthetics, disposable needles, filling materials, impression materials, cotton rolls, exodontia sponges and the like. It would not include such items as burs and laboratory stone. In the latter situation the dentist is regarded as the consumer.

Mr. Severn indicated that regulations pertaining to purchases of dental products would be under review by the Retail Sales Tax Branch. The regulations at present in existence then may not be in force for any significant length of time.

Select Committee — Cost of Drugs

The delegates appointed by the Board, Dr. John Methven, Dr. Clifford Reynolds and the Secretary appeared before the Select Committee on the Cost of Drugs on Thursday, June 15th, 1961. A Brief was presented and the Secretary, then Dr. Methven, were questioned in depth by the Committee Counsel and the Members of the Committee. The Chairman expressed appreciation for the contribution of the profession to the deliberations of the Committee. Appreciation was previously expressed to Drs. Methven and Reynolds in letters from the Secretary.

Workmen's Compensation Board Coverage

The Secretary was instructed to inform the profession of the availability of Workmen's Compensation coverage for dentists and their employees as well as the methods to be followed to obtain additional information.

ANNUAL MEETING

Budget Amendments

The 1962 Budget appeared on pages 45 and 46 of the 1961 *Proceedings*.

Two amendments were approved:

- (1) O.D.A. Dental Public Health Committee grant increased to \$5,150.00.
- (2) \$1,100.00 provided for employee dental care plan.

Coordination of Efforts in Insurance

A motion was adopted at the Fall 1961 Meeting authorizing the organization of a meeting to bring together representatives of dental societies sponsoring various types of insurance coverage. Shortly following the Fall Meeting the Secretary was informed by one of the Trustees of the Canadian Dental Association Insurance Programme that the Canadian Dental Association proposed to arrange such a meeting. The Canadian Dental Association Secretary presented the background and reasons which prompted Canadian Dental Association participation in insurance at the meeting of Society representatives held during the Ontario Dental Association Convention on May 15th, 1962. Early in the Fall of 1962 the Canadian Dental Association will call the meeting at its headquarters.

Dentist's Name Used in Product Endorsation

A letter was received from a dental publication seeking an opinion of the propriety of a dentist's name being included in an advertisement endorsing a product being advertised in a professional publication. The Board views with disfavour the voluntary association of the name of any member of the College with any commercial product whether or not it is directly concerned with the practice of the profession.

Dr. _____

This member appeared before a meeting of the Discipline Committee in the Fall of 1961 as a result of earlier proceedings taken against him in the courts relative to certain serious charges. Competent medical help was obtained by the member and effective therapy was instituted.

Fall 1962 Board Examinations

The date of the 1962 Fall Board Examinations was established as November 14th to 16th.

Group Attempts to Seek Right to Practise Dentistry

A letter was received from the Honourable M. B. Dymond, M.D., Minister of Health, requesting comment upon the action of an Ontario branch of a national organization seeking the right to deal directly with the public in respect of repair of dentures. The submission of the group alleged grossly excessive fees being assessed for this service by some dentists and many dentists already sending patients directly to dental

laboratories. The content of the Secretary's reply to Dr. Dymond was concurred in by the Board and because of the importance of this issue both to the public and the profession this communication is reported in its entirety:

"I am acutely aware of the problems which can accrue to a profession when a few of its members either abrogate or prostitute their professional responsibilities. Unfortunately such relatively few occurrences are often employed in an attempt to nullify or repudiate the principle which must apply.

We believe, sincerely and genuinely, that the welfare of the public, in its acquisition of dental services, requires that such services be provided under the responsibility of dentists who are qualified by education, training, experience and licensure to have an all-encompassing concern and regard for the dental and total health of their patients. This concept, in no way, fails to recognize the valuable and important services which are and can be provided by auxiliary personnel fitted for their responsibilities through recognized educational and training programmes. It does aver, however, that all auxiliaries engaged in contributing to the provision of dental care should serve as personnel whose services are integrated under the supervision and direction of the dentist who, himself, must assume complete responsibility for the dental welfare of the patient.

This principle, I believe, applies with equal force and pertinence to any professional pursuit whether it be dentistry, medicine, law or engineering.

While I would hesitate without full knowledge of all the facts to comment upon the alleged occurrences reported to the Cabinet it is entirely possible that some dentists may have acted in the manner stated. By so doing their actions bring discredit upon themselves and, unfortunately, upon the profession of which they are a part. Such derelictions of responsibility, however, do not affect the validity of the principle which should apply to professional services.

An artificial denture is required to fulfil a physiological purpose. More than mechanical competence, derived from on-the-job training, is needed to determine if the denture meets essential physiological criteria. If a denture should fracture during function it is essential that the cause of the fracture be determined because the mere mechanical repairing of the prosthesis may in no way overcome the deficiencies of the denture created by considerable tissue change beneath it. Again, even if a denture is broken outside the mouth, the dimensional changes which may accrue from the polymerization process and the positioning of any new denture tooth involved in the repair may have a direct bearing upon the subsequent functioning of that denture. These are matters to which the dentist must direct his attention.

The fees which dentists assess for their services in this regard should, unquestionably, be commensurate with the extent and responsibility of such services. For many repairs, intra-oral procedures such as

impression making and recording jaw relationship are required. Again fees for these services should be fair both to the one who receives the service and the one who provides it.

With respect, Sir, we do not believe that the ultimate best interests of the public are served by divisive actions which fractionize the responsibility that must be borne by the dental profession. It is most regrettable that there may be a few within our profession whose actions tend to engender attempts by persons to assume responsibilities they are unqualified to accept."

A committee consisting of Drs. H. M. Jolley, R. L. Twible and E. T. Guest (appointee of O.D.A.) was created for the purpose of considering the various factors having a bearing upon prescriptions for dental laboratory services and to make appropriate recommendations for Board action.

Request for Funds in Support of Faculty Museum

The Librarian, following presentation of his report, requested a grant in the amount of \$2,000.00 in support of the Museum in the Faculty of Dentistry. The request was tabled until the November 1962 meeting with the request that the Faculty Council inform the Board more specifically of the purposes to which the money would be directed.

Staff Dental Care Plan

The Board authorized the establishment of a dental care plan for its employees on the basis of criteria established by the Dental Services Committee of the Canadian Dental Association (see Appendix A — Report of the Dental Services Committee — 1962 C.D.A. Transactions). A sum equal to \$100.00 per qualified employee was budgeted for 1962 and its transmission to Canadian Dental Services Plans Incorporated, the administrative agency, was approved.

'Study Group for C.D.A. Reform'

Two members appeared before the Board to present a Brief on behalf of an organization of approximately 12 members said to have been formed in 1962. The contentions of the group are to the effect that dentistry's general organizational arrangements are not conducive to the establishment of an effective forum for discussion. The group suggested an alteration in the present method of appointing Governors to the Canadian Dental Association. The Board was of the opinion that no valid reasons had been presented for any alteration in the existing method of selecting the Ontario representatives to the C.D.A. Board of Governors.

Welfare Trust Account

In respect of the Welfare Trust Fund on deposit in either a Savings Account in the Royal Bank of Canada, Bloor and Bedford Branch, Toronto and/or on deposit in a Savings Account in a Trust Company authorized to engage in business in Ontario under the Loan and Trust Corporations Act, any two of Dr. James D. Purves, Dr. Harry M. Jolley and the Treasurer were authorized as signing officers for such accounts.

REGULATIONS

SIGNS

A member of the Royal College of Dental Surgeons, in connection with his profession:—

1. May not display or permit to be displayed any sign other than a sign which in its character, position, size and wording is merely such as may be reasonably required to indicate the location of and entrance to the premises in which a dental practice is being carried on and in which no letters larger than four (4) inches are used.
2. May not display more than two signs in addition to one at or on his entrance door.
 - (a) Not more than one of these may be a suspended sign.
 - (b) Not more than one of these may be an illuminated sign and if illuminated must not be intermittent, daylight, "Neon" or "Neon type" and no colours shall appear in such signs other than white or black.
3. May not display any sign on premises other than those in which his practice is actually carried on.

Notwithstanding the above regulations he may (using only unilluminated letters or figures not larger than two inches):

- (a) Add to his entrance sign, his office hours.
- (b) Add to any sign the words (when an entrance is difficult to find) "Entrance on . . ."

PROFESSIONAL CARDS AND ANNOUNCEMENTS

A member of the Royal College of Dental Surgeons, in connection with his practice:—

1. May not permit to appear in any newspaper or other publication, printed or written for distribution or display anything other than his professional card (which may contain at most his name, title or degrees, profession, address, telephone number and office hours) or an announcement of his commencement of practice, change of office location, absence from or return to practice, or the restriction of his practice. The announcement shall not contain any reference to qualifications, procedures or equipment. The space used, for either card or announcement, must not exceed one column (13 ems) in width by two inches in length and must not be in the nature of a display.
2. He may, however, observing the dignity and ethics of the profession, without reference to qualifications, procedures or equipment:
 - (a) Use private professional cards.
 - (b) Issue accounts and receipts.
 - (c) Issue appointment cards.
 - (d) Mail to his patients recall notices.
 - (e) Mail to his patients and acquaintances announcements of his commencement of practice, change of office location, absence from or return to practice or the restriction of his practice, provided he is a certified specialist.

SOLICITED ADVERTISING

For the protection of the Profession from solicited advertising, the Board prohibits any member of the Royal College of Dental Surgeons from inserting his professional card in hand-bills, programmes, year books or other printed matter of like character.

TAKING OVER A PRACTICE

When any member of the Royal College of Dental Surgeons takes over the practice or office of another member of the College, either by purchase or otherwise, the member so acquiring the said practice or office shall not after one year from the date of such acquisition use any sign or printed matter which suggests to the public that the retiring member was in any way associated or connected with the said practice or office.

TELEPHONE DIRECTORY LISTINGS

1. No display advertising of any kind.
2. No black face listings in the yellow pages.
3. No specialists' list under separate group headings.
4. Mention of office hours is of no particular value and is usually used only to increase space, therefore to be excluded.
5. Mention of particular facilities or equipment, such as X-rays, gas extractions, etc., not acceptable in either section.
6. Residence listing in yellow pages, as well as in white pages, is acceptable.
7. Designation as specialists may be used in both yellow and white pages, provided the dentist is a specialist certified in and restricted to the designated branch of dentistry.

REPORT

In accordance with the provision of The Dentistry Act of Ontario and the By-Laws of the Royal College of Dental Surgeons of Ontario, an election of the Board of Directors was held from October to December, 1962.

On October 12, 1962 nominations were called for by circular letters to each Licentiate resident in Ontario on October 1st. Valid nominations were received as follows:

- District No. 1 — Dr. J. P. Coupland, Ottawa
- District No. 2 — Dr. R. C. Honey, Peterborough
- District No. 3 — Dr. G. S. Bowles, Fort William
 - Dr. G. P. Copeland, Sudbury
 - Dr. C. J. Egan, Fort William
 - Dr. A. B. Sutherland, Sudbury
- District No. 4 — Dr. J. G. Booth, Toronto
 - Dr. R. E. Diprose, Toronto
 - Dr. H. M. Jolley, Toronto
 - Dr. E. J. Siegel, Toronto
- District No. 5 — Dr. A. M. Blair, Alliston
 - Dr. W. G. Bruce, Kincardine
- District No. 6 — Dr. D. J. Ferguson, London
- District No. 7 — Dr. J. R. Hurton, Brantford
 - Dr. R. Michell, Kitchener
- District No. 8 — Dr. R. F. Hicken, Port Credit
 - Dr. A. H. Leckie, Hamilton

All candidates were informed of their nominations. Dr. G. S. Bowles of District No. 3 instructed the secretary by registered mail to withdraw his name from nomination. As no additional valid nominations were received for Districts 1, 2 and 6, Drs. Coupland, Honey and Ferguson, respectively, were declared elected by acclamation.

Elections were held in Districts 3, 4, 5, 7, and 8.

On November 30th ballots, together with necessary instructions, were mailed to all qualified Electors in the districts in which elections were being held. The officially appointed Scrutineers, Dr. R. S. Woollatt and Mr. Colin C. Rous counted the ballots on Wednesday, December 12th, 1962. Dr. Ray Mulrooney, representing Dr. E. J. Siegel, Dr. A. M. Blair and Dr. R. F. Hicken were present during the counting of ballots. The report of the Scrutineers (Appendix A) indicates that the following were elected:

- District No. 3 — Dr. A. B. Sutherland
- District No. 4 — Dr. H. M. Jolley
- District No. 5 — Dr. W. G. Bruce
- District No. 7 — Dr. R. Michell
- District No. 8 — Dr. A. H. Leckie

A letter from the Secretary of the Faculty of Dentistry, University of Toronto (Appendix B) confirms the election of Dr. James D. Purves as Faculty Representative.

Therefore the duly-elected members of the Board of Directors for the ensuing biennial term are:

- District No. 1 — Dr. J. P. Coupland, Ottawa
- District No. 2 — Dr. R. C. Honey, Peterborough
- District No. 3 — Dr. A. B. Sutherland, Sudbury
- District No. 4 — Dr. H. M. Jolley, Toronto
- District No. 5 — Dr. W. G. Bruce, Kincardine
- District No. 6 — Dr. D. J. Ferguson, London
- District No. 7 — Dr. R. Michell, Kitchener
- District No. 8 — Dr. A. H. Leckie, Hamilton
- Faculty — Dr. J. D. Purves, Toronto

The ballots as sealed by the Scrutineers are herewith presented and should be disposed of by direction of the Board.

SCRUTINEERS' REPORT ON ELECTIONS

District No. 3

Number of ballots received	151
Number of valid ballots	151
Number of invalid ballots	0

The 151 valid ballots were marked as follows:

For Dr. G. P. Copeland	50
For Dr. C. J. Egan	44
For Dr. A. B. Sutherland	57

Showing a majority of 7 for Dr. Sutherland

Dr. Sutherland is thereby declared elected.

District No. 4

Number of ballot envelopes received	780
Number of valid ballots	773
Number of invalid ballots	7

Reason for declaring ballots invalid:

Not validated	3
Spoiled	1
Blank	1
No ballot in envelope	2

The 773 valid ballots were marked as follows:

For Dr. J. G. Booth	36
For Dr. R. E. Diprose	162
For Dr. H. M. Jolley	293
For Dr. E. J. Siegel	282

Showing a majority of 11 for Dr. Jolley

Dr. H. M. Jolley is thereby declared elected.

District No. 5

Number of ballots received	92
Number of valid ballots	92
Number of invalid ballots	0

The 92 valid ballots were marked as follows:

For Dr. A. M. Blair	13
For Dr. W. G. Bruce	79

Showing a majority of 66 for Dr. Bruce

Dr. Bruce is thereby declared elected.

District No. 7

Number of ballots received	135
Number of valid ballots	133
Number of invalid ballots	2
Reason for declaring ballots invalid:	
Spoiled ballot	1
No validation slip	1
The 133 valid ballots were marked as follows:	
For Dr. J. R. Hurton	61
For Dr. R. Michell	72
Showing a majority of 11 for Dr. Michell	
Dr. R. Michell is thereby declared elected.	

District No. 8

Number of ballots received	246
Number of valid ballots	243
Number of invalid ballots	3
Reason for declaring ballots invalid:	
No validation slip	3
The 243 valid ballots were marked as follows:	
For Dr. R. F. Hicken	88
For Dr. A. H. Leckie	155
Showing a majority of 67 for Dr. Leckie	
Dr. A. H. Leckie is thereby declared elected.

March 19, 1963

Dr. W. J. Dunn,
Royal College of Dental Surgeons,
230 St. George Street,
Toronto, Ontario.

Dear Dr. Dunn:

I should like to confirm that Faculty Council at its meeting on October 2, 1962, elected Dr. J. D. Purves Council representative to the Board of the R.C.D.S. for the period 1963 — 1965.

Yours truly,

(signed) A. G. Read,
Secretary.

ACTION

1. Report adopted.

CANADIAN DENTAL ASSOCIATION

REPRESENTATIVES: M. V. J. Keenan, A. H. Leckie, E. T. Guest,
O. J. Yule, J. P. Coupland.

REPORT

FALL MEETING

1. Annual Meeting

The Annual Meeting of the Board of Governors was held in the Hotel Vancouver May 30th - June 2nd, 1962. The Annual Meeting of the Association was held during the National Convention on June 4th. Dr. M. V. J. Keenan was installed as President, the first time that a dentist from R.C.D.S. District No. 3 has been so honoured. The complete report of the 3½ day Meeting of the Board and the Annual Meeting of the Association appears in the 1962 *C.D.A. Transactions*. A few of the highlights are herein enunciated:

2. Royal Commission on Health Services

The Steering Committee, W. G. McIntosh, P. G. Anderson and W. J. Dunn, reported magnificent co-operation from all who assisted in preparing the C.D.A. Brief. The Chairman particularly praised the work done by the Headquarters staff and the Director of the Bureau of Economic Research.

3. Federal Dental Services

There has been a growing awareness that dentists engaged in the Federal Dental Services should have representation on the Board of Governors of the Association. Action was taken to grant representation to the Royal Canadian Dental Corps, The Dental Services of the Department of Veterans Affairs and National Health and Welfare as soon as the necessary revisions in the By-laws can be made.

4. Royal College of Dentists of Canada

The creation of a Royal College of Dentists of Canada was approved in principle. The Executive Council was authorized to apply for an incorporation Act as soon as possible.

The Objects of the Proposed College are:

- (a) To set up qualifications for and to grant certification to dental specialists.
- (b) To establish regulations governing specialties.
- (c) To encourage the establishment of training programs in the Canadian Dental Schools.
- (d) To give recognition for superior qualifications by conferring fellowships in the College.

5. **Group Purchase Dental Care Plans**

The inauguration of a Pre-Payment Insurance Plan to provide a comprehensive dental service for C.D.A. and R.C.D.S. Headquarters' employees was announced. It is expected that the experience gained as a result of operating this plan will be of some value even though the number of participants is not large.

6. **C.D.A. Headquarters Property**

Expansion of the Headquarters' facilities by building an addition on the rear of the present premises was approved. The Committee was authorized to proceed as soon as a permit could be obtained and other arrangements concluded.

ACTION

1. **Report adopted.**

DENTAL PUBLIC HEALTH COMMITTEE

MEMBERS: K. F. Pownall, Chairman; M. Jackson; R. R. Butler; K. W. Davey; R. O. Fisk; M. Buckman; F. B. Burns; D. J. E. Mitchell; G. T. Mitton, Field Secretary.

REPORT

1. Workshop Conference on the Problems of Dentistry in Rural Ontario

On November 21 1962, a one day conference was held concerning the shortage of dentists in rural Ontario. The format and the resolutions of this conference were reported in the January issue of the *Journal of the Ontario Dental Association*. Follow up committees of this conference are (1) an education committee to plan a curriculum for the teaching of dental health in all grades in elementary and secondary schools and at Teacher Colleges, (2) a hospital committee to investigate the part that dentists can and should play in a hospital environment in Ontario, (3) an executive committee to investigate office and living accommodation in rural Ontario and to act on other resolutions from the workshop. Progress reports can be expected from these committees shortly. This has been one of the most challenging projects ever entered into by this committee.

2. Careers Display at C.N.E. 1962

Dentistry as a Career was presented to the public in an attractive exhibit. This was staffed by volunteer dentists mainly from Hamilton and by dental hygienists from Toronto.

3. Dental Health Index

Due to a new system of compiling the statistics derived from this survey, the survey originally planned to be carried out this spring will be carried out this fall using I.B.M. type cards.

4. Recruitment — Placement

This important work was carried out with the assistance of the Muskoka-Simcoe Dental Society and the North Bay Dental Society. Over 40 high school students from these areas were made aware of the advantages of Dentistry as a career and brought to Toronto to visit the Faculty and stay overnight at the home of a dentist. This is part of a long-range plan to encourage students from rural Ontario to settle in small towns.

5. Mouth Protection Committee

The committee is reviewing all the literature on the subject and is not ready to make any recommendations this time.

6. Annual Events

(a) *Dental Health Day (April 3rd, 1963)*

Every dentist in Ontario received a kit of information on public health materials with samples enclosed. Several hundred posters were sent to local dental societies. Every radio and T.V. station and newspaper was sent information on dental subjects.

(b) *Student Dinner*

This dinner to introduce the graduates of dentistry to the Members of the Board of the R.C.D.S. and the Governors of the O.D.A. was held in Hart House in November 1962. Unfortunately it was poorly attended by the senior year students.

(c) *Convention activity*

This will include our annual luncheon and breakfast as well as group and table clinics. Dr. S. A. MacGregor of our committee is our luncheon speaker, his topic being "Must the 20th Century Belong to the City", initiated at the Workshop Conference.

7. The Field Secretary

Once again special commendation should be extended Dr. G. T. Mitton for his tireless efforts on behalf of this committee.

ACTION

1. Careers' display at the Canadian National Exhibition discontinued.
2. Report adopted.

DENTAL LABORATORY PRESCRIPTIONS (SPECIAL)

MEMBERS: H. M. Jolley, Chairman; R. L. Twible, E. T. Guest.

REPORT

FALL MEETING

1. This special committee was established at the April 1962 meeting "to investigate the present philosophy of prescription writing pertaining to laboratory technicians' procedures and to recommend to the Board the results of said investigation."

2. Discussion of Philosophy and Training

It was generally agreed that there were two main areas of abuse. First there was the tendency on the part of dentists to write inadequate prescriptions or no prescriptions. Secondly, some dentists were guilty of sending patients directly to laboratories for repairs and adjustments.

Assurances were received from the representative of the Faculty of Dentistry on the committee that undergraduates were given sufficient training to enable them to write prescriptions in a manner consistent with the requirements of both the Dentistry Act and the Dental Technicians' Act. This training included not only supervised production of prescriptions but also surveying of study casts and design of partial dentures so that intelligently detailed instructions could be given to the technician.

It was agreed among the committee members that the relevant clauses in the Dentistry Act (R.S.O. 1960 — Chapter 91 — Section 23(2) and the Dental Technicians' Act (R.S.O. — 1960 — Chapter 90 — Section 1(b) were desirable and appropriate to the needs of the situation that exists in present-day dental practice.

3. Discussion of Methods of Improvement

The matter of vigorous enforcement of the Act was discussed and discharged as neither practical nor desirable.

It was suggested that imprinting Section 23(2) of the Dentistry Act on all blank prescription pads issued by the dental laboratories in Ontario might have an admonitory effect. The practicability of the proposal, which was not enthusiastically received, is being investigated by the Secretary in discussion with the Secretary of the Governing Board of Dental Technicians.

It was agreed that all dental organizations in the province should be alerted to the situation and to the dangers inherent in it in regard to existing modes of practice.

The committee directed that a leaflet be prepared for mailing to all members of the profession which would set out the problem and point out the relevant legal responsibility placed upon Ontario dentists. It would also contain an outline of the principles involved in laboratory prescription writing and samples of three or four typical prescriptions. It was emphasized that care and caution must be exercised in regard to the character and implications of any printed material that is distributed.

ACTION

1. Report adopted.

DENTAL SERVICES COMMITTEE

MEMBERS: H. M. Jolley, Chairman; D. B. McAdam, P. B. Willson, James Sim, R. H. Finlayson, W. S. MacKenzie.

REPORT

FALL MEETING

1. Since the April meeting of the Board a special sub committee has met once with representatives of the Ontario Government and the committee has held one plenary session.

2. Welfare Plan — Extension of Services

On July 19th a sub committee consisting of Drs. Jolley, Leckie, MacKenzie and Dunn met with the Hon. Louis P. Cecile, Minister of Public Welfare, and the Deputy Minister, Mr. James S. Band, in the Parliament Buildings at Queen's Park, Toronto. Both the Minister and the Deputy Minister expressed their appreciation of the manner in which the existing program was functioning.

The committee then made presentations to them to the effect that after a study of the needs and the service available broadening of the Ontario Dental Welfare Plan along the following lines was suggested to include:

1. Children 16, 17 and 18 years of age who qualify within the meaning of the Mothers' and Dependent Children's Allowance Act — the authorized services to be identical with those already provided for children under 16 years of age.
2. Mothers who qualify within the meaning of the said Act with services similar to those to which their children are now entitled with the addition of repairs to existing artificial dentures.
3. Beneficiaries of the Department of Public Welfare in the 65 to 69 year age group and the Old Age (over 70) beneficiaries of the Department. The services should be identical with those now provided for the children with the addition of repairs to existing artificial dentures. Complete dentures should also be provided on the basis of an equal apportionment of cost between the beneficiary and the plan. (This is exactly the same material as reported to the April meeting. It wasn't possible to arrange a meeting with the Government officials until July 19th.)

The general impression of the members of the committee was that items 1 and 2 in our submission were favourably received with little or no chance of approval of item 3. Subsequent to this meeting our Secretary was informed by Mr. Band that there was reason to believe that the Department will augment the age limit up to and including 18 years of age. The extension of the Plan to all beneficiaries under the Mothers' and Dependent Children's Allowances Act is still under consideration. The Department is also interested in including those children whose parents are direct relief recipients. Problems affecting the fiscal relationship between the provincial and federal government must be overcome before very much further action may be expected.

The committee decided that the sub committee which has dealt with the proposals respecting extension of the Welfare Plan should be continued in order to maintain the Welfare Plan under study.

3. Pre Payment Plan

As a possible indication of a current trend the Secretary reported receipt of a letter from a Union official enquiring as to the availability of a dental care plan for workers in a plant in Fort William. The members of the Committee were apprised of the action of the Board in incorporating a Staff Dental Care Plan. The experimental nature and hoped for statistical data of the scheme were discussed and it was agreed that useful material should be forthcoming for further study and guidance. The meeting of the C.D.A. Dental Services Committee which was to be held on November 5th and 6th was to be made aware of the committee's concurrence with the Secretary's suggestion that some experienced person, preferably one with an actuarial background, should be retained to make a comprehensive study of all available data relating to the institution of prepayment plans. Such a report should be of great value in guiding the committee and the Board in taking measures to establish any form of pre payment plans.

As a first positive step along these lines the following motion was approved: "That this Committee strongly recommend to the Board of Directors that action be taken to seek incorporation of an agency which, under appropriate statutory authority, may be entitled to operate non-profit pre payment plans for dental care service in Ontario."

4. Centralized Accounting Plans

The Committee discussed the matter of organizations approaching the profession to provide accounting facilities. This apparently stemmed in part from the results obtained by the action of the Board (and the comparable authority in the medical profession) in dealing with the sale of accounts to these organizations by members of the College. It was agreed that the responsibility of the Committee or the Board to the members of the profession or the public in this matter was limited so long as the plans were conducted in a manner consistent with the ethical conduct expected of the members of the profession. The Administrator was urged to attempt to make the IBM Accounting Plan as favourable as possible and that the profession be apprised of the quality of the program in the hope that those members of the profession interested in employing such a service would utilize it rather than participating with other groups whose financial stability and ethical approach might be matters of concern.

The Committee also felt it was entirely possible that the training of undergraduates in matters concerning the professional attitude toward the business aspects of the practice of the profession might be open to some question. It was felt that in some instances, perhaps inadvertently, misconceptions in the matters of fees and collections were implanted and that these were reflected in faulty attitudes in the very earliest days of private practice. It was suggested that the matter might be discussed with profit at a Faculty Council meeting.

ACTION

1. Incorporation of an agency to operate non-profit pre-payment plans for dental care in Ontario is being sought.
2. Report adopted.

REPORT

ANNUAL MEETING

1. Introduction

The committee has held one meeting since the November meeting of the Board.

2. Welfare Plan

(a) Amendments to Law having a bearing upon the beneficiaries under the Mothers' Allowances Act.

The Secretary reported that the Director of the Allowances Branch of the Ontario Department of Public Welfare had informed him, at a meeting held with him and our Business Manager, that certain amendments had been proclaimed into law. It will now be possible to shift some of these beneficiaries to the General Welfare Assistance Act. Under this statute the municipality provides 20% of the cost and the remaining 80% of the cost is shared on a proportional basis between the Provincial and Federal Governments. The R.C.D.S. will now receive two cheques each month instead of the former one — totalling, however, no more than would a single cheque prior to this procedural change. One of the cheques will be issued under Mothers' Allowance and the other under General Welfare Assistance. The possible significance of these changes may be noticeable if new contract negotiations in regard to finances are ever undertaken.

It was agreed among the Allowances' Director, the Secretary and Business Manager that the existing contract lacks precision. The Welfare Department is reviewing the contract and will propose appropriate amendments. To expedite matters the Committee agreed to grant the Chairman and the Secretary authority to act in the name of the Committee in effecting necessary administrative amendments in the existing contract between the Department of Welfare and the R.C.D.S.

(b) Welfare Plan Payments

The Welfare Plan leaflet distributed to the profession states "until any further revision may be authorized payment will be made on the basis of 70% of the existing schedule. The Trust account from which fees are paid is created from a grant by the Department of Public Welfare based upon an amount of 70 cents per month for each eligible child."

In January 1963 the Ontario Dental Association issued a revised suggested Fee Guide in which there has been an overall increase of about 18% for the services with which the Welfare Plan largely concerns itself. There has been no concomitant increase in the grant from the Department of Public Welfare. The Committee, therefore, decided that "for authorized services rendered within the Dental Welfare Plan payment be made, commencing January 1, 1963, on the basis of the January 1963 Fee Guide of the Ontario Dental Association prorated two thirds."

It should be pointed out that even the decrease from 70% to two-thirds in the proration the return to the practitioner will be increased over that hitherto received. For example, the fee for a single surface amalgam was authorized at \$5.00 — 70% of which would be \$3.50. Under the 1963 schedule the fee for a single amalgam is \$6.00—prorated at two-thirds the operator would receive \$4.00. Based on our experience up to this point, it is believed the Dental Welfare Plan will be able to operate at this rate but with a reduced margin of safety financially.

(c) Extension of Services

The committee was informed that the Department has extended the eligible age of the children who are beneficiaries under this plan up to and including 17 years of age. This should provide an additional 2,800 children per month.

(d) These changes will necessitate changes in the Dental Welfare Pamphlet. The committee authorized the Secretary to effect the appropriate amendments, arrange for reprinting and then distribute the pamphlets to the profession.

(e) A detailed summary of statistics in connection with operation of the Plan is appended. (Appendix A).

(f) Comment

No complaints of any moment have been received. It has been suggested that the insistence of signatures of the parent indicating satisfactory rendering of services may be superfluous and in any event needs re-examination.

Some uneasiness has been expressed in some circles that governmental authorities may utilize the prorationing scheme here employed as a precedent in any other negotiations which may take place. The committee is aware of this concern and in all negotiations with government it is stressed that this arrangement may be valid only when welfare services are being considered.

3. Incorporation of Ontario Dental Services

The necessary legal procedures have been set into motion by the Board's Solicitor. The Secretary informed the members of the committee that he employed their names as the list of initial directors seeking incorporation of Ontario Dental Services.

4. Some extremely preliminary and tentative discussion has taken place at a committee meeting in regard to the standards that might be established in regard to any type of prepaid scheme which might be presented. It is suggested that either this committee, or some other, should be charged with the responsibility of accumulating data and preparing the groundwork for any discussions which may have to be entered into with governmental or other agencies.

5. The Secretary has been requested to enquire of the Director of the Bureau of Economic Research of the C.D.A. if it would be possible to place the name of each member of the Dental Services Committee on the mailing list to receive the *Dental Economics Newsletter*.

Appendix A

ONTARIO DENTAL WELFARE PLAN — 1962

Financial Position of the Plan

Balance from 1961	\$ 36,719.31
Grants 1962	186,408.60
	\$223,127.91
Payments	163,802.65
Balance December 31, 1962	\$ 59,325.26
Cash in Bank	\$ 26,783.34
Certificates — 5¾%	50,000.00
	\$ 76,783.34
Plus O/S Grant	15,430.80
	\$ 92,214.14
Less: O/S Payment	31,576.38
	\$ 60,637.76
Less: Accumulated Interest	1,312.50
	\$ 59,325.26

Participation in the Plan

Total Number of Dentists Participating	1,175
Total Number of Payments Made to Dentists	5,100
Total Number of Patients Treated	9,840
Average Number of Children Eligible per Month	22,191
Total Number of Children Eligible in the Year	28,991
Additions During the Year	6,741
Deletions During the Year	6,947

ACTION

1. Efforts to be made to have dental representation on any group established by provincial authorities to consider the provision of health care services under governmental aegis.
2. Report adopted.

DISCIPLINE COMMITTEE

MEMBERS: M. V. J. Kennan, Chairman; J. D. Purves; R. C. Honey; H. M. Jolley; J. R. Hurton.

REPORT

Since the last report of this Committee was presented most of the complaints received were of such a nature that no reflection could be cast on the accused.

However, the practice of one member of the College seems to require critical examination. Well documented complaints have brought attention to the unnecessary anatomical mutilation of dentitions.

Since this procedure has no authoritative acceptance it is recommended that the Board advise the offending member that his continuation of this practice will force the Board of the Royal College of Dental Surgeons of Ontario to take disciplinary action.

ACTION

1. Whereas the Board of Directors of the Royal College of Dental Surgeons of Ontario having viewed several models of the mouths of patients of Dr..... of are agreed that the anatomical mutilation of the dentitions of these patients is improper and is not in any manner to be considered a preventive measure.

Therefore be it resolved

That the Board of Directors of the Royal College of Dental Surgeons of Ontario hereby orders the said Dr..... to discontinue immediately this practice before action by the Discipline Committee becomes necessary.

2. Report adopted.

EXAMINERS AND PETITIONS COMMITTEE

MEMBERS: J. D. Purves, Chairman; D. J. Ferguson; W. G. Bruce.

REPORT

FALL MEETING

1. Fall Board Examinations

Licensing examinations were conducted for eight candidates.

2. Applications for Registration

The committee recommends that

1. Duane V. Jue, D.M.D. (Oregon '57), Kenrick Kawall, D.D.S. (Northwest '47), Clifford F. Ramcharan, B.D.S. (London '62), Edwin J. C. Small, D.D.S. (McGill '48), Travis F. Smith, D.D.S. (Western Reserve '57), Hubert O. Stone, D.D.S. (Nebraska '49), John H. Sweetnam, D.D.S. (Loyola '54), be granted their Licentiates in Dental Surgery in the Royal College of Dental Surgeons of Ontario when all remaining regulations and requirements have been met.
2. In respect of Trevor D. G. Lyons, B.D.S., he be required to complete to the satisfaction of the Board the construction of complete upper and lower dentures and the construction of either a partial upper denture or a partial lower denture and that he then be passed and be granted his Licentiate of Dental Surgery when all remaining regulations and requirements have been met.

3. Applications for Specialty Certification

The following having met the requirements for their respective specialties are recommended for certification:

1. Manly Gary Badner, D.D.S. (Tor '54), M.Sc.D. (Tor '62), in Orthodontics,
2. Melvin David Charendoff, D.D.S. (Tor '59), M.S. (Mich '62), in Paedodontics,
3. Sidney Golden, D.D.S. (Tor. '56), Cert. Perio. (Tufts '62), in Periodontics,
4. Samuel Newman, D.D.S. (Tor '56), Cert. Perio. '61, Boston '62), in Periodontics,
5. Franklin Pulver, D.D.S. (Tor '58), M.S. (Mich '62), in Paedodontics.

4. Approval of Graduate Programs

The committee recommends that each of the following candidates be considered eligible for certification in paedodontics when

1. Keith W. Davey, D.D.S., successfully completes his graduate program within the Division of Postgraduate Studies of the Faculty of Dentistry of the University of Toronto, such program which has as its major subject Oral Biology, and as its minor subjects Radiology and Statistics,

and thereby receives the Master of Science in Dentistry Degree in view of the fact that his previous clinical, teaching and academic experience is at least the equivalent of that which forms a portion of the diploma course in paedodontics,

2. Herbert W. Sorenson, D.D.S., successfully completes a modified program in paedodontics arranged by the Division of Postgraduate Studies of the Faculty of Dentistry of the University of Toronto and in view of the fact that his previous clinical, hospital, and teaching experience is at least the equivalent of that which forms a portion of the diploma course in paedodontics.

5. Liaison Sub Committee

The committee regrets to report that because of the assumption of full-time teaching and research at the School of Dentistry of the University of Michigan Dr. Robert Rapp has found it necessary to resign from the Liaison Sub Committee as one of the representatives of the specialty of paedodontics. The committee polled all certified Ontario paedodontists and Dr. Gordon Nikiforuk is recommended as successor to Dr. Rapp.

6. Format of Examinations — By-Law No. 1, Section 2

The committee was again requested by the Board to review the format of the licensing examinations. The committee, while believing the present format is not entirely satisfactory, agrees that a major change would not be justified until the future relationship between the R.C.D.S. and the National Dental Examining Board of Canada has become clarified.

7. Temporary Registration

The committee considered the advisability of making temporary registration possible. While it was agreed that there might be the rare instance where the absence of temporary registration creates some hardship it was generally held, in view of the experiences of other licensing authorities, that temporary registration creates more problems than it solves. Significant difficulties arise when candidates have been given temporary registration and subsequently fail to meet the standards expected of them in the examinations.

The committee was also of the opinion that as licensing examinations are held twice each year anyone coming to Ontario from any distance would, assuredly, clear the legal requirements well in advance. The committee felt that the Board could well view with a certain degree of suspicion anyone who simply arrived on the scene without demonstrating appreciation for the reasonable requirements imposed by licensing regulations.

ACTION

1. Report adopted.

REPORT

ANNUAL MEETING

1. A review of the present methods employed and the philosophies which pertain with respect to specialty certification has elicited no proposal for change at this time. The committee strongly believes that the projected Royal College of Dentists of Canada could effectively serve to establish and maintain specialty certification criteria acceptable to the participating provincial dental legal bodies. The committee urges early action to make the Royal College of Dentists of Canada operable and accordingly presents the following resolution:

Whereas the number seeking certification in the various specialties recognized by the Canadian Dental Association is rapidly increasing, and

Whereas the extension of the number of specialties at present recognized by the various Corporate Members is under study, and

Whereas the assessment of the graduate specialty programs given in many jurisdictions is difficult to establish in respect to quality and content, and

Whereas the establishment of adequate certification criteria for all specialties could best be accomplished by a national body,

THEREFORE BE IT RESOLVED

THAT the Board of Directors of the Royal College of Dental Surgeons of Ontario endorse the creation of a projected Royal College of Dentists of Canada to establish and maintain criteria for specialty certification, and further

THAT this Board would support this principle and be prepared to offer, on an equitable basis, financial assistance to help assure the success of the Royal College of Dentists of Canada.

2. The diploma courses in orthodontics and in periodontics at the Faculty of Dentistry of the University of Toronto have been extended from 17 to 22 academic months. As this Board, by policy, employs the various graduate specialty programs of the Toronto Faculty as the academic criterion of certification it is recommended that subsection 3 of clause II of "Rules and Regulations for the Certification of Specialists" be amended to permit the said subsection to read as follows:

"Completion of a post-graduate course in the specialty designated, in any dental school or institution approved by the Board consisting of a minimum of thirty-two consecutive months of instruction in the specialty of Oral Surgery, a minimum of two consecutive periods of eleven months each in the specialties of Orthodontics and Periodontics, and a minimum of two consecutive periods of eight months each in the specialty of Paedodontics, or the equivalent of such courses. In Dental Public Health, completion of a post-graduate course consisting of a minimum of eight consecutive months of instruction in a dental school or institution approved by the Board, and in addition two years subsequent service in an approved health agency."

3. The committee authorized two hospital internship agreements with two non-registrable dentists with the Hamilton General Hospital such hospital enjoying Canadian Dental Association approval of its Dental Service.

4. At the Fall, 1961 meeting of the Board the Examiners and Petitions Committee was authorized on behalf of and in the name of the Board to review the results of the licensing examinations to be conducted from May 16th to 18th, 1962 and grant registration to the successful candidates.

Applications for Registration

The committee directed that:

- (1) Ivars Cenne, D.D.S. (McG. '58).
Edward C. Cooperman, B.A. (Clark '57), D.D.S. (Penn. '62).
Michael Demetri, Dip. Dent. (Athens '53), D.D.S. (McG. '60).
Andrzej Duksza, B.D.S. (Lond. '60).
Janusz Jagaciak, B.D.S. (Sheff. '60).
Alojzy Richard Lachowicz, D.D.S. (McG. '60).
Joel Mark Levin, B.A. (Buff. '58), D.D.S. (Buff. '62).
Phillip Allan Seltzer, D.D.S. (Det. '62).
Arnold Charles Shulman, D.D.S. (Det. '62).

be granted their Licentiates in Dental Surgery in the Royal College of Dental Surgeons of Ontario when all remaining regulations and requirements have been met.

- (2) In respect of Paul Vyte, D.D.S. (Mont. '58) he be required to complete to the satisfaction of the Head of the Department a program of 120 hours in the subject of Operative Dentistry and that he then be passed and be granted his Licentiate of Dental Surgery when all remaining regulations and requirements have been met.

5. Applications for Specialty Certification

It is recommended that each of the following having met the requirements established for certification in his respective specialty be granted certification when the appropriate transcript has been received:

- (a) John Jury Brake, D.D.S. (McG. '50), Dip. Orth. (Mont. '51) — Orthodontics.
- (b) Roderick Nicol Jack, D.D.S. (Tor. '59), Dip. Perio. (Tor. '63) — Periodontics.
- (c) Frederick Charles Lackie, D.D.S. (Tor. '42), Dip. Perio. (Tor. '63) — Periodontics.
- (d) Wilfred J. McColeman, D.D.S. (Tor. '46) — Orthodontics.
- (e) Norman Levine, B.A., D.D.S. (Tor. '60), Dip. Paed. (Tor. '62) — Paedodontics.
- (f) Burton Wallace Pickering, D.D.S. (Tor. '49), Dip. Orth. (Tor. '63) — Orthodontics.
- (g) Myron Poplove, B.Sc. (McG. '49), M.Sc. (McG. '51), D.D.S. (McG. '56), Certs. Perio. (Penn. '61) and (Bost. '62) — Periodontics.
- (h) Alan N. Winnick, D.D.S. (Tor. '60), Certs. Perio. (Penn. '61) and (Bost. '62) — Periodontics.

ACTION

1. Dr. Lajos Balogh, having met the requirements of the Examiners and Petitions Committee and in accordance with the authority granted at the November, 1962 meeting of the Board, was ratified and confirmed as a Licentiate of the Royal College of Dental Surgeons of Ontario dated from January 25th, 1963.
2. The resolving clauses of the Resolution contained in the report of the Examiners and Petitions Committee was submitted to the Canadian Dental Association for inclusion in the 1963 Board of Governors Meeting.
3. The following to be granted their Licentiate Certificates when the Faculty Council advises the Registrar that all conditions have been cleared: Messrs. Crooks, Crouse, Karstoff, Silverberg, Smits and Swords, and when all additional requirements have been met.
4. The following have been recommended for the Degree of Doctor of Dental Surgery from the Faculty of Dentistry of the University of Toronto and having met all other requirements of the Board were registered as Licentiates in Dental Surgery:

Anderson, Donald Anthony
 Aquilina, Paul Joseph
 Armstrong, Robert Milton
 Asling, Miss Patricia
 Balfour, Robert Malcolm
 Bambha, Jagdish Kumar
 Barker, Robert Jackson

REPORT

1. Introduction

The members of the Staff of the Faculty of Dentistry who have been actively associated with dental education in Toronto during the past decade can now look back upon a stimulating ten year period of growth and development. Firstly, the many months of planning new facilities and the training of staff; secondly, watching the construction of the new building and the recruitment of students; and thirdly, the occupation of the new quarters and enrolling capacity classes. The last four years have been spent in the third phase portrayed above, but this is not the time to sit back and proclaim that "we have arrived". There is still much to be done to maintain dental education as the dynamic process which it has become through the years.

With new dental schools being established in Canada, the responsibility of the Toronto Faculty, in training and developing more and more teachers and research personnel becomes a heavy one. We believe the next decade will require an active program of personnel preparation, not only to meet the demands of new schools but also to improve the ratio of full-time teachers in the established schools, particularly our own in Toronto.

2. Full-time Staff

In the report to the Royal Commission on Health Services and subsequently in correspondence with the President of the University, the need for more full-time teachers on the staff of this Faculty, has been emphasized.

In spite of these observations, in session 1962/63 an additional fifty part-time instructors were appointed to the staff.

Restricted finances necessitated the provision of part-time staff rather than their equivalent in full-time teachers. The total academic staff now includes fifteen on a full-time basis and one hundred and sixty on part-time.

Budget provision for fifteen new full-time staff was requested for session 1963/64, but the final allocation permits the addition of only five new full-time teachers. Unfortunately, some rather vital full-time appointments must be postponed.

3. Dentistry as a Career

With the classes in the Dental Faculty at or approaching full capacity, the problems created by limitation of enrolment become more acute. There is a noticeable increase of interest in dentistry as a career. At a recent Career Day held in one of Toronto's largest Collegiate Institutes

no less than eighty students (girls and boys) attended the presentation on dentistry. Recruitment efforts and the increased numbers of students seeking University education are responsible for the interest. Recruitment activity should not be curtailed at this time. The increased number seeking dentistry as a career will have the desirable effect of raising the standards of those admitted to the profession and give emphasis to the needs for a second dental school in the Province of Ontario.

However, the Universities of Ontario are becoming more sensitive to the importance of using to the maximum, their facilities and resources in the years ahead. One facet of this subject is acceleration of education so that more students may be accommodated as in the post-war years. The possible introduction of the Tri-mester system has been raised so that students may complete a four year course in three years. Under these circumstances the University facilities would be in use for undergraduate teaching ten and a half or eleven months of the year. The problems inherent in such a scheme are:

- (1) loss of student earnings during the Summer vacation period, which would have to be offset with vastly increased provision of financial aid for students;
- (2) loss of student time to relax, reflect and recuperate, so that they may return to their studies in a receptive mood;
- (3) loss of staff time for reviewing and revitalizing lecture notes, teaching materials and curriculum content;
- (4) loss of staff time for research activities and graduate and postgraduate student direction.

In the Dental Faculty we have already introduced a workable plan of moderate acceleration. The third year class remains in active session until June 30th and the same class returns after a nine weeks' vacation to commence the final year in the first week of September. Graduation in early April is feasible under this arrangement. The clinic facilities are idle under this plan for only nine weeks of the year, instead of about eighteen to twenty weeks formerly and this shorter period is the minimum required for overhauling the equipment. The effect on student summer earnings was revealed in a recent survey made among the Toronto students. Ninety-three per cent of the first and second year students found summer work in 1962 and saved an average of \$743 and \$686 respectively. Fifty per cent of those seeking employment for the short vacation between third and fourth year had difficulty arranging employment and their savings averaged \$404. Thus the earning capacity of the students of the early years is preserved under the present Toronto arrangement. The loss of earnings in the summer period prior to entering the final year, is offset by earlier graduation.

Acceleration of the four dental years, which was undertaken and accepted during World War II should *not* be contemplated at this time. Nor should overcrowding of the facilities such as occurred during the post-war emergency, be permitted today. Standards cannot be safeguarded for long under such circumstances.

4. Registration

Once again progressive registration figures are produced for the record. For the year preceding occupation of the new facilities and the four subsequent years, the statistics are as follows:

	1958-59	1959-60	1960-61	1961-62	1962-63
<i>Undergraduate Course</i>

The October, 1957 prediction of registration in session 1962/63, in the undergraduate course and dental hygiene was 690. The actual registration in these two categories as shown above, was 692. We regret the slight inaccuracy. With the demise of the Preprofessional Class in the Faculty of Dentistry in session 1963/64 in favour of their registration in the Faculties of Arts & Science of their choice, the registration figures in the Faculty of Dentistry will be reduced by one hundred and twenty-five.

5. Student Financial Aid

With the assistance of the Department of Financial Aid in the University Registrar's Office, the following details were prepared, indicating financial aid received by students in the Dental Faculty during sessions 1960/61 and 1961/62. Figures for 1962/63 are not yet available.

	1960-61	1961-62
Total Financial Aid received by Dental Students	\$71,561.00	\$119,260.00
Number of students receiving Aid	173	235
1961-62 Type of Aid — Scholarships	4%	
Bursaries	39%	
Loans	57%	

The following Table comparing the situation in the Faculty of Dentistry with other Faculties in the University is of interest.

	Dents	Meds	Pharm.	Arts	Average
Percentage of Students receiving Aid	43	41	27	31	34.7
Average amount for student receiving Aid	\$507	\$469	\$438	\$493	\$495.

These figures do not include the assistance received through the Reserve Officer Training Plan. (R.C.D.C.)

During the current session six students contracted for bursaries provided under the arrangement announced by the Minister of Health of the Ontario Government approximately one year ago. A total of ten \$1,000 bursaries were available. Reference was made in this Report, one year ago, to the terms of award of these bursaries.

6. Auxiliary Personnel

In the annual Report submitted by the Dean a year ago reference was made to a proposed experimental program designed to obtain information, concerning possible "expansion of the duties generally recognized as being within the scope of the Dental Hygienist". The projects outlined in Appendix B attached to the 1962 Report have been implemented during the current session but the results have not yet been evaluated. We shall report in more detail on this experimental study at a later date.

Also under the heading of Auxiliary Personnel we indicated a year ago, that a Committee was studying "ways and means of training the dental student to utilize effectively, the services of the dental assistant". Present indications are that in session 1963/64 we will have the benefit of the services of a new staff member to initiate such a program on a modest basis, which in the years to come we hope will develop into a very significant contribution to the manpower situation.

7. Continuing Education

An interesting and stimulating new area of continuing education presented itself during the current session. The School of Hygiene requested participation of the Faculty in the Sixth Annual Refresher Course for public health personnel, February 4-8. The entire second day of the program was devoted to dental aspects of public health. Those enrolled in this Refresher Course, numbering approximately ninety, included medical health officers, practising physicians, dentists, veterinarians, nutritionists, bacteriologists, virologists, nurses, sanitarians and public health workers.

We cannot help but comment on the growing number of students from overseas, who are enrolling in Postgraduate Courses offered by the Faculty. During the 1962/63 session we have had, in addition to the seventeen Canadians registered in the Specialty Courses, the following overseas graduates:

Dental Public Health

- 3 candidates from the Philippines
- 1 candidate from Thailand
- 1 candidate from Malaya.

Orthodontics

- 1 candidate from Peru
- 1 candidate from Malta
- 1 candidate from India.

Periodontics

- 1 candidate from the Philippines
- 1 candidate from Denmark.

Master of Science in Dentistry

- 1 candidate from Ghana.

The six Courses of three to five days' duration have attracted in addition to one hundred and one Canadian dentists, twenty-one candidates from the United States.

8. As Others See Us

The Faculty of Dentistry was well represented at the recent annual meetings of the International Association for Dental Research and the American Association of Dental Schools held in Pittsburgh. The papers presented by members of the Division of Dental Research and graduates of this Faculty who are presently registered in graduate programmes in the United States were of a very high calibre. Testimony to this effect came to the notice of the Dean from several sources following the meeting.

Dr. P. G. Anderson presented two papers at Conference Sessions on Operative Dentistry and Fixed Partial Prosthesis, during the meeting of the American Association of Dental Schools. These papers portraying new concepts in dental education were well received by those attending these Conference Sessions. While we hesitate to speak too enthusiastically about developments and new ideas which have been introduced since entering the new building, there is no doubt that from the favourable comments heard during the A.A.D.S. Meeting and in correspondence from visitors to the school, the Toronto school is now recognized as being in the forefront of dental education. The Head of one overseas dental school who was in Toronto recently, commented after his visit as follows: "Looking back on my visit I think I can say without a doubt that the Toronto Dental School shows the greatest amount of thought about the problem of combining dental education, dental treatment and dental research. You have reached a very successful conclusion. I congratulate you, too, on having an active and enthusiastic staff and I was particularly impressed with the use of closed circuit television".

As Dean of this Faculty I am grateful to the members of the staff who at meetings like the I.A.D.R. and the A.A.D.S., have contributed so much to create such a favourable image for this school.

9. Public Relations

The members of the Faculty Council are sensitive to problems which concern this Board, relating to unreasonable fee schedules of a few recent graduates. During the past academic year this subject has been discussed on several occasions and a renewed effort will be made to impress on the members of future graduating classes the harm which accrues to the

profession from even a few isolated instances of this nature. The lectures given in practice administration are excellent, but casual observations by individuals in close contact with students quickly undermine the most effective lectures. At the beginning of the next session, it is intended that an appeal be made to all members of the staff, urging caution in this vital realm of public relations.

10. Varsity Fund

The Faculty of Dentistry recently received a grant of \$6,000 from the Varsity Fund, to be used in providing permanent housing for the valuable data accumulated at the Burlington Orthodontic Research Centre, during the past ten years. This material is unique in many respects and is attracting world wide interest among research workers. During the past year, data from Burlington were used by staff and graduate students in diverse areas, such as anatomy, surgery, orthodontics, anthropology and genetics. The proper organization of this data is important to its preservation and its usefulness in the future.

11. Student Awards

The writing award competition sponsored by the American College of Dentists, open to students in the graduating year in dental schools in Canada and the United States has been won this year by Roel Wyman of this Faculty. The title of Mr. Wyman's winning essay, selected by the American College of Dentists, was "How can dental educational methods be improved".

In the Summer of 1962, two of the four cadet awards offered by the Royal Canadian Dental Corps, were won by Toronto students. These awards are made to candidates achieving the highest standard of excellence in each of the phases of training. The Honour Cadet Trophy, Phase One, was awarded to Officer Cadet I. C. Wamberra of the First Dental Year and for Phase Two, the award was won by Officer Cadet H. Greisbach of the Second Dental Year. Since all Canadian dental schools are represented, the winners bring honour, not only to themselves, but to the school as well.

Mr. Ralph Grose of the graduating year was the winner of a Students' Administrative Council Honour Award. These awards are made to students who have made a significant contribution to student activities within the general University Community.

The National Research Council has provided two Scholarships to each dental school to be offered to outstanding students of any academic year in order to provide an opportunity for undergraduates to work on research projects relating to dentistry. Mr. R. W. Priddy of the First Dental Year and Mr. Eric Luks of the Second Dental Year have been awarded these Scholarships for the Summer of 1963.

12. Staff

The untimely death of Dr. Wallace Graham on December 14th, saddened his many close friends on the staff. Dr. Graham was highly res-

pected as an instructor by students in both medicine and dentistry. The tribute of the Council of the Faculty of Dentistry took the form of a Resolution which is recorded in the Minutes of the Faculty Council.

Dr. Marjorie Jackson was appointed Supervisor of the Course in Dental Hygiene at the beginning of the current session.

13. Acknowledgements

Once again it is my happy privilege to extend to many people and organizations the sincere gratitude of the Faculty for their continuing interest and support. Particular reference is made to the benefits we have derived from the assistance of the Ontario Dental Association with the Museum project. With equal emphasis we extend appreciation to the Dental Alumni Association and this Board for generous contributions in support of numerous Faculty projects.

In conclusion, I seize this opportunity to acknowledge the moral support which members of this Board have so graciously accorded to the Dean in the past and during the current session.

ACTION

1. Letter of congratulations sent to Roel Wyman.
2. Report adopted.

MEMBERS: J. R. Hurton, Chairman; H. M. Jolley; D. J. Ferguson.

REPORT

1. General Remarks

The financial structure of the Royal College of Dental Surgeons of Ontario was carefully appraised. The headquarters building is fully-owned. Additional bonds have been purchased but the cash assets are less than should be expected for this organization. The change of the fiscal year to correspond to the calendar year has been accomplished and one full year (1962) has been completed. There have been increasing activities at headquarters with some increase in operating cost. However, this was anticipated by your committee in their budget. This is well illustrated in the double budget for the years ending December 31, 1961 and December 31, 1962. The actual surplus exceeded the budget surplus by only a few hundred dollars. This is an example of the terrific team work of this committee, the treasurer Dr. Dunn and Mr. W. E. Jackson our business manager, along with the generous co-operation of each director. It is our hope that the 1963 budget may prove equally as realistic and comprehensive.

2. Grant to the Canadian Dental Association

The Committee at its meeting on March 20th, 1963, agreed that grants to the C.D.A. were in balance as of December 31, 1962. The Committee then reviewed the licentiate fee structure of the Board which applies for different categories:

Active Member	\$75.00
Graduating Student, U. of T.	40.00
Inactive Member	40.00
Life Members	NIL

The Committee offers no recommendations to change this structure this year. The Committee does, however, present two proposals having a bearing upon the present C.D.A. grant structure:

- (a) That for the calendar and fiscal year 1963 the grant to the Canadian Dental Association be calculated on the basis of \$40.00 for every active, graduating student, and inactive member recorded on December 31, 1962 and that for each member to whom the Board has granted Life Membership such Life Membership being tenable on December 31, 1962, an aggregate grant equivalent to the amount required for Associate Membership in the Canadian Dental Association for each of the said Life Members be remitted.

Thus the grant for 1963 would be calculated as follows:

Number of active, graduating student, and inactive members (Dec 31, '62)	= 2,439 × \$40.00	= \$97,560.00
Number of Life Members on December 31, '62	= 83 × \$8.00	= 664.00
Total grant		<u>\$98,224.00</u>

- (b) That the practice of assessing a partial licentiate fee for new registrants from the Faculty of Dentistry, University of Toronto, be discontinued and that for 1964 the said licentiate fee for such registrants be identical to that fee required of any active member.

3. Signing Authority

The Committee considered the advisability of the Business Manager being authorized within the By-laws to sign cheques on the R.C.D.S. Current Account. Accordingly the Committee approved the following motion:

"That the Finance Committee recommend to the Board of Directors that a By-law amendment be enacted to enable the Business Manager, on the basis of appropriate security, to sign cheques on the R.C.D.S. Current Account in the Royal Bank of Canada, Bloor and Bedford Branch, Toronto, when delegated to do so by the Treasurer."

ACTION

1. Budgetary item with reference to the Canadian Dental Association grant adopted at the November, 1962 meeting was adjusted to \$98,224.00.
2. Report adopted.

REPORT

FALL MEETING

1. Death of a Practitioner

The Board directed the Committee to consider the provisions of By-law No. 13, Section 2(a), as they relate to the estate of a deceased dentist. This section excludes a dentist from engaging in the practice of his profession for the profit of any person who is not duly qualified and lawfully entitled to practice dentistry in Ontario. Thus this provision would seem to preclude a dentist from carrying on a practice for a limited period of time with a portion of the proceeds accruing to the deceased dentist's widow.

The Committee recommends that the Board adopt a policy under which rental paid by a duly licensed practitioner to the personal representative of a deceased practitioner, for a period not exceeding twelve months, for equipment and office space on a basis consisting in whole or in part of a percentage of the gross receipts realized from the practice, would not be deemed to be a breach of the provisions of By-law 13, Section 2(a).

2. Radiological Technicians

Members of the Ontario Society of Radiological Technicians may, in consonance with their rules and regulations, engage in radiological work in an ethical manner under the supervision of a qualified medical or dental practitioner. Radiological technicians are employed extensively in hospitals throughout the Province and in a more limited capacity are employed by radiologists in private practice.

The definitive regulations made pursuant to the Dentistry Act of Ontario provide authorization for dental hygienists to perform radiological services but none exists in respect of Registered Radiological Technicians. The Board's Solicitor while stating that it is arguable there is no prohibition in the Dentistry Act against taking radiographs of any kind if the technician's activities are limited to the making of radiographs and the interpretation is the responsibility of the dentist, nevertheless believes that the Board is not in a position, under the Act, to authorize such a course of action.

When one compares the training required for registration by the O.S.R.T. with the training in radiology provided for student dental hygienists, the comparison is most favourable. It appears desirable that the Board should investigate the possibility of creating a legal environment which would make possible the employment of registered radiological technicians in dental practice. To that end it is recommended that the Secretary and Solicitor of the Board enter into discussions with the Ontario Society of Radiological Technicians and/or the Joint Committee

on Radiological Technicians' Affairs which operates as a Committee of the Section of Radiology of the Ontario Medical Association, with a view to the ultimate development of regulations consistent with the appropriate statutes.

3. Hospital Internship

- (a) By-law No. 9, Section 1 makes reference, when considering acceptability of candidates for hospital internships, to graduates of approved schools. Present practice broadly interprets this section to include any dentist who possesses a registrable qualification even though he may not be a graduate of an "approved school". In this group would be included those who hold the U.K., Australian, and New Zealand B.D.S. degrees and those with the F.D.S. qualification. The employment of the term "approved school" means in effect, a dental school approved by the Council on Education of the Canadian Dental Association. By reciprocity, this will include the dental schools approved by the Council on Dental Education of the American Dental Association. The Committee recommends that this section be amended to authorize consideration of all candidates possessing "registrable qualifications".
- (b) The Committee requests that the Board give consideration to whether or not the limiting of such hospital internships to candidates possessing registrable qualifications is too restrictive in view of the fact that such persons are engaged by the hospital and must render their services under the responsible oversight of the Chief of the Dental Department. The Educational Register was created to permit graduate dentists not possessing a registrable qualifications in Ontario to function in a hospital as an intern *provided this internship is a portion of an academic program*. This proviso thus has the effect of limiting such activities to those hospitals directly related to a University possessing a Faculty of Dentistry. The Committee recommends that the Board consider extending the provisions for hospital internship to any graduate dentist provided that
 - (1) the qualifications of the graduate dentist are satisfactory to the Board for the purpose of granting permission for hospital internship, and
 - (2) the Dental Services of the hospital in which the applicant seeks an internship have been accredited by the Canadian Dental Association.

Should the Board agree to this recommendation then the continuance of the Educational Register would no longer be necessary.

4. By-laws Respecting Dental Hygienists

Under Section 12 of the Dentistry Act of Ontario (R.S.O., 1960, Chpt. 91), the Board has power, subject to the approval of the Lieutenant-Governor in Council, to pass By-laws providing for the establishment, development, regulation and control of — dental hygienists. By-laws created over a decade ago, while applicable at the time, require, in the light of contemporary needs and procedures, extensive revision. The Committee therefore will present an amending By-law for the consideration of the Board and if concurred in by the Board then subsequently to the Lieutenant-Governor in Council.

ACTION

1. Report adopted.

BY-LAW NO. 95

Being a By-law to amend By-law No. 9, Section 1.

Be it enacted a By-law of the Royal College of Dental Surgeons of Ontario as follows:

That By-law No. 9, Section 1 be amended by deleting "of an approved school" in line 1 and substituting in place thereof "whose qualifications for the purpose of internship have been approved by the Board," and by deleting "recognized" in line 3 and by inserting following "Ontario" in line 4 "whose dental services are approved by the Canadian Dental Association,".

BY-LAW RESPECTING DENTAL HYGIENISTS

Be it enacted a By-law to repeal existing By-laws for Dental Hygienists and substitute in place thereof By-laws 1 to 26 inclusive.

That the By-laws for Dental Hygienists enacted by the Board of Directors of the Royal College of Dental Surgeons of Ontario pursuant to The Dentistry Act of Ontario and as approved by the Lieutenant-Governor in Council on April 19th, 1951 be repealed and

That the following By-laws for Dental Hygienists be enacted in place thereof:

REGULATION 76 under The Dentistry Act R.S.O., 1960, Chpt. 91

INTERPRETATION

1. (a) In these By-laws "registrar-secretary" means the person appointed by the Board of Directors of the Royal College of Dental Surgeons of Ontario (Board) as registrar and secretary of the College.
(b) "Approved" means approved by the Board.

ESTABLISHMENT OF DENTAL HYGIENISTS

2. An ancillary body known as "dental hygienists" is established.
3. Dental hygienists consist of those persons who are registered under this By-law as dental hygienists.
4. No person shall act as a dental hygienist unless she is registered under this By-law.

DELEGATION

5. There is delegated to dental hygienists, under the direct control and supervision of a member of the College
 - (a) the performance of the services of cleaning and polishing teeth,
 - (b) the giving of instructions and demonstrations in oral hygiene and mouth care, and
 - (c) the following dental duties:
 - (i) administering first aid,
 - (ii) making radiographs,
 - (iii) topical application of medicaments, and
 - (iv) any other procedure of a minor nature acceptable to the Board.

MATRICULATION REQUIREMENTS

6. Anyone desirous of obtaining registration as a dental hygienist in the Province of Ontario is required:
 - (1) to be a female person
 - (2) to hold standing
 - (a) in 9 papers of the Ontario Department of Education known as Grade XIII papers as follows:
 - (i) 2 papers in English,
 - (ii) 2 papers in Latin or 2 papers chosen from algebra, geometry, and trigonometry — and — statics,
 - (iii) 2 papers chosen from botany, zoology, physics and chemistry,
 - (iv) 2 papers in any one language chosen from French, German, Greek, Spanish and Italian, and
 - (v) one paper not already chosen from the options in clauses (ii), or (iv),

or
 - (b) equivalent to the standing in clause (a) as determined by the Minister of Education.

COURSE OF STUDY

7. The course of study for student dental hygienists shall consist of a minimum of two academic years in an approved dental hygiene program.

EXAMINATIONS

8. (1) The Board may conduct examinations for candidates seeking registration as dental hygienists.

- (2) The registrar-secretary shall conduct or cause to be conducted the examinations referred to in sub-section (1).
- (3) The Board may accept the examinations as conducted by an approved dental hygiene program as the registration examinations for dental hygienists.

REGISTRATION

9. (1) Every student dental hygienist in Ontario who
 - (a) has completed the course of study prescribed by section 7 and
 - (b) has passed the examinations prescribed by section 8 may apply to the registrar-secretary for registration as a dental hygienist.
- (2) The application for registration shall be in Form 1.
10. The registrar-secretary shall register as a dental hygienist any applicant referred to in section 9 who
 - (a) pays the treasurer of the College the registration fee prescribed by section 21 and
 - (b) furnishes proof to the satisfaction of the Board that she has complied with the requirements prescribed by section 9.
11. (1) Any female person who
 - (a) has graduated from a school outside Ontario recognized by the Board as requiring qualifications for admission and proving a course of study equivalent to those required under clause (b) of sub-section 2 of section 6, and of section 7,
 - (b) possesses the aptitude, capacity and character to become and act as a dental hygienist, and
 - (c) has passed the examinations prescribed by the Board under section 8may apply to the registrar-secretary for registration as a dental hygienist.
- (2) The application shall be in Form 1.
12. The registrar-secretary shall register any applicant under section 11 who
 - (a) pays to the treasurer of the College the registration fee prescribed by section 21, and
 - (b) furnishes proof to the satisfaction of the Board that she has complied with the requirements of section 11.
13. No person shall be registered as a dental hygienist unless she
 - (a) is a Canadian citizen, or
 - (b) furnishes proof to the satisfaction of the Board that she intends to make application for Canadian citizenship within a reasonable time after she is qualified to make the application.

THE REGISTER

14. (1) There shall be a register of dental hygienists containing the names of persons who are entitled to registration under this By-law.
- (2) The register shall be maintained by the registrar-secretary.

CERTIFICATES OF REGISTRATION

15. (1) The registrar-secretary shall issue a certificate of registration as a dental hygienist in Form 2 to every person whose name appears on the register.
- (2) The certificate shall be signed by the president of the College and the registrar-secretary.
16. A dental hygienist employed by a member of the College shall display her certificate of registration in a conspicuous place in the office of the member.

RENEWAL OF CERTIFICATES

17. Every certificate of registration shall remain in force during the calendar year in which it is issued.
18. Every registered dental hygienist shall pay annually to the treasurer of the College the fee prescribed by section 22 on or before the first day of January in each year and upon payment thereof the registrar-secretary shall issue a certificate of renewal of registration.
19. The registrar-secretary shall remove from the register, after ninety days, the name of any dental hygienist who does not pay the renewal fee as prescribed by section 22.

FEES

20. All fees are payable to the treasurer of the College.
21. The fee for registration under section 10 or section 12 is \$25.
22. The fee for renewal of a certificate of registration is \$2.
23. (1) Where the name of any dental hygienist has been removed from the register under section 19 and that dental hygienist pays a registration fee of \$5, the registrar-secretary shall register the dental hygienist and thereupon issue a certificate of renewal of registration.
- (2) On or before the 1st day of December in each year the registrar-secretary shall notify each dental hygienist that the annual fee is due at the end of the year.
- (3) The notice shall be sent by prepaid post addressed to the dental hygienist at her address appearing on the register.
24. Except as provided by section 16 and except to a member of the College, a dental hygienist shall not

- (a) by exhibiting, displaying or permitting to be displayed any sign or notice, or
- (b) by otherwise advertising
represent that she is
- (c) engaged or about to become engaged in the practice of dental hygiene.

Notwithstanding the provisions of sub-sections (a) and (b) of this By-law, any dental hygienist registered as such under this By-law is entitled to employ the designation, Registered Dental Hygienist, (R.D.H.).

25. (1) Where the Board, after a hearing, finds that a dental hygienist
- (a) has been guilty of
 - (i) incompetence,
 - (ii) improper or dishonourable conduct in respect of the dental practice of her employer, or
 - (iii) failure to comply with the Act or this By-law
 - or
 - (b) has been convicted of a crime that affects her fitness to practise
- the Board may revoke or suspend the registration of that dental hygienist and remove her name from the register.

COMMENCEMENT

26. This By-law shall come into force when approved by the Lieutenant-Governor in Council upon the recommendation of the Minister of Health.

FORM 1 The Dentistry Act APPLICATION FOR REGISTRATION AS A DENTAL HYGIENIST UNDER SECTION 11

I apply for registration as a dental hygienist. I have passed the examinations prescribed for admission to registration as a dental hygienist in Ontario. I enclose \$25 registration fee payable to the treasurer of the Royal College of Dental Surgeons, and submit the following information:

1. Name in full
2. Permanent address
3. Temporary address
4. Date and place of birth
5. Citizenship
6. Preliminary education
7. Name of secondary school attended
 - (i) Location
 - (ii) Time in attendance

8. Education as a dental hygienist

(i) Name of school attended

(ii) Location

(iii) Time in attendance

(iv) Date of completion of course

(v) Graduation diploma or certificate obtained

9. References

(Signature of applicant)

FORM 2
The Dentistry Act
CERTIFICATE OF REGISTRATION
AS A DENTAL HYGIENIST

..... is registered as a dental hygienist.
(address)

(Signature of President)

(Signature of Registrar-Secretary)

BY-LAW NO. 96
Enacted April 18th, 1963

Being a By-Law to amend By-Law No. 2, Section 5, By-Law No. 3, and By-Law No. 14, Section 5.

Be it enacted a By-Law of the Royal College of Dental Surgeons of Ontario as follows:

That By-Law No. 2, Section 5 be amended by inserting after the words "signed by the Treasurer" in line 13 the words "or upon and in accordance with the instructions of the Treasurer by a Business Manager duly appointed and bonded."

That By-Law No. 3 be amended by adding thereto, "A similar security bond shall be given by the Business Manager before he shall be authorized to sign cheques on current accounts."

That By-Law No. 14, Section 5 be amended by adding thereto, "No otherwise qualified elector shall be nominated or eligible for election to the Board or shall continue to be a member of the Board if he is or after election becomes a director of any corporation or organization engaged or involved in the business of providing dental supplies or non-professional services to the dental profession."

REPORT

The following is respectfully submitted concerning prosecutions and investigations for the period January 1st, 1962, to December 31st, 1962.

1. Prosecutions (Dentistry Act)

(a) Schulz, Kurt, 18 Clela Drive, Scarborough, Ontario

A complaint concerning unsuitable dentures resulted in search of premises and the following charges. It may be of interest to note that equipment found during search included extraction instruments, a portable head rest and also arm and hand piece.

Sec. 23 (1) (b) 'take impression with view to producing a prosthetic denture'

Sec. 23 (1) (c) 'supply prosthetic denture'

Sec. 23 (5) 'have dental equipment'

Charges were laid during July, 1962, and disposed of at Magistrates' Court, Toronto, on the 5-12-62 with convictions being registered on charges under Sec. 23 (1) (b) and Sec. 23 (5). The other charge was withdrawn. Due to previous convictions a fine of \$250.00 was imposed on each count and has been paid.

(b) Boisvert, Rene, 46 Nicolet St., Sudbury, Ontario

Laurin, Gerald, 440 Teddman Ave., Sudbury, Ontario

Following investigation of equipment found in an automobile owned by Boisvert and in which both were occupants, Boisvert and Laurin were charged jointly under Sec. 23 (5) 'have dental equipment'. Charge was laid during December, 1962, and on 4-1-63 at District Court, Sudbury, a conviction was registered against Boisvert and fine of \$500.00 and costs imposed due to previous convictions. The charge against Laurin was dismissed. Upon conviction the Magistrate saw fit to order that the equipment concerned in the charge be confiscated and disposed of. Fine and costs have been paid.

2. Investigations

Complaint was received from a community in Northern Ontario regarding an unregistered person soliciting a trade in dentures. The Ontario Provincial Police investigated this matter on request and no illegal practice or other circumstances to warrant the laying of charges was established by such inquiry.

Complaint was received regarding an unregistered person supplying dentures in Toronto and dentures and cheques to support payment were available. Investigation was made during the period of time for preferring charges, however the individual had left his usual place of residence and

his whereabouts or any further illegal activity, was not known or reported during this time. No charge was preferred in this instance on advice of the College solicitor as the individual could not be located and was not known to be continuing with any illegal activities.

3. General

There have been no complaints since January, 1962, concerning newspaper advertising in foreign language papers. An "X-Ray" sign displayed on premises contrary to By-Laws was readily removed on request. A few reports regarding suspected illegal activities and infraction of the Dentistry Act in various sectors of the Province are under investigation with inquiry being instituted and developments awaited.

ACTION

- 1. Report adopted.

REPORT

Library circulation this year has risen to the highest figure on record. Total circulation was 16,016, which included 2,047 items used in the reading room. There were 189 items loaned, by mail, to 84 out-of-town borrowers. There were 251 acquisitions of new books and seven new journal subscriptions were instituted. As of date of report, 55 orders are outstanding. The situation in regard to the lapse of time in receiving our orders is very much improved.

Donations of books, journals and museum items from many sources, including the following are gratefully acknowledged: Drs. G. A. C. Adams, Ford Butler, Menzies Campbell, F. Compton, C. Corrigan, J. T. Coyne, R. T. Durocher, R. G. Ellis, G. C. Hare, W. R. Hendry, E. B. Hooks, H. A. Hunter, M. Jackson, J. H. Johnson, A. W. Lindsay, M. E. Lucyk, Mrs. Hugh MacLaren, Drs. G. T. Mitton, G. Nikiforuk, K. J. Paynter, P. Peloso, R. W. Phillips (Indiana), J. A. Parish, M. Silverman and the Estate of Dr. A. P. Rutherford.

We also gratefully acknowledge donations from the American Dental Association; the Canadian Medical Association; Ash Temple Company; Denco; Dominion Dental Company; S. S. White Company; the Connaught Medical Research Laboratories; the American Equilibration Society; the Hospital for Sick Children; the Pan-American Health Association; the Colgate-Palmolive Company; the 1961 class in Dental Hygiene; the University of Michigan Library; the United States Department of Health, Education and Welfare; and the World Health Organization. Special acknowledgement is also made to the Novocol Chemical Manufacturing Company for generous financial assistance towards the museum; and to the Crown and Bridge Study Club for their donation to the library contingency fund. Grateful acknowledgement is made to Dr. F. W. Clement of Toledo, for a donation of interesting historical books; and to Dr. R. N. Reid of Regina for the donation of a copy of John Hunter's book, which is in an excellent state of preservation.

The present shelving space for our rare book collection is completely filled, and we are pleased to report that we have been able to secure four new sections with glass doors and locks in which to house our expanding collection. This will provide space for the addition of approximately one thousand more items.

Due to repeated breakage it has been found necessary to replace the existing wire retaining clips which held the current journals on the lid of the journal stacks in our periodical area. These clips have now been replaced by elasticized plastic cords which give not only a more pleasing appearance, but are much more functional and will cause much less wear on the respective journals.

A separate museum committee which meets independently to the library committee has been formed during the year. The mural depicting the history of dentistry has been completed and a temporary exhibit has been put on display. The museum was the subject of much interest and many favourable comments on "Open House" day. Electrostatic filters have been installed in the ventilation system of the library stack room and museum storage space in the basement. The situation previously existing has given rise to much concern, because of dust gaining entrance to the storage area with resulting damage to the contents. I am happy to report that the new filters appear to be working perfectly, and that the material is now stored under the best possible conditions.

We acknowledge with gratitude the co-operation received from the Library of the Canadian Dental Association and from Miss Gagnon, the librarian, who has given much help through the facilities of her Library. Appreciation is also expressed to Dean R. G. Ellis and various staff members who have made personal copies of texts available to us on loan in emergencies. Through the generosity of the University, it was possible for me to attend the conference session on dental libraries held during the annual session of the American Association of Dental Schools in Pittsburgh. It was also possible for me to visit the Dental Museum section of the Smithsonian Institute, where I received helpful and very much appreciated information. On the return journey, it was also possible for me to confer with Dr. Curt Proskauer at the Charles H. Land Museum at Columbia University. All of these visits were most helpful in respect to our own collection. My grateful appreciation is expressed for the financial assistance which made these visits possible.

My grateful appreciation is expressed to the members of the Library Committee for their interest throughout the year, and to the Library staff, for their efficient and courteous service. With the increase in library load, consideration should be given for provision of a corresponding addition to staff.

Comparative circulation figures, (Appendix A), together with a financial statement of both the University appropriation and the Harry R. Abbott Fund, (Appendix B), are presented herewith.

This report is respectfully submitted with the recommendation that the customary grants be continued for the ensuing year.

Appendix A

CIRCULATION FOR THE LAST FIVE YEARS

REPORT

FALL MEETING

1. The Annual Meeting of the N.D.E.B. was held in Ottawa on June 29th, 1961.

2. Report of the President:

Dr. Walter F. Hancock reported that the number of candidates who tried the June examinations exceeded all previous years by an estimated 35-40%. This year 126 candidates wrote the examinations. This compares with: 96 in 1961, 84 in 1960, 59 in 1959.

Drs. Fortier, Racey, Beach and Hancock, representing the N.D.E.B. met with Drs. Rogers, LaChapelle, LeBlanc and others representing the Quebec Board. As a result of this meeting all graduates from both University of Montreal and McGill University will be candidates for the N.D.E.B. examinations in 1964. The N.D.E.B. are to take over the written and oral examinations the Quebec Board are now performing.

A report was made of the meeting with the Board of the Royal College of Dental Surgeons.

An informal meeting was arranged with the Provincial Secretaries and other interested parties at the C.D.A. Convention in Vancouver at which time a very frank discussion was held. It was felt that this was very helpful and should become an annual event.

It was recommended that a representative of the N.D.E.B. attend the meeting of Secretaries.

It was reported that in British Columbia the registration fee for holders of N.D.E.B. qualification has been reduced from \$500.00 to \$200.00.

3. Report of the Secretary:

The Secretary reported that there are now 735 holders of N.D.E.B. certificates in Canada.

A report of Candidates according to Centre, Faculties and Provinces appears as Appendix A.

4. Report of Committee of Examiners:

Total number of candidates	126
Number passed in all subjects	114
Number with one supplemental	6
Number with two supplementals	1
Number failed	5

The Committee commented that it is noted with concern that in many instances the papers are carelessly written with deficiencies in spelling, grammar and neatness to the degree where it is considered a sub-standard performance for professionally educated men.

5. The Registrar-Secretary of the R.C.D.S. presented this Board's proposal respecting an extension of the role of the N.D.E.B.

His presentation was made in his usual very capable manner.

A lengthy discussion ensued which was outlined to this Board in the Report to Directors, Volume 7, Number 2, July 5th, 1962.

A motion was passed that the Chairman appoint a Committee to further study the proposal of the R.C.D.S. Brief presented at this meeting in an attempt to arrive at a solution that is mutually satisfactory.

6. The following Officers were elected:

President	— Dr. W. F. Hancock
Vice-President	— Dr. R. Ball
Executive	— Dr. A. C. Racey
	— Dr. T. J. Cooke
	— Dr. J. P. Coupland
Registrar-Secretary	— Dr. H. N. B. Beach

7. The President thanked the members for their confidence in re-electing him and also for the tremendous amount of work which had been done at this meeting.

1. Report adopted.

A PROPOSAL RESPECTING AN EXTENSION OF THE ROLE OF THE NATIONAL DENTAL EXAMINING BOARD OF CANADA

The following presentation was made to the N.D.E.B. on behalf of the R.C.D.S. Board by its Secretary on June 29th, 1962, in Ottawa.

"It is a privilege for the Board of Directors of the Royal College of Dental Surgeons of Ontario to be granted this opportunity of presenting certain proposals to the National Dental Examining Board of Canada. We do so with a sincere desire to be constructive because we recognize in the N.D.E.B. an important agency for the advancement of Canadian dentistry through the conduct of licensing examinations which maintain high minimum standards for those who seek the privilege of practising dentistry. Because of the possible ramifications which could accrue from unilateral action on the part of the Ontario Board and because of our sincere desire to function in a manner which places national interest in a position of priority, these proposals are offered for your consideration.

In the more than ninety years of Dentistry's statutory existence in Canada our profession has made outstanding progress in dental education, treatment procedures, organizational efforts, research, and public health. It is suggested, however, that regulations pertaining to the rights and privileges of practice have not kept pace with the growing maturity of Canadian dentistry. As the British North America Act confers upon the provinces of Canada the right to legislate in matters of health and education we have a multiplicity of regulations in respect of dental licensure developed and administered by respective licensing boards charged with the responsibility of determining who shall practice dentistry within provincial boundaries.

The dental profession itself must retain the responsibility of determining the educational requirements of those who propose to practice dentistry. It is a firmly established tenet of any profession, whose members are registered and provide professional services for the public, that the profession is the only group capable of determining and understanding the various qualifications and requisites for membership in it. The profession must have the indisputable right to determine whether or not the various schools of dentistry are selecting students with appropriate pre-professional training and once admitted that these students acquire an educational and training experience sufficient to permit them to provide a high standard of dental care to the public following graduation.

The Council on Education of the Canadian Dental Association, following the establishment of principles for the approval of schools, appointed a Survey Committee to assess the various Canadian dental schools in respect to their overall relationship to the established principles. Eventually all Canadian schools were approved by the Council and as an indication of the standards insisted upon, the comparable Council of the American Dental Association granted its approval to the Canadian dental schools as well. Thus the profession, through the Canadian Dental Association, a voluntary organization comprised of the ten provincial corporate members who within themselves are responsible for licensure arrangements, has assured itself that these schools are providing a high standard of dental education.

In view of the above one may be forgiven if it is believed there are inconsistencies in our licensing arrangements. One example may be cited.

In Ontario, The Royal College of Dental Surgeons, in effect, accepts the final examinations of the Faculty of Dentistry of the University of Toronto as the licensing examinations for the class graduating from that Faculty. Providing the student possesses his qualifying certificate he can be registered in Ontario immediately upon notification by the Faculty to the Board that he has successfully completed his final examinations. A similar arrangement exists in Nova Scotia wherein the Nova Scotia Board accepts the examinations of the Faculty of Dentistry of Dalhousie University as the licensing examinations for the final year students from that institution. The Ontario Board will not recognize, on the same basis, the Dalhousie graduate, nor will the Nova Scotia Board accept the Toronto student. In each instance a further examination is required.

In effect, what is being said in this situation? Is not the R.C.D.S. Board saying, "While we have confidence in the calibre of the graduate of Toronto, we do not regard the Dalhousie graduate as being similarly qualified?" And is the Nova Scotia Board not expressing the same sentiments only with the geographic locations reversed?

Informed and thoughtful dentists in both provinces really do not believe, geographic pride aside, that the students of one Faculty, generally, are more competent than those of the other. The situation is even more incongruous when it is realized that Ontario and Nova Scotia accept the lowest passing standard of their respective students but would examine the highest academically qualified from the other province's school.

How then may a reasonable and justifiable procedure be developed keeping in mind the prerogative of the profession and the attained approval of all the dental schools? There are, we believe, two methods and each can engender many arguments to support it.

Firstly, as the Canadian dental schools have all been accredited by an agency of the profession in which the provincial licensing boards participate, evidence of graduation from such a school might be sufficient in itself to assure professional competence and permit registration without further examination.

Secondly, a further development of the National Dental Examining Board of Canada could be the means of synthesizing a solution which could retain the prerogatives of the profession, give recognition to the attained approval of all dental schools, and provide a facility for examining candidates, who although possessing registrable qualifications in some provincial jurisdictions are not graduates of approved Canadian or American dental schools. We believe the second alternative is much to be preferred.

The Board of Directors of the Royal College of Dental Surgeons of Ontario is on record in expressing its willingness to make the possession of the N.D.E.B. certificate mandatory *providing the N.D.E.B. does not require that candidates write an additional set of examinations subsequent to graduation from their respective approved schools*. Such graduation is obviously indicative that the candidates have already satisfied the minimum requirements of the approved schools as determined by the examinations of the schools.

The N.D.E.B. could establish its own requirements for approval of Canadian dental schools or it could associate itself with the Council on Education of the Canadian Dental Association in this venture. The N.D.E.B. through arrangements satisfactory to itself and to the schools, could satisfy itself that the final examinations of the respective dental schools are sufficiently comprehensive to warrant their recognition for N.D.E.B. purposes.

In addition, the National Dental Examining Board of Canada is respectfully encouraged to so amend its regulations that it will be prepared to conduct a licensing examination for any candidate for whom a provincial registrar provides an enabling certificate. Thus candidates who possess the B.D.S. degree of a United Kingdom, Australian, or New Zealand dental school and candidates who possess the F.D.S. of the Royal College of Surgeons of England or Edinburgh could obtain their academic entitlement to registration in Ontario through the acquisition of an N.D.E.B. certificate.

Unfortunately, the position of Ontario in respect of the National Dental Examining Board of Canada appears to be misunderstood in several quarters. By the above suggestions it should be perfectly obvious that Ontario is not only anxious to assure the continued existence of the N.D.E.B. but indeed would desire that the function of the N.D.E.B. be expanded to meet contemporary conditions and requirements."

REPORT

Two years ago you honoured me by electing me President of this Board. Within this period many things of importance have been accomplished and I am indeed grateful to the chairmen and members of the various committees of this Board for the manner in which they have dealt with their particular problems.

There are many things yet to be accomplished.

During the past year the Secretary and I have had two meetings with the Minister of Health of our province with regard to a new dental school. At our second meeting we presented the excellent report prepared by Dean A. C. Lewis, as to the location of this school. The Minister agreed wholeheartedly with the conclusions of this report and suggested to us the proper procedure to follow to bring this to a conclusion. A Committee of this Board would seek a joint meeting with a similar Committee of the College of Physicians and Surgeons of Ontario to discuss this most important proposition. If they are in accord, a joint delegation of both bodies should then make presentation to the Advisory Committee on University Affairs of the Department of Education. This should be pursued with all possible alacrity.

Several years ago we delegated the authority of dealing with complaints from the public to Mediation Committees set up by various local societies. Perhaps it would be fitting for this Board to ask the local societies to report annually as to the number and nature of the complaints received by them. It would be impossible for our staff to deal with these individually but I feel that we should have some idea as to what is taking place throughout the Province.

The Liaison Committee appointed at our November meeting met with a Committee of the Ontario Dental Association. Many subjects were discussed and much benefit derived. This liaison should be pursued and frequent meetings held.

Every political party in our country has included in its platform some form of medical health insurance with the promise that once the medical plan is working prescription drugs and dentistry are to follow.

Discussions on this topic should be instituted very soon with the Ontario Dental Association so that the two bodies when approached by the Government will have some concrete observations to make and possibly some plan to suggest which might be acceptable to both the people receiving the service and those providing it.

Courses in dental assisting have been carried on this year by a number of local societies. These courses have been well attended and we now have 225 Certified Dental Assistants in the province with possibly another

150 to be added in the near future. The young ladies who have been interested enough to take this course as well as the lecturers who have spent a great deal of time in preparation and teaching are to be highly commended.

The report of the Royal Commission on Health Services has not yet been presented to the Government. Two members of the Commission have received honours. Mr. Justice Hall has been appointed a Justice of the Supreme Court of Canada and Mr. W. McCutcheon has been appointed Minister of Trade and Commerce as well as a Senator. It is to be hoped that these appointments will in no way affect the presentation of the report and that it may soon be forthcoming.

A Canadian Fund for Dental Education has been set up and the trustees named. These represent the dental schools, the dental profession and the dental trade. The fund has received grants from the C.D.A. in the amount of \$5,000.00 and from the Canadian Section of the American Dental Trade Association of \$10,000.00. This Board might well consider making a grant to this worthwhile and important undertaking.

Again I would like to thank the members of this Board for your labours and support in the past two years. Your efforts have greatly facilitated my term of office. I would like to thank those members of the profession who are not directors of this Board but who have served faithfully on our various Committees. Without their assistance the work of the Board could not have been carried on so expediently. I would like to thank the members of our Headquarters Staff who have laboured on our behalf. Particularly would I like to thank our Registrar-Secretary-Treasurer and our Business Manager who have carried much of the load in spite of frequent changes which have had to be made in staff personnel. They have been working under difficulties but the work of the Board has been carried out smoothly and efficiently.

ACTION

1. The Board continues its encouragement of Local Dental Societies to establish Mediation Committees and that those Societies with functioning Mediation Committees be commended and be requested to submit annual reports to the Board.
2. The Fund for Dental Education to be considered at the Fall, 1963 Board Meeting.
3. Report adopted.

PROPERTY COMMITTEE

MEMBERS: R. C. Honey, Chairman; W. G. Woods; V. A. Herron

REPORT

1. The Committee met at Headquarters on March 20, 1963. A complete inspection of the building was carried out and again the Committee agreed not to consider any outside work until the Canadian Dental Association's building project is completed. The addition to the National Headquarters is scheduled to begin on May 1, 1963.

2. Maintenance Procedures to be Undertaken

The Committee authorized the following maintenance procedures:

(a) Painting — one coat:

(1) Mailing room

(2) D.S.P.I. offices

(3) Back hall — main floor

(b) Construction of a cupboard employing fire-resistant materials and with the approval of the Fire Marshal, on the west wall of the furnace room for use by the Academy of Dentistry.

3. Property Budget

The Committee reviewed the year-end statement for 1962 and after careful consideration agreed that no change in the rent structure is, at present, indicated. The Committee felt that a need did not exist for a separate property budget and accordingly approved the following motion:

That the Chairman of the Property Committee be authorized, in the name of the Committee to suggest budgetary requirements respecting the property to the Chairman of the Finance Committee for consideration for inclusion in the General Budget for 1964, which will be considered by the Board of Directors at its Fall meeting in 1963.

4. Time of Meeting of Committee

The Committee agreed that a more appropriate time of year for its Annual Meeting would be about one month prior to the Fall Meeting of the Board.

5. Building Closing Hour

The Committee presents the following motion:

"That the Property Committee recommend to the Board of Directors that meetings being held in the Headquarters Building be terminated in time sufficient that the building is vacated by eleven o'clock p.m."

ACTION

1. Report adopted.

PUBLIC RELATIONS COMMITTEE

MEMBERS: J. R. Hurton, Chairman; H. M. Jolley;
R. C. Honey; B. M. Jackson

REPORT

This is the fourth annual report I am privileged to present. I am pleased to note that in the Committee's survey of Public Relations the most important efforts in this area have been:

- (a) The Secretary's several addresses to dental and associated groups.
- (b) Appropriate releases to various news media.
- (c) A recognition of the need for a continuing program of Public Relations between the individual members of the profession.

I believe that a significant forward step was taken through a resolution recommending to the Board of the R.C.D.S. that it request the Liaison Committee of the R.C.D.S. - O.D.A. to direct its early and considered attention to a study of the organizational structure of dentistry in Ontario. It is the opinion of the Public Relations Committee that more direct lines of communication among individual members, local societies and the provincial organizations would be of great benefit to all concerned.

ACTION

1. Report adopted.

REPORT

It is a privilege to present my seventh annual report for the consideration of the Board.

1. A Second Dental School in Ontario

Following the approval of the report *A Location for the Establishment of a Second Dental School in Ontario* at the Fall, 1962 session of the Board, a meeting was held on Friday, February 1st, 1963, with the Hon. M. B. Dymond, M.D., Minister of Health of the Province of Ontario. The Board was represented by the President, Dr. A. H. Leckie, Dean A. C. Lewis, Dean R. G. Ellis and the Secretary. The report had been forwarded to the Minister in advance of the discussion. He commented most favourably upon the report and indicated there was validity in the facts and the conclusions. He recognized the necessity of establishing this school in a municipality which could provide a sufficient pool of patients for teaching purposes.

As the College of Physicians and Surgeons of Ontario has been concerning itself with the creation of a fifth Faculty of Medicine in Ontario and as McMaster University, in all likelihood, would be considered as a possible site for a Faculty of Medicine, it was suggested that, if possible, the two licensing authorities could work together in this matter. If it were determined that McMaster should not be the site of the proposed Faculty of Medicine then, independently, the Royal College of Dental Surgeons of Ontario would proceed to attempt to have implemented its second recommendation to have created at the University of Western Ontario a second dental school for Ontario. On this date the position of the Council of the College of Physicians and Surgeons is not known. Contact is being maintained between the respective registrars and following the meeting of the Council of the College of Physicians and Surgeons toward the end of April, 1963, we should be in a position to ascertain the intentions of our medical colleagues.

It is further interesting to note that in a study prepared by the Committee of Presidents of Provincially Assisted Universities and presented to the Advisory Committee on University Affairs of the Ontario Department of Education statement is made that in the medical sciences there is clearly a need for additional facilities. Another Faculty of Medicine, of Dentistry, and of Pharmacy will be needed in this Province by 1968 or 1969, along with facilities for training technologists, technicians, therapists, and nurses.

In order, then, that activity may be maintained it is suggested that the Board provide authorization to some delegated person, or persons, to act in the name of an on behalf of the Board whenever appropriate action is required.

2. Hospital Relationship

During the November 1962 meeting of the Board, Dr. A. A. Antoni and the Secretary were requested to meet at a time deemed appropriate with the Ontario Hospital Services Commission. In the judgement of the appointed delegates it was desirable to delay such a meeting until the Canadian Council on Hospital Accreditation had completed some relatively extensive amendments to the *Basic Principles and Standards* for dental service.

Dr. Antoni and the Secretary in the capacity of representatives of the Canadian Dental Association to a Liaison Committee of the Council and of the C.D.A. have engaged in extensive discussions and negotiations from which the new amendments have accrued. It is a pleasure to report that these amendments will reflect, almost entirely, the policy of the Canadian Dental Association in respect to the provision of dental services in hospitals. At this writing the receipt of the newly reprinted *Basic Principles and Standards* is being awaited. When this document has been received the appointed delegation will then activate the request of the Board to seek a meeting with the Ontario Hospital Services Commission.

3. Organizational Structure of Ontario Dentistry

On January 9th, 1963, a meeting of the Liaison Committee of the R.C.D.S. - O.D.A. was held. While the essential purpose of the meeting was to discuss proposals respecting the schedule of fees of the Department of Veterans' Affairs considerable time was directed to the subject of the organizational structure of Ontario dentistry. The Committee was unanimous in believing that it would be appropriate to request of both boards that a study be undertaken of the present and future requirements of the structure of dentistry in Ontario. It was further believed that such a study should be undertaken by an objective and competent group, perhaps chaired by someone not a dentist. In this way preconceived opinions or prejudices could be minimized and a report might well ensue that would permit of deliberate study by both Boards.

4. Radiological Technicians

Investigations have proceeded in respect to the clarification of the legal position of the certified radiological technician in relationship to the practice of dentistry. In February, 1963, the Secretary communicated with the President of the Ontario Society of Radiological Technicians and with the General Secretary of the Ontario Medical Association suggesting that a meeting be held to investigate the possibility of creating a legal environment which could make possible the utilization of registered radiological technicians in dental practice.

The General Secretary of the Ontario Medical Association indicated that he would be pleased to meet for the purpose outlined as did the President of the Ontario Society of Radiological Technicians.

On this date all correspondence and documents having a pertinence to this subject are in the possession of the radiological technician who is Radiological Chairman on the Joint Committee on Technicians Affairs of the Ontario Society of Radiological Technicians and the Ontario Medical

Association. In due course it is expected that the Solicitor and the Secretary will meet with representatives of the other two organizations concerned.

5. Dental Assisting Course — Township of Scarborough

In September, 1963, the first class of 24 girls will commence a program leading to a qualification in dental assisting at West Hill Collegiate in the Township of Scarborough.

The Department of Education has made possible the establishment of a four-year secondary school program called the Science, Technology and Trades Branch. This four-year program offers, together with the study each year of basic secondary school subjects, specialized instruction in technical subjects for pupils who expect to enter employment for which such subjects will have prescribed value. Pupils who are successful at the end of Grade 10 in the four-year program in any branch may be admitted to the dental assisting course which will be offered in Grades 11 and 12.

For both Grades 11 and 12, 50% of the course will be academic and will include, English, History, Commercial skills (Bookkeeping, Typing, Business Arithmetic), Physical Education, Home Economics, Science, and Economics.

The other half of the program will consist of dental subjects through lectures, laboratory work, and chairside assistance. It has been proposed that toward the end of the second year the students will obtain some actual chairside assisting in the clinics at the Faculty of Dentistry.

The physical establishment for this program is entirely adequate and the estimated cost, which has received governmental approval, is \$38,500.00.

6. Royal Commission on Taxation

The Secretary served with Dr. W. G. McIntosh and Dr. R. A. Clappison on a Steering Committee appointed by the Canadian Dental Association to develop a brief for presentation to the Royal Commission on Taxation. The senior author of the brief was Mrs. B. Isabel Brown, the Director of the Bureau of Economic Research of the Canadian Dental Association. Dr. Don W. Gullett and Mr. K. L. Croft, Secretary and Deputy-Secretary of the Association, respectively, also made most significant contributions to this document.

The recommendation from this Board of the desirability of making expenditures for approved courses of graduate and postgraduate training acceptable for income tax purposes was featured prominently in the brief.

7. Unqualified Persons Performing Services of Dental Hygienists

The Board continues to receive frequent allegations that persons not registered and licensed as dental hygienists are performing services legally restricted, as far as auxiliary personnel are concerned, to dental hygienists. The Dentistry Act and the By-Laws enacted pursuant to it make it illegal for someone ostensibly acting in the capacity of a dental

assistant to provide intra-oral services of any kind. While the difficulties of enforcement are readily acknowledged this matter is brought to the attention of the Board because of the increasing number of complaints being received.

8. R.C.D.S. Admission Scholarship

As, commencing in September, 1963, the admission to the Faculty of Dentistry will no longer be at the pre-professional year level it has been necessary to alter the main condition respecting the awarding of the admission scholarship of the Royal College of Dental Surgeons of Ontario. The Scholarships and Awards Committee of the Faculty recommended and the Council approved the following requirement: "A candidate must register in the first dental year having obtained first-class standing (at least 75%) in the Grade XIII examinations and at least second-class standing in his or her last year of university study prior to entry to the first dental year." All other aspects of this award remain unchanged. The winner of the first R.C.D.S. Admission Scholarship was Mr. William D. Medlock of Etobicoke. A student of Royal York Collegiate Institute, Mr. Medlock obtained an average of 81.2% on nine papers of Grade XIII.

9. Dental Students' Bursaries

The Secretary has served with the Dean of the Faculty of Dentistry and the Director of Dental Services for the Province of Ontario under the chairmanship of the Deputy Minister of Health on a Select Committee established to award government bursaries to dental students agreeing to supply services to rural areas subsequent to their graduation. While budgetary provision was made for ten such bursaries applications were received which permitted the awarding of only six. It is too early to assess the effectiveness of this program.

10. Schedule of Committee Meetings

Because of the wide geographic separation of the various members of the Board a certain reluctance exists to arrange the meetings of various committees unless there is sufficient agenda material to justify the cost and inconveniences involved. An experiment, recently, in telescoping Committee meetings proved reasonably effective. Because of certain overlapping Committee memberships it was possible to conduct meetings for three Committees of this Board during the same day. It is suggested that each Standing Committee of the Board arrange to meet at least once each year. Where overlapping Committee memberships occur it should be possible, depending upon the business to be considered, to arrange for several meetings during the day or days selected. If such a system could be effected, it should serve to enhance the work of the Board by requiring that each Committee consider its responsibilities within its own terms of reference at least once each year and economies both in money and in time could be effected by co-ordination of such meetings.

11. Liability Insurance Participation

The participation in the liability insurance program initiated by the Royal College of Dental Surgeons of Ontario is, in the aggregate, begin-

ning to approach the 2000 mark within the five provinces in which the program is operable. The following represents participation by provinces:

Ontario	1426
Alberta	298
Saskatchewan	64
Manitoba	118
New Brunswick	27

Only the New Brunswick Dental Society has not met its 50% participation quota but it is hoped that within the next year this province will have attained its required enrolment.

12. All-Risks Replacement Cost Insurance

While the participation in the All-Risk Replacement Cost Insurance has developed much more slowly than in the liability insurance program there are, at present, some 371 policies in force. Again the members of the profession should be urged carefully to consider the insurance which they employee to protect the equipment, furnishings, and supplies of their offices. Fires, unfortunately, are not rare. Over the past four to five years at least 9 dental offices in this province have been destroyed by fire. If the dentists concerned possess insurance only to cover actual value a real hardship can eventuate when the dentist desires to re-establish himself with the necessary equipment, furnishings and supplies.

13. Contributory Pension Plan For Employees of Dentists

The Insurance Advisers were gratified that the Board ratified their proposal to institute a contributory pension plan for employees of dentists. While participation, at this moment, is not high it is considered highly important that this facility should have been provided. There are, at present, some 16 employee participants and it is hoped that the value of this plan both to the dentists and to their employees will experience an ever-growing awareness.

14. Administration of Plans Which Are Provincial in Character

Canadian Dental Services Plans Incorporated has been performing a most creditable service for the profession in the administration of the various plans which have been delegated to it. Because of its direct and close association with the profession D.S.P.I. has been able to provide, within the Liability and All-Risks Programs, a degree of service which outside organizations and agencies find almost impossible to emulate.

It is a matter of some concern that the profession in Ontario is not yet utilizing to capacity this organization which The Royal College of Dental Surgeons of Ontario was instrumental in bringing into existence. Ontario Hospital Services Commission, Blue Cross Supplemental, and Physicians' Services Incorporated coverages in Ontario are administered by an organization whose controlling interest is vested in a company with headquarters in the United Kingdom. It is the strong belief of the Insurance Advisers that the Administrative Agency for Group Plans which apply to the profession should be an agency whose policies and activities are

determined by the dental profession and the members of the administrative staff should be salaried by the dental group they represent. It is recommended that this Board carefully consider the method of administration of the aforementioned plans in the light of the pertinent circumstances.

15. Licences Issued in 1962

Dentists

Licences Issued — Active	2418	
— Graduating	74	
— Inactive	6	
— Life Members	98	
Total licences issued to December 31, 1962	2596	2596
Increase in licenses issued over previous year	2596—2546	50

Dental Hygienists

Licences issued in 1962		
Practising in Ontario	53	
Out-of-Province	4	
	57	57

16. Changes In Register During 1962

Additions

By R.C.D.S. examination	12	
Graduates of University of Toronto	74	
Resumed Practice	27	
By N.D.E.B. Certificate	13	
	126	126

Deletions

On Post Graduate Courses	6	
Left Ontario	11	
Retired	37	
Deceased (15 Life Members)	42	
	96	96

Licensed dentists in Ontario on December 31, 1962	2463	
Licensed dentists out of Province on December 31, 1962	59	
	2522	2522

17. Licentiates Deceased

The year 1962 witnessed the deaths of 42 members of the Royal College of Dental Surgeons of Ontario. Of this number, 15 held Life Membership. Wherever possible letters are written to the next of kin to express the sympathy of the Board and the Members of the College. This list is attached as Appendix A.

18. Life Membership

The names of eleven Licentiates all registered in the Royal College of Dental Surgeons of Ontario in 1914, thus having been on the Ontario register for fifty years are herewith appended (Appendix B) and are proposed for Life Membership commencing January 1, 1964.

19. Dentist — Population Ratios

At the close of 1962 there was one licensed dentist for every 2443 residents in Ontario. This figure represents an additional 47 people for each dentist when compared to the previous year. It is also interesting to note that the ratio worsened in each electoral district with district number 3 experiencing the greatest percentage increase in population to dentist and districts number 4 and 7 encountering the least percentage increase. The Dentist Population Ratios by counties and electoral districts appears as Appendix C.

20. Extramural and Extension Lectures

The Extramural and Extension Lecture Program continues to enjoy the high regard of many local societies. The distinction in Terminology is that an 'Extramural' lecture is given by a member of the Staff of the Faculty of Dentistry of the University of Toronto while an 'Extension' lecture is given by someone not a member of the Faculty Staff. Honoraria to Extramural lecturerers are paid by the University from a Fund which, except for \$300.00 contributed by the University is maintained by the Board. The Board pays Honoraria to Extension lecturers and the out-of-pocket expenses of both Extramural and Extension lecturers directly from its own funds for which budgetary provision has been made.

During 1962 there was 31 lecture programs at which some 895 members were in attendance. The 1962 report of this project is appended as Appendix D.

21. On behalf of the Headquarters Staff I express appreciation to the Board for its many considerations and kindnesses. It has been a privilege to serve the Board, the members of the profession and the public during 1962.

The Secretary is grateful to his co-workers at Headquarters for the interest and diligence which are always demonstrated in the various responsibilities each assumes.

ACTION

1. The President and the Secretary were authorized to act in the name of and on behalf of the Board whenever action is required in respect of a Second Faculty of Dentistry in Ontario.
2. The co-operative participation of the O.D.A. to be sought in undertaking a study of the organizational structure of Ontario Dentistry.
3. The profession is advised of the concern of the Board with the apparent increasing practice in the use of unauthorized personnel performing services within the oral cavity for which no legal qualification exists. Hope was expressed that it would not become necessary to enforce regulations through disciplinary action.
4. The Secretary will develop a schedule whereby each Standing Committee of the Board will meet at least once a year.
5. The Secretary was directed to confer with the Ontario Hospital Services Commission, P.S.I. and Blue Cross to secure information re D.S.P.I. performing the administrative procedures necessary for the participation of the Ontario Dental Profession in these programs.
6. That Life Membership be conferred on members listed in Appendix B.
7. Report adopted.

A SECOND DENTAL SCHOOL FOR ONTARIO

Dr. A. Clifford Lewis, former Dean of the Ontario College of Education and Consultant in Education to the Canadian Dental Association, was retained by the Board to submit a report having a bearing upon a location for the establishment of a Second Dental School in Ontario. The following, except for two maps and a Dentist-Patient Ratio Table which appeared in the 1962 Proceedings (Page 72) is Dean Lewis' Report.

I. INTRODUCTION

1. The preparation of the Report grows out of a recommendation in the brief (1) submitted to the Royal Commission on Health Services by the R.C.D.S. of Ontario and the Ontario Dental Association as follows:

"It is recommended that a new dental school to accommodate sixty students per class and twenty-five dental hygiene students in each of the two years of a dental hygiene program be established in Ontario, immediately. Funds approximating \$4,000,000 will be required and should be provided on an equal basis by the provincial and federal governments."

A supporting recommendation in the brief (2) of the Canadian Dental Association to the Commission follows:

"Dental Schools should be planned immediately at the University of British Columbia (3) the University of Saskatchewan and Laval University. Another dental school should be opened in Ontario."

2. Ontario is fortunate in having several Universities where a Faculty of Dentistry might be established. It seems axiomatic that
 - (a) the school should not be located in Metropolitan Toronto where one already exists or in Northern Ontario with its sparse population.
 - (b) the school should be located in a University which has, or is about to have, a medical school.
3. Consideration should therefore be given to the problem of placing the school in one of:

McMaster University
The University of Ottawa, Ottawa
Queen's University, Kingston
The University of Western Ontario

McMaster University has not yet established a Medical School, but the others have well established Faculties of Medicine including the basic sciences.

-
- (1) R.C.D.S. Brief P. 1, R1.
 - (2) Page 51 para 163.
 - (3) Established on Sept. 1, 1962.

II. THE PROBLEM

4. There are certain factors which must be taken into consideration for a second dental school in Ontario. Northern Ontario is eliminated because of the sparse population. The following investigations seem necessary and will be dealt with in the analysis of each of the four Universities considered:
 - (a) a study of the distribution and the rate of growth of the population in southern Ontario, and of the student supply.
 - (b) the distribution of dentists in southern Ontario.
 - (c) the availability of teaching staff,
 - (d) the supply of clinical material,
 - (e) the proximity of a medical school with its basic services.
 - (f) the accessibility of hospital services.
5. With this limitation of the study a series of tables has been prepared to assist in answering the many questions involved in the search for the location of the school. The tables are to be found in the appendix and will be referred to frequently as arguments are presented for and against placing the school in one or other of the four universities, which will be dealt with in alphabetical order, McMaster, Ottawa, Queen's, and Western Ontario. It should be noted here that the University of Toronto appears in most of the tables but only for purposes of comparison. It is assumed that the new school will not be located anywhere in Metropolitan Toronto. The statistical material was gleaned from many sources, some of which are the Annual Reports of the Department of Municipal Affairs, the Proceedings and Briefs on Dental Health of the Royal College of Dental Surgeons of Ontario, the Canadian Dental Association, and the Department of Educational Research of the Ontario College of Education.
6. The analyses in section *III* follow, in the case of each University the factors
 - (a) population and student density,
 - (b) distribution of dentists,
 - (c) teaching staff,
 - (d) clinical material,
 - (e) a medical school,
 - (f) hospital services,

III. THE ANALYSES

7. In preparing the tables in the appendix those counties were selected which are growing rapidly. In Table 2 an effort was made to allocate arbitrarily those counties which might be considered in the area of each of the universities. Table 7 (map not shown) lists the rapidly

growing counties as measured by the percentage growth in elementary school enrolment for the decade 1951 to 1960. The 1951 students who were able to proceed at once through secondary and higher education have secured their degrees by this time. It is noted that Halton County had a phenomenal elementary school population growth from 100% in 1951 to 286% in 1960. Furthermore Halton (Table 1) shows a general population growth over the same period from 100% in 1951 to 278% in 1960. These figures are almost incredible until verified.

McMaster University

8. McMaster University is in the heart of the most rapidly growing population rate in the Province of Ontario. Table 1 shows that Halton and Peel on Lake Ontario west of York have a far greater growth rate in population than any other county. The former shows a growth from 100% in 1950 to 278% in 1960 and Peel has grown from 100% to 236% during the same period. Wentworth (134%) and Waterloo (146%) are also growing rapidly.
9. The Grade 13 enrolment in Halton and Peel is far ahead of any other counties. (Table 2). The province indicates a Grade 13 percentage of the age group of 21.38% whereas Halton has 48.4% of the age group in Grade 13 and Peel 35.6%. These figures are both exceptionally high.
10. McMaster should draw students from the counties marked in Table 2 with figures as in Table 3 of 9862 potential Grade 13 applicants. This is the highest number of any of the four Universities.
11. The figures shown in Table 4 of enrolment in undergraduate degree and diploma courses indicate that McMaster, the smallest of the four Universities, has the most rapid growth. From 1959 to 1962 the enrolment increased 55% with acceleration through that period. McMaster in 1961 drew 27.7% of first year students from Hamilton, 13.3% from the suburban area, 56.6% from other parts of Ontario, 0.3% from other provinces and 2.1% from other countries.
12. The estimated expansion (Table 6) in enrolment for McMaster is quite astounding. Taking 1961 as the basis, the estimated enrolment in 1965 will rise to 207% and in 1970 to 354% of the 1961 actual enrolment. By 1970 McMaster will have the largest enrolment of the four universities. Table 7 of actual elementary school enrolment 1951 to 1960 assures a large crop of students in the University at least to 1968 and the pre-school group (under 6 years of age) will project into 1975.
13. The five counties in R.C.D.S. Electoral District No. 8 show a ratio of population per dentist as 1/2672. To reduce this to 2000 per dentist would require immediately 108 more dentists in this area.
14. The staff for a dental school could be obtained more easily in Hamilton than in any other of the four university cities, since a number of practising dentists in the area (12) are serving part time

on the staff of the Toronto dental school. The number of dentists in Wentworth County is 139.

15. The supply of clinical material should not be difficult to find in such a populous city.
16. There is no medical school at McMaster but it is quite possible that the building concurrently of both a medical school and a dental school could be contemplated.

The University of Ottawa

17. The four counties of Renfrew, Carleton, Prescott and Russell would ordinarily be expected to provide some considerable enrolment if a dental school were to be established at the University of Ottawa. Carleton County of course includes the City of Ottawa which in 1961 had a population of 262,639 — slightly smaller than Hamilton. The neighbouring areas in the Province of Quebec would also in all probability provide some applicants.
18. Of the four counties mentioned Renfrew and Carleton have an increase in elementary school enrolment from 1951 to 1960 of 81% and 97% respectively, while the other two counties have an increase of only 21% in the same period. Carleton and Renfrew would therefore normally be expected to contribute most of the applicants from the university area.
19. The Grade 13 enrolment (Table 2) shows 25.5% of the age group in Carleton County and only 16.7% in Renfrew County. (The potential Grade 13 applicants in the area number 6092.)
20. There is not a large source of enrolment in Ottawa and its environs, but there is a high concentration of population in Ottawa itself as indicated in paragraph 17. However, this source of enrolment is insufficient for the need.
21. The geographical distribution of freshmen (Table 5) in 1961 was 26.8% from Ottawa, 14.3% from the suburban area, 20.9% from elsewhere in Ontario, 33.1% from other provinces and 4.9% from other countries. The University draws its enrolment from a wider area than do the other three universities, although Queen's and Western are close seconds.
22. The enrolment rose from 2414 in 1959-1960 to 2985 in 1962-1963, an increase in the four years of 23% (Table 4). The increase for each year was 9%, 7.5% and 5.5% respectively. The rate of growth declined slightly.
23. The University has a good medical school and good departments of basic and biological sciences.
24. It would be difficult to build an enrolment of 60 to 70 dental candidates a year because the two maps do not reveal any massive population concentration in the area surrounding the city of Ottawa.
25. In a city of population 262,639 it should be possible to find a good supply of clinical material of the type suitable for the training of 60 to 70 dental students per year and 30 dental hygienists.

26. Carleton County has 166 dentists from whom it would be possible to secure staff for the school, but few have had experience on the staff of a dental school. A number of qualified teachers would have to be brought in from elsewhere.
27. There is one special factor that must be considered with the University of Ottawa. Due to the fact that the University is a denominational institution it is well to determine how the finances are obtained to support a professional school. It is to be noted that substantial legislative grants are made for the support of pure and applied science and for the medical school. It is therefore likely that similar grants would be made for the support of pure and applied science and for the support of a dental school.

Queen's University

28. The city of Kingston, with a population in 1961 of 48,432, is located in a comparatively sparsely settled area. The population density to the north is very sparse. The counties in Table 2 with any considerable increase in population in the decade 1951 to 1960 which were allocated to Queen's are Frontenac and Peterborough. The total of potential applicants to Queen's from these two countries, as observed in Table 3, is 1967 — lowest in the table.
29. However, Queen's University draws an unusual number of students from an area beyond what would seem to be its natural range, as shown in the first column of Table 5. In 1961 Kingston provided 9.9% of freshmen, the suburban area 0.9%, elsewhere in Ontario 76.3%, from other provinces 8.3%, and from outside Canada 4.6%.
30. The enrolment at Queen's (Table 4,) increased 15% from 1959 to 1962 which is the slowest rate of any university under consideration.
31. The ratio of dentist to population in Frontenac is 1 to 2119. Only a few counties have a better ratio. Most of the 36 dentists are located in Kingston. Very few have had teaching experience in a dental school. It would be very difficult to secure a dental staff from a group of 36 dentists, hence a number of full-time staff would have to be imported.
32. It would not be easy to obtain a good supply of clinical material (patients) suitable for the purpose of training, let us say, 60 to 70 graduates per year and some 30 dental hygienists.
33. Queen's University has a good medical school on the campus and equally good basic and biological sciences. Hospital services are also good.

The University of Western Ontario

34. The University of Western Ontario is in the centre of what is generally known as Southwestern Ontario. The foci of population in the area are London, Woodstock, Stratford, St. Thomas, Chatham, Windsor and Sarnia. In this area are the nine counties of Essex, Kent, Elgin, Norfolk, Oxford, Perth, Huron, Lambton and Middlesex,

which had a combined population in 1960 of 929,929. This is less than in York County alone. All these counties except Lambton and Middlesex have had a comparatively slow growth rate in the last decade.

35. Table 3 gives the potential applicants for the universities under study. Western's quota is comparatively low.
36. Table 4 shows the actual rate of growth of the universities under consideration from 1959 to 1962 where Western has increased its enrolment by a substantial 41% over those years. Table 5 shows that in 1961 Western obtained its freshmen over a wide area; from London 22.3%, suburban area 3.4%, elsewhere in Ontario 71.%, other provinces 2%, other countries 1.3%.
37. The estimated expansion of this University for the periods from October 1961 to October 1965 to October 1970 are shown in Table 6. By 1970 the freshman class will have grown from 1076 in 1961 to 1400 in 1970, but it will have reached this number by 1965 and will remain on a plateau from 1965 to 1970. The total under-graduates will have increased from 3339 in 1961 to 5000 in 1965 when increase will have ceased. In brief the maximum enrolment for Western to 1970 will have been reached by 1965.
38. Western has a good medical school which became a Faculty of the University in 1912. First classes were graduated in Arts and in Medicine in 1883. A good staff in the basic and biological sciences has long been established. Also the hospital services are good.
39. If the new school is to be built at Western some experienced teachers will have to be found elsewhere. There are 91 dentists in the County of Middlesex from whom some staff might be obtained, but only a few have had experience teaching in a dental school.
40. In a city the size of London, with a population of 161,554, it should be possible to obtain suitable clinical material.

IV. CONCLUSION

41. It would have been possible to have applied a more complete statistical treatment by including all counties and all nine universities in Ontario, but the end result would not have been essentially different. The most rapidly growing counties will determine the most rapid growth in university expansion. Furthermore only the older and better established universities could possibly possess all of the factors set out in paragraph 4, which would lead to the establishment of a successful dental school.
42. With regard to the time factor, even if the school were established at once, it could not produce any graduates earlier than 1968. It therefore becomes necessary to proceed immediately with plans because of the urgent need for expanding the health services of the Province of Ontario. This was strongly recommended by the brief of the Royal College of Dental Surgeons of Ontario and that of the Faculty of Dentistry, University of Toronto, to the Royal Commission on Health Services.

V. RECOMMENDATIONS

43. Arguments and statistics need not be repeated in making the suggested recommendations except to note that a modern dental school is dependent upon a medical school for instruction in the biological and medical sciences.

IT IS RECOMMENDED

1. that the new school be located at McMaster University *provided that a medical school be established there simultaneously,*
2. that in the event that the conditions as outlined in the first recommendation cannot be fulfilled, the new school be located at the University of Western Ontario,
3. that Queen's University not be considered as it could not effectively operate a school with an enrolment of 60 to 70 dental students and 30 dental hygiene students a year.
4. that the University of Ottawa not be considered on evidence previously presented, and for the additional reason that there are schools of dentistry at McGill and the University of Montreal, and the possibility of a new school at Laval University in Quebec City.

VI. APPENDIX

44. 1. Population Growth by Rapidly Growing Counties 1950 to 1960 as measured by assessed population.
2. Proportion of Grade 13 Enrolment in 1958 to 1961 to Estimated 18 to 21 Age-group in Rapidly Growing Counties.
3. Estimated Potential Grade 13 Applicants for University Admission in Five University Areas 1958 to 1961.
4. Full-time Enrolment in Undergraduate Degree and Diploma Courses 1959-60-61-62.
5. Home Addresses of Freshmen in 1961.
6. Estimated Expansion of Five Universities from October 1961 to October 1965 and October 1970.

ACTION

The following motion was adopted:

"That the Board having considered all the factors enunciated by our Consultant on "The Establishment of a Second Dental School for Ontario" recommends

1. that the new school be located at McMaster University provided that a medical school be established there simultaneously, and
2. that in the event that the conditions as outlined in the first recommendation cannot be fulfilled, the new school be located at the University of Western Ontario."

REPORT

1. Revenue and Expenditures

The total revenue for 1962, \$225,575.09, exceeded the total expenditures, \$208,980.77 by \$16,594.32. Total revenue exceeded budget by \$299.09 and total expenditures exceeded budget by \$376.77. The statement of revenue and expenses which follows the Auditors' report provides a complete documentation of all revenue and expense items.

2. Interest Earnings

Considerable effort has been expended by the Business Manager to derive a high interest return from those moneys available to the Board other than the funds already placed in longer-term investments. Through the utilization of Canadian Dollar Deposit Receipts and short term investment trust certificates the interest earnings for 1962 were \$6,304.47 — more than double what they have been for any previous year.

3. Bond Holdings

An examination of the bond holdings of the College will reveal that bonds with a par value of \$30,000.00 have a 2¾ interest return. While the Board has, on several occasions, considered the advisability of selling these issues and reinvesting at higher returns, the book loss has militated against this procedure.

Employing simple interest only for the duration of the terms of the four issues the Board would derive \$5,957.00 in interest. Using simple interest at 5% on the same amounts for similar terms, the interest would be \$10,840.00 — which is really the estimated minimum earnings possible on the full \$30,000.00.

However, as may be determined from the Auditor's report the market value aggregate of the four issues is \$26,187.50 which is \$3,812.50 below par value and \$4,187.50 below book value. Thus any increase in interest may be offset by the reduced value available for reinvestment.

It is suggested that the Finance Committee might give further consideration to the feasibility of disposing of these bonds and reinvesting the sums derived in more attractive issues.

4. Modernization of the Accounting System

The various revenue and expenditure items in the general account are now coded to facilitate the accounting procedures which are performed. The Statement of Revenue and Expenditures which follows the Balance Sheet prepared by the Auditors reflects the departmentalization which has been instituted but the code numbers employed are not printed as essentially they are not needed when a description of the item is pro-

vided. The employment of the code numbers in the day to day accounting greatly assists all members of the staff whose duties require them to assume responsibilities in this area. The Treasurer is particularly grateful to Mr. W. E. Jackson, the Business Manager and to Mrs. Edith Schmidt in charge of the bookkeeping and records for their outstanding services.

5. Member Stricken from Register

At the direction of the Board the name of Dr. Paul K. Takahashi was stricken from the register for non-payment of annual licence fee. Judgment was received in Division Court requiring Dr. Takashi to discharge his indebtedness which included the 1962 licentiate fee in addition to the penalties and costs. This court judgment has now been satisfied.

6. Auditors' Report

The Auditors' Report is attached and the appointment of auditors for the ensuing year is necessary.

AUDITORS' REPORT

To the Directors of the Royal College of Dental Surgeons of Ontario:

In accordance with your instructions and the recommendations adopted by you at your 1960 fall meeting we have examined the accounts and records of the Royal College of Dental Surgeons of Ontario for the year ended December 31, 1962 and the balance sheet of the College as at that date. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion the accompanying balance sheet presents fairly the financial position of the College as at December 31, 1962, on a basis consistent with that of the preceding period.

Toronto, Canada,
March 22, 1963.

REPORT

This Report covers the period from March 1, 1962 to February 28, 1963.

Your Consultant has been in regular attendance at the Board's offices at least two half days each month, sometimes more, during the period under review. In addition, he is available for telephone consultation with colleagues and members of the Board's staff at any time. Further, on request of the Board's Medical Staff, workmen are examined in the Consultant's office in order to give opinion on workmen's dental needs and the extent of entitlement to dental service under the Workmen's Compensation Act. As you are probably aware, your Consultant's recommendations are expected to conform with principles of entitlement as set out by the Board and are considered as an expressed professional opinion. The Medical Aid Committee considers this opinion in its final decision.

During the year January 1 to December 31, 1962, the Workmen's Compensation Board paid out \$99,339 for dental services to 878 dentists who treated its beneficiaries.

In the main there has been very little complaint about Board Fee Allowances. Many submit a fee for less than the Board allows; this is frequently raised to comply with the Board Schedule. There are some dentists of course, who submit a higher fee. This latter situation has been more noticeable in recent months since the Ontario Dental Laboratories Association issued a new price list and the Ontario Dental Association have issued a new suggested tariff.

A new Workmen's Compensation Fee Schedule came into effect on July 1, 1962. Every dentist in Ontario was mailed a copy. This Schedule was prepared by a committee of dentists appointed by you, together with representatives from the Ontario Dental Association. The Committee's recommendations were approved by you and the Schedule accepted without alteration by the Workmen's Compensation Board. Recently the new Ontario Dental Association Schedule was distributed to Ontario dentists. This is causing a little friction between some members of the profession and Board staff because estimates for dental services are being based on this Schedule rather than the one accepted by the Board. It should be understood the Board will not recognize any Fee Schedule but its own and failure to recognize this only delays authorization to the dentist to proceed with treatment.

It would help greatly if this Board and the Ontario Dental Association could get together in this matter of suggested fees for services and come to some understanding. It is understood this has happened in Medicine — Medicine speaks with one voice. The Workmen's Compensation Board has always been co-operative. Fee suggestions that provide a fair compensation for good services that can be performed by a dentist of average capabilities will no doubt be given every consideration. But it would be good for all concerned if confusion could be eliminated.

Perhaps it should be noted here that the Board Fee Schedule is mislaid in many dental offices. Would it be better if the Board reverted to printing the Schedule on the back of the dental report form? This was done prior to 1958. Actually, the average dentist sees only a few compensation beneficiaries and the Board Schedule is not at hand when needed.

On the subject of complaints, perhaps the most frequent is referred to as "Red Tape". Everyone knows that all large organizations must have routine procedures. This is accepted. However, it is prudent to keep these procedures under constant review for purposes of improvement. Your Consultant is conscious of the many delays that confront and irritate the dentist. Representations are continually being made to Board Officers with the view of speeding up processing of dental claims.

Some of the points brought up are as follows:

1. There is often a delay in getting the Board's dental report form to the dentist. This is due to the Board's procedure of establishing the claimant's entitlement before the form is sent out. Then the form is sent to the injured person and he is instructed to take it to the dentist.

It has been suggested that these dental forms be stockpiled with each dentist so that when an accident case comes to his office, he can make a complete report on the spot and forward same to the Board. Entitlement of the injured person could then be considered along with the treatment plan suggested by the dentist. Too often these reports are made out weeks after the dentist first attended the patient and are done from memory. This is conducive to a poor report and unsatisfactory reports lead to confusion and further delay.

2. These reports are perused by laymen assessors known as "markers". Many have difficulty in understanding dental terminology due to lack of experience with dental claims. This, coupled with inadequate information, causes further delay in processing of the claim. The dentist is contacted for more information by correspondence or telephone. In either case the dentist often senses the "marker" is a layman and does not understand the problem involved and it irks the dentist in having to explain to a layman. From here the claim goes to consultation with supervisors and perhaps eventually to the Dental Consultant for opinion. These situations all take time and are not conducive to optimum relations between Board staff and dentist. Thus, so-called "Red Tape".

Dental service is highly technical and unless one has an understanding of it, it is hard to grasp dental problems. Moreover, dentists are very busy and many are reluctant to take necessary time to make an adequate informative report. Your Consultant has suggested that all dental claims be referred to one unit of "markers". This would give these officers experience in dental claims and enable them to process same from a better understanding and a closer association with the Dental Consultant.

3. Another problem is that in many accidents there are multiple injuries. The injured person is admitted to hospital and he or she is given medical and surgical care. Injuries to the teeth and jaws are not always brought to the attention of a dentist until after hospital discharge, perhaps weeks or months later. There is no deliberate intention of overlooking the dental

problem but it simply is not in the medical field. Therefore, there is sometimes difficulty in establishing entitlement to dental service for the injured person. Further, the dental problem may be greatly complicated by the delay.

At the suggestion of your Consultant a question has been placed on the medical report form. "Are dental services needed?" Your Consultant is not satisfied with the prominence given this question and has requested the question be framed "Were there facial injuries involving the teeth or jaws?" "Yes" or "No". It is hoped this will give the Board a lead to follow up dental injuries more quickly.

There are a great variety of questions arising where there is some difference in dentist point of view and Board policy on entitlement under the Compensation Act.

1. The problem of aesthetics is one that commonly occurs. Since the advent of high speed air rotors there is great tendency to full coverage crowns on anterior teeth where at one time three-quarter crowns and pinlays were often used — undoubtedly there is a place for all types of restorations and undoubtedly aesthetics is an important consideration in all dental procedures. Yet a beneficiary of the Board has no entitlement for services where aesthetics is the prime motive. There is entitlement for good restorative dental services to replace lost dental structures to as near as possible conditions of health and function as existed prior to the accident.

2. There are situations of inferior dental services where the Board receives complaints from their beneficiaries. These are always referred to your Consultant for opinion. In cases where inferior and unsatisfactory services are substantiated the Board reserves the right to refer its beneficiaries to personnel of their choice. These situations are usually reported to your Registrar-Secretary, Dr. Dunn.

In the matter of X-rays, there is quite a little carelessness evident in the exposing and processing of dental films. X-rays are returned to the dentist when they are of no diagnostic value. Written reports of X-ray findings are expected from the dentist, but this is seldom done.

3. Porcelain Jacket Crowns are a favourite restoration for fractured anterior teeth. The Board reserves the right of authorizing these crowns before the dentist proceeds. They are not an emergency service. In harmony with teaching at the Faculty of Dentistry it is the Board policy to request a provisional crown restoration for 90 days. If tooth then indicates normal vitality the dentist may proceed with the porcelain jacket restoration. Where the dentist proceeds with a porcelain jacket crown without authorization and before the 90 day period, he may be allowed a fee only for a provisional crown.

4. There is an increasing use of full metal crowns with baked porcelain veneer. The fee was established a year ago by this Board as \$75.00 but it was not included on the Schedule. Is it the feeling of this Board that this is fair?

In this Report much of the content has been discussed before. The work of your Consultant increases in volume constantly and it is hoped to be fruitful. The good relations between the profession as a whole and the Board seems to continue at a high level. It might be noted the Board is interested in promoting good relations and would welcome opportunities to address dental groups anywhere in Ontario. There is the utmost cordiality and co-operation shown your Consultant by the Board staff at all times.

In conclusion your Consultant desires to thank Dr. Dunn for his patience in discussing problems and helping with their solution. And to you Gentlemen, my thanks for your confidence in entrusting this responsibility of representing you and the profession at the Workmen's Compensation Board.

ACTION

1. Dr. T. R. Marshall reappointed Consultant to the Workmen's Compensation Board of Ontario.
2. Report adopted.

Academic Standards for Dental Hygienists (Fall)

The following resolution was unanimously adopted:

Whereas the maintenance of academic standards for dental hygienists is a responsibility which must, under most existing legislation, be borne by the dental profession and

Whereas to date all graduates of Canadian Dental Hygiene Programs have been required to possess senior matriculation before acceptance into the said programs as students and

Whereas the curriculum content of acceptable programs for the education and training of dental hygienists should be established pursuant to and based upon senior matriculation standing

Therefore be it resolved

That the Board of Directors of the Royal College of Dental Surgeons of Ontario strongly urges the Council on Education of the Canadian Dental Association, in its establishment of minimum requirements for the approval of a course in dental hygiene, stipulate, as an admission requirement, the possession of at least a senior matriculation qualification.

Brochure for New Registrants

Because of an apparent growing problem with some new registrants engaging in practices not considered consistent with ethical and, in some instances, legal requirements placed upon members of a health profession, a brochure to be entitled, "On Entering Practice" is to be produced and made available to all new registrants.

Company Seeks Approval for Demonstrations of its Product

A letter from a solicitor outlining proposals of a company in respect of demonstrations of the quality and application of its products in the laboratory atmosphere was received. The Board found that the proposals did not contravene the intent of Section 23 (b) of the Act and accordingly the Board offered no objection to the program.

Conference on Insurance Coverages (Fall)

The Board expressed concern with the number of insurance plans being presented to the profession with resultant overlappings, losses in economy of administration and confusion in communication. Accordingly the following resolution was adopted:

That a study in regard to insurance be instituted consisting of

- (1) the development of a brief documentation of the existing insurance coverages under dental sponsorship in Ontario, such study to be undertaken by the Business Manager with the participating co-operation of each Director, and

- (2) concomitantly the Insurance Advisers be requested to report on the basic insurance coverages which reside within the responsibility of a professional dental organization to provide, and
- (3) the information arising from (1) and (2) be presented at a meeting to which will be invited representatives to be selected by the Directors on a geographic basis, the expense of the meeting to be the responsibility of the Board, with the hope that from the deliberations may develop proposals to institute a sound and effective insurance program for the Ontario dental profession.

Department of Veterans' Affairs — Dental Fee Schedule (Fall)

The Board favours the recognition of Provincial Fee Schedules by the Department of Veterans' Affairs and was in general agreement with the motion of the Executive Council of the C.D.A. submitted to the 1962 meeting of the Board of Governors

"That we recommend that negotiation with D.V.A. continue on a basis that Provincial Fee Schedules, as established by the profession, less 10% be accepted as scale of payment for services between the Department and the dentist rendering the services."

Dr. Harvey W. Reid — Honorary Member, A.D.A. (Fall)

A congratulatory message was sent to Dr. Harvey W. Reid in recognition of an Honorary Membership conferred by the American Dental Association.

Extension Lectureships Extended (Fall)

Local Dental Societies were authorized to extend the Extension Lectureship privileges to permit clinicians from outside Ontario, provided the clinician is retained at the same basic per diem rate and travel expenses inherent in the plan, for one lecture per year.

Fall Board Examinations

The dates of the licensing examinations conducted by the Board in the Fall of 1963 were set for November 20th, 21st and 22nd.

Federal Dental Services on C.D.A. Board

The Canadian Dental Association's Council on Constitution and By-Laws gave notice of a proposed By-Law amendment to provide for representation of Federal Dental Services on the Board of Governors of the national organization. The proposed amendment was approved by the R.C.D.S. Board.

Governing Board of Dental Technicians

The Governing Board of Dental Technicians has been concerned for some time with the provision of Section 23 (5) of the Dentistry Act which makes possession of dental equipment by someone other than a licenced dentist *prima facie* evidence of the existence of illegal practice. While no registered dental technician has ever been prosecuted on this basis alone,

the Governing Board was understandably concerned with a too literal interpretation of this section. Accordingly the Governing Board requested that Section 23 (5) be amended by the addition of the following to the end of the section: "But this shall not apply to any Registered Dental Technician's material and equipment, used by him in the operation of his Dental Laboratory, providing such Laboratory is Registered in Ontario with the Governing Board of Dental Technicians of Ontario under the Dental Technicians Act."

The Board adopted the following resolutions:

"That the Secretary with the advice of the Board's Solicitor prepare a statement which would grant a Registered Dental Technician permission to possess dental material and equipment used by him in the operation of his Dental Laboratory."

Increase in Licence Fee Discussed

Dentistry stands at the threshold of dramatic changes which may substantially alter the pattern of practice as we know it. The profession must be prepared to make its contribution to the discussions preliminary to projected changes by providing the attitudes, special information, and knowledge which are peculiarly its own. To discharge these obligations it must accumulate data, underwrite research, and disseminate knowledge. These activities will require money — money which must come from the profession itself.

By careful budgeting, close supervision, and intelligent management, the finances of the R.C.D.S. have been kept in balance. There is no foreseeable reason why this happy condition should not continue to exist, provided the Board restricts itself to its present policies and activities. With current income the Board has been able to conduct all the activities that lie within its jurisdiction, including such matters as enforcing the Act, provision of Extension and Extramural lectures, maintenance of our Headquarters Office, etc. Sizable contributions have been made toward the maintenance and support of a strong, virile, active C.D.A. Wise and careful husbanding of current income has made possible the extension of some of our activities in carefully selected directions. The Board has been sternly realistic with a leavening of practical vision in its financial activities.

The time has come to consider widening the scope of our functions. At least two activities suggest themselves. There must be and there will be an improvement in the organizational structure of dentistry in Ontario. To bring this about we must be prepared to make a financial contribution at least initially to a study of the many problems such improvement will encompass. Secondly, activation of a body to administer pre-payment plans for dental services, Ontario Dental Services, soon to be a legal entity, will necessarily require a strong financial underwriting.

R.C.D.S. reserves, although sizable, are not commensurate with present and future financial requirements. They fall far short of what economists tell us should be the ideal relationship between income and reserves. They limit and restrict embarkation into areas which existing circumstances and potential events make mandatory. It is essential that the profession have a strong participating role in guiding the direction in which our segment of health services will move.

The chief source of income of the R.C.D.S. is the licentiate fees paid by the members of the College. It is, therefore, proposed to augment this income by increasing the licentiate fee by an as yet undetermined amount. The amount of increase will be decided upon only after the most careful investigation of all the factors involved.

Finance Committee.

Informal Hearing Held

Dr. _____ was required to appear before the Board to answer for his conduct which led to a conviction on income tax evasion. Following a lengthy statement from the member, the President conveyed the serious concern of the Board and sought assurance, which was given, that appropriate procedures had been instituted to assure that there would be no recurrence.

Meetings of Local Societies

It was agreed that communication between the Board and the members of the profession could best be accomplished in a direct person to person exchange of information, views, and opinions. Each Director was strongly urged to seek an opportunity to meet at least once each year with the local societies within his district. Additionally it was hoped that each society might extend an invitation to its District R.C.D.S. Representative to appear at one of its regular meetings to discuss whatever matters merit consideration.

Member Proposes Amendment to the Dentistry Act

Dr. H. M. Jolley, Director representing Electoral District #4 introduced a motion, which was adopted, requesting the Government and Legislation Committee to give consideration to amending The Dentistry Act of Ontario to provide that in addition to the one Director for each electoral district for which The Act now makes provision there be one additional director for each 400 members or major portion, thereof. Thus when the membership in a district rises to 601, that district would be entitled to two directors. For 1001 members the entitlement would be three directors.

Neighbours Given Permission to Utilize Driveway (Fall)

The South driveway was made available to the Staff of Lorimer Lodge for the purpose of access to and egress from the rear of Lorimer Lodge property, such permission being in accord with an agreement drafted by the Board's Solicitor.

Ontario Dental Public Health Council Makes Requests

The Ontario Dental Public Health Council made several requests of the Board:

- (1) That it suggest to the Faculty of Dentistry that it consider expanding present facilities for counselling students in selecting a practice location. The Board concurred and authorized the appropriate communication.

- (2) That it apprise local dental societies of certain efforts they could make in respect to recruitment activities. All local society presidents and secretaries were written endorsing the proposals of the Council.
- (3) That it sanction a "Question-Answer" type dental health news release and provide the Council with appropriate authority. The Board approved this project for press, radio, and television releases.
- (4) That it consider measures to control practice management courses under the sponsorship or co-sponsorship of commercial organizations. The Board adopted the following motion: "That local dental societies, before entering into a course on practice management, be required to supply a definitive outline of the course content to the Board for approval which is in accordance with Section 25 (6) of The Dentistry Act of Ontario."

The Secretary was requested to write to the Chairman of the Canadian Section of the American Dental Trade Association expressing the concern and action of the Board in this respect.

Ontario Society of Oral Surgeons Presents Brief

A deputation from the Ontario Society of Oral Surgeons presented a brief in which concerns were expressed relative to the future of the graduate program in oral surgery, and the future relationship of oral surgery to both teaching and non-teaching public general hospitals. Two resolutions arose from deliberations following the departure of the deputation:

1. "That the Board of Directors of the Royal College of Dental Surgeons of Ontario has a deep concern that the high standards in the teaching of Oral Surgery be maintained and suggests to the Dean of the Faculty of Dentistry that should he desire to arrange a meeting with the Superintendent of the Toronto General Hospital with the ultimate objective of meeting with the Board of Trustees of that Hospital, that the Board's Secretary would be prepared to associate himself in this endeavour as representative of this Board."
2. "That the resolution of the Ontario Society of Oral Surgeons be received and that the concerns therein expressed which reside within the jurisdictional competence of this Board be discussed with appropriate authorities."

Orthodontists' Agreement

Six member orthodontists submitted for Board approval an agreement to continue the operation of their respective practices in the event of the death or incapacity of some one or more of them pursuant to certain terms and provisions. The Board gave its approval.

Per Diem Allowance

Because of current costs of operating practices, many such costs continuing even in the absence of the dentist, and recognizing that the present per diem director's allowance of \$45.00 is inadequate even to meet the daily overhead costs of most practices, a notice of motion was passed to give consideration at the November, 1963 Meeting of the Board to a by-law amendment to increase the per diem allowance to \$75.00.

Principles of Ethical Billing

The Board requested the Council on Ethics of the C.D.A. to consider the desirability and/or feasibility of outlining principles of ethical billing for the dental profession.

Radiation Safety

The Board expressed commendation to the C.D.A. Council on Research for the Report entitled, "Safe and Effective Methods for the Use of the Dental X-ray Machine" and expressed the hope to the C.D.A. that the Report would receive the widest possible distribution by publication in *The Journal* and in pamphlet form.

The Government and Legislation Committee was requested to determine the responsibilities of the Board in respect to contemporary standards of radiation safety.

R.C.D.S. Insurance Programs Enhanced (Fall)

The Board authorized negotiations respecting extension to coverages under the Liability and "All-Risks" Plans providing no increase in premium accrued to members participating.

- (a) All-Risks—a graduated scale of premiums has been instituted for Class 1, Class 2, and Class 3 accommodation. Thus dentists in "Preferred" accommodation enjoy a significant benefit.
- (b) Liability—property damage increased from \$5,000 to \$10,000.
—a voluntary medical payment to a limit of \$500 has been written in.

Staff Income Protection Plan

The Board instituted a disability income protection plan in respect of the Secretary and the Business Manager which would take effect in the event of disabling injury or sickness, 90 days following the accident or onset of the illness.

Student Body Seeks Aid For Publication

The Board learned from the Faculty representative that the Students' Council of the Faculty of Dentistry proposes to publish an undergraduate dental journal. In enthusiastically endorsing the project the Board hopes that writing for the scientific literature and dental journalism may be encouraged. The Board agreed to make a modest financial contribution after being satisfied as to the details of financing involved. The Board was mindful of the need for some degree of supervision by the Faculty as to the content of the publication.

Terms of Reference of Committees

The Executive Committee was requested to review and where necessary amend or create the terms of reference of the various Committees of the Board.

REGULATIONS

SIGNS

A member of the Royal College of Dental Surgeons, in connection with his profession:—

1. May not display or permit to be displayed any sign other than a sign which in its character, position, size and wording is merely such as may be reasonably required to indicate the location of and entrance to the premises in which a dental practice is being carried on and in which no letters larger than four (4) inches are used.
2. May not display more than two signs in addition to one at or on his entrance door.
 - (a) Not more than one of these may be a suspended sign.
 - (b) Not more than one of these may be an illuminated sign and if illuminated must not be intermittent, daylight, "Neon" or "Neon type" and no colours shall appear in such signs other than white or black.
3. May not display any sign on premises other than those in which his practice is actually carried on.

Notwithstanding the above regulations he may (using only unilluminated letters or figures not larger than two inches):

- (a) Add to his entrance sign, his office hours.
- (b) Add to any sign the words (when an entrance is difficult to find) "Entrance on . . ."

PROFESSIONAL CARDS AND ANNOUNCEMENTS

A member of the Royal College of Dental Surgeons, in connection with his practice:—

1. May not permit to appear in any newspaper or other publication, printed or written for distribution or display anything other than his professional card (which may contain at most his name, title or degrees, profession, address, telephone number and office hours) or an announcement of his commencement of practice, change of office location, absence from or return to practice, or the restriction of his practice. The announcement shall not contain any reference to qualifications, procedures or equipment. The space used, for either card or announcement, must not exceed one column (13 ems) in width by two inches in length and must not be in the nature of a display.
2. He may, however, observing the dignity and ethics of the profession, without reference to qualifications, procedures or equipment:
 - (a) Use private professional cards.
 - (b) Issue accounts and receipts.
 - (c) Issue appointment cards.
 - (d) Mail to his patients recall notices.
 - (e) Mail to his patients and acquaintances announcements of his commencement of practice, change of office location, absence from or return to practice or the restriction of his practice, provided he is a certified specialist.

SOLICITED ADVERTISING

For the protection of the Profession from solicited advertising, the Board prohibits any member of the Royal College of Dental Surgeons from inserting his professional card in hand-bills, programs, year books or other printed matter of like character.

TAKING OVER A PRACTICE

When any member of the Royal College of Dental Surgeons takes over the practice or office of another member of the College, either by purchase or otherwise, the member so acquiring the said practice or office shall not after one year from the date of such acquisition use any sign or printed matter which suggests to the public that the retiring member was in any way associated or connected with the said practice or office.

TELEPHONE DIRECTORY LISTINGS

1. No display advertising of any kind.
2. No black face listings in the yellow pages.
3. No specialists' list under separate group headings.
4. Mention of office hours is of no particular value and is usually used only to increase space, therefore to be excluded.
5. Mention of particular facilities or equipment, such as X-rays, gas extractions, etc., not acceptable in either section.
6. Residence listing in yellow pages, as well as in white pages, is acceptable.
7. Designation as specialists may be used in both yellow and white pages, provided the dentist is a specialist certified in and restricted to the designated branch of dentistry.
